

**Firm Overview**

*Federated Clover Investment Advisors, part of Federated's global equity team, provides value-focused investment advisory services to institutional and private clients. Located in Rochester, NY, Federated Clover has dedicated itself to consistent value equity management since 1984.*

**Strategy Highlights**

**Style**

All Cap Value

**Approach**

Bottom-up Fundamental Stock Selection

**Benchmark**

Russell 3000® Value Index

**Inception Date**

1/1/88

**Key Investment Team**

**Stephen K. Gutch, CFA**

*Senior Vice President,  
Senior Portfolio Manager,  
Head of Clover Value Team  
24 Years Experience*

**Investment Philosophy**

Federated Clover's approach to value equity investing integrates bottom up, fundamental analysis with rigorous quantitative analysis to exploit inefficiencies in the market. The team's process targets alpha through security selection which centers upon free cash flow analysis. Portfolios are actively managed through systematic monitoring of factor risks which allows the portfolio managers to minimize unintended macroeconomic exposures while allocating capital to the team's highest conviction ideas.

**Product Details**

Characterizing mispricing through Change and Cash Flow

■ **Fundamental Drivers of Positive Change**

- Internal Change – Company Level
- External Change – Industry Level

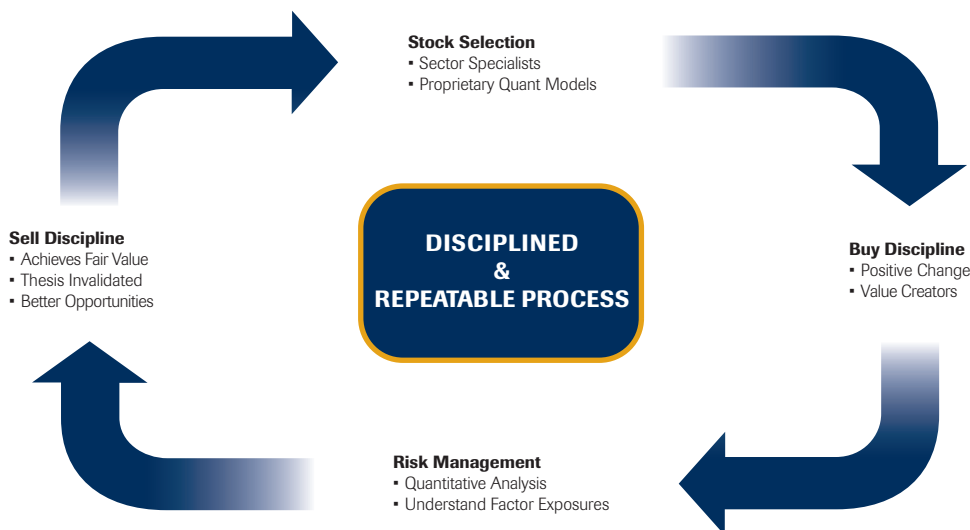

■ **Free Cash Flow Valuation Focus**

- Allocation – Creating Shareholder Value
- Acceleration – Improving Profitability

**Distinguishing Characteristics**

- **Evidence-based Process:** Combines best practices of fundamental and quantitative analysis.
- **Proactive Portfolio Construction:** Advanced risk management ensures alpha is driven by stock selection.
- **No Market Cap Restrictions:** : Able to select the most attractive opportunities, regardless of size; Able to hold a company as it grows, enhancing return potential, reducing costs and improving tax efficiency.

**Investment Process**

\*Represents the 3-year annualized standard deviation for both the composite and index returns. This statistic is used to measure the volatility of composite returns.

\*\*Standard deviation is calculated using gross returns. Standard deviation is not applicable ("N/A") for any period if fewer than five accounts are in the composite for that period. (See footnote 5)

Portfolios in this composite must be invested in equity securities with an investment objective of long-term capital appreciation. Portfolios in this composite invest substantially in equity securities of U.S. companies from a broad range of large, medium and small market capitalization companies, which typically are found in the Russell 3000 Value Index. The objective is to create a diversified portfolio of equities with lower-than-average valuations and improving fundamental business outlooks. Portfolios eligible for this composite may include portfolios managed on behalf of registered investment companies (mutual funds) or separate account portfolios. In addition, this composite may include portfolios with client-directed trading requirements. All members of this composite must be fully discretionary, tax-exempt portfolios with an asset market value of at least \$250,000, plus or minus 15%, solely due to unrealized appreciation or depreciation, respectively, and mutual funds that are managed according to this objective. This composite was created in January 1993. Federated Clover Investment Advisors, a division of Federated Global Investment Management, has managed portfolios in this investment style since January 1988. Firm assets prior to December 2008 are of an acquired entity of Federated Investors. Performance presented prior to December 2008 occurred while the Portfolio Management Team members were affiliated with a prior firm. Federated Investors claims compliance with the Global Investment Performance Standards ("GIPS®") and has prepared and presented this report in compliance with the GIPS® standards. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy of quality of the content contained herein. Federated Investors has been independently verified for the period of January 1, 1992, through September 30, 2019. The verification report is available upon request. A firm that claims compliance with the GIPS® standards must establish policies and procedures for complying with all the applicable requirements of the GIPS® standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS® standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. The firm's separately managed account fee schedule for this product is 0.70% on the first \$5 million; 0.60% on \$5 - \$25 million; 0.50% on \$25 - \$50 million; 0.40% on \$50 - \$100 million; 0.35% on assets greater than \$100 million. Net of fee performance is calculated monthly using the actual net return after the deduction of all expenses for all portfolios in the composite. Actual fees may vary by client.

See Notes to the Schedule of Rates of Return and Statistics

## Notes to the Schedule of Rates of Returns and Statistics:

- 1. Federated Investors is a global, independent, multi-strategy investment management firm with offices in Pittsburgh, New York, Rochester, Boston, Cleveland, and London. For GIPS® purposes, Federated Investors is defined to include the assets of registered investment companies, separate (or private) accounts, managed accounts (including wrap accounts) and commingled or collective trusts that are advised or sub-advised by the following subsidiaries: Federated Equity Management Co. of PA; Federated Investment Counseling; Federated Investment Management Co.; Federated Global Investment Management Corp., to include effective December, 2008, (the date of acquisition) the institutional assets of Federated Clover Investment Advisors, and effective September, 2009, (the date the assets were brought into compliance) the SMA/Wrap assets of Federated Clover Investment Advisors; Federated International Management Limited; MDT Advisers; and effective April, 2012 (the date of acquisition) Federated Investors (UK) LLP. Firm assets on this report exclude the advisory-only, model-based assets that may be included in other reports providing total firm assets.*
- 2. Interest income and dividends are recognized on an accrual basis. Returns include the reinvestment of all income.*
- 3. All market values and performance information are valued in U.S. dollars unless currency is denoted in composite title.*
- 4. With the exception of the Federated Clover Investment Advisors composites, annual composite dispersion is measured and presented using the asset weighted standard deviation of the returns of all of the portfolios included in the composite over the entire year. Quarterly dispersion is measured using all portfolios included in the composite for that quarter. With regard to Federated Clover Investment Advisors composites, annual dispersion is measured using the equal weighted standard deviation of the returns of all the portfolios included in the composite over the entire year.*
- 5. Composite dispersion does not measure the risk of the product presented, it simply measures the return variance among portfolios managed in a similar fashion. This variance can be affected by variations in cash flow or specific client parameters among the portfolios comprising the composites, as well as by Federated's execution of strategy across accounts.*
- 6. See the composite description language on the prior page for a discussion on appropriate fees currently applied to calculate composite performance. With regard to the institutional composites not managed by the Federated Clover or MDT Advisers teams, for the period July 1, 1992 through September 30, 2009, net of fee performance was calculated monthly by reducing the gross composite return by the highest actual fee of any account in the composite for that month, regardless of investment vehicle. Prior to this, the maximum management fee charged for the period July 1, 1992 through September 30, 1992 was used to calculate net of fee performance back to inception of the composite. In addition, further fee information can be obtained from Federated's respective Forms ADV Part 2 Brochure Item 5.*
- 7. Additional information regarding the policies for valuing portfolios, calculating performance, and preparing compliant presentations, as well as a complete list and description of the firm's composites is available upon request.*
- 8. Past performance is not indicative of future results.*
- 9. See disclosures on the Schedule of Rates of Return and Statistics Reports for additional information.*
