Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit Federated-Investors.com. Maximum Offering Price figures reflect the maximum sales charge of 5.5% for A Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund.

* The fund's expense ratio is from the most recent prospectus. Pursuant to a settlement agreement, the expense ratio reflects a voluntary reduction of the management fee, from its stated, gross management fee, continuing until June 30, 2022. Additionally, the expense ratio reflects voluntary fee waivers and/or expense reimbursements determined by the fund's Advisor and/or its affiliates. The voluntary waivers and/or expense reimbursements are in effect up to but not including the later of 1/1/20 or the date of the fund's next effective prospectus.

Distinguishing Characteristics

Transparent and Accountable Process

- Capital efficiency and transparency are built into the compensation structure
- Bonus pool is allocated according to individual's contribution to results
- Incentivized to optimize capital

Tenured Team, Differentiated Portfolio

- Team follows same 30-year philosophy and process used since inception of the Kaufmann strategy
- Distinguished professionals with specialized industry ties; organized for full accountability
 - Continuity of team allows for constructive problem solving
 - Seeking a differentiated, large cap portfolio

Extensive Research, Long-Term Results

- Independent, proprietary research focuses on:
- Exceptional business models
 - Positive inflections of business momentum
 - Clear pathway to free cash flow growth

Past performance is no guarantee of future results.

Sector Weightings (%)

The index position were small hedges we invested in given macro uncertainty. Portfolio composition is based on net assets at the close of business on 6/30/19 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Highlights

- Global equity markets were mostly positive for the quarter
- Investors continued to prefer growth over value stocks
- The Technology and Industrial sector stocks positively contributed to the fund's performance
- Stock selection drove the fund's positive, relative performance

Looking Back

The U.S. economy indicated continued slowing signs despite positive employment gains, still positive ISM data and strong readings from the U.S. gross domestic product (GDP) for the first quarter of 2019. Global equity markets responded from the May sell-off with a rebound in June to produce positive returns for many indexes for the quarter. The U.S. equity markets were led by the S&P 500 Index, up by 4.30%, followed by large-cap stocks, represented by the Russell 1000 Index, up 4.25%, followed by mid-cap stocks, represented by the Russell Mid-Cap Index, up by 4.13%, finally followed by small-cap stocks that are represented by Russell 2000 Index, up 2.09% for the quarter. Mid-cap growth stocks outperformed mid-cap value stocks, a continuation of the multiyear trend.

During the second quarter, the portfolio team added to existing positions or initiated new positions in the following: BT Group plc, AnaptysBio, Inc., UniQure, Trex Co. and Vulcan Materials.

Also during the quarter, the portfolio subtracted or reduced the following positions in pursuit of better opportunities: Spark Therapeutics, Inc., Veeva Systems, GrafTech International, Ingevity Corp. and Focus Financial Partners.

Also of note, the fund participated in the following initial public offerings during the quarter: Beyond Meat, Inc., Luckin Coffee, The Real Real, Nexi SPA, Parsons Corp. and Rattler Midstream.

Performance

Federated Kaufmann Fund Institutional Shares returned 5.55% at NAV for the three months ended June 28, 2019. That compares with its benchmark, the Russell Mid-Cap Growth Index, which returned 5.40% during the same period.

Performance Contributors

- Stocks that made a positive contribution to performance: Veeva Systems Inc., Heico Corp., Shopify Inc., arGen-X and Coupa Software

Performance Detractors

- Stocks that detracted from performance: Puma Biotechnology, Minerva Neurosciences, Atara Biotherapeutics, AnaptysBio and Spark Therapeutics

Performance quoted represents past performance, which is no guarantee of future results. How We Are Positioned

As the U.S. economy continues through 2019, the positive economic momentum over the last two years has shown signs of slowing. With U.S. business confidence high, jobless claims near a generational low, consumer confidence and the ISM Index still in positive territory, the markets continue to shrug off slowdown fears. As slower earnings growth and U.S. GDP growth weighed on the market, support from the central banks has helped stimulate the equity markets into positive territory in the second quarter of 2019. Federated Kaufmann Fund, however, continues to be focused on those companies that have little dependence on the economy, good or bad, to generate significant earnings growth.

This quarter the fund had approximately 66% of the portfolio invested in four sectors: Information Technology, Health Care, Consumer Discretionary and Industrials. The sector weightings of the portfolio are a byproduct of our bottom-up stock selection strategy with a team of sector-specialist portfolio managers. We seek to find companies that have company-specific catalysts for growth rather than develop macro themes to construct sector weightings. These sectors also have historically provided good opportunities for bottom-up growth investors.

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or a prospectus containing this and other information, contact us or visit FederatedInvestors.com. Please carefully read the summary prospectus or the prospectus before investing.

The fund is the successor to the Kaufmann Fund, Inc. (Kaufmann Fund) pursuant to a reorganization that took place on April 23, 2001. Prior to that date, the fund had no investment operations. Accordingly, for periods prior to that date, the performance information is that of the Kaufmann Fund, adjusted to reflect the maximum sales charge applicable to the fund's A Shares. The fund's Institutional Shares commenced operations on December 29, 2016. For the period prior to the commencement of operations of the Institutional Shares, the performance information shown is for R Shares adjusted to remove any voluntary waiver of fund expenses related to the fund's R Shares that occurred during the period prior to the commencement of the fund's Institutional Shares.

A Word About Risk

Mutual funds are subject to risks and fluctuate in value.

Small company stocks may be less liquid and subject to greater price volatility than large capitalization stocks.

International investing involves special risks, including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

Investing in IPOs involves special risks such as limited liquidity and increased volatility.

Definitions

Russell 1000[®] Index measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000[®] Index companies with lower price-to-book ratios and lower expected growth values. The R1000V is constructed to provide a comprehensive and unbiased barometer for the large-cap value segment. The Russell 1000[®] Value Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect value characteristics.

Russell 2000[®] Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 is a subset of the Russell 3000[®] Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000[®] Index is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set.

Russell Midcap[®] Index measures the performance of the mid-cap segment of the U.S. equity universe. The Russell Midcap[®] Index is a subset of the Russell 1000[®] Index. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap[®] Index represents approximately 27% of the total market capitalization of the Russell 1000 companies.

Russell Midcap[®] Growth Index measures the performance of the mid-cap growth segment of the U.S. equity universe. It includes those Russell Midcap[®] Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell Midcap[®] Growth Index is constructed to provide a comprehensive and unbiased barometer of the mid-cap growth market. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap growth market.

S&P 500 Index is an unmanaged capitalization-weighted index of 500 stocks designated to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Indexes are unmanaged and cannot be invested in directly.

Alpha shows how much or how little return is generated, given the risk a portfolio takes. A portfolio with an Alpha greater than 0 has earned more than expected given its Beta—meaning the portfolio has generated excess return without increasing risk. A portfolio with a negative Alpha is producing a lower return than would be expected given its risk.

Beta measures a portfolio's volatility relative to the market. A Beta greater than 1.00 suggests the portfolio has historically been more volatile than the market as measured by the fund's benchmark. A Beta less than 1.00 suggests the portfolio has historically had less volatility relative to the market.

Correlation is the degree to which one variable (here, the fund's returns) fluctuates relative to another (the returns of the fund's benchmark). Correlation ranges from 1.00, when two variables move identically in the same direction, to -1.00, when two variables move identically in the opposite direction.

R-Squared indicates what percentage of a portfolio's movement in performance is explained by movement in performance of the market. R-squared ranges from 0 to 100, and a score of 100 suggests that all movements of a portfolio's performance are completely explained by movements in the market as measured by the fund's benchmark.

Standard Deviation is a historical measure of the variability of returns relative to the average annual return. A higher number indicates higher overall volatility.

Weighted Median Market Cap is the calculation representing the median market capitalization of the stocks in the portfolio, weighted by the amount of each stock.

Weighted Median P/E (LTM—Latest 12 Months) is a ratio comparing share price to earnings per share using data from the previous 12 months.

Weighted Median P/E (NTM—Next 12 Months) is a ratio comparing share price to earnings per share using estimated data for the next 12 months.
