Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedInvestors.com.

* The fund's expense ratio is from the most recent prospectus. The expense ratio may reflect voluntary fee waivers and/or expense reimbursements determined by the fund's Advisor and its affiliates. The voluntary waivers and/or reimbursements, if applicable, are in effect up to but not including the later of 11/1/19 or the date of the fund's next effective prospectus.

Federated Hermes SDG Engagement Equity Fund

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or prospectus containing this and other information, contact us or visit FederatedInvestors.com. Please carefully read the summary prospectus or the prospectus before investing.

Past performance is no guarantee of future results.

Federated Global Investment Management Corp. is the adviser of the fund and Hermes Investment Management Limited is the sub adviser.

A Word About Risk

Mutual funds are subject to risks and fluctuate in value.

The fund's strategy is to target companies that the adviser or sub-adviser believes will contribute positive societal impact aligned to the UN SDGs. The fund may underperform funds that do not have such a strategy.

The UN SDGs are as follows: no poverty; zero hunger; good health and well-being; quality education; gender equality; clean water and sanitation; affordable and clean energy; decent work and economic growth; industry, innovation and infrastructure; reduced inequalities; sustainable cities and communities; responsible consumption and production; climate action; life below water; life on land; peace, justice and strong institutions; and partnership for the goals.

International investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

Small company stocks may be less liquid and subject to greater price volatility than large capitalization stocks.

Mid-capitalization companies often have narrower markets and limited managerial and financial resources compared to larger and more established companies.

Definitions

The holdings percentages are based on net assets at the close of business on 12/31/18 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

Weighted Median Market Capitalization is the calculation represented by the median market capitalization of the stocks in the portfolio, weighted by the amount of each stock.

Weighted Median P/E (LTM - Latest Twelve Months) is a ratio comparing share price to earnings per share using data from the previous twelve months.

Weighted Median P/E (NTM - Next Twelve Months) in calculating this, individual holdings with values greater than 60 are capped at 60 in accordance with Morningstar's methodology for calculating "Weighted Median P/E."

Weighted Median Price/Book is a ratio comparing share price to book value or assets minus liabilities.

MSCI All Country World SMID Index captures mid and small cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. With 7,401 constituents, the index covers approximately 28% of the free float-adjusted market capitalization in each country.

Indexes are unmanaged and cannot be invested in directly.

Ratings and Rating Agencies

Morningstar Category identifies funds based on their actual investment styles as measured by their underlying portfolio holdings over the past three years.
