Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedInvestors.com. Maximum offering price figures reflect the maximum sales charge of 5.5% for A Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund. Total returns for periods of less than one year are cumulative.

* The fund's expense ratio is from the most recent prospectus. The expense ratio may reflect voluntary fee waivers and/or expense reimbursements determined by the fund's Advisor and its affiliates. The voluntary waivers and/or reimbursements, if applicable, are in effect up to but not including the later of 1/1/23 or the date of the fund's next effective prospectus.

Distinguishing characteristics

Transparent and accountable process

- Capital efficiency and transparency are built into the compensation structure
- Bonus pool is allocated according to individual's contribution to results
- Incentivized to optimize capital

Tenured team, differentiated portfolio

Team follows same 35-year philosophy and process used since inception of the Kaufmann strategy

- Distinguished professionals with specialized industry ties; organized for full accountability
- Continuity of team allows for constructive problem solving
- Seeking a differentiated, small-cap portfolio

Extensive research, long-term results

Independent, proprietary research focuses on:

- Exceptional business models
- Positive inflections of business momentum
- Clear pathway to free cash flow growth

Past performance is no guarantee of future results.

Sector weightings (%)

Totals may not add up to 100% due to rounding.

The index position were small hedges we invested in given macro uncertainty.

Portfolio composition is based on net assets at the close of business on 9/30/22 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Highlights

- Global equity markets sold off significantly as the global economic slowdown persisted
- Growth stocks outperformed value stocks during the quarter
- Stock selection was the primary factor for the relative underperformance
- The Health Care sector negatively contributed to the fund's performance on a relative basis

Looking back

During the third quarter of 2022, the U.S. economy and most significant westernized economies saw inflation continue to be the primary headwind to economic growth. Inflationary pressures persisted again due to the impact from record monetary and fiscal stimulus as well as the Eastern European conflict along with regulatory restrictions causing supply disruptions. This inflationary pressure has caused most global central banks to pursue aggressive monetary tightening policies in 2022. Both inflation pressure and tightening monetary policies are causing slower economic growth, which led equity markets to sell off during the quarter. The U.S. markets' sell-off continued from the second quarter into the third quarter of 2022. The U.S. indexes that sold off the most during the quarter were led by the S&P 500 Index, which returned -5.89%, followed by large-cap stocks, represented by the Russell 1000 Index, returning -5.69%, followed by mid-cap stocks, represented by the Russell Midcap Index, returning -4.80%, followed by the growth- and technology-oriented Nasdaq Index, which returned -4.77%. Small-cap stocks, represented by the Russell 2000 Index, returned -3.30%. Small-cap growth stocks outperformed small-cap value stocks, reversing a multi-quarter trend.

During the third quarter, the portfolio team increased or added new positions of the following equity positions to the portfolio: Seres Therapeutics, Apellis Pharmaceuticals Inc. (new), Amylyx Pharmaceuticals (new), Bavarian Nordic A/S (new), Prometheus BioSciences Inc. (new), Rhythm Pharmaceuticals and Mercury Systems.

Also during the quarter, the portfolio exited or reduced the following equity positions in pursuit of better opportunities: GMS Inc, Dyanavax Technologies, Generac Holdings Inc., FincoBank Banca Finco SA and Freshpet Inc.

Capital Markets activities during the quarter:

The fund participated in zero IPOs as the IPO market remained very quiet during the third quarter. The team was active in the secondary equity markets during the quarter, the fund participated in six secondary offers, including the following: Verve Therapeutics Inc., Legend Biotech Corp, Cerevel Therapeutics Holdings, First Watch Restaurant Group Inc., Ideaya Biosciences Inc. and Rhythm Pharmaceuticals Inc.

Performance

Federated Hermes Kaufmann Small Cap Fund Institutional Shares returned -2.55% at NAV for the three months ended September 30, 2022. That compares with its benchmark the Russell 2000 Growth Index, which returned 0.24% during the same period.

Performance contributors

- Stocks that made a positive contribution to performance: Wingstop Inc., Rhythm Pharmaceuticals Inc., Advanced Drainage Systems, Inc., Livent Corporation and Academy Sports + Outdoors Inc.

Performance detractors

- Stocks that detracted: Ultragenyx Pharmaceutical, Inc., Rapid7 Inc., ContraFect Corp, Legend Biotech Corp, and Planet Fitness Inc.

How we are positioned

As the U.S. economy continues through 2022, many headwinds persist, from global monetary tightening to inflation to geopolitical uncertainty. These questions, among others, are likely to endure throughout the year which could cause market uncertainty. One indicator of investor caution would be very little IPO activity for the third quarter in a row. After a record-breaking year in 2021, 2022 U.S. IPO issuance remains quiet with only 64 IPOs priced in 2022 through September 30 only raising \$6.6 billion, according to Renaissance Capital. Despite the macro uncertainties, the Kaufmann team continues to be focused on finding and investing in companies that have little dependence on the economy, good or bad, to generate significant sales and earnings growth.

This quarter the fund had approximately 68% of the portfolio invested in four sectors: Information Technology, Health Care, Consumer Discretionary and Industrials. The sector weightings of the portfolio is a byproduct of our bottom-up stock selection strategy with a team of sector-specialist portfolio managers. These sectors also have historically provided good opportunities for bottom-up growth investors. We seek to find companies that have company-specific catalysts for growth rather than develop macro themes to construct sector weightings. The strategy's consistent growth bias has allowed the portfolio to produce the following statistics: average sales growth last twelve months of 41%, operating margins of 21% and median earnings growth for the last year of 12%. This compares to the Russell 2000 Growth Index's average sales growth of 34%, median operating margins of 17% and median earnings growth of 8%.

Federated Hermes Kaufmann Small Cap Fund

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or a prospectus containing this and other information, contact us or visit FederatedInvestors.com. Please carefully read the summary prospectus or the prospectus before investing.

The fund's R6 Shares commenced operations on September 1, 2017. For the period prior to the commencement of operations of the R6 Shares, the performance information shown is for the fund's A Shares adjusted to reflect the expenses of the fund's R6 Shares for each year for which the Fund's R6 Shares expenses would have exceeded the actual expenses paid by the fund's A Shares. The performance information has also been adjusted to reflect any applicable differences between the sales loads and charges imposed on the purchase and redemption of R6 Shares and A Shares, as well as the removal of any voluntary waivers/reimbursements of fund expenses that may have occurred during the periods prior to the commencement of operations of the R6 Shares.

The fund's Institutional Shares commenced operations on December 30, 2015. For the period prior to the commencement of operations for the Institutional Shares, the performance information shown is for the A Shares adjusted to reflect the expenses of the Institutional Shares for each year for which the expenses of the Institutional Shares would have exceeded the actual expenses paid by the fund's A Shares. The performance information has also been adjusted to reflect any applicable differences between the sales loads and charges imposed on the purchase and redemption of Institutional and A Shares, as well as the removal of any voluntary waivers/reimbursements of fund expenses that may have occurred during the periods prior to the commencement of operations of the Institutional Shares.

A word about risk

Mutual funds are subject to risks and fluctuate in value.

International investing involves special risks, including currency risk, increased volatility, political risks and differences in auditing and other financial standards.

Investing in IPOs involves special risks such as limited liquidity and increased volatility.

Small company stocks may be less liquid and subject to greater price volatility than large capitalization stocks.

Definitions

Alpha shows how much or how little return is generated, given the risk a portfolio takes. A portfolio with an alpha greater than 0 has earned more than expected given its beta—meaning the portfolio has generated excess return without increasing risk. A portfolio with a negative alpha is producing a lower return than would be expected given its risk.

Beta measures a portfolio's volatility relative to the market. A beta greater than 1.00 suggests the portfolio has historically been more volatile than the market as measured by the fund's benchmark. A beta less than 1.00 suggests the portfolio has historically had less volatility relative to the market.

R-squared indicates what percentage of a portfolio's movement in performance is explained by movement in performance of the market. R-squared ranges from 0 to 100, and a score of 100 suggests that all movements of a portfolio's performance are completely explained by movements in the market as measured by the fund's benchmark.

Standard deviation is a historical measure of the variability of returns relative to the average annual return. A higher number indicates higher overall volatility.

Weighted median P/E (LTM—latest 12 months) is a ratio comparing share price to earnings per share using data from the previous 12 months.

Weighted median P/E (NTM—next 12 months) is a ratio comparing share price to earnings-per-share using estimated data for the next 12 months.

Weighted median market cap is the calculation representing the median market capitalization of the stocks in the portfolio, weighted by the amount of each stock.

Russell 1000® Index measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000® Index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000® represents approximately 92% of the U.S. market. The Russell 1000® Index is constructed to provide a comprehensive and unbiased barometer for the large-cap segment and is completely reconstituted annually to ensure new and growing equities are reflected.

Russell 2000® Growth Index measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000® Index companies with higher price-to-value ratios and higher forecasted growth values. The Russell 2000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the small-cap growth segment. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set and that the represented companies continue to reflect growth characteristics.

Russell 2000® Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 is a subset of the Russell 3000® Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000® Index is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set.

Russell Midcap® Index measures the performance of the mid-cap segment of the U.S. equity universe. The Russell Midcap® Index is a subset of the Russell 1000® Index. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap® Index represents approximately 27% of the total market capitalization of the Russell 1000 companies.

S&P 500 Index is an unmanaged capitalization-weighted index of 500 stocks designated to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Indexes are unmanaged and cannot be invested in directly.
