

Monthly Newsletter: January 2026

ANNOUNCEMENTS

We welcome the following entities who joined TexPool in December 2025:

TexPool

- Galveston Property Finance Authority
- Uvalde County ESD 2
- Victoria County Groundwater Conservation District
- Dallas Central Appraisal District
- Lampasas EDC
- Medical Center Area Redevelopment Authority/ TIRZ 28

TexPool Prime

- Galveston Property Finance Authority
- Uvalde County ESD 2
- Madisonville ISD
- Victoria County Groundwater Conservation District
- Dallas Central Appraisal District
- Lampasas EDC
- Medical Center Area Redevelopment Authority/ TIRZ 28
- Azle ISD
- Kimble County Hospital

TexPool Advisory Board Members

- Patrick Krishock
 - Valarie Van Vlack
 - Belinda Weaver
 - David Landeros
 - Deborah Laudermilk
 - Dina Edgar
- Overseen by the State of Texas acting Comptroller of Public Accounts Kelly Hancock
 Operated under the supervision of the Texas Treasury Safekeeping Trust Company

Economic and Market Commentary Maintaining momentum

January 1, 2026

The last few years have been remarkable for stable value investments. Even as the Federal Reserve has pivoted to easing rates, assets in liquidity products have marched steadily upward. Depending on your sources, which all calculate differently, total industry money market fund assets hit record highs in 2025 and other vehicles had strong years.

How investors view liquidity products this year will probably be influenced by recency bias. With the latest Summary of Economic Projections (SEP) of the Federal Open Market Committee (FOMC) indicating at least one 25 basis-point cut in the fed funds target range in 2026, yields are likely to slide for most stable value investments. Behavioral economics posits that some investors will focus on the decline, despite the likelihood that yields across the industry will remain attractive. We expect most investors, however, to remain happy with money market products even if the terminal fed funds rate rests in the lower 3% area, as the SEP dot plot forecasts. Industry assets might decline, but if they do, it should be gradual.

Fed independence

2025 was a rough year for Fed Chair Jerome Powell as he faced many calls to lower rates faster. His term as chair ends in May. Despite the likelihood he will be succeeded by a more dovish leader, we think the Fed will retain its status as an “uniquely structured, quasi-private entity,”

**Definition of Weighted Average Maturity and Weighted Average Life

WAM is the mean average of the periods of time remaining until the securities held in the fund's portfolio (a) are scheduled to be repaid, (b) would be repaid upon a demand by the fund or (c) are scheduled to have their interest rate readjusted to reflect current market rates. For government variable rate securities, if the interest rate is readjusted no less frequently than every 397 calendar days, the security shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate. For non-government variable rate securities, if the security has a scheduled maturity of 397 days or less the security is treated as maturing on the earlier of the date the security is scheduled to be repaid through demand or the period remaining until the next readjustment of the interest rate. If the variable rate security has a scheduled maturity that is more than 397 days it is the later of those two dates. The mean is weighted based on the percentage of the market value of the portfolio invested in each period.

WAL is calculated in the same manner as WAM, but is based solely on the periods of time remaining until the securities held in TexPool (a) are scheduled to be repaid or (b) would be repaid upon a demand by TexPool, without reference to when interest rates of securities within TexPool.

Houston, TX 77002

as the Supreme Court called it last summer. We are hopeful that the Senate confirmation process will focus on their expertise in monetary policy and maintaining the integrity of the institution.

About those falling rates

With the Fed in an easing cycle, it is understandable that investors would wonder if it will ever take the policy rate to near-zero again. There is no guarantee, of course, but we do not think this will happen. That also is the Fed's stance, based on the December SEP, which forecasts a terminal fed funds range for this cycle between 3-3.50% and a long-run policy rate of 3%. At 3.50-3.75%, the current target range is already near that. Changes in Fed leadership and composition of the FOMC likely will not lead to rates deviating much from this path.

At month-end, yields on 1-, 3-, 6- and 12-month US Treasuries were 3.59%, 3.64%, 3.61% and 3.48%, respectively.

90-Day Treasury Bill is a short-term debt instrument backed by the national government. These are used to collect immediate cash to meet outstanding obligations.

Any private investor can invest in a Treasury bill. The 90-Day Treasury Bill is a weighted average rate of the weekly auctions of 90-Day Treasury Bills.

Past performance is no guarantee of future results.

An investment in the Pool is not insured or guaranteed by any government or government agency. Although the manager of the Pool seeks to preserve principal, it is possible to lose money by depositing money in the Pool.
