October 27, 2023

Bank Loan Core Fund

A Portfolio of Federated Hermes Core Trust

This Part B (“Statement of Additional Information” or SAI) is not a Prospectus. Read this SAI in conjunction with the Private Offering Memorandum for Bank Loan Core Fund (“Fund”) dated October 27, 2023.

This SAI incorporates by reference the Fund’s Annual Report. Obtain the Private Offering Memorandum or the Annual Report without charge by calling 1-800-341-7400. This SAI has been prepared solely for the information of the recipient and may not be reproduced, provided to others or used for any other purpose.

Fund History

The Fund is a diversified portfolio of Federated Hermes Core Trust (“Trust”). The Trust is an open-end, management investment company that was established under the laws of the Commonwealth of Massachusetts on August 21, 1996. The Trust may offer separate series of shares of beneficial interest representing interests in separate portfolios of securities. This SAI relates only to Shares of the Fund. The Trust is governed by a Board of Trustees (“Board” or “Trustees”). The Fund’s investment adviser is Federated Investment Management Company (“Adviser”). Effective April 24, 2020, the Trust changed its name from Federated Core Trust to Federated Hermes Core Trust, and, effective August 28, 2020, the Fund changed its name from Federated Bank Loan Core Fund to Bank Loan Core Fund.

Investments, Techniques, Risks and Limitations

SECURITIES DESCRIPTIONS AND TECHNIQUES

The principal securities or other investments in which the Fund invests are described in the Private Offering Memorandum. The Fund may also invest in securities or other investments as non-principal investments for any purpose that is consistent with its investment objective. The following information is either additional information, in respect of a principal security or other investment referenced in the Private Offering Memorandum, or information in respect of a non-principal security or other investment (in which case there is no related disclosure in the Private Offering Memorandum).

DEBT INSTRUMENT DESCRIPTIONS AND TECHNIQUES

The following describes the types of debt instruments in which the Fund invests.

Loan Instruments

The Fund may invest in loans and loan-related instruments, which are generally interests in amounts owed by a corporate, governmental, or other borrower to lenders or groups of lenders known as lending syndicates (loans and loan participations).

Investments in certain loans have additional risks that result from the use of agents and other interposed financial institutions. Such loans are structured and administered by a financial institution (e.g., a commercial bank) that acts as the agent of the lending syndicate. The agent bank, which may or may not also be a lender, typically administers and enforces the loan on behalf of the lenders in the lending syndicate. In addition, an institution, typically but not always the agent bank, holds the collateral, if any, on behalf of the lenders. A financial institution’s employment as an agent bank might be terminated for a number of reasons, for example, in the event that it fails to observe a requisite standard of care or becomes insolvent. A successor agent bank would generally be appointed to replace the terminated agent bank, and assets held by the agent bank under the loan agreement likely would remain available to holders of such indebtedness. However, if assets held by the agent bank for the benefit of the Fund were determined to be subject to the claims of the agent bank’s general creditors, the Fund might incur certain costs and delays in realizing payment on a loan or loan participation and could suffer a loss of principal and/or interest. In situations involving other interposed financial institutions (e.g., an insurance company or government agency) similar risks may arise.

Loans may be secured or unsecured. If secured, then the lenders have been granted rights to specific property, which is commonly referred to as collateral. The purpose of securing loans is to allow the lenders to exercise rights over the collateral if a loan is not repaid as required by the terms of the loan agreement. Collateral may include security interests in receivables, goods, commodities or real property. Interests in loans may also be tranching or tiered with respect to collateral rights. Unsecured loans expose the lenders to increased credit risk.

The loans in which the Fund may invest may involve borrowers, agent banks, co-lenders and collateral located both in the United States and outside of the United States (in both developed and emerging markets).

Investments in loans may expose the Fund to interest rate risk, risk of investing in foreign securities, credit risk, liquidity risk, risk of noninvestment-grade debt instruments, risk of emerging markets and leverage risk. (For purposes of the descriptions in this SAI of these various risks, references to “issuer,” include borrowers under loan instruments.) Many loans incorporate risk mitigation, credit enhancement (e.g., standby letters of credit) and insurance products into their structures, in order to manage these risks. There is no guarantee that these risk management techniques will work as intended.

Loan Assignments

The Fund may purchase a loan assignment from the agent bank or other member of the lending syndicate. Investments in loans through an assignment may involve additional risks to the Funds. For example, if a loan is foreclosed, a Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. In addition, it is conceivable that under emerging legal theories of lender liability, a Fund could be held liable as co-lender. It is unclear whether loans and other forms of direct indebtedness offer securities law protections against fraud and misrepresentation. In the absence of definitive regulatory guidance, the Fund relies on the Adviser's research in an attempt to avoid situations where fraud or misrepresentation could adversely affect the Funds.

Loan Participations

The Fund may purchase a funded participation interest in a loan, by which the Fund has the right to receive payments of principal, interest and fees from an intermediary (typically a bank, financial institution or lending syndicate) that has a direct contractual relationship with a borrower. In loan participations, the Fund does not have a direct contractual relationship with the borrower.

The Fund may also purchase a type of a participation interest, known as risk participation interest. In this case, the Fund will receive a fee in exchange for the promise to make a payment to a lender if a borrower fails to make a payment of principal, interest or fees, as required by the loan agreement.

When purchasing loan participations, the Fund will be exposed to credit risk of the borrower and, in some cases, the intermediary offering the participation. A participation agreement also may limit the rights of the Fund to vote on changes that may be made to the underlying loan agreement, such as waiving a breach of a covenant. The participation interests in which a Fund intends to invest may not be rated by any nationally recognized rating service or, if rated, may be below investment grade and expose the fund to the risk of noninvestment-grade securities.

Collateralized Loan Obligations

A collateralized loan obligation ("CLO") is an asset-backed security whose underlying collateral is a pool of loans. Such loans may include domestic and foreign senior secured loans, senior unsecured loans and subordinate corporate loans, some of which may be below investment grade or equivalent unrated loans. Investments in CLOs carry the same risks as investments in loans directly, such as interest rate risk, issuer credit and liquidity risks. These investments are also subject to the risks associated with a decrease of market value due to collateral defaults and disappearance of subordinate tranches, market anticipation of defaults and investor aversion to these types of securities as a class. CLOs issue classes or "tranches" that vary in risk and yield. Losses caused by defaults on underlying assets are borne first by the holders of subordinate tranches. A CLO may experience substantial losses attributable to loan defaults. A Fund's investment in a CLO may decrease in market value because of: (i) loan defaults or credit impairment; (ii) the disappearance of subordinate tranches; (iii) market anticipation of defaults; and (iv) investor aversion to CLO securities as a class. These risks may be magnified depending on the tranche of CLO securities in which a Fund invests. For example, investments in a junior tranche of CLO securities will likely be more sensitive to loan defaults or credit impairment than investments in more senior tranches.

Treasury Securities

Treasury securities are direct obligations of the federal government of the United States. Treasury securities are generally regarded as having minimal credit risk.

Government Securities

Government securities are issued or guaranteed by a federal agency or instrumentality acting under federal authority. Some government securities, including those issued by Government National Mortgage Association ("Ginnie Mae"), are supported by the full faith and credit of the United States and are guaranteed only as to the timely payment of interest and principal.

Other government securities receive support through federal subsidies, loans or other benefits, but are not backed by the full faith and credit of the United States. For example, the U.S. Treasury is authorized to purchase specified amounts of securities issued by (or otherwise make funds available to) the Federal Home Loan Bank System, Federal Home Loan Mortgage Corporation ("Freddie Mac") and Federal National Mortgage Association ("Fannie Mae") in support of such obligations.

Some government agency securities have no explicit financial support, and are supported only by the credit of the applicable agency, instrumentality or corporation. The U.S. government has provided financial support to Freddie Mac and Fannie Mae, but there is no assurance that it will support these or other agencies in the future.

The Fund treats mortgage-backed securities guaranteed by a federal agency or instrumentality as government securities. Although such a guarantee helps protect against credit risk, it does not eliminate it entirely or reduce other risks.

Additional Information Related to Freddie Mac and Fannie Mae. The extreme and unprecedented volatility and disruption that impacted the capital and credit markets beginning in 2008 led to market concerns regarding the ability of Freddie Mac and Fannie Mae to withstand future credit losses associated with securities held in their investment portfolios, and on which they provide guarantees, without the direct support of the federal government. On September 7, 2008, Freddie Mac and Fannie Mae were placed under the conservatorship of the Federal Housing Finance Agency (FHFA). Under the plan of conservatorship, the FHFA assumed control of, and generally has the power to direct, the operations of Freddie Mac and Fannie Mae, and is empowered to exercise all powers collectively held by their respective shareholders, directors and officers, including the power to: (1) take over the assets of and operate Freddie Mac and Fannie Mae with all the powers of the shareholders, the directors and the officers of Freddie Mac and Fannie Mae and conduct all business of Freddie Mac and Fannie Mae; (2) collect all obligations and money due to Freddie Mac and Fannie Mae; (3) perform all functions of Freddie Mac and Fannie Mae which are consistent with the conservator's appointment; (4) preserve and conserve the assets and property of Freddie Mac and Fannie Mae; and (5) contract for assistance in fulfilling any function, activity, action or duty of the conservator.

In connection with the actions taken by the FHFA, the Treasury has entered into certain preferred stock purchase agreements (SPAs) with each of Freddie Mac and Fannie Mae which establish the Treasury as the holder of a new class of senior preferred stock in each of Freddie Mac and Fannie Mae. The senior preferred stock was issued in connection with financial contributions from the Treasury to Freddie Mac and Fannie Mae. Although the SPAs are subject to amendment from time to time, currently the Treasury is obligated to provide such financial contributions up to an aggregate maximum amount determined by a formula set forth in the SPAs, and until such aggregate maximum amount is reached, there is not a specific end date to the Treasury's obligations.

The future status and role of Freddie Mac and Fannie Mae could be impacted by (among other things) the actions taken and restrictions placed on Freddie Mac and Fannie Mae by the FHFA in its role as conservator, the restrictions placed on Freddie Mac's and Fannie Mae's operations and activities under the SPAs, market responses to developments at Freddie Mac and Fannie Mae, downgrades or upgrades in the credit ratings assigned to Freddie Mac and Fannie Mae by nationally recognized statistical rating organizations (NRSROs) or ratings services, and future legislative and regulatory action that alters the operations, ownership, structure and/or mission of these institutions, each of which may, in turn, impact the value of, and cash flows on, any securities guaranteed by Freddie Mac and Fannie Mae.

In addition, the future of Freddie Mac and Fannie Mae, and other U.S. government-sponsored enterprises that are not backed by the full faith and credit of the U.S. government (GSEs), remains in question as the U.S. government continues to consider options ranging from structural reform, nationalization, privatization or consolidation, to outright elimination. The issues that have led to significant U.S. government support for Freddie Mac and Fannie Mae have sparked serious debate regarding the continued role of the U.S. government in providing mortgage loan liquidity.

Commercial Paper (A Type of Corporate Debt Instrument)

Commercial paper is an issuer's obligation with a maturity of less than nine months. Companies typically issue commercial paper to pay for current expenditures. Most issuers constantly reissue their commercial paper and use the proceeds (or bank loans) to repay maturing paper. If the issuer cannot continue to obtain liquidity in this fashion, its commercial paper may default. The short maturity of commercial paper generally reduces both the market and credit risk as compared to other debt securities of the same issuer.

Demand Instruments

Demand instruments are corporate debt instruments that the issuer must repay upon demand. Other demand instruments require a third party, such as a dealer or bank, to repurchase the security for its face value upon demand. The Fund treats demand instruments as short-term securities, even though their stated maturity may extend beyond one year.

Mortgage-Backed Securities

An MBS is a type of pass-through security, which is a pooled debt obligation repackaged as interests that pass principal and interest through an intermediary to investors. In the case of MBS, the ownership interest are issued by a trust and represent participation interests in pools of adjustable and fixed-rate mortgage loans. MBS are most commonly issued or guaranteed by the U.S. government (or one of its agencies or instrumentalities) ("agency MBS"), but also may be issued or guaranteed by private entities ("non-agency MBS"). Unlike conventional debt obligations, MBS provide monthly payments derived from the monthly interest and principal payments (including any prepayments) made by the individual borrowers on the pooled mortgage loans. Most MBS make these payments monthly; however, certain MBS are backed by mortgage loans which do not generate monthly payments but rather generate payments less frequently.

The mortgage loan collateral for non-agency MBS consists of residential mortgage loans that do not conform to GSEs underwriting guidelines. Non-agency MBS generally offer a higher yield than agency MBS because there are no direct or indirect government guarantees of payment.

The non-agency and agency MBS acquired by the Fund could be secured by fixed-rate mortgages, adjustable-rate mortgages or hybrid adjustable-rate mortgages. Adjustable-rate mortgages are mortgages whose interest rates are periodically reset when market rates change. A hybrid adjustable-rate mortgage (“hybrid ARM”) is a type of mortgage in which the interest rate is fixed for a specified period and then resets periodically, or floats, for the remaining mortgage term. Hybrid ARMs are usually referred to by their fixed and floating periods. For example, a “5/1 ARM” refers to a mortgage with a five-year fixed interest rate period, followed by 25 annual interest rate adjustment periods.

Investments in MBS expose the Fund to interest rate, prepayment and credit risks.

Collateralized Mortgage Obligations (CMOs)

CMOs, including interests in real estate mortgage investment conduits (REMICs), allocate payments and prepayments from an underlying pass-through certificate among holders of different classes of mortgage-backed securities. This creates different prepayment and interest rate risk for each CMO class. The degree of increased or decreased prepayment risk depends upon the structure of the CMOs. However, the actual returns on any type of mortgage-backed security depend upon the performance of the underlying pool of mortgages, which no one can predict with certainty and will vary among pools.

Sequential CMOs

In a sequential pay CMO, one class of CMOs receives all principal payments and prepayments. The next class of CMOs receives all principal payments after the first class is paid off. This process repeats for each sequential class of CMO. As a result, each class of sequential pay CMOs reduces the prepayment risk of subsequent classes.

PACs, TACs and Companion Classes

More sophisticated CMOs include planned amortization classes (PACs) and targeted amortization classes (TACs). PACs and TACs are issued with companion classes. PACs and TACs receive principal payments and prepayments at a specified rate. The companion classes receive principal payments and prepayments in excess of the specified rate. In addition, PACs will receive the companion classes’ share of principal payments, if necessary, to cover a shortfall in the prepayment rate. This helps PACs and TACs to control prepayment risk by increasing the risks to their companion classes.

IOs and POs (Types of CMO)

CMOs may allocate interest payments to one class (“Interest Only” or IOs) and principal payments to another class (“Principal Only” or POs). POs increase in value when prepayment rates increase. In contrast, IOs decrease in value when prepayments increase, because the underlying mortgages generate less interest payments. However, IOs tend to increase in value when interest rates rise (and prepayments decrease), making IOs a useful hedge against interest rate risk.

Floater and Inverse Floater (Types of CMO)

Another variant allocates interest payments between two classes of CMOs. One class (“Floater”) receives a share of interest payments based upon a market index such as the London Interbank Offered Rate (LIBOR). The other class (“Inverse Floater”) receives any remaining interest payments from the underlying mortgages. Floater classes receive more interest (and Inverse Floater classes receive correspondingly less interest) as interest rates rise. This shifts prepayment and interest rate risk from the Floater to the Inverse Floater class, reducing the price volatility of the Floater class and increasing the price volatility of the Inverse Floater class.

Z Classes and Residual Classes

CMOs must allocate all payments received from the underlying mortgages to some class. To capture any unallocated payments, CMOs generally have an accrual (Z) class. Z classes do not receive any payments from the underlying mortgages until all other CMO classes have been paid off. Once this happens, holders of Z class CMOs receive all payments and prepayments. Similarly, REMICs have residual interests that receive any mortgage payments not allocated to another REMIC class.

Non-Governmental Mortgage-Backed Securities

Non-governmental mortgage-backed securities (including non-governmental CMOs) are issued by private entities, rather than by U.S. government agencies. The non-governmental mortgage-backed securities in which the Fund invests will be treated as mortgage related asset-backed securities. These securities involve credit risk and liquidity risk. The degree of risks will depend significantly on the ability of borrowers to make payments on the underlying mortgages and the seniority of the security held by the Fund with respect to such payments.

Commercial Mortgage-Backed Securities

Commercial mortgage-backed securities (CMBS) represent interests in mortgage loans on commercial real estate, such as loans for hotels, shopping centers, office buildings and apartment buildings. Generally, the interest and principal payments on these loans are passed on to investors in CMBS according to a schedule of payments. The Fund may invest in individual CMBS issues or, alternately, may gain exposure to the overall CMBS market by investing in a derivative contract, the performance of which is related to changes in the value of a domestic CMBS index. The risks associated with CMBS reflect the risks of investing in the commercial real estate securing the underlying mortgage loans and are therefore different from the risks of other types of MBS. Additionally, CMBS may expose the Fund to interest rate, liquidity and credit risk.

Asset-Backed Securities

Asset-backed securities are payable from pools of obligations other than mortgages. Most asset-backed securities involve consumer or commercial debts with maturities of less than ten years. However, almost any type of fixed-income assets (including other fixed-income securities) may be used to create an asset-backed security. Asset-backed securities may take the form of commercial paper, notes or pass-through certificates. Asset-backed securities have prepayment risk. Like CMOs, asset-backed securities may be structured like Floaters, Inverse Floaters, IOs and POs.

Zero-Coupon Securities

Zero-coupon securities do not pay interest or principal until final maturity unlike debt securities that provide periodic payments of interest (referred to as a coupon payment). Investors buy zero-coupon securities at a price below the amount payable at maturity. The difference between the purchase price and the amount paid at maturity represents interest on the zero-coupon security. Investors must wait until maturity to receive interest and principal, which increases the interest rate and credit risk of a zero-coupon security.

Bank Instruments

Bank instruments are unsecured interest bearing deposits with banks. Bank instruments include, but are not limited to, bank accounts, time deposits, certificates of deposit and banker's acceptances. Yankee instruments are denominated in U.S. dollars and issued by U.S. branches of foreign banks. Eurodollar instruments are denominated in U.S. dollars and issued by non-U.S. branches of U.S. or foreign banks.

Credit Enhancement

Credit enhancement consists of an arrangement in which a company agrees to pay amounts due on a fixed-income security if the issuer defaults. In some cases the company providing credit enhancement makes all payments directly to the security holders and receives reimbursement from the issuer. Normally, the credit enhancer may have greater financial resources and liquidity than the issuer. For this reason, the Adviser may evaluate the credit risk of a fixed-income security based solely upon its credit enhancement.

Common types of credit enhancement include guarantees, letters of credit, bond insurance and surety bonds. Credit enhancement also includes arrangements where securities or other liquid assets secure payment of a fixed-income security. If a default occurs, these assets may be sold and the proceeds paid to security's holders. Either form of credit enhancement reduces credit risk by providing another source of payment for a fixed-income security.

Foreign Government Debt Instruments

Foreign government debt instruments generally consist of debt instruments supported by national, state, or provincial governments or similar political subdivisions. Foreign government debt instruments also include debt obligations of supranational entities, such as international organizations designed or supported by governmental entities to promote economic reconstruction or development, international banking institutions and related government agencies. Examples of these include, but are not limited to, the International Bank for Reconstruction and Development (the "World Bank"), the Asian Development Bank, the European Investment Bank and the Inter-American Development Bank.

Foreign government debt instruments also include debt instruments of quasi-governmental agencies that are either issued by entities owned by a national, state, or equivalent government or are obligations of a political unit that are not backed by the national government's full faith and credit. Further, foreign government debt instruments include mortgage-related securities issued or guaranteed by national, state or provincial governmental instrumentalities, including quasi-governmental agencies.

Foreign Corporate Debt Instruments

The Fund will also invest in high-yield debt instruments of foreign corporations. Notes, bonds, debentures, loans and commercial paper are the most prevalent types of corporate debt instruments.

The credit risk of corporate debt instruments vary widely among issuers. The credit risk of an issuer's debt instrument may also vary based on its priority for repayment. For example, higher ranking (senior) debt instruments have a higher priority than lower ranking (subordinated) debt instruments. This means that the issuer might not make payments on subordinated debt instruments while continuing to make payments on senior debt instruments. In addition, in the event of bankruptcy, holders of senior debt instruments may receive amounts otherwise payable to the holders of subordinated debt instruments.

DERIVATIVE CONTRACTS

Derivative contracts are financial instruments that derive their value from underlying securities, commodities, currencies, indices or other assets or instruments, including other derivative contracts (each a "Reference Instrument" and collectively, "Reference Instruments"). The most common types of derivative contracts are swaps, futures and options, and the major asset classes include interest rates, equities, commodities and foreign exchange. Each party to a derivative contract may sometimes be referred to as a "counterparty." Some derivative contracts require payments relating to an actual, future trade involving the Reference Instrument. These types of derivatives are frequently referred to as "physically settled" derivatives. Other derivative contracts require payments relating to the income or returns from, or changes in the market value of, a Reference Instrument. These types of derivatives are known as "cash settled" derivatives, since they require cash payments in lieu of delivery of the Reference Instrument.

Many derivative contracts are traded on exchanges. In these circumstances, the relevant exchange sets all the terms of the contract except for the price. Parties to an exchange-traded derivative contract make payments through the exchange. Most exchanges require traders to maintain margin accounts through their brokers to cover their potential obligations to the exchange. Parties to the contract make or collect daily payments to the margin accounts to reflect losses (or gains), respectively, in the value of their contracts. This protects traders against a potential default by their counterparty. Trading contracts on an exchange also allows traders to hedge or mitigate certain risks or carry out more complex trading strategies by entering into offsetting contracts.

For example, the Fund could close out an open contract to buy an asset at a future date by entering into an offsetting contract to sell the same asset on the same date. If the offsetting sale price is more than the original purchase price, the Fund realizes a gain; if it is less, the Fund realizes a loss. Exchanges may limit the amount of open contracts permitted at any one time. Such limits may prevent the Fund from closing out a position. If this happens, the Fund will be required to keep the contract open (even if it is losing money on the contract), and to make any payments required under the contract (even if it has to sell portfolio securities at unfavorable prices to do so). Inability to close out a contract could also harm the Fund by preventing it from disposing of or trading any assets it has been using to secure its obligations under the contract.

The Fund may also trade derivative contracts over-the-counter (OTC), meaning off-exchange, in transactions negotiated directly between the Fund and an eligible counterparty, which may be a financial institution. OTC contracts do not necessarily have standard terms, so they may be less liquid and more difficult to close out than exchange-traded derivative contracts. In addition, OTC contracts with more specialized terms may be more difficult to value than exchange traded contracts, especially in times of financial stress.

The market for swaps and other OTC derivatives was largely unregulated prior to the enactment of federal legislation known as the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"). Regulations enacted by the Commodity Futures Trading Commission (the "CFTC") under the Dodd-Frank Act require the Fund to clear certain types of swap contracts (including certain interest rate and credit default swaps) through a central clearinghouse known as a derivatives clearing organization (DCO).

To clear a swap through a DCO, the Fund will submit the contract to, and post margin with, a futures commission merchant (FCM) that is a clearinghouse member. The Fund may enter into the swap with a counterparty other than the FCM and arrange for the contract to be transferred to the FCM for clearing or enter into the contract with the FCM itself. If the Fund must centrally clear a transaction, the CFTC's regulations also generally require that the swap be executed on a registered exchange (either a designated contract market ("DCM") or swap execution facility (SEF)). Central clearing is presently required only for certain swaps; the CFTC is expected to impose a mandatory central clearing requirement for additional derivative instruments over time.

DCOs, DCMs, SEFs and FCMs are all subject to regulatory oversight by the CFTC. In addition, certain derivative market participants that act as market makers, and engage in a significant amount of "dealing" activity are also required to register as swap dealers with the CFTC. Among other things, swap dealers are subject to minimum capital requirements and business conduct standards and must also post and collect initial and variation margin on uncleared swaps with certain of their counterparties. Because of this, if the Fund enters into uncleared swaps with any swap dealers, it may be subject to initial and variation margin requirements that could impact the Fund's ability to enter into swaps in the OTC market, including making transacting in uncleared swaps significantly more expensive.

At this point in time, most of the Dodd-Frank Act has been fully implemented, though a small number of remaining rulemakings are unfinished or are subject to phase-in periods. Any future regulatory or legislative activity would not necessarily have a direct, immediate effect upon the Fund, though it is within the realm of possibility that, upon implementation of these measures or any future measures, they could potentially limit or completely restrict the ability of the Fund to use these instruments as a part of its investment strategy, increase the costs of using these instruments or make them less effective.

Depending on how the Fund uses derivative contracts and the relationships between the market value of a derivative contract and the Reference Instrument, derivative contracts may increase or decrease the Fund's exposure to the risks of the Reference Instrument and may also expose the Fund to liquidity and leverage risk. OTC contracts also expose the Fund to credit risk in the event that a counterparty defaults on the contract, although this risk may be mitigated by submitting the contract for clearing through a DCO, or certain other factors, such as collecting margin from the counterparty.

The Fund may invest in a derivative contract if it is permitted to own, invest in or otherwise have economic exposure to the Reference Instrument. The Fund is not required to own a Reference Instrument in order to buy or sell a derivative contract relating to that Reference Instrument. The Fund may trade in the following specific types and/or combinations of derivative contracts:

Futures Contracts (A Type of Derivative)

Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a Reference Instrument at a specified price, date and time. Entering into a contract to buy a Reference Instrument is commonly referred to as buying a contract or holding a long position in the asset. Entering into a contract to sell a Reference Instrument is commonly referred to as selling a contract or holding a short position in the Reference Instrument. Futures contracts are considered to be commodity contracts. The Adviser has claimed an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act with respect to the Fund and, therefore, is not subject to registration or regulation as a commodity pool operator under the Act with respect to the Fund. Futures contracts traded OTC are frequently referred to as forward contracts. The Fund can buy or sell financial futures (such as interest rate futures, index futures and security futures), as well as, currency futures and currency forward contracts.

INTEREST RATE FUTURES

An interest-rate futures contract is an exchange-traded contract for which the Reference Instrument is an interest-bearing fixed-income security or an inter-bank deposit. Two examples of common interest rate futures contracts are U.S. Treasury futures contracts and Eurodollar futures contracts. The Reference Instrument for a U.S. Treasury futures contract is a U.S. Treasury security. The Reference Instrument for a Eurodollar futures contract is the London Interbank Offered Rate (commonly referred to as LIBOR); Eurodollar futures contracts enable the purchaser to obtain a fixed rate for the lending of funds over a stated period of time and the seller to obtain a fixed rate for a borrowing of funds over that same period.

INDEX FUTURES

An index futures contract is an exchange-traded contract to make or receive a payment based upon changes in the value of an index. An index is a statistical composite that measures changes in the value of designated Reference Instruments within the index.

SECURITY FUTURES

A security futures contract is an exchange-traded contract to purchase or sell in the future a specific quantity of a security (other than a Treasury security) or a narrow-based securities index at a certain price. Presently, the only available security futures contracts use shares of a single equity security as the Reference Instrument. However, it is possible that in the future security futures contracts will be developed that use a single fixed-income security as the Reference Instrument.

CURRENCY FUTURES AND CURRENCY FORWARD CONTRACTS (TYPES OF FUTURES CONTRACTS)

A currency futures contract is an exchange-traded contract to buy or sell a particular currency at a specific price at some time in the future (commonly three months or more). A currency forward contract is not an exchange-traded contract and represents an obligation to purchase or sell a specific currency at a future date, at a price set at the time of the contract and for a period agreed upon by the parties which may be either a window of time or a fixed number of days from the date of the contract. Currency futures and forward contracts are highly volatile, with a relatively small price movement potentially resulting in substantial gains or losses to the Fund. Additionally, the Fund may lose money on currency futures and forward contracts if changes in currency rates do not occur as anticipated or if the Fund's counterparty to the contract were to default.

Option Contracts (A Type of Derivative)

Option contracts (also called “options”) are rights to buy or sell a Reference Instrument for a specified price (the “exercise price”) during, or at the end of, a specified period. The seller (or “writer”) of the option receives a payment, or premium, from the buyer, which the writer keeps regardless of whether the buyer uses (or exercises) the option. Options may be bought or sold on a wide variety of Reference Instruments. Options that are written on futures contracts will be subject to margin requirements similar to those applied to futures contracts.

The Fund may buy and/or sell the following types of options:

CALL OPTIONS

A call option gives the holder (buyer) the right to buy the Reference Instrument from the seller (writer) of the option. The Fund may use call options in the following ways:

- Buy call options on a Reference Instrument in anticipation of an increase in the value of the Reference Instrument; and
- Write call options on a Reference Instrument to generate income from premiums, and in anticipation of a decrease or only limited increase in the value of the Reference Instrument. If the Fund writes a call option on a Reference Instrument that it owns and that call option is exercised, the Fund foregoes any possible profit from an increase in the market price of the Reference Instrument over the exercise price plus the premium received.

PUT OPTIONS

A put option gives the holder the right to sell the Reference Instrument to the writer of the option. The Fund may use put options in the following ways:

- Buy put options on a Reference Instrument in anticipation of a decrease in the value of the Reference Instrument; and
- Write put options on a Reference Instrument to generate income from premiums, and in anticipation of an increase or only limited decrease in the value of the Reference Instrument. In writing puts, there is a risk that the Fund may be required to take delivery of the Reference Instrument when its current market price is lower than the exercise price.

The Fund may also buy or write options, as needed, to close out existing option positions.

Finally, the Fund may enter into combinations of options contracts in an attempt to benefit from changes in the prices of those options contracts (without regard to changes in the value of the Reference Instrument).

Swap Contracts (A Type of Derivative)

A swap contract (also known as a “swap”) is a type of derivative contract in which two parties agree to pay each other (swap) the returns derived from Reference Instruments. Most swaps do not involve the delivery of the underlying assets by either party, and the parties might not own the Reference Instruments. The payments are usually made on a net basis so that, on any given day, the Fund would receive (or pay) only the amount by which its payment under the contract is less than (or exceeds) the amount of the other party’s payment. Swap agreements are sophisticated instruments that can take many different forms and are known by a variety of names. Common swap agreements that the Fund may use include:

INTEREST RATE SWAPS

Interest rate swaps are contracts in which one party agrees to make regular payments equal to a fixed or floating interest rate times a stated principal amount (commonly referred to as a “notional principal amount”) in return for payments equal to a different fixed or floating rate times the same principal amount, for a specific period. For example, a \$10 million London Interbank Offered Rate (commonly referred to as LIBOR) swap would require one party to pay the equivalent of the London Interbank Offered Rate of interest (which fluctuates) on \$10 million principal amount in exchange for the right to receive the equivalent of a stated fixed rate of interest on \$10 million principal amount.

CAPS AND FLOORS (A TYPE OF SWAP CONTRACT)

Caps and Floors are contracts in which one party agrees to make payments only if an interest rate or index goes above (Cap) or below (Floor) a certain level in return for a fee from the other party.

TOTAL RETURN SWAPS

A total return swap is an agreement between two parties whereby one party agrees to make payments of the total return from a Reference Instrument (or a basket of such instruments) during the specified period, in return for payments equal to a fixed or floating rate of interest or the total return from another Reference Instrument. Alternately, a total return swap can be structured so that one party will make payments to the other party if the value of a Reference Instrument increases, but receive payments from the other party if the value of that instrument decreases.

CREDIT DEFAULT SWAPS

A credit default swap (CDS) is an agreement between two parties whereby one party (the “Protection Buyer”) agrees to make payments over the term of the CDS to the other party (the “Protection Seller”), provided that no designated event of default, restructuring or other credit related event (each a “Credit Event”) occurs with respect to Reference Instrument that is usually a particular bond, loan or the unsecured credit of an issuer, in general (the “Reference Obligation”). Many CDS are physically settled, which means that if a Credit Event occurs, the Protection Seller must pay the Protection Buyer the full notional value, or “par value,” of the Reference Obligation in exchange for delivery by the Protection Buyer of the Reference Obligation or another similar obligation issued by the issuer of the Reference Obligation (the “Deliverable Obligation”). The Counterparties agree to the characteristics of the Deliverable Obligation at the time that they enter into the CDS. Alternately, a CDS can be “cash settled,” which means that upon the occurrence of a Credit Event, the Protection Buyer will receive a payment from the Protection Seller equal to the difference between the par amount of the Reference Obligation and its market value at the time of the Credit Event. The Fund may be either the Protection Buyer or the Protection Seller in a CDS. If the Fund is a Protection Buyer and no Credit Event occurs, the Fund will lose its entire investment in the CDS (i.e., an amount equal to the payments made to the Protection Seller over the term of the CDS). However, if a Credit Event occurs, the Fund (as Protection Buyer) will deliver the Deliverable Obligation and receive a payment equal to the full notional value of the Reference Obligation, even though the Reference Obligation may have little or no value. If the Fund is the Protection Seller and no Credit Event occurs, the Fund will receive a fixed rate of income throughout the term of the CDS. However, if a Credit Event occurs, the Fund (as Protection Seller) will pay the Protection Buyer the full notional value of the Reference Obligation and receive the Deliverable Obligation from the Protection Buyer. A CDS may involve greater risks than if the Fund invested directly in the Reference Obligation. For example, a CDS may increase credit risk since the Fund has exposure to both the issuer of the Reference Obligation and the Counterparty to the CDS.

CURRENCY SWAPS

Currency swaps are contracts which provide for interest payments in different currencies. The parties might agree to exchange the notional principal amounts of the currencies as well (commonly called a “foreign exchange swap”).

VOLATILITY SWAPS

A volatility swap is an agreement between two parties to make payments based on changes in the volatility of a Reference Instrument over a stated period of time. Specifically, one party will be required to make a payment to the other party if the volatility of a Reference Instrument increases over an agreed-upon period of time, but will be entitled to receive a payment from the other party if the volatility decreases over that time period. A volatility swap that requires a single payment on a stated future date will be treated as a forward contract. Payments on a volatility swap will be greater if they are based upon the mathematical square of volatility (i.e., the measured volatility multiplied by itself, which is referred to as “variance”). This type of a volatility swap is frequently referred to as a variance swap.

OTHER INVESTMENTS, TRANSACTIONS AND TECHNIQUES

Reverse Repurchase Agreements

Reverse repurchase agreements (which are considered a type of special transaction for asset segregation or asset coverage purposes) are repurchase agreements in which the Fund is the seller (rather than the buyer) of the securities, and agrees to repurchase them at an agreed-upon time and price. A reverse repurchase agreement may be viewed as a type of borrowing by the Fund. Reverse repurchase agreements are subject to credit risk. In addition, reverse repurchase agreements create leverage risk because the Fund must repurchase the underlying security at a higher price, regardless of the market value of the security at the time of repurchase.

Delayed Delivery Transactions

Delayed delivery transactions, including when-issued transactions, are arrangements in which the Fund buys securities for a set price, with payment and delivery of the securities scheduled for a future time. During the period between purchase and settlement, no payment is made by the Fund to the issuer and no interest accrues to the Fund. The Fund records the transaction when it agrees to buy the securities and reflects their value in determining the price of its Shares. Settlement dates may be a month or more after entering into these transactions so that the market values of the securities bought may vary from the purchase prices. Therefore, delayed delivery transactions create interest rate risk for the Fund. Delayed delivery transactions also involve credit risk in the event of a counterparty default. These transactions also create leverage risk.

To Be Announced Securities (TBAs)

As with other delayed delivery transactions, a seller agrees to issue a TBA security at a future date. However, the seller does not specify the particular securities to be delivered. Instead, the Fund agrees to accept any security that meets specified terms. For example, in a TBA mortgage-backed transaction, the Fund and the seller would agree upon the issuer, interest rate and terms of the underlying mortgages. The seller would not identify the specific underlying mortgages until it issues the security. TBA mortgage-backed securities increase interest rate risk because the underlying mortgages may be less favorable than anticipated by the Fund.

Dollar Rolls

Dollar rolls are transactions where the Fund sells mortgage-backed securities with a commitment to buy similar, but not identical, mortgage-backed securities on a future date at a lower price. Normally, one or both securities involved are TBA mortgage-backed securities. Dollar rolls are subject to interest rate risk and credit risk.

Credit Linked Note (A Type of Hybrid Instrument)

A credit linked note (CLN) is a type of hybrid instrument in which a special purpose entity issues a structured note (the “Note Issuer”) with respect to which the Reference Instrument is a single bond, a portfolio of bonds, or the unsecured credit of an issuer, in general (each a “Reference Credit”). The purchaser of the CLN (the “Note Purchaser”) invests a par amount and receives a payment during the term of the CLN that equals a fixed or floating rate of interest equivalent to a high rated funded asset (such as a bank certificate of deposit) plus an additional premium that relates to taking on the credit risk of the Reference Credit. Upon maturity of the CLN, the Note Purchaser will receive a payment equal to: (i) the original par amount paid to the Note Issuer, if there is no occurrence of a designated event of default, restructuring or other credit event (each, a “Credit Event”) with respect to the issuer of the Reference Credit; or (ii) the market value of the Reference Credit, if a Credit Event has occurred. Depending upon the terms of the CLN, it is also possible that the Note Purchaser may be required to take physical delivery of the Reference Credit in the event of a Credit Event. Most credit linked notes use a corporate bond (or a portfolio of corporate bonds) as the Reference Credit. However, almost any type of fixed-income security (including foreign government securities), index or derivative contract (such as a credit default swap) can be used as the Reference Credit.

Derivatives Regulation and Asset Coverage

The regulation of the U.S. and non-U.S. derivatives markets has undergone substantial change in recent years and such change may continue. In addition, effective August 19, 2022, Rule 18f-4 (the “Derivatives Rule”) under the Investment Company Act of 1940, as amended (the “1940 Act”), replaced the asset segregation framework previously used by funds to comply with limitations on leverage imposed by the 1940 Act. The Derivatives Rule generally mandates that a fund either limit derivatives exposure to 10% or less of its net assets, or in the alternative implement: (i) limits on leverage calculated based value-at-risk (VAR); and (ii) a written derivatives risk management program (DRMP) administered by a derivatives risk manager appointed by the Fund’s Board, including a majority of the independent Board members, that is periodically reviewed by the Board.

As the Fund’s derivative exposure, if any, is 10% or less of its net assets, excluding certain currency and interest rate hedging transactions, the Fund is classified as a limited derivatives user under the Derivatives Rule and will not be subject to the full requirements of the Derivatives Rule as noted above, including VAR testing and stress testing, and certain Board reporting requirements. However, the Fund is still required to implement written compliance policies and procedures reasonably designed to manage its derivatives risks and monitor its derivatives exposure daily.

In accordance with the requirements of Section 18 of the 1940 Act, any borrowings by the Fund will be made only to the extent the value of its assets, less its liabilities other than borrowings, is equal to at least 300% of all of its borrowings (the “300% Asset Coverage Ratio”). The Derivatives Rule permits the Fund to enter into reverse repurchase agreements and similar financing transactions, notwithstanding limitations on the issuance of senior securities under Section 18 of the 1940 Act, provided that the Fund either (i) treats these transactions as derivatives transactions under the Derivatives Rule, or (ii) ensures that the 300% Asset Coverage Ratio with respect to such transactions and any other borrowings in the aggregate. While reverse repurchase agreements or similar financing transactions aggregated with other indebtedness do not need to be included in the calculation of whether a fund satisfies the Limited Derivatives Users exception, for funds subject to the VAR testing requirement, reverse repurchase agreements and similar financing transactions must be included for purposes of such testing whether treated as derivatives transactions or not. See “Borrowing Money and Issuing Senior Securities” and “Additional Information” below.

Hedging

Hedging transactions are intended to reduce specific risks. For example, to protect the Fund against circumstances that would normally cause the Fund’s portfolio securities to decline in value, the Fund may buy or sell a derivative contract that would normally increase in value under the same circumstances. The Fund may also attempt to hedge by using combinations of different derivative contracts, or derivative contracts and securities. The Fund’s ability to hedge may be limited by the costs of

the derivative contracts. The Fund may attempt to lower the cost of hedging by entering into transactions that provide only limited protection, including transactions that: (1) hedge only a portion of its portfolio; (2) use derivative contracts that cover a narrow range of circumstances; or (3) involve the sale of derivative contracts with different terms. Consequently, hedging transactions will not eliminate risk even if they work as intended. In addition, hedging strategies are not always successful, and could result in increased expenses and losses to the Fund.

Securities Lending

The Fund may lend portfolio securities to borrowers that the Adviser deems creditworthy. In return, the Fund receives cash from the borrower as collateral. The borrower must furnish additional collateral if the market value of the loaned securities increases. Also, the borrower must pay the Fund the equivalent of any dividends or interest received on the loaned securities.

The Fund will reinvest cash collateral in securities that are highly liquid short-term obligations that qualify as an acceptable investment for the Fund. However, the Fund must pay interest to the borrower for the use of cash collateral. An acceptable investment into which the Fund may reinvest cash collateral includes, among other acceptable investments, securities of affiliated money market funds (including affiliated institutional prime money market funds with a “floating” net asset value that can impose redemption fees and liquidity gates, impose certain operational impediments to investing cash collateral, and, if net asset value decreases, result in the Fund having to cover the decrease in the value of the cash collateral).

Loans are subject to termination at the option of the Fund or the borrower. The Fund will not have the right to vote on securities while they are on loan. However, the Fund will attempt to terminate a loan in an effort to reacquire the securities in time to vote on matters that are deemed to be material by the Adviser. There can be no assurance that the Fund will have sufficient notice of such matters to be able to terminate the loan in time to vote thereon. The Fund may pay administrative and custodial fees in connection with a loan and may pay a negotiated portion of the interest earned on the cash collateral to a securities lending agent or broker.

Securities lending activities are subject to interest rate risk and credit risk.

EQUITY SECURITIES

Investment in equity securities is not part of the Fund’s investment strategy. However, the Fund may own equities as a consequence of a loan restructuring.

Equity securities represent a share of an issuer’s earnings and assets, after the issuer pays its liabilities. The Fund cannot predict the income it will receive from equity securities because issuers generally have discretion as to the payment of any dividends or distributions. However, equity securities offer greater potential for appreciation than many other types of securities, because their value increases directly with the value of the issuer’s business.

The following describes the types of equity securities the Fund may own as a consequence of a loan restructuring.

Common Stocks

Common stocks are the most prevalent type of equity security. Common stocks receive the issuer’s earnings after the issuer pays its creditors and any preferred stockholders. As a result, changes in an issuer’s earnings directly influence the value of its common stock.

Preferred Stocks

Preferred stocks have the right to receive specified dividends or distributions before the issuer makes payments on its common stock. Some preferred stocks also participate in dividends and distributions paid on common stock. Preferred stocks may also permit the issuer to redeem the stock. The Fund may also treat such redeemable preferred stock as a fixed-income security.

Interests in Other Limited Liability Companies

Entities such as limited partnerships, limited liability companies, business trusts and companies organized outside the United States may issue securities comparable to common or preferred stock.

Real Estate Investment Trusts (REITs)

REITs are real estate investment trusts that lease, operate and finance commercial real estate. REITs are exempt from federal corporate income tax if they limit their operations and distribute most of their income. Such tax requirements limit a REIT’s ability to respond to changes in the commercial real estate market.

Warrants

Warrants give the Fund the option to buy the issuer's equity securities at a specified price (the "exercise price") at a specified future date (the "expiration date"). The Fund may buy the designated securities by paying the exercise price before the expiration date. Warrants may become worthless if the price of the stock does not rise above the exercise price by the expiration date. This increases the market risk of warrants as compared to the underlying security. Rights are the same as warrants, except companies typically issue rights to existing stockholders.

INTER-FUND BORROWING AND THIRD-PARTY LENDING ARRANGEMENTS

Inter-Fund Borrowing

The Securities and Exchange Commission (SEC) has granted an exemption that permits the Fund and all other funds ("Federated Hermes funds") advised by subsidiaries of Federated Hermes, Inc. ("Federated Hermes," formerly, Federated Investors, Inc.) to lend and borrow money for certain temporary purposes directly to and from other Federated Hermes funds. Participation in this inter-fund lending program is voluntary for both borrowing and lending Federated Hermes funds, and an inter-fund loan is only made if it benefits each participating Federated Hermes fund. Federated Hermes administers the program according to procedures approved by the Fund's Board, and the Board monitors the operation of the program. Any inter-fund loan must comply with certain conditions set out in the exemption, which are designed to assure fairness and protect all participating Federated Hermes funds.

For example, inter-fund lending is permitted only: (a) to meet shareholder redemption requests; (b) to meet commitments arising from "failed" trades; and (c) for other temporary purposes. All inter-fund loans must be repaid in seven days or less. The Fund's participation in this program must be consistent with its investment policies and limitations, and must meet certain percentage tests. Inter-fund loans may be made only when the rate of interest to be charged is more attractive to the lending Federated Hermes fund than market-competitive rates on overnight repurchase agreements ("Repo Rate") and more attractive to the borrowing Federated Hermes fund than the rate of interest that would be charged by an unaffiliated bank for short-term borrowings ("Bank Loan Rate"), as determined by the Board. The interest rate imposed on inter-fund loans is the average of the Repo Rate and the Bank Loan Rate.

Third-Party Line of Credit

The Fund participates with certain other Federated Hermes funds, on a several basis, in an up to \$500,000,000 unsecured, 364-day, committed, revolving line of credit (LOC) agreement. The LOC was made available to temporarily finance the repurchase or redemption of shares of the Fund, failed trades, payment of dividends, settlement of trades and for other short-term, temporary or emergency general business purposes. The Fund cannot borrow under the LOC if an inter-fund loan is outstanding. The Fund's ability to borrow under the LOC also is subject to the limitations of the 1940 Act and various conditions precedent that must be satisfied before the Fund can borrow. Loans under the LOC are charged interest at a fluctuating rate per annum equal to (a) the highest, on any day, of: (i) the federal funds effective rate; (ii) the published secured overnight financing rate plus an assigned percentage; and (iii) 0.0%; plus (b) a margin. Any fund eligible to borrow under the LOC pays its pro rata share of a commitment fee based on the amount of the lenders' commitment that has not been utilized, quarterly in arrears and at maturity. As of the date of this Statement of Additional Information, there were no outstanding loans. During the most recently ended fiscal year, the Fund did not utilize the LOC.

LIQUIDITY RISK MANAGEMENT PROGRAM

The Fund has adopted and implemented a written liquidity risk management program (LRMP) and related procedures to assess and manage the liquidity risk of the Fund in accordance with Section 22(e) of the 1940 Act and Rule 22e-4 thereunder. The Board has designated the Adviser, together with Federated Hermes, Inc.'s ("Federated Hermes," formerly Federated Investors, Inc.) other affiliated registered investment advisory subsidiaries that serve as investment advisers to other Federated Hermes funds, to collectively serve as the administrator of the LRMP and the related procedures (the "Administrator"). Rule 22e-4 defines "liquidity risk" as the risk that the Fund will be unable to meet requests to redeem shares issued by the Fund without significant dilution of the remaining investors' interests in the Fund. As a part of the LRMP, the Administrator is responsible for classifying the liquidity of the Fund's portfolio investments in accordance with Rule 22e-4. As part of the LRMP, the Administrator is also responsible for assessing, managing and periodically reviewing the Fund's liquidity risk, for making periodic reports to the Board and the SEC regarding the liquidity of the Fund's investments, and for notifying the Board and the SEC of certain liquidity events specified in Rule 22e-4. The liquidity of the Fund's portfolio investments is determined based on relevant market, trading and investment-specific considerations under the LRMP.

INVESTMENT RISKS

There are many risk factors which may affect an investment in the Fund. The Fund's principal risks are described in the Private Offering Memorandum. The following information is either additional information in respect of a principal risk factor referenced in the Private Offering Memorandum or information in respect of a non-principal risk factor applicable to the Fund (in which case there is no related disclosure in the Private Offering Memorandum).

REAL ESTATE INVESTMENT TRUST RISK

Real estate investment trusts (REITs), including foreign REITs and REIT-like entities, are subject to risks associated with the ownership of real estate. Some REITs experience market risk due to investment in a limited number of properties, in a narrow geographic area, or in a single property type, which increases the risk that such REIT could be unfavorably affected by the poor performance of a single investment or investment type. These companies are also sensitive to factors such as changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand and the management skill and creditworthiness of the issuer. Borrowers could default on or sell investments that a REIT holds, which could reduce the cash flow needed to make distributions to investors. In addition, REITs may also be affected by tax and regulatory requirements impacting the REITs' ability to qualify for preferential tax treatments or exemptions. REITs require specialized management and pay management expenses. REITs also are subject to physical risks to real property, including weather, natural disasters, terrorist attacks, war, or other events that destroy real property. Foreign REITs and REIT-like entities can also be subject to currency risk, emerging market risk, limited public information, illiquid trading and the impact of local laws.

REITs include equity REITs and mortgage REITs. Equity REITs may be affected by changes in the value of the underlying property owned by the trusts, while mortgage REITs may be affected by the quality of any credit extended. Further, equity and mortgage REITs are dependent upon management skills and generally may not be diversified. Equity and mortgage REITs are also subject to heavy cash flow dependency, defaults by borrowers and self-liquidations. In addition, equity and mortgage REITs could possibly fail to qualify for tax-free pass-through of income under applicable tax laws or to maintain their exemptions from registration under the Investment Company Act of 1940, as amended. The above factors may also adversely affect a borrower's or a lessee's ability to meet its obligations to the REIT. In the event of a default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments. In addition, even many of the larger REITs in the industry tend to be small- to medium-sized companies in relation to the equity markets as a whole.

Effective for taxable years beginning after December 31, 2017, the Tax Cuts and Jobs Act generally allows individuals and certain non-corporate entities, such as partnerships, a deduction for 20% of qualified REIT dividends. Related regulations allow a regulated investment company to pass the character of its qualified REIT dividends through to its shareholders, provided certain holding period requirements are met.

Call Risk and Prepayment Risk

Call risk is the possibility that an issuer may redeem a debt instrument before maturity (a call) at a price below its current market price. An increase in the likelihood of a call may reduce the debt instrument's price.

If a debt instrument is called, the Fund may have to reinvest the proceeds in other debt instruments with lower interest rates, higher credit risk, or other less favorable characteristics.

Unlike traditional fixed-income securities, which pay a fixed rate of interest until maturity (when the entire principal amount is due) payments on mortgage-backed securities include both interest and a partial payment of principal. Partial payment of principal may be comprised of scheduled principal payments as well as unscheduled payments from the voluntary prepayment, refinancing or foreclosure of the underlying loans. These unscheduled prepayments of principal create risks that can adversely affect a Fund holding mortgage-backed securities.

For example, when interest rates decline, the values of mortgage-backed securities generally rise. However, when interest rates decline, unscheduled prepayments can be expected to accelerate, and the Fund would be required to reinvest the proceeds of the prepayments at the lower interest rates then available. Unscheduled prepayments would also limit the potential for capital appreciation on mortgage-backed securities.

Conversely, when interest rates rise, the values of mortgage-backed securities generally fall. Since rising interest rates typically result in decreased prepayments, this could lengthen the average lives of mortgage-backed securities, and cause their value to decline more than traditional fixed-income securities.

Generally, mortgage-backed securities compensate for the increased risk associated with prepayments by paying a higher yield. The additional interest paid for risk is measured by the difference between the yield of a mortgage-backed security and the yield of a U.S. Treasury security or other appropriate benchmark with a comparable maturity (the “spread”). An increase in the spread will cause the price of the mortgage-backed security to decline. Spreads generally increase in response to adverse economic or market conditions. Spreads may also increase if the security is perceived to have an increased prepayment risk or is perceived to have less market demand.

Collateralized Loan Obligations Risk

Collateralized loan obligations (CLOs) bear many of the same risks as other forms of asset-backed securities, including interest rate risk and issuer credit risk. As they are backed solely by pools of loans, CLOs also bear similar risks to investing in loans directly. CLOs issue classes or “tranches” that vary in risk and yield. The risks of an investment in a CLO depend largely on the type of collateral securities and the class of the CLO in which the Fund invests. CLOs may experience substantial losses attributable to loan defaults. Losses caused by defaults on underlying assets are borne first by the holders of subordinate tranches. The Fund’s investment in CLOs may decrease in market value if the CLO experiences loan defaults or credit impairment, the disappearance of a subordinate tranche, or due to market anticipation of defaults and investor aversion to CLO securities as a class.

Risk Associated with Complex CMOs

CMOs with complex or highly variable prepayment terms, such as companion classes, IOs, POs, Inverse Floaters and residuals, generally entail greater market, prepayment and liquidity risk than other mortgage-backed securities. For example, their prices are more volatile and their trading market may be more limited.

Liquidity Risk

Trading opportunities are more limited for debt instruments that have not received any credit ratings, have received any credit ratings below investment-grade or are not widely held. Trading opportunities are also more limited for inverse floaters that have complex terms or that are not widely held. Also, if dealer capacity has not kept, or does not keep, pace with market growth, or if regulatory changes or other certain developments warrant, dealer inventories of securities may reach low levels and impact a dealer’s ability to “make markets” (or buy or sell a security at a quoted bid and ask price).

These factors may make it more difficult to sell or buy a debt instrument at a favorable price or time. Consequently, the Fund may have to accept a lower price to sell a debt instrument, sell other debt instruments to raise cash or give up an investment opportunity, any of which could have a negative effect on the Fund’s performance. A significant reduction in dealer inventories or “market makers,” or other factors resulting in infrequent trading of debt instruments, can lead to decreased liquidity and may also lead to an increase in their price volatility. These affects may be exacerbated during times of economic or political stress. Noninvestment-grade debt instruments generally have less liquidity than investment-grade debt instruments.

Liquidity risk also refers to the possibility that the Fund may not be able to sell a debt instrument or close out a derivative contract when it wants to. If this happens, the Fund will be required to continue to hold the debt instrument or keep the position open, and the Fund could incur losses.

OTC derivative contracts generally carry greater liquidity risk than exchange-traded contracts. This risk may be increased in times of financial stress, if the trading market for OTC derivative contracts becomes restricted.

Loans may not be readily marketable and may be subject to restrictions on resale. In some cases, negotiations involved in disposing of loans may require weeks to complete. Additionally, collateral on loan instruments may consist of assets that may not be readily liquidated, and there is no assurance that the liquidation of such assets will satisfy a borrower’s obligations under the loan.

Increased Fund redemption activity, which may occur in a rising interest rate environment or for other reasons, also may increase liquidity risk due to the need of the Fund to sell portfolio securities and may negatively impact Fund performance.

Currency Risk

Exchange rates for currencies fluctuate daily. The combination of currency risk and market risk tends to make debt instruments traded in foreign markets more volatile than debt instruments traded exclusively in the United States. The Adviser attempts to manage currency risk by limiting the amount the Fund invests in securities denominated in a particular currency. However, diversification will not protect the Fund against a general increase in the value of the U.S. dollar relative to other currencies.

Investing in currencies or securities denominated in a foreign currency, entails risk of being exposed to a currency that may not fully reflect the strengths and weaknesses of the economy of the country or region utilizing the currency. Currency risk includes both the risk that currencies in which the Fund’s investments are traded, or currencies in which the Fund has taken an active investment position, will decline in value relative to the U.S. dollar and, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency being hedged. In addition, it is possible that a currency (such as, for example, the euro)

could be abandoned in the future by countries that have already adopted its use, and the effects of such an abandonment on the applicable country and the rest of the countries utilizing the currency are uncertain but could negatively affect the Fund's investments denominated in the currency. If a currency used by a country or countries is replaced by another currency, the Fund's Adviser would evaluate whether to continue to hold any investments denominated in such currency, or whether to purchase investments denominated in the currency that replaces such currency, at the time. Such investments may continue to be held, or purchased, to the extent consistent with the Fund's investment objective and permitted under applicable law.

Many countries rely heavily upon export-dependent businesses and any strength in the exchange rate between a currency and the U.S. dollar or other currencies can have either a positive or a negative effect upon corporate profits and the performance of investments in the country or region utilizing the currency. Adverse economic events within such country or region may increase the volatility of exchange rates against other currencies, subjecting the Fund's investments denominated in such country's or region's currency to additional risks. In addition, certain countries, particularly emerging market countries, may impose foreign currency exchange controls or other restrictions on the transferability, repatriation or convertibility of currency.

Risk of Investing in Derivative Contracts and Hybrid Instruments

The Fund's exposure to derivative contracts and hybrid instruments (either directly or through its investment in another investment company) involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. First, changes in the value of the derivative contracts and hybrid instruments in which the Fund invests may not be correlated with changes in the value of the underlying Reference Instruments or, if they are correlated, may move in the opposite direction than originally anticipated. Second, while some strategies involving derivatives may reduce the risk of loss, they may also reduce potential gains or, in some cases, result in losses by offsetting favorable price movements in portfolio holdings. Third, there is a risk that derivative contracts and hybrid instruments may be erroneously priced or improperly valued and, as a result, the Fund may need to make increased cash payments to the counterparty. Fourth, exposure to derivative contracts and hybrid instruments may have tax consequences to the Fund and its shareholders. For example, derivative contracts and hybrid instruments may cause the Fund to realize increased ordinary income or short-term capital gains (which are treated as ordinary income for Federal income tax purposes) and, as a result, may increase taxable distributions to shareholders. In addition, under certain circumstances certain derivative contracts and hybrid instruments may cause the Fund to: (a) incur an excise tax on a portion of the income related to those contracts and instruments; and/or (b) reclassify, as a return of capital, some or all of the distributions previously made to shareholders during the fiscal year as dividend income. Fifth, a common provision in OTC derivative contracts permits the counterparty to terminate any such contract between it and the Fund, if the value of the Fund's total net assets declines below a specified level over a given time period. Factors that may contribute to such a decline (which usually must be substantial) include significant shareholder redemptions and/or a marked decrease in the market value of the Fund's investments. Any such termination of the Fund's OTC derivative contracts may adversely affect the Fund (for example, by increasing losses and/or costs, and/or preventing the Fund from fully implementing its investment strategies). Sixth, the Fund may use a derivative contract to benefit from a decline in the value of a Reference Instrument. If the value of the Reference Instrument declines during the term of the contract, the Fund makes a profit on the difference (less any payments the Fund is required to pay under the terms of the contract). Any such strategy involves risk. There is no assurance that the Reference Instrument will decline in value during the term of the contract and make a profit for the Fund. The Reference Instrument may instead appreciate in value creating a loss for the Fund. Seventh, a default or failure by a CCP or an FCM (also sometimes called a "futures broker"), or the failure of a contract to be transferred from an Executing Dealer to the FCM for clearing, may expose the Fund to losses, increase its costs, or prevent the Fund from entering or exiting derivative positions, accessing margin or fully implementing its investment strategies. The central clearing of a derivative and trading of a contract over a SEF could reduce the liquidity in, or increase costs of entering into or holding, any contracts.

Finally, derivative contracts and hybrid instruments may also involve other risks described herein or in the Fund's Private Offering Memorandum such as interest rate, credit, currency, liquidity and leverage risk.

Risk Associated with the Investment Activities of Other Accounts

Investment decisions for the Fund are made independently from those of other accounts managed by the Adviser and accounts managed by affiliates of the Adviser. Therefore, it is possible that investment-related actions taken by such other accounts could adversely impact the Fund with respect to, for example, the value of Fund portfolio holdings, and/or prices paid to or received by the Fund on its portfolio transactions, and/or the Fund's ability to obtain or dispose of debt instruments. Related considerations are discussed elsewhere in this SAI under "Brokerage Allocation and Other Practices."

Cybersecurity and Operational Risk

Like other funds and business enterprises, Federated Hermes' business relies on the security and reliability of information and communications technology, systems and networks. Federated Hermes uses digital technology, including, for example, networked systems, email and the Internet, as well as mobile devices and "cloud"-based service offerings, to conduct business operations and engage clients, customers, employees, products, accounts, shareholders, and relevant service providers, among others. Federated Hermes, as well as its funds and certain service providers, also generate, compile and process information for purposes of preparing and making filings or reports to governmental agencies, or providing reports or statements to customers, and a cybersecurity attack or incident that impacts that information, or the generation and filing processes, can prevent required regulatory filings and reports from being made, or reports or statements from being delivered, or cause the inadvertent release of confidential information (possibly resulting in the violation of applicable privacy laws). The use of the Internet and other electronic media and technology exposes the Fund, the Fund's shareholders, and the Fund's service providers, and their respective operations, to potential risks from cybersecurity attacks or incidents (collectively, "cyber-events"). The work-from-home environment necessitated by the novel coronavirus ("COVID-19") pandemic has increased the risk of cyber incidents given the increase in cyber attack surface stemming from the use of personal devices and non-office or personal technology.

Cyber-events can result from intentional (or deliberate) attacks or unintentional events by insiders (e.g., employees) or third parties, including cybercriminals, competitors, nation-states and "hacktivists," among others. Cyber-events can include, for example, phishing, credential harvesting or use of stolen access credentials, unauthorized access to systems, networks or devices (such as, for example, through "hacking" activity), structured query language attacks, infection from or spread of malware, ransomware, computer viruses or other malicious software code, corruption of data, exfiltration of data to malicious sites, the dark web or other locations or threat actors, and attacks (including, but not limited to, denial of service attacks on websites), which shut down, disable, slow, impair or otherwise disrupt operations, business processes, technology, connectivity or website or internet access, functionality or performance. Like other funds and business enterprises, the Fund and its service providers have experienced, and will continue to experience, cyber-events on a daily basis. In addition to intentional cyber-events, unintentional cyber-events can occur, such as, for example, the inadvertent release of confidential information. Cyber-events can also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on the service providers' systems or websites rendering them unavailable to intended users or via "ransomware" that renders the systems inoperable until appropriate actions are taken. To date, cyber-events have not had a material adverse effect on the Fund's business operations or performance.

Cyber-events can affect, potentially in a material way, Federated Hermes' relationships with its customers, employees, products, accounts, shareholders and relevant service providers. Any cyber-event could adversely impact the Fund and its shareholders and cause the Fund to incur financial loss and expense, as well as face exposure to regulatory penalties, reputational damage, damage to employee perceptions of the company, and additional compliance costs associated with corrective measures and credit monitoring for impacted individuals. A cyber-event can cause the Fund, or its service providers, to lose proprietary information, suffer data corruption, lose operational capacity (such as, for example, the loss of the ability to process transactions, generate or make filings or deliver reports or statements, calculate the Fund's NAV, or allow shareholders to transact business or other disruptions to operations), and/or fail to comply with applicable privacy and other laws. Among other potentially harmful effects, cyber-events also can result in theft, unauthorized monitoring and failures in the physical infrastructure or operating systems that support the Fund and its service providers. In addition, cyber-events affecting issuers in which the Fund invests could cause the Fund's investments to lose value.

The Fund's Adviser and its relevant affiliates have established risk management systems reasonably designed to seek to reduce the risks associated with cyber-events. The Fund's Adviser employs various measures aimed at mitigating cybersecurity risk, including, among others, use of firewalls, system segmentation, system monitoring, virus scanning, periodic penetration testing, employee phishing training and an employee cybersecurity awareness campaign. Among other service provider management efforts, Federated Hermes also conducts due diligence on key service providers relating to cybersecurity. Federated Hermes has established a committee to oversee Federated Hermes' information security and data governance efforts, and updates on cyber-events and risks are reviewed with relevant committees, as well as Federated Hermes' and the Fund's Boards of Directors or Trustees (or a committee thereof), on a periodic (generally quarterly) basis (and more frequently when circumstances warrant) as part of risk management oversight responsibilities. However, there is no guarantee that the efforts of Federated Hermes, the Fund's Adviser or its affiliates, or other service providers, will succeed, either entirely or partially as there are limits on Federated Hermes' and the Fund's ability to prevent, detect or mitigate cyber-events. Among other reasons, the cybersecurity landscape is constantly evolving, the nature of malicious cyber-events is becoming increasingly sophisticated and the Fund's Adviser, and its relevant affiliates, cannot control the cyber systems and cybersecurity systems of issuers or third-party service providers.

The Fund can be exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties, or other third parties, failed or inadequate processes and technology or system failures. In addition, other disruptive events, including, but not limited to, natural disasters and public health crises (such as the COVID-19 pandemic), can adversely affect the Fund's ability to conduct business, in particular if the Fund's employees or the employees of its service providers are unable or unwilling to perform their responsibilities as a result of any such event. Even if the Fund's employees and the employees of its service providers are able to work remotely, those remote work arrangements could result in the Fund's business operations being less efficient than under normal circumstances, could lead to delays in its processing of transactions, and could increase the risk of cyber-events.

RISK OF INVESTING IN EMERGING MARKET COUNTRIES

Instruments issued or traded in emerging markets generally entail greater risks than instruments issued or traded in developed markets. For example, their prices may be significantly more volatile than prices in developed countries. Emerging market economies may also experience more severe downturns (with corresponding currency devaluations) than developed economies.

Emerging market countries may have relatively unstable governments and may present the risk of nationalization of businesses, expropriation, confiscatory taxation or, in certain instances, reversion to closed market, centrally planned economies.

FUNDAMENTAL INVESTMENT OBJECTIVE

The Fund's fundamental investment objective is to provide current income. The investment objective may not be changed by the Fund's Board without shareholder approval.

INVESTMENT LIMITATIONS

Diversification

With respect to securities comprising 75% of the value of its total assets, the Fund will not purchase securities of any one issuer (other than cash; cash items; securities issued or guaranteed by the government of the United States or its agencies or instrumentalities and repurchase agreements collateralized by such U.S. government securities; and securities of other investment companies) if, as a result, more than 5% of the value of its total assets would be invested in the securities of that issuer, or the Fund would own more than 10% of the outstanding voting securities of that issuer.

Concentration

The Fund will not make investments that will result in the concentration of its investments in the securities of issuers primarily engaged in the same industry. For purposes of this restriction, the term concentration has the meaning set forth in the Investment Company Act of 1940 ("1940 Act"), any rule or order thereunder, or any SEC staff interpretation thereof. Government securities and bank instruments will not be deemed to constitute an industry.

Underwriting

The Fund may not underwrite the securities of other issuers, except that the Fund may engage in transactions involving the acquisition, disposition or resale of its portfolio securities, under circumstances where it may be considered to be an underwriter under the Securities Act of 1933.

Investing in Commodities

The Fund may not purchase or sell physical commodities, provided that the Fund may purchase securities of companies that deal in commodities. For purposes of this restriction, investments in transactions involving futures contracts and options, forward currency contracts, swap transactions and other financial contracts that settle by payment of cash are not deemed to be investments in commodities.

Investing in Real Estate

The Fund may not purchase or sell real estate, provided that this restriction does not prevent the Fund from investing in issuers which invest, deal, or otherwise engage in transactions in real estate or interests therein, or investing in securities that are secured by real estate or interests therein. The Fund may exercise its rights under agreements relating to such securities, including the right to enforce security interests and to hold real estate acquired by reason of such enforcement until that real estate can be liquidated in an orderly manner.

Borrowing Money and Issuing Senior Securities

The Fund may borrow money, directly or indirectly, and issue senior securities to the maximum extent permitted under the 1940 Act, any rule or order thereunder, or any SEC staff interpretation thereof.

Lending

The Fund may not make loans, provided that this restriction does not prevent the Fund from purchasing debt obligations, entering into repurchase agreements, lending its assets to broker/dealers or institutional investors and investing in loans, including assignments and participation interests.

The above limitations are fundamental and cannot be changed unless authorized by the Board and by the “vote of a majority of the Fund’s outstanding voting securities,” as defined by the 1940 Act, which means the lesser of (a) 67% of the shares of the Fund present or represented by proxy at a meeting if the holders of more than 50% of the outstanding shares are present or represented at the meeting or (b) more than 50% of outstanding shares of the Fund. The following limitations, however, may be changed by the Board without shareholder approval. Shareholders will be notified before any material change in these limitations becomes effective.

Illiquid Investments

The Fund will not make investments in holdings for which there is no readily available market, or enter into repurchase agreements or purchase time deposits that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment, if immediately after and as a result, the value of such investments would exceed, in the aggregate, 15% of the Fund’s net assets.

Investing in Other Investment Companies

The Fund may invest its assets in securities of other investment companies as an efficient means of carrying out its investment policies. It should be noted that investment companies incur certain expenses, such as management fees, and, therefore, any investment by the Fund in shares of other investment companies may be subject to such additional expenses. At the present time, the Fund expects that its investments in other investment companies may include shares of money market funds, including funds affiliated with the Fund’s investment adviser.

The Fund may invest in the securities of affiliated money market funds as an efficient means of managing the Fund’s uninvested cash.

Purchases on Margin

The Fund will not purchase securities on margin, provided that the Fund may obtain short-term credits necessary for the clearance of purchases and sales of securities and further provided that the Fund may make margin deposits in connection with its use of financial options and futures, forward and spot currency contracts, swap transactions and other financial contracts or derivative instruments.

Pledging Assets

The Fund will not mortgage, pledge or hypothecate any of its assets, provided that this shall not apply to the transfer of securities in connection with any permissible borrowing or to collateral arrangements in connection with permissible activities.

Additional Information

As a matter of non-fundamental investment policy regarding certain of the Fund’s investment restrictions, please note the following additional information.

In applying the concentration restriction, the Fund will adhere to the requirements of the 1940 Act which limits investments in a particular industry or group of industries to no more than 25% of the value of the Fund’s total assets. Further, in applying the concentration restriction: (a) utility companies will be divided according to their services, for example, gas, gas transmission, electric and telephone will each be considered a separate industry; (b) financial service companies will be classified according to the end users of their services, for example, automobile finance, bank finance and diversified finance will each be considered a separate industry; and (c) asset-backed securities will be classified according to the underlying assets securing such securities.

For purposes of the above limitations, the Fund considers certificates of deposit and demand and time deposits issued by a U.S. branch of a domestic bank or savings association having capital, surplus and undivided profits in excess of \$100,000,000 at the time of investment to be “cash items” and “bank instruments.”

Except with respect to borrowing money, if a percentage limitation is adhered to at the time of investment, a later increase or decrease in percentage resulting from any change in value or net assets will not result in a violation of such limitation.

In applying the borrowing limitation, in accordance with Section 18(f)(1) of the 1940 Act and current SEC rules and guidance, the Fund is permitted to borrow money, directly or indirectly, provided that immediately after any such borrowing, the Fund has asset coverage of at least 300% for all of the Fund’s borrowings, and provided further that in the event that such asset coverage shall at any time fall below 300% the Fund shall, within three business days, reduce the amount of its borrowings to an extent that the asset coverage of such borrowings shall be at least 300%.

Non-Fundamental Names Rule Policy

Under normal market conditions, the Fund will invest at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in U.S. dollar-denominated floating-rate term loans administered by banks and loan-related derivatives and loan index products. The Fund will notify shareholders at least 60 days in advance of any change in this investment policy.

Purchases In-Kind

You may contact the Placement Agent to request a purchase of Shares using securities you own. The Fund reserves the right to determine whether to accept your securities and the minimum market value to accept. The Fund will value your securities in the same manner as it values its assets. An in-kind purchase may be treated as a sale of your securities for federal tax purposes; please consult your tax adviser regarding potential tax liability.

Massachusetts Partnership Law

Under certain circumstances, shareholders may be held personally liable as partners under Massachusetts law for obligations of the Trust. To protect its shareholders, the Trust has filed legal documents with Massachusetts that expressly disclaim the liability of its shareholders for acts or obligations of the Trust.

In the unlikely event a shareholder is held personally liable for the Trust's obligations, the Trust is required by the Declaration of Trust to use its property to protect or compensate the shareholder. On request, the Trust will defend any claim made and pay any judgment against a shareholder for any act or obligation of the Trust. Therefore, financial loss resulting from liability as a shareholder will occur only if the Trust itself cannot meet its obligations to indemnify shareholders and pay judgments against them.

Account and Share Information

VOTING RIGHTS

Each Share of the Fund gives the shareholder one vote in Trustee elections and other matters submitted to shareholders for vote.

All Shares of the Trust have equal voting rights, except that in matters affecting only a particular Fund or class, only Shares of that Fund or class are entitled to vote.

Trustees may be removed by the Board or by shareholders at a special meeting. A special meeting of shareholders will be called by the Board upon the written request of shareholders who own at least 10% of the Trust's outstanding Shares of all series entitled to vote.

As of October 5, 2023, the following shareholders owned of record, beneficially, or both 5% or more of outstanding Shares: Federated Hermes Floating Rate Strategic Income Fund, Warrendale, PA, owned approximately 46,184,380 Shares (79.11%); Northern Trust Company, Chicago, IL, owned approximately 3,797,989 Shares (6.50%); and Federated Hermes Short-Intermediate Total Return Bond Fund, Warrendale, PA, owned approximately 3,158,527 Shares (5.41%).

Shareholders owning 25% or more of outstanding Shares may be in control and be able to affect the outcome of certain matters presented for a vote of shareholders.

Federated Hermes Floating Rate Strategic Income Fund is a portfolio of Federated Hermes Income Securities Trust, which is organized in the Commonwealth of Massachusetts.

Management of the Trust

BOARD OF TRUSTEES

The Board is responsible for managing the Trust's business affairs and for exercising all the Trust's powers except those reserved for the shareholders. The following tables give information about each Board member and the senior officers of the Fund. Where required, the tables separately list Board members who are "interested persons" of the Fund (i.e., "Interested" Board members) and those who are not (i.e., "Independent" Board members). Unless otherwise noted, the address of each person listed is 1001 Liberty Avenue, Pittsburgh, PA 15222-3779. The address of all Independent Board members listed is 4000 Ericsson Drive, Warrendale, PA 15086-7561; Attention: Mutual Fund Board. As of December 31, 2022, the Trust comprised four portfolios, and the Federated Hermes Complex consisted of 33 investment companies (comprising 102 portfolios). Unless otherwise noted, each Officer is elected annually. Unless otherwise noted, each Board member oversees all portfolios in the Federated Hermes Complex and serves for an indefinite term.

As of October 5, 2023, the Fund’s Board and Officers as a group owned less than 1% of each class of the Fund’s outstanding Shares.

QUALIFICATIONS OF INDEPENDENT TRUSTEES

Individual Trustee qualifications are noted in the “Independent Trustees Background and Compensation” chart. In addition, the following characteristics are among those that were considered for each existing Trustee and will be considered for any Nominee Trustee.

- Outstanding skills in disciplines deemed by the Independent Trustees to be particularly relevant to the role of Independent Trustee and to the Federated Hermes funds, including legal, accounting, business management, the financial industry generally and the investment industry particularly.
- Desire and availability to serve for a substantial period of time, taking into account the Board’s current mandatory retirement age of 75 years.
- No conflicts which would interfere with qualifying as independent.
- Appropriate interpersonal skills to work effectively with other Independent Trustees.
- Understanding and appreciation of the important role occupied by Independent Trustees in the regulatory structure governing regulated investment companies.
- Diversity of background.

From 1988 through 1995, Mr. Durbiano was a Portfolio Manager and a Vice President of the Fund's Adviser. Mr. Durbiano has received the Chartered Financial Analyst designation and an M.B.A. in Finance from the University of Pittsburgh.

* Officers do not receive any compensation from the Fund.

In addition, the Fund has appointed an Anti-Money Laundering Compliance Officer.

DIRECTOR/TRUSTEE EMERITUS PROGRAM

The Board has created a position of Director/Trustee Emeritus, whereby an incumbent Director/Trustee who has attained the age of 75 and completed a minimum of five years of service as a director/trustee, may, in the sole discretion of the Committee of Independent Directors/Trustees ("Committee"), be recommended to the full Board of Directors/Trustees of the Fund to serve as Director/Trustee Emeritus.

A Director/Trustee Emeritus that has been approved as such receives an annual fee in an amount equal to a percent of the annual base compensation paid to a Director/Trustee. In the case of a Director/Trustee Emeritus who had previously served at least five years but less than 10 years as a Director/Trustee, the percent will be 10%. In the case of a Director/Trustee Emeritus who had previously served at least 10 years as a Director/Trustee, the percent will be 20%. The Director/Trustee Emeritus will be

reimbursed for any expenses incurred in connection with their service, including expenses of travel and lodging incurred in attendance at Board meetings. Director/Trustee Emeritus will continue to receive relevant materials concerning the Funds, will be expected to attend at least one regularly scheduled quarterly meeting of the Board of Directors/Trustees each year and will be available to consult with the Committees or its representatives at reasonable times as requested by the Chairman; however, a Director/Trustee Emeritus does not have any voting rights at Board meetings and is not subject to election by shareholders of the Funds.

The Director/Trustee Emeritus will be permitted to serve in such capacity at the pleasure of the Committee, but the annual fee will cease to be paid at the end of the calendar year during which he or she has attained the age of 80 years, thereafter the position will be honorary.

The following table shows the fees paid to each Director/Trustee Emeritus for the Fund's most recently ended fiscal year and the portion of that fee paid by the Fund or Corporation/Trust.¹

EMERITUS TRUSTEES AND COMPENSATION

Director/Trustee Emeritus	Compensation From Fund (past fiscal year)	Total Compensation Paid to Director/Trustee Emeritus ¹
Charles F. Mansfield, Jr.	\$194.52	\$60,000.00

¹ The fees paid to a Director/Trustee are allocated among the funds that were in existence at the time the Director/Trustee elected Emeritus status, based on each fund's net assets at that time.

BOARD LEADERSHIP STRUCTURE

As required under the terms of certain regulatory settlements, the Chairman of the Board is not an interested person of the Fund and neither the Chairman, nor any firm with which the Chairman is affiliated, has a prior relationship with Federated Hermes or its affiliates or (other than his position as a Trustee) with the Fund.

COMMITTEES OF THE BOARD

Board Committee	Committee Members	Committee Functions	Meetings Held During Last Fiscal Year
Executive	J. Christopher Donahue John T. Collins G. Thomas Hough	In between meetings of the full Board, the Executive Committee generally may exercise all the powers of the full Board in the management and direction of the business and conduct of the affairs of the Trust in such manner as the Executive Committee shall deem to be in the best interests of the Trust. However, the Executive Committee cannot elect or remove Board members, increase or decrease the number of Trustees, elect or remove any Officer, declare dividends, issue shares or recommend to shareholders any action requiring shareholder approval.	One
Audit	G. Thomas Hough Maureen Lally-Green Thomas M. O'Neill P. Jerome Richey	The purposes of the Audit Committee are to oversee the accounting and financial reporting process of the Fund, the Fund's internal control over financial reporting and the quality, integrity and independent audit of the Fund's financial statements. The Committee also oversees or assists the Board with the oversight of compliance with legal requirements relating to those matters, approves the engagement and reviews the qualifications, independence and performance of the Fund's independent registered public accounting firm, acts as a liaison between the independent registered public accounting firm and the Board and reviews the Fund's internal audit function.	Seven

Board Committee	Committee Members	Committee Functions	Meetings Held During Last Fiscal Year
Nominating	John T. Collins G. Thomas Hough Maureen Lally-Green Thomas M. O'Neill Madelyn A. Reilly P. Jerome Richey John S. Walsh	The Nominating Committee, whose members consist of all Independent Trustees, selects and nominates persons for election to the Fund's Board when vacancies occur. The Committee will consider candidates recommended by shareholders, Independent Trustees, officers or employees of any of the Fund's agents or service providers and counsel to the Fund. Any shareholder who desires to have an individual considered for nomination by the Committee must submit a recommendation in writing to the Secretary of the Fund, at the Fund's address appearing on the back cover of this SAI. The recommendation should include the name and address of both the shareholder and the candidate and detailed information concerning the candidate's qualifications and experience. In identifying and evaluating candidates for consideration, the Committee shall consider such factors as it deems appropriate. Those factors will ordinarily include: integrity, intelligence, collegiality, judgment, diversity, skill, business and other experience, qualification as an "Independent Trustee," the existence of material relationships which may create the appearance of a lack of independence, financial or accounting knowledge and experience and dedication and willingness to devote the time and attention necessary to fulfill Board responsibilities.	Two

BOARD'S ROLE IN RISK OVERSIGHT

The Board's role in overseeing the Fund's general risks includes receiving performance reports for the Fund and risk management reports from Federated Hermes' Chief Risk Officer at each regular Board meeting. The Chief Risk Officer is responsible for enterprise risk management at Federated Hermes, which includes risk management committees for investment management and for investor services. The Board also receives regular reports from the Fund's Chief Compliance Officer regarding significant compliance risks.

On behalf of the Board, the Audit Committee plays a key role overseeing the Fund's financial reporting and valuation risks. The Audit Committee meets regularly with the Fund's Principal Financial Officer and outside auditors, as well as with Federated Hermes' Chief Audit Executive to discuss financial reporting and audit issues, including risks relating to financial controls.

Investment Advisory and Other Services

INVESTMENT ADVISER

The Adviser conducts investment research and makes investment decisions for the Fund.

The Adviser is a wholly owned subsidiary of Federated Hermes.

The Adviser shall not be liable to the Trust or any Fund shareholder for any losses that may be sustained in the purchase, holding or sale of any security or for anything done or omitted by it, except acts or omissions involving willful misfeasance, bad faith, gross negligence or reckless disregard of the duties imposed upon it by its contract with the Trust.

The Adviser provides investment advisory services at no fee.

In December 2017, Federated Investors, Inc., now Federated Hermes, became a signatory to the Principles for Responsible Investment (PRI). The PRI is an investor initiative in partnership with the United Nations Environment Programme Finance Initiative and the United Nations Global Compact. Commitments made as a signatory to the PRI are not legally binding, but are voluntary and aspirational. They include efforts, where consistent with our fiduciary responsibilities, to incorporate environmental, social and corporate governance (ESG) issues into investment analysis and investment decision making, to be active owners and incorporate ESG issues into our ownership policies and practices, to seek appropriate disclosure on ESG issues by the entities in which we invest, to promote acceptance and implementation of the PRI within the investment industry, to enhance our effectiveness in implementing the PRI, and to report on our activities and progress towards implementing the PRI. Being a signatory to the PRI does not obligate Federated Hermes to take, or not take, any particular action as it relates to investment decisions or other activities.

In July 2018, Federated Investors, Inc., now Federated Hermes, acquired a majority interest in Federated Hermes Limited (FHL) (formerly, Hermes Fund Managers Limited), a pioneer of integrated ESG investing. Federated Hermes now owns 100% of FHL. FHL's experience with ESG issues contributes to Federated Hermes' understanding of material risks and opportunities these issues may present.

EOS at Federated Hermes, which was established as Hermes Equity Ownership Services Limited (EOS) in 2004 as an affiliate of FHL and Hermes Investment Management Limited, is a 50+ member engagement and stewardship team that conducts long-term, objectives-driven dialogue with board and senior executive level representatives of approximately 1,000 unique issuers annually. It seeks to address the most material ESG risks and opportunities through constructive and continuous discussions with the goal of improving long-term results for investors. Engagers' deep understanding across sectors, themes and regional markets, along with language and cultural expertise, allows EOS to provide insights to companies on the merits of addressing ESG risks and the positive benefits of capturing opportunities. Federated Hermes investment management teams have access to the insights gained from understanding a company's approach to these long-term strategic matters as an additional input to improve portfolio risk/return characteristics.

Portfolio Manager Information

As a general matter, certain conflicts of interest may arise in connection with a portfolio manager's management of a fund's investments, on the one hand, and the investments of other funds/pooled investment vehicles or accounts (collectively, including the Fund, as applicable, "accounts") for which the portfolio manager is responsible, on the other. For example, it is possible that the various accounts managed could have different investment strategies that, at times, might conflict with one another to the possible detriment of the Fund. Alternatively, to the extent that the same investment opportunities might be desirable for more than one account, possible conflicts could arise in determining how to allocate them. Other potential conflicts can include, for example, conflicts created by specific portfolio manager compensation arrangements (including, for example, the allocation or weighting given to the performance of the Fund or other accounts or activities for which the portfolio manager is responsible in calculating the portfolio manager's compensation), and conflicts relating to selection of brokers or dealers to execute Fund portfolio trades and/or specific uses of commissions from Fund portfolio trades (for example, research or "soft dollars"). The Adviser has adopted policies and procedures and has structured the portfolio managers' compensation in a manner reasonably designed to safeguard the Fund from being negatively affected as a result of any such potential conflicts.

The following information about the Fund's Portfolio Managers is provided as of the end of the Fund's most recently completed fiscal year unless otherwise indicated.

Mark Durbiano, Portfolio Manager

Types of Accounts Managed by Mark Durbiano	Total Number of Additional Accounts Managed/Total Assets*	Additional Accounts/Assets Managed that are Subject to Advisory Fee Based on Account Performance
Registered Investment Companies	19/\$12.7 billion	0/\$0
Other Pooled Investment Vehicles	3/\$237.6 million	0/\$0
Other Accounts	6/\$1.0 billion	1/\$141.6 million

* None of the Accounts has an advisory fee that is based on the performance of the account.

Dollar value range of shares owned in the Fund: None.

Mark Durbiano is paid a fixed base salary and a variable annual incentive. Base salary is determined within a market competitive, position-specific salary range, based on the portfolio manager's experience and performance. The annual incentive amount is determined based primarily on Investment Product Performance (IPP) and may also include a discretionary component based on a variety of factors deemed relevant, such as financial measures and performance and may be paid entirely in cash, or in a combination of cash and restricted stock of Federated Hermes, Inc. ("Federated Hermes"). The total combined annual incentive opportunity is intended to be competitive in the market for this portfolio manager role.

IPP is measured on a rolling one, three and five calendar year pre-tax gross total return basis versus the Fund's benchmark (i.e., Credit Suisse Leveraged Loan Index) and versus the Fund's designated peer group of comparable accounts. Performance periods are adjusted if a portfolio manager has been managing an account for less than five years; accounts with less than one year of performance history under a portfolio manager may be excluded.

As noted above, Mr. Durbiano is also the portfolio manager for other accounts in addition to the Fund. Such other accounts may have different benchmarks and performance measures. The allocation or weighting given to the performance of the Fund or other accounts or activities for which Mr. Durbiano is responsible when his compensation is calculated may be equal or can vary.

In addition, Mr. Durbiano has oversight responsibility for other portfolios that he does not personally manage and serves on one or more Investment Teams that establish guidelines on various performance drivers (e.g., currency, duration, sector, volatility, and/or yield curve) for taxable fixed income accounts. A portion of the IPP score is based on Federated Hermes' senior management's assessment of team contributions.

For purposes of calculating the annual incentive amount, each account managed by the Portfolio Manager currently is categorized into one of three IPP groups (which may be adjusted periodically). Within each performance measurement period and IPP group, IPP currently is calculated on the basis of an assigned weighting to each account managed or activity engaged in by the Portfolio Manager and included in the IPP groups. At the account level, the weighting assigned to the Fund is lesser than or equal to the weighting assigned to other accounts or activities used to determine IPP (but can be adjusted periodically). A portion of the bonus tied to the IPP score may be adjusted based on management's assessment of overall contributions to account performance and any other factors as deemed relevant. Pursuant to the terms of a business agreement, Mr. Durbiano's annual incentives may include certain guaranteed amounts.

Any individual allocations from the discretionary pool may be determined, by executive management on a discretionary basis using various factors, such as, for example, on a product, strategy or asset class basis, and considering overall contributions and any other factors deemed relevant (and may be adjusted periodically).

Anthony A. Venturino, Portfolio Manager

Types of Accounts Managed by Anthony A. Venturino	Total Number of Additional Accounts Managed/Total Assets*
Registered Investment Companies	2/\$534.0 million
Other Pooled Investment Vehicles	0/\$0
Other Accounts	3/\$94.6 million

* None of the Accounts has an advisory fee that is based on the performance of the account.

Dollar value range of shares owned in the Fund: None.

Anthony Venturino is paid a fixed base salary and a variable annual incentive. Base salary is determined within a market competitive, position-specific salary range, based on the portfolio manager’s experience and performance. The annual incentive amount is determined based primarily on Investment Product Performance (IPP) and may also include a discretionary component based on a variety of factors deemed relevant, such as financial measures and performance and may be paid entirely in cash, or in a combination of cash and restricted stock of Federated Hermes, Inc. (“Federated Hermes”). The total combined annual incentive opportunity is intended to be competitive in the market for this portfolio manager role.

IPP is measured on a rolling one, three and five calendar year pre-tax gross total return basis versus the Fund’s benchmark (i.e., Credit Suisse Leveraged Loan Index) and versus the Fund’s designated peer group of comparable accounts. Performance periods are adjusted if a portfolio manager has been managing an account for less than five years; accounts with less than one year of performance history under a portfolio manager may be excluded.

Mr. Venturino also provides research and analytical support for other accounts in addition to the Fund. Such other accounts may have different benchmarks and performance measures. The allocation or weighting given to the performance of the Fund or other accounts for which Mr. Venturino is responsible when his compensation is calculated may be equal or can vary.

For purposes of calculating the annual incentive amount, each account managed by the portfolio manager currently is categorized into one of three IPP groups (which may be adjusted periodically). Within each performance measurement period and IPP group, IPP currently is calculated on the basis of an assigned weighting to each account managed by the portfolio manager and included in the IPP groups. At the account level, the weighting assigned to the Fund is lesser than or equal to the weighting assigned to other accounts used to determine IPP (which may be adjusted periodically). Additionally, a portion of Mr. Venturino’s IPP score is based on the performance of the accounts for which he provides research and analytic support. A portion of the bonus tied to the IPP score may be adjusted based on management’s assessment of overall contributions to account performance and any other factors as deemed relevant.

Any individual allocations from the discretionary pool may be determined, by executive management on a discretionary basis using various factors, such as, for example, on a product, strategy or asset class basis, and considering overall contributions and any other factors deemed relevant (and may be adjusted periodically).

B. Anthony Delserone, Jr., Portfolio Manager

Types of Accounts Managed by B. Anthony Delserone, Jr.	Total Number of Additional Accounts Managed/Total Assets*
Registered Investment Companies	1/\$506.3 million
Other Pooled Investment Vehicles	0/\$0
Other Accounts	0/\$0

* None of the Accounts has an advisory fee that is based on the performance of the account.

Dollar value range of shares owned in the Fund: None.

Mr. Delserone is paid a fixed base salary and a variable annual incentive. Base salary is determined within a market competitive, position-specific salary range, based on the portfolio manager’s experience and performance. The annual incentive amount is determined based primarily on Investment Product Performance (IPP) and may also include a discretionary component based on a variety of factors deemed relevant, such as financial measures and performance and may be paid entirely in cash, or in a combination of cash and restricted stock of Federated Hermes, Inc. (“Federated Hermes”). The total combined annual incentive opportunity is intended to be competitive in the market for this portfolio manager role.

IPP is measured on a rolling one, three and five calendar year pre-tax gross total return basis versus the Fund’s benchmark (i.e., Credit Suisse Leveraged Loan Index) and versus the Fund’s designated peer group of comparable accounts. Performance periods are adjusted if a portfolio manager has been managing an account for less than five years; accounts with less than one year of performance history under a portfolio manager may be excluded.

As noted above, Mr. Delserone is also the portfolio manager for other accounts in addition to the Fund. Such other accounts may have different benchmarks and performance measures. The allocation or weighting given to the performance of the Fund or other accounts for which Mr. Delserone is responsible when his compensation is calculated may be equal or can vary.

For purposes of calculating the annual incentive amount, each account managed by the portfolio manager currently is categorized into one of three IPP groups (which may be adjusted periodically). Within each performance measurement period and IPP group, IPP currently is calculated on the basis of an assigned weighting to each account managed by the portfolio manager and included in the IPP groups. At the account level, the weighting assigned to the Fund is lesser than or equal to the weighting assigned to other accounts used to determine IPP (but may be adjusted periodically). A portion of the bonus tied to the IPP score may be adjusted based on management's assessment of overall contributions to account performance and any other factors as deemed relevant.

Any individual allocations from the discretionary pool may be determined, by executive management on a discretionary basis using various factors, such as, for example, on a product, strategy or asset class basis, and considering overall contributions and any other factors deemed relevant (and may be adjusted periodically).

Services Agreement

Federated Advisory Services Company, an affiliate of the Adviser, provides certain support services to the Adviser. The fee for these services is paid by the Adviser and not by the Fund.

Other Related Services

Affiliates of the Adviser may, from time to time, provide certain electronic equipment and software to institutional customers in order to facilitate the purchase of Fund Shares offered by the placement agent.

CODE OF ETHICS RESTRICTIONS ON PERSONAL TRADING

As required by Rule 17j-1 of the Investment Company Act of 1940 and Rule 204A-1 under the Investment Advisers Act (as applicable), the Fund, its Adviser and its placement agent have adopted codes of ethics. These codes govern securities trading activities of investment personnel, Fund Trustees and certain other employees. Although they do permit these people to trade in securities, including those that the Fund could buy, as well as Shares of the Fund, they also contain significant safeguards designed to protect the Fund and its shareholders from abuses in this area, such as requirements to obtain prior approval for, and to report, particular transactions.

VOTING PROXIES ON FUND PORTFOLIO SECURITIES

The Board has delegated to the Adviser authority to vote proxies on the securities held in the Fund's portfolio. The Board has also approved the Adviser's policies and procedures for voting the proxies, which are described below.

Proxy Voting Policies

As an investment adviser with a fiduciary duty to the Fund and its shareholders, the Adviser's general policy is to cast proxy votes in favor of management proposals and shareholder proposals that the Adviser anticipates will enhance the long-term value of the securities being voted in a manner that is consistent with the investment objectives of the Fund. Generally, this will mean voting for proposals that the Adviser believes will improve the management of a company, increase the rights or preferences of the voted securities, or increase the chance that a premium offer would be made for the company or for the voted securities. This approach to voting proxy proposals will be referred to hereafter as the "General Policy."

The Adviser generally votes consistently on the same matter when securities of an issuer are held by multiple client portfolios. However, the Adviser may vote differently if a client's investment objectives differ from those of other clients or if a client explicitly instructs the Adviser to vote differently.

The following examples illustrate how the General Policy may apply to the most common management proposals and shareholder proposals. However, whether the Adviser supports or opposes a proposal will always depend on a thorough understanding of the Fund's investment objectives and the specific circumstances described in the proxy statement and other available information.

On matters related to the board of directors, generally, the Adviser will vote to elect nominees to the board in uncontested elections except in certain circumstances, such as where the director: (1) had not attended at least 75% of the board meetings during the previous year; (2) serves as the company's chief financial officer, unless the company is headquartered in the UK where this is market practice; (3) has become overboarded (more than five boards for retired executives and more than two boards for CEOs); (4) is the chair of the nominating or governance committee when the roles of chairman of the board and CEO are combined and there is no lead independent director; (5) served on the compensation committee during a period in which compensation appears excessive relative to performance and peers; or (6) served on a board that did not implement a shareholder proposal that the Adviser supported and received more than 50% shareholder support the previous year. In addition, the Adviser will generally vote in favor of: (7) a full slate of directors, where the directors are elected as a group and not individually,

unless more than half of the nominees are not independent; (8) shareholder proposals to declassify the board of directors; (9) shareholder proposals to require a majority voting standard in the election of directors; (10) shareholder proposals to separate the roles of chairman of the board and CEO; (11) a proposal to require a company's audit committee to be comprised entirely of independent directors; and (12) shareholder proposals to eliminate supermajority voting requirements in company bylaws.

On other matters of corporate governance, generally, the Adviser will vote: (1) in favor of proposals to grant shareholders the right to call a special meeting if owners of at least 10% of the outstanding stock agree; (2) against proposals to allow shareholders to act by written consent; (3) on a case-by-case basis for proposals to adopt or amend shareholder rights plans (also known as "poison pills"); (4) in favor of shareholder proposals to eliminate supermajority requirements in company bylaws; and (5) in favor of shareholder proposals calling for "Proxy Access," that is, a bylaw change allowing shareholders owning at least 3% of the outstanding common stock for at least three years to nominate candidates for election to the board of directors.

Generally, the Adviser will vote every shareholder proposal of an environmental or social nature on a case-by-case basis. The quality of these shareholder proposals varies widely across markets. Similarly, company disclosures of their business practices related to environmental and social risks are not always adequate for investors to make risk assessments. Thus, the Adviser places great importance on company-specific analyses to determine how to vote. Above all, the Adviser will vote in a manner that would enhance the long-term value of the investment within the framework of the client's investment objectives.

The Adviser's general approach to analyzing these proposals calls for considering the literal meaning of the written proposal, the financial materiality of the proposal's objective and the practices followed by industry peers. This analysis utilizes research reports from the Adviser's proxy advisors, company filings, as well as reports published by the company and other outside organizations.

On matters of capital structure, generally, the Adviser will vote proxies for U.S. issuers on a case-by-case basis for proposals to authorize the issuance of new shares if not connected to an M&A transaction and the potential dilution is more than 10%, against proposals to create multiple-class voting structures where one class has superior voting rights to the other classes, in favor of proposals to authorize reverse stock splits unless the amount of authorized shares is not also reduced proportionately. Generally, the Adviser will vote proxies for non-U.S. issuers in favor of proposals to authorize issuance of shares with and without pre-emptive rights unless the size of the authorities would threaten to unreasonably dilute existing shareholders.

Votes on executive compensation come in many forms, including advisory votes on U.S. executive compensation plans ("Say On Pay"), advisory and binding votes on the design or implementation of non-U.S. executive remuneration plans and votes to approve new equity plans or amendments to existing plans. Generally, the Adviser will support compensation arrangements that are aligned with the client's long-term investment objectives. With respect to Say On Pay proposals, the Adviser will generally vote in favor unless the compensation plan has failed to align executive compensation with corporate performance, or the design of the plan is likely to lead to misalignment in the future. The Adviser supports the principle of an annual shareholder vote on executive pay and will generally vote accordingly on proposals which set the frequency of the Say On Pay vote.

In some markets, especially Europe, shareholders are provided a vote on the remuneration policy, which sets out the structural elements of a company's executive remuneration plan on a forward-looking basis. The Adviser will generally support these proposals unless the design of the remuneration policy fails to appropriately link executive compensation with corporate performance, total compensation appears excessive relative to the company's industry peer group, with local market dynamics also taken into account; or there is insufficient disclosure to enable an informed judgment, particularly as it relates to the disclosure of the maximum amounts of compensation that may be awarded.

The Adviser will generally vote in favor of equity plan proposals unless they result in unreasonable dilution to existing shareholders, permit replacement of "underwater" options with new options on more favorable terms for the recipient, or omit the criteria for determining the granting or vesting of awards.

On matters relating to corporate transactions, the Adviser will generally vote in favor of mergers, acquisitions and sales of assets if the Adviser's analysis of the proposed business strategy and the transaction price would have a positive impact on the total return for shareholders.

If a shareholders meeting is contested, that is, shareholders are presented with a set of director candidates nominated by company management and a set of director candidates nominated by a dissident shareholder, the Adviser will study the proposed business strategies of both groups and vote in a way that maximizes expected total return for the Fund.

In addition, the Adviser will not vote any proxy if it determines that the consequences or costs of voting outweigh the potential benefit of voting. For example, if a foreign market requires shareholders voting proxies to retain the voted shares until the meeting date (thereby rendering the shares "illiquid" for some period of time), the Adviser will not vote proxies for such shares. In addition, the Adviser is not obligated to incur any expense to send a representative to a shareholder meeting or to translate proxy materials into English.

To the extent that the Adviser is permitted to loan securities, the Adviser does not have the right to vote on securities while they are on loan. However, the Adviser will take all reasonable steps to recall shares prior to the record date when the meeting raises issues that the Adviser believes materially affect shareholder value, provided that the Adviser considers that the benefits of voting on the securities are greater than the associated costs, including the opportunity cost of the lost revenue that would otherwise be generated by the loan. However, there can be no assurance that the Adviser will have sufficient notice of such matters to be able to terminate the loan in time to vote thereon.

The Adviser will take into account feedback from issuers on the voting recommendations of the Adviser's proxy advisory firm if the feedback is provided at least five days before the voting cut-off date. In certain circumstances, primarily those where the Adviser's voting policy is absolute and without exception, issuer feedback will not be part of the voting decision. For example, it is the Adviser's policy to always support a shareholder proposal to separate the roles of chairman of the board and CEO. Thus, any comments from the issuer opposing this proposal would not be considered.

If proxies are not delivered in a timely or otherwise appropriate basis, the Adviser may not be able to vote a particular proxy.

For an Adviser that employs a quantitative investment strategy for certain funds or accounts that does not make use of qualitative research ("Non-Qualitative Accounts"), the Adviser may not have the kind of research to make decisions about how to vote proxies for them. Therefore, the Adviser will vote the proxies of these Non-Qualitative Accounts as follows: (a) in accordance with the Standard Voting Instructions (defined below); (b) if the Adviser is casting votes for the same proxy on behalf of a regular qualitative account and a Non-Qualitative Account, the Non-Qualitative Account would vote in the same manner as the regular qualitative account; (c) if neither of the first two conditions apply, as the proxy advisory firm is recommending; and (d) if none of the previous conditions apply, as recommended by the Proxy Voting Committee.

Proxy Voting Procedures

The Adviser has established a Proxy Voting Committee ("Proxy Committee"), to exercise all voting discretion granted to the Adviser by the Board in accordance with the proxy voting policies. To assist it in carrying out the day-to-day operations related to proxy voting, the Proxy Committee has created the Proxy Voting Management Group (PVMG). The day-to-day operations related to proxy voting are carried out by the Proxy Voting Operations Team (PVOT) and overseen by the PVMG. Besides voting the proxies, this work includes engaging with investee companies on corporate governance matters, managing the proxy advisory firm, soliciting voting recommendations from the Adviser's investment professionals, bringing voting recommendations to the Proxy Committee for approval, filing with regulatory agencies any required proxy voting reports, providing proxy voting reports to clients and investment companies as they are requested from time to time and keeping the Proxy Committee informed of any issues related to corporate governance and proxy voting.

The Adviser has compiled a list of specific voting instructions based on the General Policy (the "Standard Voting Instructions"). The Standard Voting Instructions and any modifications to them are approved by the Proxy Committee. The Standard Voting Instructions sometimes call for an investment professional to review the ballot question and provide a voting recommendation to the Proxy Committee (a "case-by-case vote"). The foregoing notwithstanding, the Proxy Committee always has the authority to determine a final voting decision.

The Adviser has hired a proxy advisory firm to perform various proxy voting related administrative services such as ballot reconciliation, vote processing and recordkeeping functions. The Proxy Committee has supplied the proxy advisory firm with the Standard Voting Instructions. The Proxy Committee retains the right to modify the Standard Voting Instructions at any time or to vote contrary to them at any time in order to cast proxy votes in a manner that the Proxy Committee believes is in accordance with the General Policy. The proxy advisory firm may vote any proxy as directed in the Standard Voting Instructions without further direction from the Proxy Committee. However, if the Standard Voting Instructions require case-by-case handling for a proposal, the PVOT will work with the investment professionals and the proxy advisory firm to develop a voting recommendation for the Proxy Committee and to communicate the Proxy Committee's final voting decision to the proxy advisory firm. Further, if the Standard Voting Instructions require the PVOT to analyze a ballot question and make the final voting decision, the PVOT will report such votes to the Proxy Committee on a quarterly basis for review.

Conflicts of Interest

The Adviser has adopted procedures to address situations where a matter on which a proxy is sought may present a potential conflict between the interests of the Fund (and its shareholders) and those of the Adviser or placement agent. This may occur where a significant business relationship exists between the Adviser (or its affiliates) and a company involved with a proxy vote.

A company that is a proponent, opponent or the subject of a proxy vote and which to the knowledge of the Proxy Committee has this type of significant business relationship, is referred to below as an "Interested Company."

The Adviser has implemented the following procedures in order to avoid concerns that the conflicting interests of the Adviser or its affiliates have influenced proxy votes. Any employee of the Adviser or its affiliates who is contacted by an Interested Company regarding proxies to be voted by the Adviser must refer the Interested Company to a member of the Proxy Committee, and must inform the Interested Company that the Proxy Committee has exclusive authority to determine how the proxy will be voted. Any Proxy Committee member contacted by an Interested Company must report it to the full Proxy Committee and provide a written summary of the communication. Under no circumstances will the Proxy Committee or any member of the Proxy Committee make a commitment to an Interested Company regarding the voting of proxies or disclose to an Interested Company how the Proxy Committee has directed such proxies to be voted. If the Standard Voting Instructions already provide specific direction on the proposal in question, the Proxy Committee shall not alter or amend such directions. If the Standard Voting Instructions require the Proxy Committee to provide further direction, the Proxy Committee shall do so in accordance with the proxy voting policies, without regard for the interests of the Adviser with respect to the Interested Company. If the Proxy Committee provides any direction as to the voting of proxies relating to a proposal affecting an Interested Company, it must disclose annually to the Fund's Board information regarding: the significant business relationship; any material communication with the Interested Company; the matter(s) voted on; and how, and why, the Adviser voted as it did.

In certain circumstances it may be appropriate for the Adviser to vote in the same proportion as all other shareholders, so as to not affect the outcome beyond helping to establish a quorum at the shareholders' meeting. This is referred to as "proportional voting." If the Fund owns shares of another Federated Hermes mutual fund, the Adviser will proportionally vote the client's proxies for that fund or seek direction from the Board or the client on how the proposal should be voted. If the Fund owns shares of an unaffiliated mutual fund, the Adviser may proportionally vote the Fund's proxies for that fund depending on the size of the position. If the Fund owns shares of an unaffiliated exchange-traded fund, the Adviser will proportionally vote the Fund's proxies for that fund.

Downstream Affiliates

If the Proxy Committee gives further direction, or seeks to vote contrary to the Standard Voting Instructions, for a proxy relating to a portfolio company in which the Fund owns more than 10% of the portfolio company's outstanding voting securities at the time of the vote ("Downstream Affiliate"), the Proxy Committee must first receive guidance from counsel to the Proxy Committee as to whether any relationship between the Adviser and the portfolio company, other than such ownership of the portfolio company's securities, gives rise to an actual conflict of interest. If counsel determines that an actual conflict exists, the Proxy Committee must address any such conflict with the executive committee of the board of directors or trustees of any investment company client prior to taking any action on the proxy at issue.

Proxy Advisers' Conflicts of Interest

Proxy advisory firms may have significant business relationships with the subjects of their research and voting recommendations. For example, a proxy voting service client may be a public company with an upcoming shareholders' meeting and the proxy voting service has published a research report with voting recommendations. In another example, a proxy voting service board member also sits on the board of a public company for which the proxy voting service will write a research report. These and similar situations give rise to an actual or apparent conflict of interest.

In order to avoid concerns that the conflicting interests of the engaged proxy voting service have influenced proxy voting recommendations, the Adviser will take the following steps:

- A due diligence team made up of employees of the Adviser and/or its affiliates will meet with the proxy voting service on an annual basis and determine through a review of their policies and procedures and through inquiry that the proxy voting service has established a system of internal controls that provide reasonable assurance that their voting recommendations are not influenced by the business relationships they have with the subjects of their research.
- Whenever the standard voting guidelines call for voting a proposal in accordance with the proxy voting service recommendation and the proxy voting service has disclosed that they have a conflict of interest with respect to that issuer, the PVOT will take the following steps: (a) the PVOT will obtain a copy of the research report and recommendations published by another proxy voting service for that issuer; (b) the Head of the PVOT, or his designee, will review both the engaged proxy voting service research report and the research report of the other proxy voting service and determine what vote will be cast. The PVOT will report all proxies voted in this manner to the Proxy Committee on a quarterly basis. Alternatively, the PVOT may seek direction from the Committee on how the proposal shall be voted.

Proxy Voting Report

A description of the policies and procedures that the Fund uses to determine how to vote proxies, if any, relating to securities held in the Fund's portfolio, as well as a report on "Form N-PX" of how the Fund voted any such proxies during the most recent 12-month period ended June 30, are available, without charge and upon request, by calling 1-800-341-7400. A report on "Form N-PX" of how the Fund voted any such proxies during the most recent 12-month period ended June 30 is available via the Proxy Voting Record (Form N-PX) link associated with the Fund at FederatedHermes.com/us under the "Private Funds" section of the "Products" tab, where you will be directed to a statement of agreement that you are an "accredited investor" before proceeding. Click "I agree" to agree to the terms then you will be taken to the "Private Funds" home page where you can select the appropriate asset class or category. Select a Fund to access the "Documents" tab. Form N-PX filings are also available at the SEC's website at sec.gov.

PORTFOLIO HOLDINGS INFORMATION

Information concerning the Fund's portfolio holdings is available at FederatedHermes.com/us under the "Private Funds" section of the "Products" tab, where you will be directed to a statement of agreement that you are an "accredited investor" before proceeding. Click "I agree" to agree to the terms then you will be taken to the "Private Funds" home page where you can select the appropriate asset class or category. Select a Fund to access the "Characteristics" tab. You may also obtain this information by calling 1-800-341-7400. A complete listing of the Fund's portfolio holdings as of the end of each calendar quarter is posted on the website 30 days (or the next business day) after the end of the quarter and remains posted for six months thereafter.

Summary portfolio composition information as of the close of each month is posted on the website 15 days (or the next business day) after month-end and remains posted until replaced by the information for the succeeding month. The summary portfolio composition information may include identification of the Fund's top 10 holdings, recent purchase and sale transactions and a percentage breakdown of the portfolio by sector.

You may also access portfolio information as of the end of the Fund's fiscal quarters at FederatedHermes.com/us under the "Private Funds" section of the "Products" tab by following the directions given above. The Fund's Annual Shareholder Report and Semi-Annual Shareholder Report contain complete listings of the Fund's portfolio holdings as of the end of the Fund's second and fourth fiscal quarters. Fiscal quarter information is made available on the website within 70 days after the end of the fiscal quarter. This information is also available in reports filed with the SEC at the SEC's website at sec.gov.

Each fiscal quarter, the Fund will file with the SEC a complete schedule of its monthly portfolio holdings on "Form N-PORT." The Fund's holdings as of the end of the third month of every fiscal quarter, as reported on Form N-PORT, will be publicly available on the SEC's website at sec.gov within 60 days of the end of the fiscal quarter upon filing. You may also access this information via the link to the Fund and share class name at FederatedHermes.com/us.

The disclosure policy of the Fund and the Adviser prohibits the disclosure of portfolio holdings information to any investor or intermediary before the same information is made available to other investors. Employees of the Adviser or its affiliates who have access to nonpublic information concerning the Fund's portfolio holdings are prohibited from trading securities on the basis of this information. Such persons must report all personal securities trades and obtain pre-clearance for all personal securities trades other than mutual fund shares.

Firms that provide administrative, custody, financial, accounting, legal or other services to the Fund may receive nonpublic information about the Fund's portfolio holdings for purposes relating to their services. The Fund may also provide portfolio holdings information to publications that rate, rank or otherwise categorize investment companies and to commodities exchange clearing corporations in connection with qualifying the Fund's Shares for use as margin collateral. Traders or portfolio managers may provide "interest" lists to facilitate portfolio trading if the list reflects only that subset of the portfolio for which the trader or portfolio manager is seeking market interest. A list of service providers, publications and other third parties who may receive nonpublic portfolio holdings information appears in the Appendix to this SAI.

The furnishing of nonpublic portfolio holdings information to any third party (other than authorized governmental or regulatory personnel) requires the prior approval of the President of the Adviser and of the Chief Compliance Officer of the Fund. The President of the Adviser and the Chief Compliance Officer will approve the furnishing of nonpublic portfolio holdings information to a third party only if they consider the furnishing of such information to be in the best interests of the Fund and its shareholders. In that regard, and to address possible conflicts between the interests of Fund shareholders and those of the Adviser and its affiliates, the following procedures apply. No consideration may be received by the Fund, the Adviser, any affiliate of the Adviser or any of their employees in connection with the disclosure of portfolio holdings information. Before information is furnished, the third party must sign a written agreement that it will safeguard the confidentiality of the information, will use it only for the purposes for which it is furnished and will not use it in connection with the trading of any security. Persons approved

to receive nonpublic portfolio holdings information will receive it as often as necessary for the purpose for which it is provided. Such information may be furnished as frequently as daily and often with no time lag between the date of the information and the date it is furnished. The Board receives and reviews annually a list of the persons who receive nonpublic portfolio holdings information and the purposes for which it is furnished.

PLACEMENT AGENT

The Fund's placement agent is Federated Securities Corp., located at 1001 Liberty Avenue, Pittsburgh, PA 15222-3779.

ADMINISTRATOR

Federated Administrative Services (FAS), a subsidiary of Federated Hermes, provides administrative personnel and services, including certain legal, compliance and financial administrative services ("Administrative Services"), necessary for the operation of the Fund. FAS does not charge the Fund an Administrative Services fee but is entitled to reimbursement for certain out-of-pocket expenses incurred in providing Administrative Services to the Fund.

CUSTODIAN

State Street Bank and Trust Company, Boston, Massachusetts, is custodian for the securities and cash of the Fund. Foreign instruments purchased by the Fund are held by foreign banks participating in a network coordinated by State Street Bank and Trust Company.

TRANSFER AGENT AND DIVIDEND DISBURSING AGENT

SS&C GIDS, Inc., the Fund's registered transfer agent, maintains all necessary shareholder records.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The independent registered public accounting firm for the Fund, Ernst & Young LLP, conducts its audits in accordance with the standards of the Public Company Accounting Oversight Board (United States), which require it to plan and perform its audits to provide reasonable assurance about whether the Fund's financial statements and financial highlights are free of material misstatement.

Brokerage Allocation and Other Practices

BROKERAGE TRANSACTIONS AND INVESTMENT ALLOCATION

When selecting brokers and dealers to handle the purchase and sale of portfolio instruments, the Adviser looks for prompt execution of the order at a favorable price. The Adviser will generally use those who are recognized dealers in specific portfolio instruments, except when a better price and execution of the order can be obtained elsewhere. The Adviser makes decisions on portfolio transactions and selects brokers and dealers subject to review by the Fund's Board.

Investment decisions for the Fund are made independently from those of other accounts managed by the Adviser and accounts managed by affiliates of the Adviser. When the Fund and one or more of those accounts invests in, or disposes of, the same security, available investments or opportunities for sales will be allocated among the Fund and the account(s) in a manner believed by the Adviser to be equitable. While the coordination and ability to participate in volume transactions may benefit the Fund, it is possible that this procedure could adversely impact the price paid or received and/or the position obtained or disposed of by the Fund.

Capital Stock and Other Securities

CAPITAL STOCK

Holders of the Fund's Shares of beneficial interest will have equal rights to participate in distributions made by the Fund, equal rights to the Fund's assets upon dissolution and equal voting rights; the Fund does not allow cumulative voting. Investors will have no preemptive or other right to subscribe to any additional shares of beneficial interest or other securities issued by the Trust. Shares may be redeemed at any time at net asset value (NAV) with no charge.

Shareholder Information

Beneficial interests in the Fund have not been registered and are issued in reliance on Section 4(a)(2) of the 1933 Act and Regulation D (including, without limitation, Rule 506(c) thereunder).

OFFERING PRICE

A Share's NAV is determined as of the end of regular trading on the New York Stock Exchange (NYSE) (normally 4:00 p.m. Eastern time) each day the NYSE is open. The Fund calculates the NAV by valuing its assets, subtracting its liabilities and dividing the balance by the number of Shares outstanding. The NAV is calculated to the nearest whole cent per Share.

In calculating its NAV, the Fund generally values investments as follows:

- Equity securities listed on a U.S. securities exchange or traded through the U.S. national market system are valued at their last reported sale price or official closing price in their principal exchange or market. If a price is not readily available, such equity securities are valued based upon the mean of closing bid and ask quotations from one or more dealers.
- Other equity securities traded primarily in the United States are valued based upon the mean of closing bid and ask quotations from one or more dealers.
- Equity securities traded primarily through securities exchanges and regulated market systems outside the United States are valued at their last reported sale price or official closing price in their principal exchange or market. These prices may be adjusted for significant events occurring after the closing of such exchanges or market systems as described below. If a price is not readily available, such equity securities are valued based upon the mean of closing bid and ask quotations from one or more dealers.
- Debt instruments are fair valued using price evaluations provided by a pricing service approved by the Adviser. The methods used by pricing services to determine such price evaluations are described below.
- Futures contracts listed on exchanges are valued at their reported settlement price. Option contracts listed on exchanges are valued based upon the mean of closing bid and ask quotations reported by the exchange or from one or more futures commission merchants.
- OTC derivative contracts are fair valued using price evaluations provided by a pricing service approved by the Adviser. The methods used by pricing services to determine such price evaluations are described below. If a price evaluation from a pricing service is not readily available, such derivative contracts may be fair valued based upon price evaluations from one or more dealers or using a recognized pricing model for the contract.
- Shares of other mutual funds or non-exchange-traded investment companies are valued based upon their reported NAVs. The prospectuses for these mutual funds explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

If any price, quotation, price evaluation or other pricing source is not readily available when the NAV is calculated, if the Fund cannot obtain price evaluations from a pricing service or from more than one dealer for an investment within a reasonable period of time as set forth in the Adviser's valuation policies and procedures, or if information furnished by a pricing service, in the opinion of the Valuation Committee, is deemed not representative of the fair value of such security, the Fund will use the fair value of the investment determined in accordance with the procedures described below. There can be no assurance that the Fund could purchase or sell an investment at the price used to calculate the Fund's NAV. The Fund will not use a pricing service or dealer who is an affiliated person of the Adviser to value investments.

Noninvestment assets and liabilities are valued in accordance with U.S. Generally Accepted Accounting Principles (GAAP). The NAV calculation includes expenses, dividend income, interest income, other income and realized and unrealized investment gains and losses through the date of the calculation. Changes in holdings of investments and in the number of outstanding Shares are included in the calculation not later than the first business day following such change. Any assets or liabilities denominated in foreign currencies are converted into U.S. dollars using an exchange rate obtained from a third party.

The Fund follows procedures that are common in the mutual fund industry regarding errors made in the calculation of its NAV. This means that, generally, the Fund will not correct errors of less than one cent per Share.

Fair Valuation and Significant Events Procedures

Pursuant to Rule 2a-5 under the Investment Company Act of 1940, as amended, the Board has designated the Adviser as the Fund's valuation designee to perform the fair value determination for securities and other assets held by the Fund. The Adviser, acting through its "Valuation Committee," is responsible for determining the fair value of investments for which market quotations are not readily available. The Valuation Committee is comprised of officers of the Adviser and certain of the Adviser's affiliated companies and determines fair value and oversees the calculation of the NAV. The Valuation Committee is also authorized to use pricing services to provide price evaluations of the current fair value of certain investments for purposes of calculating the NAV. The Valuation Committee is subject to Board oversight and certain reporting and other requirements intended to provide the Board the information it needs to oversee the Adviser's fair value determinations.

Pricing Service Valuations. The Valuation Committee, subject to Board oversight, is authorized to use pricing services that provide daily fair value evaluations of the current value of certain investments, primarily debt instruments and OTC derivatives contracts. Different pricing services may provide different price evaluations for the same security because of differences in their methods of evaluating market values. Factors considered by pricing services in evaluating an investment include the yields or prices of investments of comparable quality, coupon, maturity, call rights and other potential prepayments, terms and type, reported transactions, indications as to values from dealers and general market conditions. A pricing service may find it more difficult to apply these and other factors to relatively illiquid or volatile investments, which may result in less frequent or more significant changes in the price evaluations of these investments. If a pricing service determines that it does not have sufficient information to use its standard methodology, it may evaluate an investment based on the present value of what investors can reasonably expect to receive from the issuer's operations or liquidation.

Special valuation considerations may apply with respect to the Fund's "odd-lot" positions, if any, as the Fund may receive lower prices when it sells such positions than it would receive for sales of institutional round lot positions. Typically, these securities are valued assuming orderly transactions of institutional round lot sizes, but the Fund may hold or, from time to time, transact in such securities in smaller, odd lot sizes.

The Valuation Committee oversees the Fund's pricing services, which includes, among other things, monitoring significant or unusual price fluctuations above predetermined tolerance levels from the prior day, back-testing of pricing services' prices against actual sale transactions, conducting periodic due diligence meetings and reviews, and periodically reviewing the inputs, assumptions and methodologies used by these pricing services. If information furnished by a pricing service is not readily available or, in the opinion of the Valuation Committee, is deemed not representative of the fair value of such security, the security will be fair valued by the Valuation Committee in accordance with procedures established by the Adviser as discussed below in "Fair Valuation Procedures."

Some pricing services provide a single price evaluation reflecting the bid-side of the market for an investment (a "bid" evaluation). Other pricing services offer both bid evaluations and price evaluations indicative of a price between the bid and ask prices for the investment (a "mid" evaluation). The Fund normally uses bid evaluations for any U.S. Treasury and Agency securities, mortgage-backed securities and municipal securities. The Fund normally uses mid evaluations for any other types of debt instruments and any OTC derivative contracts.

Fair Valuation Procedures. The Adviser has established procedures for determining the fair value of investments for which price evaluations from pricing services or dealers and market quotations are not readily available. The procedures define an investment's "fair value" as the price that the Fund might reasonably expect to receive upon its current sale. The procedures assume that any sale would be made to a willing buyer in the ordinary course of trading. The procedures require consideration of factors that vary based on the type of investment and the information available. Factors that may be considered in determining an investment's fair value include: (1) the last reported price at which the investment was traded; (2) information provided by dealers or investment analysts regarding the investment or the issuer; (3) changes in financial conditions and business prospects disclosed in the issuer's financial statements and other reports; (4) publicly announced transactions (such as tender offers and mergers) involving the issuer; (5) comparisons to other investments or to financial indices that are correlated to the investment; (6) with respect to debt instruments, changes in market yields and spreads; (7) with respect to investments that have been suspended from trading, the circumstances leading to the suspension; and (8) other factors that might affect the investment's value.

The Valuation Committee is responsible for the day-to-day implementation of these procedures subject to the oversight of the Board. The Valuation Committee may also authorize the use of a financial valuation model to determine the fair value of a specific type of investment. The Board periodically reviews the fair valuations made by the Valuation Committee. The Board has also approved the Adviser's fair valuation procedures and significant events procedures as part of the Fund's compliance program and will review any changes made to the procedures.

Using fair value to price investments may result in a value that is different from an investment's most recent closing price and from the prices used by other registered funds to calculate their NAVs. The application of the fair value procedures to an investment represents a good faith determination of such investment's fair value. There can be no assurance that the Fund could obtain the fair value assigned to an investment if it sold the investment at approximately the time at which the Fund determines its NAV per share, and the actual value could be materially different.

Significant Events. The Adviser has adopted procedures requiring an investment to be priced at its fair value whenever the Adviser determines that a significant event affecting the value of the investment has occurred between the time as of which the price of the investment would otherwise be determined and the time as of which the NAV is computed. An event is considered significant if there is both an affirmative expectation that the investment's value will change in response to the event and a reasonable basis for quantifying the resulting change in value. Examples of significant events that may occur after the close of the principal market on which a security is traded, or after the time of a price evaluation provided by a pricing service or a dealer, include:

- With respect to securities traded principally in foreign markets, significant trends in U.S. equity markets or in the trading of foreign securities index futures contracts;
- Political or other developments affecting the economy or markets in which an issuer conducts its operations or its securities are traded; and
- Announcements concerning matters such as acquisitions, recapitalizations or litigation developments, or a natural disaster affecting the issuer's operations or regulatory changes or market developments affecting the issuer's industry.

The Adviser has adopted procedures whereby the Valuation Committee uses a pricing service to provide factors to update the fair value of equity securities traded principally in foreign markets from the time of the close of their respective foreign stock exchanges to the pricing time of the Fund. The pricing service uses models that correlate changes between the closing and opening price of equity securities traded primarily in non-U.S. markets to changes in prices in U.S.-traded securities and derivative contracts. The pricing service seeks to employ the model that provides the most significant correlation based on a periodic review of the results. The model uses the correlation to adjust the reported closing price of a foreign equity security based on information available up to the close of the NYSE.

The fair valuation of securities following a significant event can serve to reduce arbitrage opportunities for short-term traders to profit at the expense of long-term investors in the Fund. For example, such arbitrage opportunities may exist when the market on which portfolio securities are traded closes before the Fund calculates its NAV, which is typically the case with Asian and European markets. However, there is no assurance that these significant event procedures will prevent dilution of the NAV by short-term traders.

For other significant events, the Fund may seek to obtain more current quotations or price evaluations from alternative pricing sources. If a reliable alternative pricing source is not available, the fair value of the investment is determined using the methods discussed above in "*Fair Valuation Procedures.*" The Board periodically reviews fair valuations made in response to significant events.

REDEMPTION IN-KIND

Although the Fund intends to pay Share redemptions in cash, it reserves the right, as described below, to pay the redemption price in whole or in part by a distribution of the Fund's portfolio securities.

Because the Fund has elected to be governed by Rule 18f-1 under the 1940 Act, the Fund is obligated to pay Share redemptions to any one shareholder in cash only up to the lesser of \$250,000 or 1% of the net assets represented by such Share class during any 90-day period.

Any Share redemption payment greater than this amount will also be in cash unless the Fund's Board determines that payment should be in-kind. In such a case, the Fund will pay all or a portion of the remainder of the redemption in portfolio securities, valued in the same way as the Fund determines its NAV. The portfolio securities will be selected in a manner that the Fund's Board deems fair and equitable and, to the extent available, such securities will be readily marketable.

Redemption in-kind is not as liquid as a cash redemption. If redemption is made in-kind, shareholders receiving the portfolio securities and selling them before their maturity could receive less than the redemption value of the securities and could incur certain transaction costs.

Taxation of the Fund

The Fund intends to meet requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. If these requirements are not met, it will not receive special tax treatment and will be subject to federal corporate income tax.

The Fund will be treated as a single, separate entity for federal income tax purposes so that income earned and capital gains and losses realized by the Trust's other portfolios will be separate from those realized by the Fund.

The Fund is entitled to a loss carryforward, which may reduce the taxable income or gain that the Fund would realize, and to which the shareholder would be subject, in the future.

TAX BASIS INFORMATION

The Fund's Transfer Agent and/or your financial intermediary is required to provide you with the cost basis information on the sale of any of your Shares in the Fund, subject to certain exceptions.

SECURITIES LENDING ACTIVITIES

The services provided to the Fund by Citibank, N.A. as securities lending agent may include the following: selecting securities previously identified by the Fund as available for loan to be loaned; locating borrowers identified in the securities lending agency agreement; negotiating loan terms; monitoring daily the value of the loaned securities and collateral; requiring additional collateral as necessary; marking to market non-cash collateral; instructing the Fund's custodian with respect to the transfer of loaned securities; indemnifying the Fund in the event of a borrower default; and arranging for return of loaned securities to the Fund at loan termination.

The Fund did not participate in any securities lending activities during the Fund's most recently completed fiscal year.

Gross income from securities lending activities	\$00.00
<i>Fees and/or compensation for securities lending activities and related services</i>	
Fees paid to securities lending agent from a revenue split	\$00.00
Fees paid for any cash collateral management service (including fees deducted from a pooled cash collateral reinvestment vehicle) that are not included in the revenue split	—
Administrative fees not included in revenue split	—
Indemnification fee not included in revenue split	—
Rebate (paid to borrower)	\$00.00
Other fees not included in revenue split (specify)	—
Aggregate fees/compensation for securities lending activities	\$00.00
Net income from securities lending activities	\$00.00

Financial Information

The Financial Statements for the Fund for the fiscal year ended June 30, 2023, are incorporated herein by reference to the Annual Report to Shareholders of Bank Loan Core Fund dated June 30, 2023.

Investment Ratings

STANDARD & POOR'S RATING SERVICES (S&P) LONG-TERM ISSUE RATINGS

Issue credit ratings are based, in varying degrees, on S&P's analysis of the following considerations: the likelihood of payment-capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation; the nature of and provisions of the obligation; and the protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

AAA—An obligation rated "AAA" has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA—An obligation rated "AA" differs from the highest rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A—An obligation rated "A" is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB—An obligation rated "BBB" exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Obligations rated "BB," "B," "CCC," "CC" and "C" are regarded as having significant speculative characteristics. "BB" indicates the least degree of speculation and "C" the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB—An obligation rated "BB" is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B—An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB,” but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitment on the obligation.

CCC—An obligation rated “CCC” is currently vulnerable to nonpayment, and is dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC—An obligation rated “CC” is currently highly vulnerable to nonpayment.

C—A “C” rating is assigned to obligations that are currently highly vulnerable to nonpayment, obligations that have payment arrearages allowed by the terms of the documents, or obligations of an issuer that is the subject of a bankruptcy petition or similar action which have not experienced a payment default. Among others, the “C” rating may be assigned to subordinated debt, preferred stock or other obligations on which cash payments have been suspended in accordance with the instrument’s terms or when preferred stock is the subject of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

D—An obligation rated “D” is in payment default. The “D” rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within five business days, irrespective of any grace period. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action if payments on an obligation are jeopardized. An obligation’s rating is lowered to “D” upon completion of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

The ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

S&P RATING OUTLOOK

An S&P rating outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions.

Positive—Positive means that a rating may be raised.

Negative—Negative means that a rating may be lowered.

Stable—Stable means that a rating is not likely to change.

Developing—Developing means a rating may be raised or lowered.

N.M.—N.M. means not meaningful.

S&P SHORT-TERM ISSUE RATINGS

Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the United States, for example, that means obligations with an original maturity of no more than 365 days – including commercial paper.

A-1—A short-term obligation rated “A-1” is rated in the highest category by S&P. The obligor’s capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

A-2—A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitment on the obligation is satisfactory.

A-3—A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B—A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor’s inadequate capacity to meet its financial commitments.

C—A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitment on the obligation.

D—A short-term obligation rated “D” is in payment default. The “D” rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

MOODY'S INVESTOR SERVICES, INC. (MOODY'S) LONG-TERM RATINGS

Moody's long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default.

Aaa—Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa—Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A—Obligations rated A are judged to be upper-medium-grade and are subject to low credit risk.

Baa—Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Ba—Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

B—Obligations rated B are considered speculative and are subject to high credit risk.

Caa—Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

Ca—Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C—Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from Aaa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

MOODY'S SHORT-TERM RATINGS

Moody's short-term ratings are assigned to obligations with an original maturity of 13 months or less and reflect the likelihood of a default on contractually promised payments.

P-1—Issuers (or supporting institutions) rated P-1 have a superior ability to repay short-term debt obligations.

P-2—Issuers (or supporting institutions) rated P-2 have a strong ability to repay short-term debt obligations.

P-3—Issuers (or supporting institutions) rated P-3 have an acceptable ability to repay short-term obligations.

NP—Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

FITCH, INC. (FITCH) LONG-TERM DEBT RATINGS

Fitch long-term ratings report Fitch's opinion on an entity's relative vulnerability to default on financial obligations. The "threshold" default risk addressed by the rating is generally that of the financial obligations whose non-payment would best reflect the uncured failure of that entity. As such, Fitch long-term ratings also address relative vulnerability to bankruptcy, administrative receivership or similar concepts, although the agency recognizes that issuers may also make pre-emptive and therefore voluntary use of such mechanisms.

AAA: Highest Credit Quality—"AAA" ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA: Very High Credit Quality—"AA" ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A: High Credit Quality—"A" ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB: Good Credit Quality—"BBB" ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

BB: Speculative—"BB" ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial flexibility exists which supports the servicing of financial commitments.

B: Highly Speculative—"B" ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

CCC: Substantial Credit Risk—Default is a real possibility.

CC: Very High Levels of Credit Risk—Default of some kind appears probable.

C: Exceptionally High Levels of Credit Risk—Default is imminent or inevitable, or the issuer is in standstill. Conditions that are indicative of a “C” category rating for an issuer include: (a) the issuer has entered into a grace or cure period following non-payment of a material financial obligation; (b) the issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation; or (c) Fitch otherwise believes a condition of “RD” or “D” to be imminent or inevitable, including through the formal announcement of a distressed debt exchange.

RD: Restricted Default—“RD” ratings indicate an issuer that in Fitch’s opinion has experienced an uncured payment default on a bond, loan or other material financial obligation but which has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, and which has not otherwise ceased operating. This would include: (a) the selective payment default on a specific class or currency of debt; (b) the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation; (c) the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; or (d) execution of a distressed debt exchange on one or more material financial obligations.

D: Default—“D” ratings indicate an issuer that in Fitch’s opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, or which has otherwise ceased business.

Default ratings are not assigned prospectively to entities or their obligations; within this context, non-payment on an instrument that contains a deferral feature or grace period will generally not be considered a default until after the expiration of the deferral or grace period, unless a default is otherwise driven by bankruptcy or other similar circumstance, or by a distressed debt exchange.

“Imminent” default typically refers to the occasion where a payment default has been intimated by the issuer, and is all but inevitable. This may, for example, be where an issuer has missed a scheduled payment, but (as is typical) has a grace period during which it may cure the payment default. Another alternative would be where an issuer has formally announced a distressed debt exchange, but the date of the exchange still lies several days or weeks in the immediate future.

In all cases, the assignment of a default rating reflects the agency’s opinion as to the most appropriate rating category consistent with the rest of its universe of ratings, and may differ from the definition of default under the terms of an issuer’s financial obligations or local commercial practice.

FITCH SHORT-TERM DEBT RATINGS

A Fitch short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity or security stream and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as “short-term” based on market convention. Typically, this means up to 13 months for corporate, sovereign and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

F1: Highest Short-Term Credit Quality—Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

F2: Good Short-Term Credit Quality—Good intrinsic capacity for timely payment of financial commitments.

F3: Fair Short-Term Credit Quality—The intrinsic capacity for timely payment of financial commitments is adequate.

B: Speculative Short-Term Credit Quality—Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near-term adverse changes in financial and economic conditions.

C: High Short-Term Default Risk—Default is a real possibility.

RD: Restricted Default—Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Applicable to entity ratings only.

D: Default—Indicates a broad-based default event for an entity, or the default of a short-term obligation.

A.M. BEST COMPANY, INC. (A.M. BEST) LONG-TERM DEBT AND PREFERRED STOCK RATINGS

A Best’s long-term debt rating is Best’s independent opinion of an issuer/entity’s ability to meet its ongoing financial obligations to security holders when due.

aaa: Exceptional—Assigned to issues where the issuer has an exceptional ability to meet the terms of the obligation.

aa: Very Strong—Assigned to issues where the issuer has a very strong ability to meet the terms of the obligation.

a: Strong—Assigned to issues where the issuer has a strong ability to meet the terms of the obligation.

bbb: Adequate—Assigned to issues where the issuer has an adequate ability to meet the terms of the obligation; however, the issue is more susceptible to changes in economic or other conditions.

bb: Speculative—Assigned to issues where the issuer has speculative credit characteristics, generally due to a modest margin or principal and interest payment protection and vulnerability to economic changes.

b: Very Speculative—Assigned to issues where the issuer has very speculative credit characteristics, generally due to a modest margin of principal and interest payment protection and extreme vulnerability to economic changes.

ccc, cc, c: Extremely Speculative—Assigned to issues where the issuer has extremely speculative credit characteristics, generally due to a minimal margin of principal and interest payment protection and/or limited ability to withstand adverse changes in economic or other conditions.

d: In Default—Assigned to issues in default on payment of principal, interest or other terms and conditions, or when a bankruptcy petition or similar action has been filed.

Ratings from “aa” to “ccc” may be enhanced with a “+” (plus) or “-” (minus) to indicate whether credit quality is near the top or bottom of a category.

A.M. BEST SHORT-TERM DEBT RATINGS

A Best’s short-term debt rating is Best’s opinion of an issuer/entity’s ability to meet its financial obligations having original maturities of generally less than one year, such as commercial paper.

AMB-1+ Strongest—Assigned to issues where the issuer has the strongest ability to repay short-term debt obligations.

AMB-1 Outstanding—Assigned to issues where the issuer has an outstanding ability to repay short-term debt obligations.

AMB-2 Satisfactory—Assigned to issues where the issuer has a satisfactory ability to repay short-term debt obligations.

AMB-3 Adequate—Assigned to issues where the issuer has an adequate ability to repay short-term debt obligations; however, adverse economic conditions likely will reduce the issuer’s capacity to meet its financial commitments.

AMB-4 Speculative—Assigned to issues where the issuer has speculative credit characteristics and is vulnerable to adverse economic or other external changes, which could have a marked impact on the company’s ability to meet its financial commitments.

d: In Default—Assigned to issues in default on payment of principal, interest or other terms and conditions, or when a bankruptcy petition or similar action has been filed.

A.M. BEST RATING MODIFIERS

Both long- and short-term credit ratings can be assigned a modifier.

u—Indicates the rating may change in the near term, typically within six months. Generally is event-driven, with positive, negative or developing implications.

pd—Indicates ratings assigned to a company that chose not to participate in A.M. Best’s interactive rating process (discontinued in 2010).

i—Indicates rating assigned is indicative.

A.M. BEST RATING OUTLOOK

A.M. Best Credit Ratings are assigned a Rating Outlook that indicates the potential direction of a credit rating over an intermediate term, generally defined as the next 12 to 36 months.

Positive—Indicates possible ratings upgrade due to favorable financial/market trends relative to the current trading level.

Negative—Indicates possible ratings downgrade due to unfavorable financial/market trends relative to the current trading level.

Stable—Indicates low likelihood of rating change due to stable financial/market trends.

NOT RATED

Certain nationally recognized statistical rating organizations (NRSROs) may designate certain issues as NR, meaning that the issue or obligation is not rated.
