# Fund Summary Information

## Federated Hermes Mid-Cap Index Fund (the "Fund")

### RISK/RETURN SUMMARY: INVESTMENT OBJECTIVE

The Fund's investment objective is to provide investment results generally corresponding to the aggregate price and dividend performance of the publicly traded common stocks that comprise the mid-level stock capitalization sector of the United States equity market.

### RISK/RETURN SUMMARY: FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold and sell Institutional Shares (IS), Service Shares (SS) and Class R6 Shares (R6) of the Fund. If you purchase the Fund's Shares through a broker acting as an agent on behalf of its customers, you may be required to pay a commission to such broker; such commissions, if any, are not reflected in the Example below.

#### Shareholder Fees (fees paid directly from your investment)

	IS	SS	R6
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price).....	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price or redemption proceeds, as applicable) .....	None	None	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends (and other Distributions) (as a percentage of offering price) .....	None	None	None
Redemption Fee (as a percentage of amount redeemed, if applicable) .....	None	None	None
Exchange Fee .....	None	None	None

#### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	IS	SS	R6
Management Fee .....	0.30%	0.30%	0.30%
Distribution (12b-1) Fee .....	None	None	None
Other Expenses .....	0.17%	0.40%	0.12%
Total Annual Fund Operating Expenses.....	0.47%	0.70%	0.42%
Fee Waivers and/or Expense Reimbursements <sup>1</sup> .....	(0.15)%	(0.13)%	(0.11)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements .....	0.32%	0.57%	0.31%

1 The Manager and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Total annual fund operating expenses (excluding acquired fund fees and expenses, interest expense, extraordinary expenses and proxy-related expenses paid by the Fund, if any) paid by the Fund's IS, SS and R6 classes (after the voluntary waivers and/or reimbursements) will not exceed 0.31%, 0.56% and 0.30% (the "Fee Limit"), respectively, up to but not including the later of (the "Termination Date"): (a) January 1, 2022; or (b) the date of the Fund's next effective Prospectus. While the Manager and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Fund's Board of Trustees.

### Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that operating expenses are as shown in the table above and remain the same. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years
IS	\$48	\$151	\$263	\$591
SS	\$72	\$224	\$390	\$871
R6	\$43	\$135	\$235	\$530

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 34% of the average value of its portfolio.

## RISK/RETURN SUMMARY: INVESTMENTS, RISKS AND PERFORMANCE

### What are the Fund's Main Investment Strategies?

The Fund normally invests its assets primarily in common stocks included in the Standard & Poor's MidCap 400 Index ("Index"). The Index is a broad-based market capitalization-weighted index of common stocks representing all major industries in the mid-range of the U.S. stock market. Under normal circumstances, the Manager will also use enhanced management techniques as further described in the Prospectus in an attempt to improve the performance of its portfolio relative to the Index to compensate for Fund expenses and tracking error. The Manager's principal enhanced technique will be to over or underweight positions in securities within the Index based upon the Manager's quantitative analysis of the securities. The Fund may invest in derivatives

contracts (such as, for example, futures contracts) to implement its investment strategies. The Fund may use derivative contracts to increase or decrease the portfolio's exposure to the investment(s) underlying the derivative in an attempt to benefit from changes in the value of the underlying investment(s), to realize gains from trading a derivative contract or to hedge against potential losses. There can be no assurances that the Fund's use of derivative contracts will work as intended. Derivative investments made by the Fund are included within the Fund's 80% policy (as described below) and are calculated at market value.

The Fund will invest its net assets so that at least 80% of its net assets (plus any borrowings for investment purposes) are invested in Index investments. The Fund will notify shareholders of any changes in its investment policies that would enable the Fund to normally invest less than 80% of its net assets (plus any borrowings for investment purposes) in Index investments.

The Fund's Manager has received an exemptive order from the SEC to permit the Trust and the Board of Trustees (the "Board") to appoint and replace subadvisers for the Fund and to enter into and amend the Fund's subadvisory agreements without further shareholder approval.

### **What are the Main Risks of Investing in the Fund?**

All mutual funds take investment risks. Therefore, it is possible to lose money by investing in the Fund. The primary factors that may reduce the Fund's returns include:

- **Stock Market Risk.** The value of equity securities in the Fund's portfolio will fluctuate and, as a result, the Fund's Share price may decline suddenly or over a sustained period of time. Information publicly available about a company, whether from the company's financial statements or other disclosures or from third parties, or information available to some but not all market participants, can affect the price of a company's shares in the market. Among other factors, equity securities may decline in value because of an increase in interest rates or changes in the stock market. Recent and potential future changes in industry and/or economic trends, as well as changes in monetary policy made by central banks and/or their governments, also can affect the level of interest rates and contribute to the development of or increase in volatility, illiquidity, shareholder redemptions and other adverse effects (such as a decline in a company's stock price), which could negatively impact the Fund's performance.
- **Real Estate Investment Trust Risk.** Real estate investment trusts (REITs) carry risks associated with owning real estate, including the potential for a decline in value due to economic or market conditions.
- **Mid-Cap Company Risk.** The Fund may invest in mid-capitalization (or "mid-cap") companies. Mid-cap companies often have narrower markets, limited managerial and financial resources, more volatile performance and greater risk of failure, compared to larger, more established companies. These factors could increase the volatility of the Fund's portfolio, performance and Share price.

- **Sector Risk.** Because the Fund may allocate relatively more assets to certain industry sectors than others, the Fund's performance may be more susceptible to any developments that affect those sectors emphasized by the Fund.
- **Risk of Investing in Derivative Contracts.** Derivative contracts involve risks different from, or possibly greater than, risks associated with investing directly in securities and other traditional investments. Specific risk issues related to the use of such contracts include valuation and tax issues, increased potential for losses and/or costs to the Fund and a potential reduction in gains to the Fund. Each of these issues is described in greater detail in this Prospectus. Derivative contracts may also involve other risks described in this Prospectus, such as stock market, credit, liquidity and leverage risks.
- **Leverage Risk.** Leverage risk is created when an investment exposes the Fund to a level of risk that exceeds the amount invested. Changes in the value of such an investment magnify the Fund's risk of loss and potential for gain.
- **Liquidity Risk.** Liquidity risk refers to the possibility that the Fund may not be able to sell a security or close out a derivative contract when it wants to. If this happens, the Fund will be required to continue to hold the security or keep the position open, and the Fund could incur losses. Over-the-counter (OTC) derivative contracts generally carry greater liquidity risk than exchange-traded contracts.
- **Counterparty Credit Risk.** Credit risk includes the possibility that a party to a transaction involving the Fund will fail to meet its obligations.
- **Risk Related to the Economy.** The value of the Fund's portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets. Economic, political and financial conditions, industry or economic trends and developments or public health risks, such as epidemics or pandemics, may, from time to time, and for varying periods of time, cause the Fund to experience volatility, illiquidity, shareholder redemptions, or other potentially adverse effects.
- **Quantitative Modeling Risk.** The Fund employs quantitative models as a management technique. These models examine multiple economic factors using various proprietary and third-party data. The results generated by quantitative analysis may perform differently than expected and may negatively affect Fund performance for various reasons (for example, human judgment, data imprecision, software or other technology malfunctions, or programming inaccuracies).
- **Technology Risk.** The Manager uses various technologies in managing the Fund, consistent with its investment objective and strategy described in this prospectus. For example, proprietary and third-party data and systems are utilized to support decision making for the Fund. Data imprecision, software

or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance.

The Shares offered by this Prospectus are not deposits or obligations of any bank, are not endorsed or guaranteed by any bank and are not insured or guaranteed by the U.S. government, the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

**PERFORMANCE: BAR CHART AND TABLE**

**Risk/Return Bar Chart**

The bar chart and performance table below reflect historical performance data for the Fund and are intended to help you analyze the Fund’s SS class investment risks in light of its historical returns. The bar chart shows the variability of the Fund’s SS class total returns on a calendar year-by-year basis. The Average Annual Total Return table shows returns *averaged* over the stated periods, and includes comparative performance information. *The Fund’s performance will fluctuate, and past performance (before and after taxes) is not necessarily an indication of future results.* Updated performance information for the Fund is available under the “Products” section at [FederatedInvestors.com](http://FederatedInvestors.com) or by calling 1-800-341-7400.

The Fund’s SS class total return for the nine-month period from January 1, 2020 to September 30, 2020, was (8.86)%.

Within the periods shown in the bar chart, the Fund’s SS class highest quarterly return was 14.30% (quarter ended March 31, 2019). Its lowest quarterly return was (20.00)% (quarter ended September 30, 2011).

**Average Annual Total Return Table**

The Fund’s IS class commenced operations on January 4, 2012. Accordingly, for the period prior to the commencement of operations of the Fund’s IS class, the performance information shown in the Average Annual Total Return Table is for the Fund’s SS class, adjusted to remove any voluntary waiver of Fund expenses related to the Fund’s SS class that occurred prior to the commencement of operations of the Fund’s IS class. The Fund’s R6 class

commenced operations on October 18, 2016. For the period prior to commencement of operations of the Fund's R6 class, the performance information shown below is for the Fund's SS class, adjusted to remove any voluntary waiver of Fund expenses related to the Fund's SS class that occurred during the period prior to the commencement of the Fund's R6 class.

In addition to Return Before Taxes, Return After Taxes is shown for the Fund's SS class to illustrate the effect of federal taxes on Fund returns. After tax-returns are shown only for the Fund's SS class and after-tax returns for the Fund's IS class and R6 class may differ from those shown for the Fund's SS class. Actual after-tax returns depend on each investor's personal tax situation, and are likely to differ from those shown. After-tax returns are calculated using a standard set of assumptions. The stated returns assume the highest historical federal income and capital gains tax rates. These after-tax returns do not reflect the effect of any applicable state and local taxes. After-tax returns are not relevant to investors holding shares through tax-deferral programs, such as a 401(k) plan, an Individual Retirement Account or other tax-advantaged investment plan.

(For the Period Ended December 31, 2019)

## **PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

### **IS & SS Classes**

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and/or its related companies may pay the intermediary for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

## **PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

### **R6 Class**

Class R6 Shares do not make any payments to financial intermediaries, either from Fund assets or from the investment adviser and its affiliates.
