Fund description

The fund pursues long-term capital appreciation by taking a “whole-market” approach to U.S. stocks and investing in a diversified portfolio of companies from the Russell 3000 Index. Through a fundamentally based, bottom-up, systematic approach, it seeks to remove subjective and emotional influences from the stock-selection process.

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedInvestors.com. Maximum offering price figures reflect the maximum sales charge of 5.5% for A Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund. Total returns for periods of less than one year are cumulative.

* The fund's expense ratio is from the most recent prospectus. The expense ratio may reflect voluntary fee waivers and/or expense reimbursements determined by the fund's Advisor and its affiliates. The voluntary waivers and/or reimbursements, if applicable, are in effect up to but not including the later of 10/1/21 or the date of the fund's next effective prospectus.

Investment process

Fundamentally based research

Research identifies powerful combinations of classic fundamentals enhanced with behavioral signals that work across market environments.

Stock selection

Stock alphas are forecasted based on each company's characteristics.

Portfolio optimization

Proprietary software is used to maximize portfolio alpha, net of trading costs, while managing risk.

Pre-trade review

All trades are reviewed to ensure they are based on the most recent and accurate information. Insights from pre-trade review provide important feedback to the team and inspire further research.

Sector weightings (%)

Portfolio composition is based on net assets at the close of business on 9/30/20 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Highlights

- The market favored large caps over small caps, and growth over value
- Underperformance came from stocks with flat or improving earnings-to-price and negative analyst conviction
- Fund ended quarter roughly sector-neutral to benchmark

Looking back

The first two months of 2020's third quarter were positive for the domestic stock market, led by large-cap and growth stocks. September brought a correction, with mid-caps leading large caps while value led growth. But the overall direction of the market for the quarter was unchanged. The Russell 3000 Index returned 9.21% during the period. Large caps beat small caps, with the mega-cap Russell Top 200 Index returning 10.16%, the Russell Midcap Index returning 7.46% and the small-cap Russell 2000 Index returning 4.93%. Growth stocks beat value stocks, with the Russell 3000 Growth Index returning 12.86% and the Russell 3000 Value Index returning 5.42%. The growth advantage was widest in the mega-cap range where growth led value by 8.84%. It was narrowest in the mid-cap range where growth led value by 2.97%.

So while September was a short-term change of pattern, the large-cap-and-growth orientation of the market has persisted the last three years. From October 2017 through September 2020, the mega-cap Russell Top 200 has an annualized return of 14.34% while the small-cap Russell 2000 has returned 1.77%; the Russell Midcap return lies between the two, at 7.13% annualized. Comparing the growth and value styles, the Russell 3000 Growth Index has returned 20.73% while the Russell 3000 Value Index has returned 2.11%.

Performance

Federated Hermes MDT All Cap Core Fund Institutional Shares returned 6.55% in the third quarter, underperforming the 9.21% return of its benchmark, the Russell 3000 Index.

Performance contributors

- Overweight of growth-oriented stocks with strong technical factors and neutral to high analyst conviction
- Strong performers overweighted by the fund: DocuSign, Inc., Cincinnati Financial Corporation and Livongo Health, Inc.

Performance detractors

- Stocks with flat or improving earnings-to-price and negative analyst conviction
- Stocks with high structural earnings and neutral to high analyst conviction
- Security selection in Consumer Discretionary, Industrials and Communication Services sectors
- Weak performer overweighted by the fund: Spirit AeroSystems Holdings, Inc. (Class A)
- Strong performers underweighted by the fund: Apple Inc. and Tesla Inc.

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedInvestors.com.

How we are positioned

The fund ended the third quarter roughly sector-neutral to the benchmark, according to the GICS sectors. Within the sectors there were overweight positions in the insurance, pharmaceuticals, biotechnology & life sciences and household & personal products industries. There were underweight positions in the technology, hardware & equipment and banks industries. At the end of the period, the fund was tilted toward growth stocks.

Federated Hermes MDT All Cap Core Fund

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or a prospectus containing this and other information, contact us or visit FederatedInvestors.com. Please carefully read the summary prospectus or the prospectus before investing.

As of June 29, 2020, the fund was renamed Federated Hermes MDT All Cap Core Fund.

The fund is the successor to MDT All Cap Core Fund pursuant to a reorganization that took place on December 8, 2006. Prior to that date, the fund had no investment operations. Accordingly, the performance information shown for periods prior to that date is that of MDT All Cap Core Fund.

The fund's R Shares, re-designated as R6 Shares on September 1, 2016, commenced operations on December 12, 2006. For the period prior to the commencement of operations of the R Shares (now known as R6 Shares), the performance information shown is for the fund's Institutional Shares, adjusted to reflect the expenses of the R Shares and the performance information for the R6 Shares prior to September 1, 2016 reflects the higher R Shares expenses. See the prospectus for other fees and expenses that apply to a continued investment in the fund.

A word about risk

Mutual funds are subject to risks and fluctuate in value.

The quantitative models and analysis used by the fund may perform differently than expected and negatively affect fund performance.

Definitions

Alpha shows how much or how little return is generated, given the risk a portfolio takes. A portfolio with an alpha greater than 0 has earned more than expected given its beta—meaning the portfolio has generated excess return without increasing risk. A portfolio with a negative alpha is producing a lower return than would be expected given its risk.

Beta measures a portfolio's volatility relative to the market. A beta greater than 1.00 suggests the portfolio has historically been more volatile than the market as measured by the fund's benchmark. A beta less than 1.00 suggests the portfolio has historically had less volatility relative to the market.

Correlation is the degree to which one variable (here, the fund's returns) fluctuates relative to another (the returns of the fund's benchmark). Correlation ranges from 1.00, when two variables move identically in the same direction, to -1.00, when two variables move identically in the opposite direction.

R-squared indicates what percentage of a portfolio's movement in performance is explained by movement in performance of the market. R-squared ranges from 0 to 100, and a score of 100 suggests that all movements of a portfolio's performance are completely explained by movements in the market as measured by the fund's benchmark.

Sharpe ratio is calculated by dividing a fund's annualized excess return by the fund's annualized standard deviation. The higher the Sharpe ratio, the better the fund's historical risk adjusted performance.

Standard deviation is a historical measure of the variability of returns relative to the average annual return. A higher number indicates higher overall volatility.

Tracking error is the difference between a portfolio's returns and the benchmark or index it was meant to mimic or beat.

Up capture ratio/down capture ratio is a measure of how well a manager was able to replicate or improve on periods of positive benchmark returns and how badly the manager was affected by periods of negative benchmark returns. The up-market capture ratio is a measure of a manager's performance in up markets relative to the index during the same period. For example, a ratio value of 115 indicates that the manager has outperformed the market index by 15% in periods when the index has risen. The down-market capture ratio is the direct opposite of the up-market capture ratio, gauging performance of the manager relative to the index in down markets. A ratio value of 80 would indicate the manager had declined on 80% as much as the declining overall market, indicating relative outperformance.

Weighted median P/E (LTM—latest 12 months) is a ratio comparing share price to earnings per share using data from the previous 12 months.

Weighted median P/E (NTM—next 12 months) is a ratio comparing share price to earnings-per-share using estimated data for the next 12 months.

Weighted median market cap is the calculation representing the median market capitalization of the stocks in the portfolio, weighted by the amount of each stock.

Weighted median price/book is a ratio comparing share price to book value or assets minus liabilities.

Russell 2000® Growth Index measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000® Index companies with higher price-to-value ratios and higher forecasted growth values. The Russell 2000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the small-cap growth segment. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set and that the represented companies continue to reflect growth characteristics.

Russell 2000® Value Index measures the performance of small-cap value segment of the U.S. equity universe. It includes those Russell 2000® Index companies with lower price-to-book ratios and lower forecasted growth values. The Russell 2000 Value Index is constructed to provide a comprehensive and unbiased barometer for the small-cap value segment and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set and that the represented companies continue to reflect value characteristics.

Russell 3000® Index measures the performance of the largest 3000 U.S. companies representing approximately 98% of the investable U.S. equity market. The Russell 3000® Index is constructed to provide a comprehensive, unbiased and stable barometer of the broad market and is completely reconstituted annually to ensure new and growing equities are reflected.

Russell 3000® Growth Index measures the performance of the broad growth segment of the U.S. equity universe. It includes those Russell 3000® Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell 3000® Growth Index is constructed to provide a comprehensive, unbiased and stable barometer of the broad growth market. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics.

Russell 3000® Value Index measures the performance of the broad value segment of U.S. equity value universe. It includes those Russell 3000® Index companies with lower price-to-book ratios and lower forecasted growth values. The Russell 3000® Growth Index is constructed to provide a comprehensive, unbiased and stable barometer of the broad growth market. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics.

Russell Midcap® Growth Index measures the performance of the mid-cap growth segment of the U.S. equity universe. It includes those Russell Midcap® Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell Midcap® Growth Index is constructed to provide a comprehensive and unbiased barometer of the mid-cap growth market. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap growth market.

Russell Midcap® Value Index measures the performance of the mid-cap value segment of the U.S. equity universe. It includes those Russell Midcap Index companies with lower price-to-book ratios and lower forecasted growth values.

S&P 500 Index is an unmanaged capitalization-weighted index of 500 stocks designated to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Indexes are unmanaged and cannot be invested in directly.
