

Federated Hermes Prudent Bear Fund

Nasdaq symbol — IS: PBRIX | A: BEARX | C: PBRXC

6/30/20

Product highlights

- Pursues capital appreciation.
- Seeks to help investors benefit from a declining U.S. stock market through the convenience of an actively managed bear fund.
- Employs strategic short selling supported by an intensive security-by-security research process.
- Long positions in stocks that the portfolio management team feels are undervalued.
- Historically negative correlation with major U.S. and international equity markets; low correlation with other markets.
- Seeks to limit losses in bull markets through defined risk-management strategies.

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedInvestors.com. Maximum offering price figures reflect the maximum sales charge of 5.5% for A Shares, and the maximum contingent deferred sales charge of 1% for C Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund.

* The fund's expense ratio is from the most recent prospectus. The expense ratio may reflect voluntary fee waivers and/or expense reimbursements determined by the fund's Advisor and/or its affiliates. The voluntary waivers and/or reimbursements, if applicable, are in effect up to but not including the later of 12/1/20 or the date of the fund's next effective prospectus. The expense ratio includes Dividends and Other Expenses Related to Short Sales. If Dividends and Other Expenses Related to Short Sales were excluded, the total net expenses for Class A, C and IS Shares would have been 1.83%, 2.58% and 1.58% respectively.

¹ Excluding Short Sale Expenses.

Federated Hermes Prudent Bear Fund

Growth over time

If you had invested \$10,000 in A Shares on 12/31/95 (month end of the fund's performance inception) and reinvested all distributions, here's what your account would have been worth as of 6/30/20.

Federated Prudent Bear Fund is the successor to Prudent Bear Fund, pursuant to a reorganization that took place on December 5, 2008. Prior to that date, Federated Prudent Bear Fund had no investment operations. Accordingly, performance information shown for periods prior to December 5, 2008, is historical information for the former No Load Shares but has been adjusted to reflect the maximum sales charges and expenses applicable to the fund's A and C Shares and to remove any voluntary waiver of expenses related to the No Load Shares that may have occurred prior to commencement of operations of the Institutional Shares. The performance information of the predecessor Prudent Bear Fund has not been adjusted to reflect the expense ratio of the Institutional Shares since the Institutional Shares are estimated to have a lower expense ratio than the expense ratio of the predecessor Prudent Bear Fund's No Load Shares.

As of June 29, 2020, the fund was renamed Federated Hermes Prudent Bear Fund.

A word about risk

Mutual funds are subject to risks and fluctuate in value.

Federated Hermes Prudent Bear Fund regularly makes short sales of securities, which involves unlimited risk including the possibility that losses may exceed the original amount invested. The fund may also use options and future contracts, which have risks associated with unlimited losses of the underlying holdings due to unanticipated market movements and failure to correctly predict the direction of securities prices, interest rates and currency exchange rates. However, a mutual fund investor's risk is limited to one's amount of investment in a mutual fund. The fund may also hold restricted securities purchased through private placements. Such securities may be difficult to sell without experiencing delays or additional costs. Please see the prospectus for further details. Considering the increased risks, the fund may not be suitable for all investors.

Diversification does not assure a profit nor protect against loss.

Definitions

The portfolio composition percentages are based on net assets at the close of business on 6/30/20 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

Growth over time performance is for the fund's A Shares. Figures do not reflect the 5.5% maximum sales charge. The fund offers additional share classes whose performance will vary due to differences in charges and expenses.

Beta analyzes the market risk of a fund by showing how responsive the fund is to the market. The beta of the market is 1.00. Accordingly, a fund with a 1.10 beta is expected to perform 10% better than the market in up markets and 10% worse in down markets. Usually the higher betas represent riskier investments.

S&P 500 Index is an unmanaged capitalization-weighted index of 500 stocks designated to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Indexes are unmanaged and cannot be invested in directly.

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or prospectus containing this and other information, contact us or visit FederatedInvestors.com. Please carefully read the summary prospectus or the prospectus before investing.
