SUPPLEMENT TO SUMMARY PROSPECTUS, PROSPECTUS AND STATEMENT OF ADDITIONAL INFORMATION DATED JANUARY 31, 2023

On February 16, 2023, the Board of Trustees (the “Board”) of Federated Hermes Adviser Series approved a Plan of Liquidation for Federated Hermes International Developed Equity Fund (the “Fund”) pursuant to which the Fund will be liquidated on or about April 21, 2023 (the “Liquidation” or the “Liquidation Date”).

In approving the Liquidation, the Board determined that the liquidation of the Fund is in the best interests of the Fund and its shareholders. Accordingly, the Fund’s investment adviser will begin positioning the Fund for liquidation, which may cause the Fund to deviate from its stated investment objectives and strategies, including, but not limited to, the Fund’s policy to invest at least 80% of net assets (plus any borrowings for investment purposes) in equity securities of developed markets. It is anticipated that the Fund’s portfolio will be converted into cash on or prior to the Liquidation Date.

Effective on or about March 31, 2023, the Fund will be closed to new investors and closed to additional investments by existing shareholders. Any shares outstanding at the close of business on the Liquidation Date will be automatically redeemed. Such redemptions shall follow the procedures set forth in the Fund’s Plan of Liquidation.

Dividends and capital gains, if any, will be distributed to shareholders prior to the Liquidation.

At any time prior to the Liquidation Date, the shareholders of the Fund may redeem their shares of the Fund pursuant to the procedures set forth in the Fund’s Prospectus. Shareholders of the Fund’s Institutional Shares and Class R6 Shares may exchange shares of the Fund for shares of any Federated Hermes fund or share class that does not have a stated sales charge or contingent deferred sales charge, except shares of Federated Hermes Institutional Money Market Management, Federated Hermes Institutional Tax-Free Cash Trust, Federated Hermes Institutional Prime Obligations Fund, Federated Hermes Institutional Prime Value Obligations Fund, and no-load Class A Shares and Class R Shares of any Fund if the shareholder meets the eligibility criteria and investment minimum for the Federated Hermes fund for which the shareholder is exchanging.

The Liquidation of the Fund will be a recognition event for tax purposes. In addition, any income or capital gains distributed to shareholders prior to the Liquidation Date or as part of the liquidation proceeds may also be subject to taxation. All investors should consult with their tax advisor regarding the tax consequences of this Liquidation.

Fund Summary Information

Federated Hermes International Developed Equity Fund (the "Fund")

RISK/RETURN SUMMARY: INVESTMENT OBJECTIVE

The Fund's investment objective is to provide long-term capital appreciation. The objective may be changed by the Fund's Board of Trustees (the "Trustees") without shareholder approval.

RISK/RETURN SUMMARY: FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold and sell Institutional Shares (IS) and Class R6 Shares (R6) of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

Shareholder Fees (fees paid directly from your investment)

	IS	R6
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price) .	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price or redemption proceeds, as applicable).....	None	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends (and other Distributions) (as a percentage of offering price).....	None	None
Redemption Fee (as a percentage of amount redeemed, if applicable).....	None	None
Exchange Fee.....	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	IS	R6
Management Fee.....	0.70%	0.70%
Distribution (12b-1) Fee.....	None	None
Other Expenses.....	1.79% ¹	0.82%
Total Annual Fund Operating Expenses.....	2.49%	1.52%
Fee Waivers and/or Expense Reimbursements ²	(1.75)%	(0.79)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements.....	0.74%	0.73%

1 The Fund may incur and pay certain service fees (shareholder services/account administration fees) on its IS class of up to a maximum of 0.25%. No such fees are currently incurred and paid by the IS class of the Fund. The IS class of the Fund will not incur and pay such fees until such time as approved by the Trustees.

2 The Adviser and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Total annual fund operating expenses (excluding acquired fund fees and expenses, tax reclaim recovery expenses, interest expense, extraordinary expenses and proxy-related expenses paid by the Fund, if any) paid by the Fund's IS class and R6 class (after the voluntary waivers and/or reimbursements) will not exceed 0.74% and 0.73% (the "Fee Limit"), respectively, up to but not including the later of (the "Termination Date"): (a) February 1, 2024; or (b) the date of the Fund's next effective Prospectus. While the Adviser and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Trustees.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 for the time periods indicated and then redeem or hold all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that operating expenses remain the same. The Example does not reflect sales charges (loads) on reinvested dividends. If these sales charges (loads) were included, your costs would be higher. Although your actual costs and returns may be higher or lower, based on these assumptions your cost would be:

Share Class	1 Year	3 Years	5 Years	10 Years
IS	\$252	\$776	\$1,326	\$2,826
R6	\$155	\$480	\$ 829	\$1,813

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 20% of the average value of its portfolio.

RISK/RETURN SUMMARY: INVESTMENTS, RISKS AND PERFORMANCE

What are the Fund's Main Investment Strategies?

The Fund pursues its investment objective of long-term capital appreciation by investing typically in large-cap equity securities (i.e., companies with market capitalizations greater than \$10 billion) that are quoted or traded on regulated markets worldwide (excluding North America) and component securities of the MSCI EAFE Index or equity securities of companies listed in the countries referenced in this index. The Fund will invest at least two-thirds of its assets in these securities.

The Fund will be an actively managed portfolio using a disciplined fundamental stock-selection process based on well documented market anomalies. The Fund’s investment adviser or sub-adviser (as applicable, the “Adviser”) will use a proprietary quantitative model which captures systematic behavioral biases of market participants in order to generate returns for the Fund. The Fund’s investments will be selected based on the output of this model and will favor equity securities which have a combination of proven fundamental characteristics. Companies with a competitive advantage and a sustainable business model are sought after as they are more likely to offer visibility of earnings growth. In addition, the Adviser believes that companies that are well governed are more likely to avoid unforeseeable negative impacts and targets such companies. The Adviser believes that choosing stocks that demonstrate a combination of these characteristics will allow the Fund to hold stocks over the long-term. The Adviser employs a disciplined subjective analysis that assesses the model’s effectiveness.

As part of the strategy’s assessment of quality and its approach to risk management, risks associated with a company’s approach to environmental, social and governance (ESG) issues, among other factors, are actively assessed. The Adviser considers data on Federated Hermes’ proprietary ESG Dashboard, which contains a wide range of ESG factors and ranks companies on their behaviors versus peers. In making its investment decisions, the Adviser will seek to consider ESG issues with regards to the holding of either individual securities or various categories or classes of securities. These ESG considerations are intended to provide guidance on achieving best practice standards of corporate governance and equity stewardship in order to make informed investment decisions.

The Fund will invest in a diversified portfolio of equities (such as common and/or preferred stock and/or rights/warrants) and/or equity-related instruments (such as depositary receipts) of, or relating to companies in, or that derive a large proportion of their revenue from, international developed markets. Investment in or exposure to such securities will be on a long-only basis.

The Fund may invest in other investment companies and futures contracts to implement elements of its investment strategy, including for cash flow management, cost effectiveness, and gaining exposure to certain markets and securities in a quicker and/or more efficient manner. These investments will be on a long-only basis. There can be no assurance that the Fund’s use of futures contracts will work as intended. Futures contract investments made by the Fund are included within the Fund’s 80% policy (as described below) and are calculated at market value.

The Fund will invest its assets so that, under normal circumstances, at least 80% of its net assets (plus any borrowings for investment purposes) are invested in equity securities of developed markets. The Fund will notify shareholders at least 60 days in advance of any change in its investment policy that would permit the Fund to invest, under normal circumstances, less than 80% of its net assets (plus any borrowings for investment purposes) in equity securities of developed markets.

What are the Main Risks of Investing in the Fund?

All mutual funds take investment risks. Therefore, it is possible to lose money by investing in the Fund. The primary factors that may reduce the Fund's returns include:

- **Stock Market Risk.** The value of equity securities in the Fund's portfolio will fluctuate and, as a result, the Fund's Share price may decline suddenly or over a sustained period of time. Information publicly available about a company, whether from the company's financial statements or other disclosures or from third parties, or information available to some but not all market participants, can affect the price of a company's shares in the market. Among other factors, equity securities may decline in value because of an increase in interest rates or changes in the stock market. Recent and potential future changes in industry and/or economic trends, as well as changes in monetary policy made by central banks and/or their governments, also can affect the level of interest rates and contribute to the development of or increase in volatility, illiquidity, shareholder redemptions and other adverse effects (such as a decline in a company's stock price), which could negatively impact the Fund's performance.
- **Large-Cap Company Risk.** The Fund may invest in large capitalization (or "large-cap") companies. In addition, large-cap companies may have fewer opportunities to expand the market for their products or services, may focus their competitive efforts on maintaining or expanding their market share, and may be less capable of responding quickly to competitive challenges. These factors could result in the Share price of large companies not keeping pace with the overall stock market or growth in the general economy, and could have a negative effect on the Fund's portfolio, performance and Share price.
- **Quantitative Modeling Risk.** The Fund employs quantitative models as a management technique. These models examine multiple economic factors using various proprietary and third-party data. The results generated by quantitative analysis may perform differently than expected and may negatively affect Fund performance for various reasons (for example, human judgment, data imprecision, software or other technology malfunctions, or programming inaccuracies).
- **Environmental, Social and Governance Risk.** The Adviser considers environmental, social and governance (ESG) issues as part of its security selection process. ESG factors are not the only factors considered by the

Adviser and there is no guarantee the companies in which the Fund invests will be considered ESG companies or have high ESG ratings. Such considerations may fail to produce the intended result.

- **Risk Related to the Economy.** The value of the Fund's portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets. Economic, political and financial conditions, industry or economic trends and developments or public health risks, such as epidemics or pandemics, may, from time to time, and for varying periods of time, cause the Fund to experience volatility, illiquidity, shareholder redemptions, or other potentially adverse effects.
- **Risk of Foreign Investing.** The foreign markets in which the Fund invests may be subject to economic or political conditions which are less favorable than those of the United States and may lack financial reporting standards or regulatory requirements comparable to those applicable to U.S. companies.
- **Risk of Investing in Depository Receipts and Domestically Traded Securities of Foreign Issuers.** Because the Fund may invest in American Depository Receipts and other domestically traded securities of foreign companies, whether in the United States or in foreign local markets, the Fund's Share price may be more affected by foreign economic and political conditions, taxation policies and accounting and auditing standards than would otherwise be the case.
- **Currency Risk.** Exchange rates for currencies fluctuate daily. Accordingly, the Fund may experience increased volatility with respect to the value of its Shares and its returns as a result of its exposure to foreign currencies through direct holdings of such currencies or holdings of non-U.S. dollar denominated securities.
- **European Union and Eurozone Related Risk.** A number of countries in the European Union (EU), including certain countries within the EU that have adopted the euro (Eurozone), have experienced, and may continue to experience, severe economic and financial difficulties. Additional countries within the EU may also fall subject to such difficulties. These events could negatively affect the value and liquidity of the Fund's investments in euro-denominated securities and derivatives contracts, securities of issuers located in the EU or with significant exposure to EU issuers or countries.
- **Liquidity Risk.** The securities in which the Fund invests may be less readily marketable and may be subject to greater fluctuation in price than other securities.
- **Risk of Investing in Derivative Contracts.** Derivative contracts involve risks different from, or possibly greater than, risks associated with investing directly in securities and other traditional investments. Specific risk issues related to the use of such contracts include valuation and tax issues, increased potential for losses and/or costs to the Fund and a potential reduction in gains to the Fund. Each of these issues is described in greater

detail in this Prospectus. Derivative contracts may also involve other risks described in this Prospectus, such as stock market, interest rate, credit, currency, liquidity and leverage risks.

- **Counterparty Credit Risk.** Credit risk includes the possibility that a party to a transaction involving the Fund will fail to meet its obligations. This could cause the Fund to lose the benefit of the transaction or prevent the Fund from selling or buying other securities to implement its investment strategy.
- **Custodial Services and Related Investment Costs.** Custodial services and other costs relating to investment in international securities markets generally are more expensive due to differing settlement and clearance procedures than those of the United States.
- **Technology Risk.** The Adviser uses various technologies in managing the Fund consistent with its investment objective and strategy described in this Prospectus. For example, proprietary and third-party data and systems are utilized to support decision making for the Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance.

The Shares offered by this Prospectus are not deposits or obligations of any bank, are not endorsed or guaranteed by any bank and are not insured or guaranteed by the U.S. government, the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

PERFORMANCE: BAR CHART AND TABLE

Risk/Return Bar Chart

The bar chart and performance table below reflect historical performance data for the Fund and are intended to help you analyze the Fund's investment risks in light of its historical returns. The bar chart shows the variability of the Fund's IS class total returns on a calendar year-by-year basis. The Average Annual Total Return table shows returns for each class averaged over the stated periods, and includes comparative performance information. The Fund's performance will fluctuate, and past performance (before and after taxes) is not necessarily an indication of future results. Updated performance information for the Fund is available under the "Products" section at [FederatedInvestors.com](https://www.federatedinvestors.com) or by calling 1-800-341-7400.

Within the periods shown in the bar chart, the Fund's IS class highest quarterly return was 22.27% (quarter ended December 31, 2022). Its lowest quarterly return was (23.37)% (quarter ended September 30, 2022).

Average Annual Total Return Table

The Fund's R6 class commenced operations on June 11, 2021. In addition to Return Before Taxes, Return After Taxes is shown for the Fund's IS class to illustrate the effect of federal taxes on Fund returns. After-tax returns are shown only for IS class, and after-tax returns for R6 class will differ from those shown below for IS class. *Actual after-tax returns depend on each investor's personal tax situation, and are likely to differ from those shown.* After-tax returns are calculated using a standard set of assumptions. The stated returns assume the highest historical federal income and capital gains tax rates. These after-tax returns do not reflect the effect of any applicable **state** and **local** taxes. After-tax returns are not relevant to investors holding Shares through a 401(k) plan, an Individual Retirement Account (IRA) or other tax-advantaged investment plans. (For the Period Ended December 31, 2022)
