Performance quoted represents past performance, which is no guarantee of future results. Investment return will vary. An investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, contact us or visit FederatedInvestors.com.

Under the investment advisory contract, the Advisor is required to reimburse/waive the amount, limited to the amount of the management fee, by which the Fund's aggregate annual operating expenses, including the management fee, but excluding interest, taxes, brokerage commissions, expenses of registering and qualifying the Fund and its shares under federal and state laws, expenses of withholding taxes and extraordinary expenses exceed (after voluntary waivers and reimbursements) 0.45% of the Fund's IS class average daily net assets. The Advisor and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses so that the total annual fund operating expenses (excluding acquired fund fees and expenses, extraordinary expenses, interest expense and proxy related expenses, if any) paid by the Fund's IS class (after the voluntary waivers and/or reimbursements) will not exceed 0.20% (the "Fee Limit") up to but not including the later of (the "Termination Date"): (a) October 1, 2020; or (b) the date of the Fund's next effective Prospectus. While the Advisor and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Fund's Board of Trustees.

Otherwise, the 7-day yield would have been 1.73% and total return would have been lower.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Yield quotations more closely reflect the current earnings of the fund than the total return quotation.

Rule 2a-7 requires that money market funds maintain at least 10% daily liquidity assets and at least 30% weekly liquidity assets. Both requirements are 'point of purchase' requirements. Thus, it is possible that money market funds may, at any given time, have liquidity percentages reflecting less than the 10% and 30% thresholds. In such circumstances, the portfolio manager will be required to purchase securities to meet the requisite liquidity thresholds prior to purchasing longer-dated securities. Additionally, the SEC requirements for what may be defined as 'daily' and 'weekly' differs from the standard maturities used in calculating the 'Effective Maturity Schedule.' Therefore, the percentages in the 2a-7 Liquidity table will generally not equal the amounts shown in the 'Effective Maturity Schedule.'

*This fund is on the National Association of Insurance Commissioner's list as a U.S. Direct Obligations/Full Faith & Credit listing. This designation denotes that the fund meets certain quality and pricing guidelines such as: a rating of AAAM or Aaa-mf by a Nationally Recognized Statistical Rating Organization (NRSRO), maintain a constant NAV \$1.00 at all times, allow a maximum 7 day redemption of proceeds, invest 100% in U.S. government securities. This is subject to an annual review.

Federated Trust for U.S. Treasury Obligations

Portfolio Manager Commentary

In the third quarter of 2019, the Federal Reserve cut its benchmark rate twice, the Libor curve returned to being positively sloped and U.S.-China trade negotiations remained unresolved. The policy easing steps by the Federal Reserve and other developments put downward pressure on yields on short-term securities and returns in the liquidity space. However, investors continued to favor money market funds and similar products, with inflows continuing.

After steadily raising it for several years, in July the Fed reduced its federal funds rate for the first time since the financial crisis. Policymakers took great care in describing the action to the markets for fear it would be misunderstood amid growing calls for easing. Their primary message was that the quarter-point move to a target range of 2-2.25% was not the first step in a descent to the zero-rate environment of the years following the Great Recession, but part of its continuing attempt to normalize policy and spur inflation. Fed Chair Jerome Powell specifically referred to the cut as a “mid-cycle adjustment to policy” rather than the start of a new stimulus cycle. The Treasury yield curve continued to be inverted, a sign that historically predicted a recession, but as the period progressed it began to flatten and eventually steepen as expectations of a Fed cut in September grew. This came to pass, with policymakers lowering the target range again by 25 basis points to 1.75-2%. However, dissent grew, as two members of the Federal Open Market Committee voted to leave rates unchanged and another preferred to lower them by 50 basis points.

The third quarter was an eventful one for the government space. Sandwiched between the two rate cuts was a rare case of volatility in the overnight repo market. The latter resulted from a confluence of technical factors—including corporate quarterly tax payments and a large settlement of net new Treasury supply—not a credit event. The Fed intervened and the volatility subsided. As the quarter ended, domestic economic indicators, while moderating, did not point to an imminent recession.

The Treasury yield curve ended the quarter with 1-month at 1.90%, 3-month at 1.83%, 6-month at 1.83% and 12-month at 1.77%. The London interbank offered rate (Libor) curve finished with 1-month at 2.03%, 3-month at 2.10%, 6-month at 2.06% and 12-month at 2.04%.

You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

The fund has not elected to be subject to the liquidity fees and gates requirement at this time.

Performance shown is for Institutional Shares. The fund offers additional share classes whose performance will vary due to differences in charges and expenses. Please consult your financial institution regarding your eligibility to purchase these classes.

A Word About Risk

Fund shares are not guaranteed by the U.S. government.

Current and future portfolio holdings are subject to risk.

Definitions

Net yields are based on the average daily income dividend and average net asset value for the 7 days ended on the date of calculation. The 7-day net annualized yield is based on the average net income per share for the 7 days ended on the date of calculation and the offering price on that date.

The fund is a managed portfolio and its holdings are subject to change.

The holdings percentages are based on net assets at the close of business on 9/30/19 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes.

Weighted Average Maturity is the mean average of the periods of time remaining until the securities held in the fund's portfolio (a) are scheduled to be repaid, (b) would be repaid upon a demand by the fund or (c) are scheduled to have their interest rate readjusted to reflect current market rates. Securities with adjustable rates payable upon demand are treated as maturing on the earlier of the two dates if their scheduled maturity is 397 days or less, and the later of the two dates if their scheduled maturity is more than 397 days. The mean is weighted based on the percentage of the amortized cost of the portfolio invested in each period.

Weighted Average Life is calculated in the same manner as the Weighted Average Maturity (WAM), but is based solely on the periods of time remaining until the securities held in the fund's portfolio (a) are scheduled to be repaid or (b) would be repaid upon a demand by the fund without reference to when interest rates of securities within the fund are scheduled to be readjusted.

Repurchase agreements consist of a financial institution selling securities to a fund and agreeing to repurchase them at a mutually agreed upon price and time.

Ratings And Rating Agencies

Ratings are based on an evaluation of several factors, including credit quality, diversification and maturity of assets in the portfolio, as well as management strength and operational capabilities. A money market fund rated AAAm by Standard & Poor's is granted after evaluating a number of factors, including credit quality, market price, exposure and management. Money market funds rated Aaa-mf by Moody's are judged to be of an investment quality similar to Aaa-rated fixed income obligations, that is, they are judged to be of the best quality. For more information on credit ratings, visit standardandpoors.com and moody's.com.

Ratings are subject to change and do not remove market risk.

Credit ratings do not provide assurance against default or other loss of money and can change.

This must be preceded or accompanied by a current prospectus.
