Investment objective and strategy

Liquidity and income in line with current market rates to the extent consistent with the preservation of capital. Investments limited to types of money market instruments, provided they are denominated in US dollars and have a remaining maturity of 397 days or less. Will be managed in a way to maintain an overall weighted average maturity not to exceed 60 days and a weighted average life of 120 days or less. Will only invest in either securities which have been rated (or whose issuers have been rated) in the highest short-term rating category by a US nationally recognized statistical rating organization or in unrated securities that have been determined by the investment manager or sub-advisor to be of comparable quality.

Investment manager's report

Like so many derailed plans in 2020, the Federal Reserve intended its major revision of its "Statement on Longer-Run Goals and Monetary Policy Strategy" to be its momentous policy announcement of the year. Unlike the calibrations that happen in Federal Open Market Committee (FOMC) meetings, this document frames everything U.S. policymakers do. The only thing more fundamental is the Federal Reserve Act that established the central bank in 1913. Of course, Covid-19 happened and the Fed had much more urgent issues. It finally unveiled it at the annual Jackson Hole, Wyo., symposium of world central bankers, announced through a live video feed by Chair Jerome Powell. On the surface it seems dire, but it really isn't. The unfortunate news is the Fed essentially adopted a lower-for-longer stance. It won't raise rates when the economy is getting better-like it did under Janet Yellen (and Powell)-only when conditions are robust. But this approach simultaneously is the good side of the new framework for the liquidity space. Previously the goal was to hit an inflation rate of 2%. Officials have long thought that full employment drives inflation higher, but that hasn't been the case recently. So it will let the labor market run as hot as needed to get to 2%, even if it overshoots that target for "some time." Combined with the Fed moves earlier this year, this new approach might spur inflation sooner than many think after the pandemic ends, meaning the FOMC could raise rates sooner and yields in the liquidity space should rise. Treasury yields ended August with 1-month at 0.09%, 3-month at 0.10%, 6-month at 0.12% and 12-month at 0.14%. The London interbank offered rate (Libor) ended August with 1-month at 0.16%, 3-month at 0.24%, 6-month at 0.31% and 12-month at 0.45%.

About Federated Hermes

A financial industry pioneer since 1955, Federated Hermes, Inc. ("Federated Hermes," formerly, "Federated Investors, Inc.") is one of the largest US investment managers. Known for our stability, diligence and diverse product line, Federated Hermes takes the long view, believing that doing business the right way over time will present opportunity for future growth. We apply the same approach to managing our international undertakings, which began in 1984 with the launch of one of the first international equity funds. Since then Federated Hermes has established a host of international funds and offices, including Federated International Management Limited ("FIML") in Dublin to manage Irish domiciled UCITS, Federated Asset Management GmbH in Frankfurt to service German-speaking countries, Federated Hermes (UK) LLP (formerly Federated Investors (UK) LLP), to manage UK-domiciled UCITS, as well as Federated Investors Canada ULC, to manage a Canadian fund, and the Federated Hermes Short-Term Daily U.S. Dollar Fund, Ltd., based in the Cayman Islands. Highly experienced investment professionals direct our operations, and we continually look to increase our robust global footprint through organic growth and strategic acquisitions.
