

QUARTERLY UPDATE

Georgia Fund 1 Prime

6/30/24

INTRODUCTION

Investor Goals

The primary objective of GF1 Prime is to provide eligible state and local entities the potential of a higher return for strategic cash investments, over GF1, by adding credit oriented investments.

Portfolio Managers

Paige Wilhelm
Mark Weiss, CFA
Deborah A. Cunningham, CFA

Product Highlights

- Offers participation in a diversified portfolio of high credit quality money market instruments that seek to obtain the highest possible level of current income consistent with preservation of capital and liquidity.
- Robust oversight by the Georgia Office of the State Treasurer and managed in strict compliance with state investment policies and portfolio guidelines.
- Aims to maintain sufficient liquidity to meet reasonably foreseeable participant redemption activity.

Credit Rating AAAmmf Fitch

Portfolio Profile

Weighted Average Maturity	36 Days
Weighted Average Life	77 Days
Pool Assets	\$599.1 million

Effective Maturity Schedule (%)

Liquidity

Daily	24.30%
Weekly	43.90%

Portfolio Composition (%)

Annualized 7-Day Effective Yields (%)

Performance data quoted represents past performance which is no guarantee of future results. Investment return will vary. The value of an investment, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than what is stated.

PORTFOLIO MANAGER COMMENTARY

Reality seemed to catch up with the Federal Reserve in the second quarter. Consecutive updates to its Summary of Economic Projections in December and March indicated policymakers still thought three 25 basis point cuts in the fed funds rate would be appropriate by year-end, despite inflation proving sticky. But Federal Open Market Committee (FOMC) members capitulated in the May meeting. Not only did they keep rates in the target range of 5.25-5.50%, but they also sounded almost despondent in their post-meeting statement: "In recent months, there has been a lack of further progress toward the Committee's 2% inflation objective." Indeed, the annualized growth rate of both the Consumer Price Index and the Personal Consumption Expenditures Index remained in the tight range observed for many months. The dour mood was confirmed in the revised projections released at the June meeting. The new "dot plot" showed that policymakers now think only a single quarter-point cut this year would fit the bill.

These lowered expectations were overall positive news for liquidity products across the industry. An extension of elevated rates likely translates into an extension of elevated yields, offering the potential for prolonging their attractiveness as an investment. Money market funds, in particular, appeared to benefit as assets under management remained around historically lofty levels.

Two other shifts in assets took place in the second quarter. The first was the Fed's decision to reduce the monthly reduction, known as tapering, of its balance sheet, which had grown from huge to colossal during the pandemic. Since June of 2022, the Fed had allowed \$60 billion of Treasuries and \$35 billion of mortgage-backed securities (MBS) to mature without replacing them. Determined to avert any liquidity issues in the vast Treasury market, the FOMC slowed that pace in June of 2024, lowering the monthly cap on Treasuries from \$60 billion to \$25 billion, while keeping the MBS cap at \$35 billion.

The second change emanated from a building a few blocks from Fed headquarters in Washington, D.C. In May, the U.S. Treasury Department announced a program to purchase U.S. Treasuries in the coming months. By purchasing certain maturities of securities, the Dept. intends to facilitate market making, provide liquidity support and mitigate volatility in bill issuance. The latter can occur when it reduces the magnitude of bill auctions because it is flush with cash (primarily on tax collection dates).

At the end of the quarter, yields on 1-, 3-, 6- and 12-month U.S. Treasuries were 5.35%, 5.37%, 5.33% and 5.12%, respectively.

Bloomberg Short-Term Bank Yield Index: The Bloomberg Short Term Bank Yield Index (BSBY) is a proprietary index calculated daily and published at 7:00 am (EST) on each U.S. business day. The index has been developed to address the needs of the market by providing a series of credit sensitive reference rates that incorporate bank credit spreads and defines a forward term structure. BSBY seeks to measure the average yields at which large global banks access USD senior unsecured marginal wholesale funding.

Portfolio composition is subject to change.

Weighted average life (WAL) is defined as the average time a dollar of principal is outstanding at an assumed prepayment rate.

Weighted average maturity is the average time to maturity of debt securities held in the fund.

7-day effective net yield is calculated by taking an average of the past 7 days' net yields less any short-term capital gains.

An investment in the Georgia Fund 1 Prime is not a deposit of a bank and is neither insured nor guaranteed by the State of Georgia or the U.S. government, the Federal Deposit Insurance Corporation (FDIC) or any other government agency. Although the Georgia Fund 1 Prime seeks to preserve the value of your investment at \$1.00 per unit, it is possible to lose money by investing in the Pool. The Pool's yield will vary from day to day based on changes in interest rates and market changes.

The securities in which the Pool invests will be rated in one of the two highest short-term rating categories by one or more Nationally Recognized Statistical Rating Organization or deemed by the Adviser to be of comparable quality to securities having such ratings. Credit ratings do not provide assurance against default or other loss of money.

An investment in the Pool is not insured or guaranteed by any government or government agency. Although the manager of the Pool seeks to preserve principal, it is possible to lose money by depositing money in the Pool.
