

Quarterly Update

TexPool and TexPool Prime

Investor Goal

The investor goal for both TexPool and TexPool Prime is preservation and safety of principal, liquidity and yield.

Pool Features

- Administered by the Texas Comptroller of Public Accounts.
- Managed and serviced by Federated Hermes.
- Highest possible ratings from Standard & Poor's underscores the portfolios' high credit quality, daily liquidity and relative safety.
- High asset levels give the benefit of economies of scale.

Performance data quoted represents past performance which is no guarantee of future results. Investment return will vary. The value of an investment, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than what is stated.

Portfolio Manager Commentary

The shutdown of the U.S. in an effort to contain the Covid-19 pandemic began in March, but the parade of abysmal economic reports began in the second quarter. The labor market led the way in shocking fashion in April as nonfarm payrolls plunged by 20.5 million jobs, the unemployment rate soared to 14.7% and continuing jobless claims climbed over 20 million. No economic metric escaped the downturn, with data for manufacturing, the housing market, retail sales and many more falling off a cliff. The National Bureau of Economic Research made it official by declaring that the U.S. entered a full-fledged recession in February.

While the Federal Reserve stated that its emergency programs, such as the Money Market Mutual Fund Liquidity Facility (MMLF) and the Primary Dealer Credit Facility (PDCF), saved the liquidity markets from an even greater crisis, officials said they would not hesitate to add more stimulus and special purpose vehicles if needed. Policymakers kept the fed funds target range at 0-0.25% in the reporting period, but made clear they were not considering setting rates below zero. The Fed's increased purchases of government securities since the outbreak pushed its balance sheet to more than \$7 trillion at quarter-end.

Asset flows in the liquidity space diversified in the quarter. The concentration in government funds was pared as flows into the municipal sector were net positive and assets poured back into prime offerings, especially institutional prime money market funds. The short end of the Treasury yield curve rose and the London interbank offered rate (Libor) fell.

As the quarter progressed, many states and cities began to open up, business brought back employees and new coronavirus infections dropped, giving hope to the possibility that the U.S. economy would recover quicker than expected. Among the areas with improving data were the labor market and retail sales. But this thesis was challenged at the end of the reporting period due to a resurgence of cases.

Treasuries ended the second quarter with 1-month at 0.13%, 3-month at 0.15%, 6-month at 0.18% and 12-month at 0.17%. Libor ended the quarter with 1-month at 0.16%, 3-month at 0.30%, 6-month at 0.37% and 12-month at 0.55%.

Portfolio composition is subject to change.

An investment in the Pool is not insured or guaranteed by any government or government agency. Although the manager of the Pool seeks to preserve principal, it is possible to lose money by depositing money in the Pool.

An AAAM rating by Standard & Poor's is obtained after Standard & Poor's evaluates a number of factors, including credit quality, market price exposure and management. Ratings are subject to change, and do not remove market risk. For more information on credit ratings, visit standardandpoors.com.

For more complete information, see the investment policy and information statement available at www.texpool.com. You should consider the investment's objectives, risks, charges, and expenses carefully before you invest. Information about these and other important subjects is in the investment policy and information statement, which you should read carefully before investing.
