Portfolio Manager Commentary

In January, U.S. Treasury Secretary Janet Yellen announced that the federal government's statutory debt limit had been reached and that the Treasury Department was forced to implement "extraordinary measures" to meet its obligations. Yellen warned that the "X date"—the day it exhausts its cash balance held at the Federal Reserve—could come in June. As in past cases, lawmakers pushed the negotiations to the brink before finally voting to suspend the limit until January 2025. The immediate result was that the Treasury embarked on plans to issue a massive amount of securities to replenish its coffers. Some estimates put that amount as high as \$1 trillion, based on the need to make whole the federal accounts in which it redeemed or suspended investments, service the national debt and fund government spending. The preponderance of the issuance will come in bills, a process that started as the second quarter drew to a close.

In the first of two Federal Open Market Committee (FOMC) meetings during the quarter, policymakers disregarded the debt ceiling debate and raised the fed funds target range by 25 basis points. That lifted it to a 16-year high of 5-5.25%. The rationale was that restricting the economy to fight inflation was critical despite the uncertainty. Most measures of inflation continued to decrease, but remained stubbornly above the Fed's 2% target, and the labor market and consumer spending remained strong.

Intriguingly, at its June FOMC meeting the Fed made a different decision after the resolution of the debt limit debate, declining to change the policy range after 10 straight hikes. This announcement was paired with policymaker projections that rates likely will continue to rise. As the quarter closed, public comments by Fed Chair Jerome Powell suggested the tightening cycle that began in March 2022 was not over.

At the end of the month, yields on 1-, 3-, 6- and 12-month U.S. Treasuries were 5.14%, 5.32%, 5.45% and 5.42%, respectively; the 1-, 3-, 6- and 12-month Bloomberg Short-Term Bank Yield Index rates (BSBY) were 5.21%, 5.47%, 5.67% and 5.93%, respectively; the 1-, 3-, 6- and 12-month London interbank offered rates were 5.26%, 5.53%, 5.81% and 6.04%, respectively. Since US\$ LIBOR rates are no longer being reported, this is the last time they will appear on this update.
