

# IMPORTANT INFORMATION REGARDING THE FEDERATED HERMES FUNDS

---

## **SUPPLEMENT TO CURRENT SUMMARY PROSPECTUSES, PROSPECTUSES AND STATEMENTS OF ADDITIONAL INFORMATION**

On November 10, 2022, the Boards of Trustees/Directors (the “Boards”) of the Federated Hermes Funds (the “Funds”) listed below approved a Plan of Conversion for the Class B Shares of the Funds pursuant to which the Class B Shares of each of the Funds will be converted into each Fund’s existing Class A Shares on or about February 3, 2023, resulting in the closure and termination of the Funds’ Class B Shares. In approving the conversion, the Board determined that the conversion of the Class B Shares into Class A Shares is in the best interests of the shareholders of the Class B Shares. The Funds’ Class B Shares were previously closed to new investments and new accounts, with the exception of exchanges by existing Class B shareholders.

Pursuant to the Plan of Conversion, Class B shareholders will automatically receive shares of Class A Shares in exchange for their Class B Shares without any fee, load or charge to the shareholder, including any contingent deferred sales charges, on or about February 3, 2023. Future purchases of Class A Shares will be at the applicable sales load schedule. Shareholders should consult their Fund’s prospectus for additional information regarding Class A sales loads and other expenses.

The conversion will occur on a tax-free basis. The cash value of a shareholder’s investment will not change as a result of the share class conversion. Class B shareholders will receive Class A Shares with a total dollar value equal to the total dollar value of the Class B Shares owned at the time of conversion. With respect to each Fund, the Class A Shares into which shareholders will be converted currently offer a lower total net expense ratio than the Class B Shares.

No action is required by shareholders to effect the conversion. There will be no disruption to their accounts.

Please delete all references to the following Class B Shares effective as of February 3, 2023.

The Predecessor Fund was also managed by the Adviser. The Predecessor Fund is the accounting and tax survivor.*

### Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 for the time periods indicated and then redeem all of your Shares at the end of those periods. Expenses assuming no redemption are also shown. The Example also assumes that your investment has a 5% return each year and that operating expenses (excluding any sales loads on reinvested dividends, fee waivers and/or expense reimbursements) are as shown in the table above and remain the same. The expenses used to calculate the Fund's examples do not include fee waivers or expense reimbursements. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years
<b>A:</b>				
Expenses assuming redemption	\$663	\$ 901	\$1,158	\$1,892

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 70% of the average value of its portfolio.

## RISK/RETURN SUMMARY: INVESTMENTS, RISKS AND PERFORMANCE

### What are the Fund’s Main Investment Strategies?

The Fund seeks to achieve its objective by investing primarily in the common stock of large-cap U.S. companies undervalued relative to the market.

The Fund’s investment adviser’s (“Adviser”) investment strategy utilizes a large-cap value approach by selecting most of its investments from companies listed in the Russell 1000<sup>®</sup> Value Index, an index that measures the performance of those companies with lower price-to-book ratios and lower forecasted growth values within the large-cap segment of the U.S. equity universe, which includes the 1,000 largest U.S. companies by market capitalization. The Fund considers large-cap companies to be those of a size similar to companies listed in the Russell 1000<sup>®</sup> Value Index. As of October 31, 2021, companies in the Russell 1000<sup>®</sup> Value Index ranged in market capitalization from \$0.4 billion to \$2.0 trillion. As more fully described in this Prospectus, the Fund’s investments primarily include the following: equity securities of domestic issuers and real estate investment trusts (REITs). As the Fund’s sector exposure approximates the Russell 1000<sup>®</sup> Value Index, the Fund may, from time to time, have large allocations to certain broad market sectors, such as financials, healthcare and industrials.

The Adviser implements its strategy using a quantitative model driven by fundamental and technical stock selection variables, including relative value, profit trends, capital structure and price history. This process seeks to impose strict discipline over stock selection, unimpeded by market or manager psychology. It seeks to maximize compound annual return while controlling

risk. The process also takes into account trading costs in an effort to ensure that trades are generated only to the extent they are expected to be profitable on an after-trading-cost basis. Additionally, risk is controlled through diversification constraints which limit exposure to individual companies as well as to groups of correlated companies.

The Fund will invest its assets so that at least 80% of its net assets (plus any borrowings for investment purposes) are invested in large-cap investments. Such large-cap investments will be comprised primarily of common stocks. The Fund will notify shareholders at least 60 days in advance of any change in its investment policies that would enable the Fund to normally invest less than 80% of its net assets (plus any borrowings for investment purposes) in large-cap investments.

The Fund actively trades its portfolio securities in an attempt to achieve its investment objective. Active trading will cause the Fund to have an increased portfolio turnover rate and increase the Fund's trading costs, which may have an adverse impact on the Fund's performance. An active trading strategy will likely result in the Fund generating more short-term capital gains or losses. Short-term gains are generally taxed at a higher rate than long-term gains. Any short-term losses are used first to offset short-term gains.

#### **What are the Main (or Principal) Risks of Investing in the Fund?**

All mutual funds take investment risks. Therefore, it is possible to lose money by investing in the Fund. The primary factors that may reduce the Fund's returns include:

- **Stock Market Risk.** The value of equity securities in the Fund's portfolio will fluctuate and, as a result, the Fund's Share price may decline suddenly or over a sustained period of time. Information publicly available about a company, whether from the company's financial statements or other disclosures or from third parties, or information available to some but not all market participants, can affect the price of a company's shares in the market. Among other factors, equity securities may decline in value because of an increase in interest rates or changes in the stock market. Recent and potential future changes in industry and/or economic trends, as well as changes in monetary policy made by central banks and/or their governments, also can affect the level of interest rates and contribute to the development of or increase in volatility, illiquidity, shareholder redemptions and other adverse effects (such as a decline in a company's stock price), which could negatively impact the Fund's performance.
- **Risk Related to the Economy.** The value of the Fund's portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets. Economic, political and financial conditions, industry or economic trends and developments or public health risks, such as epidemics or pandemics, may, from time to time, and for varying periods of time, cause the Fund to experience volatility, illiquidity, shareholder redemptions and/or other potentially adverse effects.

- **Large-Cap Company Risk.** The Fund will invest in large capitalization (or “large-cap”) companies. Large-cap companies may have fewer opportunities to expand the market for their products or services, may focus their competitive efforts on maintaining or expanding their market share, and may be less capable of responding quickly to competitive challenges. These factors could result in the share price of large companies not keeping pace with the overall stock market or growth in the general economy, and could have a negative effect on the Fund’s portfolio, performance and Share price.
- **Risk Related to Investing for Value.** Due to their relatively low valuations, value stocks are typically less volatile than growth stocks. Additionally, value stocks tend to have higher dividends than growth stocks. This means they depend less on price changes for returns and may lag behind growth stocks in an up market. The value approach to stock selection also carries the risk that the market will not recognize a security’s intrinsic value for a long time (if ever), or that a stock judged to be undervalued may actually be appropriately priced.
- **Real Estate Investment Trust Risk.** Real estate investment trusts (REITs) carry risks associated with owning real estate, including the potential for a decline in value due to economic or market conditions.
- **Sector Risk.** Because the Fund may allocate relatively more assets to certain industry sectors than others, the Fund’s performance may be more susceptible to any developments which affect those sectors emphasized by the Fund.
- **Quantitative Modeling Risk.** The Fund employs quantitative models as a management technique. These models examine multiple economic factors using various proprietary and third-party data. The results generated by quantitative analysis may perform differently than expected and may negatively affect Fund performance for various reasons (for example, human judgment, data imprecision, software or other technology malfunctions, or programming inaccuracies).

The Shares offered by this Prospectus are not deposits or obligations of any bank, are not endorsed or guaranteed by any bank and are not insured or guaranteed by the U.S. government, the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

## **PERFORMANCE: BAR CHART AND TABLE**

### **Risk/Return Bar Chart**

The Fund is the successor to the Federated MDT Large Cap Value Fund (a Massachusetts business trust with the same name as the Fund) (“Predecessor Fund”), pursuant to a reorganization involving the Fund, the Predecessor Fund and the Federated Clover Value Fund that was completed on the close of business on December 8, 2017. The Predecessor Fund is both the tax and accounting survivor of the reorganization. Prior to the date of the reorganization, the Fund had no investment operations. Accordingly, the performance information, including information on fees and expenses and

financial information provided in this prospectus for periods prior to December 8, 2017 (the Fund’s commencement of investment operations) is historical information for the Predecessor Fund. The Predecessor Fund was managed by Federated MDTA LLC and had substantially identical investment objectives and strategies as the Fund. The investment advisory contract of the Predecessor Fund contained a contractual cap on expenses of 100 basis points. This contractual cap does not exist with respect to the Fund. Given the above, unless specifically stated otherwise, subsequent references in this section to the Fund should be read to include the Predecessor Fund.

The bar chart and performance table below reflect historical performance data for the Fund and the Predecessor Fund and are intended to help you analyze the Fund’s investment risks in light of its historical returns. The bar chart shows the variability of the Fund’s SS class total returns on a calendar year-by-year basis. The Average Annual Total Return table shows returns for each class averaged over the stated periods, and includes comparative performance information. *The Fund’s performance will fluctuate, and past performance (before and after taxes) is not necessarily an indication of future results.* Updated performance information for the Fund is available under the “Products” section at [FederatedInvestors.com](http://FederatedInvestors.com) or by calling 1-800-341-7400.

The total returns shown in the bar chart do not reflect the payment of any sales charges or recurring shareholder account fees. If these charges or fees had been included, the returns shown would have been lower.

The Fund’s SS class total return for the nine-month period from January 1, 2021 to September 30, 2021, was 15.68%.

Within the periods shown in the bar chart, the Fund’s SS class highest quarterly return was 18.63% (quarter ended June 30, 2020). Its lowest quarterly return was (26.14)% (quarter ended March 31, 2020).

### Average Annual Total Return Table

The Predecessor Fund’s A class commenced operations on May 1, 2014. For the periods prior to the commencement of operations of the A class, the performance information shown below is for the Predecessor Fund’s SS class. The performance of the SS class has not been adjusted, except for sales charges,

to reflect the expenses applicable to the A class since the A class has the same net expense ratio as the SS class. The performance of the SS class has been adjusted to remove any voluntary waiver of Fund expenses related to the SS class that may have occurred during the periods prior to the commencement of operations of the A class. The Predecessor Fund's Class R6 Shares commenced operations on June 29, 2016. For the periods prior to the commencement of operations of the Predecessor Fund's R6 class, the performance information shown below is for the Predecessor Fund's SS class. The performance of the SS class has not been adjusted to reflect the expenses applicable to the R6 class since the R6 class has a lower expense ratio than the expense ratio of the SS class. The performance of the SS class has been adjusted to remove any voluntary waiver of Fund expenses related to the SS class that may have occurred during the periods prior to the commencement of operations of the R6 class.

The Fund's B, C and R classes commenced operations on December 8, 2017. The Predecessor Fund did not have corresponding B, C and R classes. For the periods prior to the commencement of operations of the B, C and R classes, the performance information shown below is for the Predecessor Fund's SS class. The performance of the SS class has not been adjusted to reflect the higher expenses applicable to the B, C and R classes, respectively. The B, C and R classes and the SS class are invested in the same portfolio of securities and the annual returns will differ only to the extent that the classes do not have the same expenses. It is anticipated that the expense ratios of the B, C and R classes, respectively, will be higher than the expense ratio of the SS class; accordingly, the actual performance of the B, C and R classes is anticipated to be lower than the performance of the SS class.

In addition to Return Before Taxes, Return After Taxes is shown for the Fund's SS class to illustrate the effect of federal taxes on Fund returns. After-tax returns are shown only for the SS class and after tax-returns for the A, B, C, R, IS and R6 classes will differ from those shown for the SS class. *Actual after-tax returns depend on each investor's personal tax situation, and are likely to differ from those shown.* After-tax returns are calculated using a standard set of assumptions. The stated returns assume the highest historical federal income and capital gains tax rates. These after-tax returns do not reflect the effect of any applicable state and local taxes. After-tax returns are not relevant to investors holding Shares through a 401(k) plan, an Individual Retirement Account (IRA) or other tax-advantaged investment plans.
