Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedInvestors.com. Maximum offering price figures reflect the maximum sales charge of 5.5% for A Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund.

* The fund's expense ratio is from the most recent prospectus. The expense ratio may reflect voluntary fee waivers and/or expense reimbursements determined by the fund's Advisor and its affiliates. The voluntary waivers and/or reimbursements, if applicable, are in effect up to but not including the later of 1/1/22 for Class A and IS and 8/1/22 for R6 or the date of the fund's next effective prospectus.

Federated Hermes SDG Engagement Equity Fund

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or prospectus containing this and other information, contact us or visit FederatedInvestors.com. Please carefully read the summary prospectus or the prospectus before investing.

Past performance is no guarantee of future results.

Federated Global Investment Management Corp. is the advisor of the fund and Hermes Investment Management Limited is the sub advisor.

The fund's A Shares commenced operations on November 5, 2019. For the periods prior to the commencement of operations of the A Shares, the performance information is that of the fund's IS Shares. The total returns of the IS Shares have not been adjusted to reflect the higher expenses applicable to the A Shares, but have been adjusted to reflect the A Shares sales load. The A Shares and the IS Shares are invested in the same portfolio of securities and the annual returns would differ only to the extent that the classes do not have the same expenses. It is anticipated that the expenses of the A Shares will be higher than those of the IS Shares; accordingly, the actual total returns of the A Shares are anticipated to be lower than the total returns of the IS Shares.

The fund's R6 Shares commenced operations on June 11, 2021. For the period prior to the commencement of operations of the R6 Shares, the performance information shown is for the fund's Institutional Shares. The performance of the Institutional Shares has not been adjusted to reflect the expenses applicable to the R6 Shares. The performance for the R6 class would be substantially similar to that of the Institutional class over the same period because the classes are invested in the same portfolio of securities and would differ only to the extent the classes do not have the same expenses.

A word about risk

The fund's use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional instruments.

Mutual funds are subject to risks and fluctuate in value.

The fund's strategy is to target companies that the adviser or sub-adviser believes will contribute positive societal impact aligned to the SDGs. The fund may underperform funds that do not have such a strategy.

The SDGs are as follows: no poverty; zero hunger; good health and well-being; quality education; gender equality; clean water and sanitation; affordable and clean energy; decent work and economic growth; industry, innovation and infrastructure; reduced inequalities; sustainable cities and communities; responsible consumption and production; climate action; life below water; life on land; peace, justice and strong institutions; and partnership for the goals.

International investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

Small company stocks may be less liquid and subject to greater price volatility than large capitalization stocks.

Mid-capitalization companies often have narrower markets and limited managerial and financial resources compared to larger and more established companies.

Definitions

Active share is a measure of the percentage of stock holdings in a portfolio that differ from the benchmark index.

The holdings percentages are based on net assets at the close of business on 9/30/21 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

Weighted median P/E (LTM - latest twelve months) is a ratio comparing share price to earnings per share using data from the previous twelve months.

Weighted median P/E (NTM - next twelve months) in calculating this, individual holdings with values greater than 60 are capped at 60 in accordance with Morningstar's methodology for calculating "weighted Median P/E."

Weighted median market capitalization is the calculation represented by the median market capitalization of the stocks in the portfolio, weighted by the amount of each stock.

Weighted median price/book is a ratio comparing share price to book value or assets minus liabilities.

MSCI All Country World SMID Index captures mid and small cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. With 7,401 constituents, the index covers approximately 28% of the free float-adjusted market capitalization in each country."

Indexes are unmanaged and cannot be invested in directly.

Ratings and rating agencies

Morningstar Category identifies funds based on their actual investment styles as measured by their underlying portfolio holdings over the past three years.
