---

## SUPPLEMENT TO CURRENT STATEMENTS OF ADDITIONAL INFORMATION

Please add the following to the Statement of Additional Information under the section entitled “**Investment Risks.**”

### “LIBOR Risk

Certain derivatives or debt securities, or other financial instruments in which the Fund may invest, as well as the Fund’s committed, revolving line of credit agreement, utilize or may utilize in the future the London Interbank Offered Rate (LIBOR) as the reference or benchmark rate for interest rate calculations. LIBOR is a measure of the average interest rate at which major global banks can borrow from one another. It is quoted in multiple currencies and tenors using data reported by a panel of private-sector banks. Following allegations of rate manipulation in 2012 and concerns regarding its thin liquidity, the use of LIBOR came under increasing pressure, and in July 2017, the U.K. Financial Conduct Authority, which regulates LIBOR, announced that it will stop encouraging banks to provide the quotations needed to sustain LIBOR after 2021. This may cause LIBOR to cease to be published. LIBOR panel banks have agreed to submit quotations to LIBOR through the end of 2021. Before then, it is expected that market participants will transition to the use of different reference or benchmark rates. However, there is currently no definitive information regarding the future utilization of LIBOR or of any particular replacement rate. Regulators have suggested alternative reference rates, but global consensus is lacking and the process for amending existing contracts or instruments to transition away from LIBOR remains unclear.

While it is expected that market participants will amend financial instruments referencing LIBOR to include fallback provisions and other measures that contemplate the discontinuation of LIBOR or other similar market disruption events, neither the effect of the transition process nor the viability of such measures is known. While market participants have begun transitioning away from LIBOR, there are obstacles to converting certain longer term securities and transactions to a new benchmark or benchmarks. The effectiveness of multiple alternative reference rates as opposed to one primary reference rate has not been determined. The effectiveness of alternative reference rates used in new or existing financial instruments and products has also not yet been determined. As market participants transition away from LIBOR, LIBOR’s usefulness may deteriorate, which could occur prior to the end of 2021. The transition process may lead to increased volatility and illiquidity in markets that currently rely on LIBOR to determine interest rates. LIBOR’s deterioration may adversely affect the liquidity and/or market value of securities that use LIBOR as a benchmark interest rate, including securities and other financial instruments held by the Fund. Further, the utilization of an alternative reference rate, or the transition process to an alternative reference rate, may adversely affect the Fund’s performance.”

## SUPPLEMENT TO CURRENT SUMMARY PROSPECTUSES, PROSPECTUSES AND STATEMENTS OF ADDITIONAL INFORMATION

\* The Federated Hermes Funds include the below listed registrants and funds (including all share classes)

On February 13, 2020, in connection with Federated Investors, Inc.'s corporate name change to Federated Hermes, Inc., which became effective January 31, 2020, the Boards of Directors/Trustees (the "Boards") of the Federated Hermes funds listed below (the "Funds") approved changing each Fund's name to replace "Federated" with "Federated Hermes." In addition, the Boards approved changing each Fund's registrant name (the "Registrant") as noted below. There are no changes in fund operations or investment policies as a result of the name changes. The Fund and Registrant name changes will be effective at the close of business on June 26, 2020.

## How is the Fund Organized?

The Fund is a diversified portfolio of Federated Equity Funds (“Trust”). The Trust is an open-end, management investment company that was established under the laws of the Commonwealth of Massachusetts on April 17, 1984. The Trust may offer separate series of shares representing interests in separate portfolios of securities.

The Board of Trustees (“Board”) has established four classes of shares of the Fund, known as Class A Shares, Class C Shares, Institutional Shares and Class T Shares (“Shares”). This SAI relates to Class A Shares, Class C Shares and Institutional Shares. The Fund’s investment adviser is Federated Equity Management Company of Pennsylvania (“Adviser”).

The Fund is the successor to the Prudent Bear Fund pursuant to a reorganization that took place on December 5, 2008. Prior to that date, the Fund had no investment operations. Accordingly, the performance information and financial information provided in the prospectus and in this SAI for periods prior to the first business day following the reorganization is historical information for the Prudent Bear Fund. The Prudent Bear Fund was managed by David W. Tice & Associates, LLC and had the same investment objectives and similar strategies as the Fund. Holders of Class C Shares and No Load Shares of the Prudent Bear Fund received Class C Shares and Class A Shares of the Fund, respectively, as a result of the reorganization.

## Securities in Which the Fund Invests

The principal securities or other investments in which the Fund invests are described in the Fund’s Prospectus. The Fund also may invest in securities or other investments as non-principal investments for any purpose that is consistent with its investment objective. The following information is either additional information in respect of a principal security or other investment referenced in the Prospectus or information in respect of a non-principal security or other investment (in which case there is no related disclosure in the Prospectus).

### **SECURITIES DESCRIPTIONS AND TECHNIQUES**

#### **EQUITY SECURITIES**

Equity securities represent a share of an issuer’s earnings and assets, after the issuer pays its liabilities. The Fund cannot predict the income it will receive from equity securities because issuers generally have discretion as to the payment of any dividends or distributions. However, equity securities offer greater potential for appreciation than many other types of securities, because their value increases directly with the value of the issuer’s business.

The following further describes the types of equity securities in which the Fund invests.

#### **Preferred Stocks**

Preferred stocks have the right to receive specified dividends or distributions before the issuer makes payments on its common stock. Some preferred stocks also participate in dividends and distributions paid on common stock. Preferred stocks may also permit the issuer to redeem the stock.

#### **Warrants**

Warrants give the Fund the option to buy the issuer’s equity securities at a specified price (the exercise price) at a specified future date (the expiration date). The Fund may buy the designated securities by paying the exercise price before the expiration date. Warrants may become worthless if the price of the stock does not rise above the exercise price by the expiration date. This increases the market risks of warrants as compared to the underlying security. Rights are the same as warrants, except companies typically issue rights to existing stockholders.

#### **FIXED-INCOME SECURITIES**

Fixed-income securities pay interest, dividends or distributions at a specified rate. The rate may be a fixed percentage of the principal or may be adjusted periodically. In addition, the issuer of a fixed-income security must repay the principal amount of the security, normally within a specified time. Fixed-income securities provide more regular income than equity securities. However, the returns on fixed-income securities are limited and normally do not increase with the issuer’s earnings. This limits the potential appreciation of fixed-income securities as compared to equity securities.

A security’s yield measures the annual income earned on a security as a percentage of its price. A security’s yield will increase or decrease depending upon whether it costs less (a “discount”) or more (a “premium”) than the principal amount. If the issuer may redeem the security before its scheduled maturity, the price and yield on a discount or premium security may change based upon the probability of an early redemption. Securities with higher risks generally have higher yields.

The following further describes the types of fixed-income securities in which the Fund invests.

### **Treasury Securities (A Fixed-Income Security)**

Treasury securities are direct obligations of the federal government of the United States. Treasury securities are generally regarded as having minimal credit risks.

### **Government Securities (A Fixed-Income Security)**

Government securities are issued or guaranteed by a federal agency or instrumentality acting under federal authority. Some government securities, including those issued by Government National Mortgage Association (“Ginnie Mae”), are supported by the full faith and credit of the United States and are guaranteed only as to the timely payment of interest and principal.

Other government securities receive support through federal subsidies, loans or other benefits, but are not backed by the full faith and credit of the United States. For example, the U.S. Treasury is authorized to purchase specified amounts of securities issued by (or otherwise make funds available to) the Federal Home Loan Bank System, Federal Home Loan Mortgage Corporation (“Freddie Mac”) and Federal National Mortgage Association (“Fannie Mae”) in support of such obligations.

Some government agency securities have no explicit financial support, and are supported only by the credit of the applicable agency, instrumentality or corporation. The U.S. government has provided financial support to Freddie Mac and Fannie Mae, but there is no assurance that it will support these or other agencies in the future.

The Fund treats mortgage-backed securities guaranteed by a federal agency or instrumentality as government securities. Although such a guarantee helps protect against credit risk, it does not eliminate it entirely or reduce other risks.

***Additional Information Related to Freddie Mac and Fannie Mae.*** The extreme and unprecedented volatility and disruption that impacted the capital and credit markets beginning in 2008 led to market concerns regarding the ability of Freddie Mac and Fannie Mae to withstand future credit losses associated with securities held in their investment portfolios, and on which they provide guarantees, without the direct support of the federal government. On September 7, 2008, Freddie Mac and Fannie Mae were placed under the conservatorship of the Federal Housing Finance Agency (FHFA). Under the plan of conservatorship, the FHFA assumed control of, and generally has the power to direct, the operations of Freddie Mac and Fannie Mae, and is empowered to exercise all powers collectively held by their respective shareholders, directors and officers, including the power to: (1) take over the assets of and operate Freddie Mac and Fannie Mae with all the powers of the shareholders, the directors and the officers of Freddie Mac and Fannie Mae and conduct all business of Freddie Mac and Fannie Mae; (2) collect all obligations and money due to Freddie Mac and Fannie Mae; (3) perform all functions of Freddie Mac and Fannie Mae which are consistent with the conservator’s appointment; (4) preserve and conserve the assets and property of Freddie Mac and Fannie Mae; and (5) contract for assistance in fulfilling any function, activity, action or duty of the conservator.

In connection with the actions taken by the FHFA, the Treasury has entered into certain preferred stock purchase agreements (SPAs) with each of Freddie Mac and Fannie Mae which establish the Treasury as the holder of a new class of senior preferred stock in each of Freddie Mac and Fannie Mae. The senior preferred stock was issued in connection with financial contributions from the Treasury to Freddie Mac and Fannie Mae. Although the SPAs are subject to amendment from time to time, currently the Treasury is obligated to provide such financial contributions up to an aggregate maximum amount determined by a formula set forth in the SPAs, and until such aggregate maximum amount is reached, there is not a specific end date to the Treasury’s obligations.

The future status and role of Freddie Mac and Fannie Mae could be impacted by (among other things) the actions taken and restrictions placed on Freddie Mac and Fannie Mae by the FHFA in its role as conservator, the restrictions placed on Freddie Mac’s and Fannie Mae’s operations and activities under the SPAs, market responses to developments at Freddie Mac and Fannie Mae, downgrades or upgrades in the credit ratings assigned to Freddie Mac and Fannie Mae by nationally recognized statistical rating organizations (NRSROs) or ratings services, and future legislative and regulatory action that alters the operations, ownership, structure and/or mission of these institutions, each of which may, in turn, impact the value of, and cash flows on, any securities guaranteed by Freddie Mac and Fannie Mae.

In addition, the future of Freddie Mac and Fannie Mae, and other U.S. government-sponsored enterprises that are not backed by the full faith and credit of the U.S. government (GSEs), remains in question as the U.S. government continues to consider options ranging from structural reform, nationalization, privatization, or consolidation, to outright elimination. The issues that have led to significant U.S. government support for Freddie Mac and Fannie Mae have sparked serious debate regarding the continued role of the U.S. government in providing mortgage loan liquidity.

### **Commercial Paper (A Type of Corporate-Debt Security)**

Commercial paper is an issuer’s obligation with a maturity of less than nine months. Companies typically issue commercial paper to pay for current expenditures. Most issuers constantly reissue their commercial paper and use the proceeds (or bank loans) to repay maturing paper. If the issuer cannot continue to obtain liquidity in this fashion, its commercial paper may default. The short maturity of commercial paper reduces both the market and credit risks as compared to other debt securities of the same issuer.

### **Convertible Securities (A Fixed-Income Security)**

Convertible securities are fixed-income securities or preferred stocks that the Fund has the option to exchange for equity securities at a specified conversion price. The option allows the Fund to realize additional returns if the market price of the equity securities exceeds the conversion price. For example, the Fund may hold fixed-income securities that are convertible into shares of common stock at a conversion price of \$10 per share. If the market value of the shares of common stock reached \$12, the Fund could realize an additional \$2 per share by converting its fixed-income securities.

Convertible securities have lower yields than comparable fixed-income securities. In addition, at the time a convertible security is issued the conversion price exceeds the market value of the underlying equity securities. Thus, convertible securities may provide lower returns than non-convertible, fixed-income securities or equity securities depending upon changes in the price of the underlying equity securities. However, convertible securities permit the Fund to realize some of the potential appreciation of the underlying equity securities with less risk of losing its initial investment.

The Fund treats convertible securities as both fixed-income and equity securities for purposes of its investment policies and limitations, because of their unique characteristics.

### **Foreign Government Securities (A Type of Foreign Fixed-Income Security)**

Foreign government securities generally consist of fixed-income securities supported by national, state or provincial governments or similar political subdivisions. Foreign government securities also include debt obligations of supranational entities, such as international organizations designed or supported by governmental entities to promote economic reconstruction or development, international banking institutions and related government agencies. Examples of these include, but are not limited to, the International Bank for Reconstruction and Development (the World Bank), the Asian Development Bank, the European Investment Bank and the Inter-American Development Bank.

Foreign government securities also include fixed-income securities of quasi-governmental agencies that are either issued by entities owned by a national, state or equivalent government or are obligations of a political unit that are not backed by the national government's full faith and credit. Further, foreign government securities include mortgage-related securities issued or guaranteed by national, state or provincial governmental instrumentalities, including quasi-governmental agencies.

### **DERIVATIVE CONTRACTS**

Derivative contracts are financial instruments that require payments based upon changes in the values of designated securities, commodities, currencies, indices or other assets or instruments including other derivative contracts (each a "Reference Instrument" and collectively, "Reference Instruments"). Each party to a derivative contract may sometimes be referred to as a counterparty. Some derivative contracts require payments relating to an actual, future trade involving the Reference Instrument. These types of derivatives are frequently referred to as "physically settled" derivatives. Other derivative contracts require payments relating to the income or returns from, or changes in the market value of, a Reference Instrument. These types of derivatives are known as "cash-settled" derivatives, since they require cash payments in lieu of delivery of the Reference Instrument.

Many derivative contracts are traded on securities or commodities exchanges. In this case, the exchange sets all the terms of the contract except for the price. Investors make payments due under their contracts through the exchange. Most exchanges require investors to maintain margin accounts through their brokers to cover their potential obligations to the exchange. Parties to the contract make (or collect) daily payments to the margin accounts to reflect losses (or gains) in the value of their contracts. This protects investors against potential defaults by the other party to the contract. Trading contracts on an exchange also allows investors to close out their contracts by entering into offsetting contracts.

For example, the Fund could close out an open contract to buy an asset at a future date by entering into an offsetting contract to sell the same asset on the same date. If the offsetting sale price is more than the original purchase price, the Fund realizes a gain; if it is less, the Fund realizes a loss. Exchanges may limit the amount of open contracts permitted at any one time. Such limits may prevent the Fund from closing out a position. If this happens, the Fund will be required to keep the contract open (even if it is losing money on the contract), and to make any payments required under the contract (even if it has to sell portfolio securities at unfavorable prices to do so). Inability to close out a contract could also harm the Fund by preventing it from disposing of or trading any assets it has been using to secure its obligations under the contract.

The Fund may also trade derivative contracts over-the-counter (OTC) in transactions negotiated directly between the Fund and a financial institution. OTC contracts do not necessarily have standard terms, so they may be less liquid and more difficult to close-out than exchange-traded contracts. In addition, OTC contracts with more specialized terms may be more difficult to value than exchange-traded contracts, especially in times of financial stress.

The market for swaps and other OTC derivatives was largely unregulated prior to the enactment of federal legislation known as the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"). Regulations enacted by the Commodity Futures Trading Commission (the CFTC) under the Dodd-Frank Act require the Fund to clear certain swap contracts through a clearing house or central counterparty (a CCP).

To clear a swap through the CCP, the Fund will submit the contract to, and post margin with, a futures commission merchant (FCM) that is a clearing house member. The Fund may enter into the swap with a financial institution other than the FCM and arrange for the contract to be transferred to the FCM for clearing, or enter into the contract with the FCM itself. If the Fund must centrally clear a transaction, the CFTC's regulations also generally require that the swap be executed on registered exchange or through a market facility that is known as a swap execution facility or SEF. Central clearing is presently required only for certain swaps, the CFTC is expected to impose a mandatory central clearing requirement for additional derivative instruments over time.

The CCP, SEF and FCM are all subject to regulatory oversight by the CFTC. In addition, most derivative market participants are now regulated as swap dealers or major swap participants and are subject to certain minimum capital and margin requirements and business conduct standards. Similar regulatory requirements are expected to apply to derivative contracts that are subject to the jurisdiction of the SEC, although the SEC has not yet finalized its regulations. In addition, uncleared OTC swaps will be subject to regulatory collateral requirements that could adversely affect the Fund's ability to enter into swaps in the OTC market. These developments could cause the Fund to terminate new or existing swap agreements or to realize amounts to be received under such instruments at an inopportune time.

Until the mandated rulemaking and regulations are implemented completely, it will not be possible to determine the complete impact of the Dodd-Frank Act and related regulations on the Fund.

Depending on how the Fund uses derivative contracts and the relationships between the market value of a derivative contract and the Reference Instrument, derivative contracts may increase or decrease the Fund's exposure to the risks of the Reference Instrument, and may also expose the fund to liquidity and leverage risks. OTC contracts also expose the Fund to credit risks in the event that a counterparty defaults on the contract, although this risk may be mitigated by submitting the contract for clearing through a CCP.

The Fund may invest in a derivative contract if it is permitted to own, invest in or otherwise have economic exposure to the Reference Instrument. The Fund is not required to own a Reference Instrument in order to buy or sell a derivative contract relating to that Reference Instrument. The Fund may trade in the following types of derivative contracts, including combinations thereof:

#### **Futures Contracts (A Type of Derivative)**

Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a Reference Instrument at a specified price, date and time. Entering into a contract to buy a Reference Instrument is commonly referred to as buying a contract or holding a long position in the asset. Entering into a contract to sell a Reference Instrument is commonly referred to as selling a contract or holding a short position in the Reference Instrument. Futures contracts are considered to be commodity contracts. The Adviser has claimed an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act with respect to the Fund, and therefore is not subject to registration or regulation as a commodity pool operator under the Act with respect to the Fund. Futures contracts traded OTC are frequently referred to as forward contracts. The Fund can buy or sell financial futures (such as interest rate futures, index futures and security futures), as well as, currency futures and currency forward contracts.

#### **Interest Rate Futures**

An interest-rate futures contract is an exchange-traded contract for which the Reference Instrument is an interest-bearing fixed-income security or an inter-bank deposit. Two examples of common interest rate futures contracts are U.S. Treasury futures contracts and Eurodollar futures contracts. The Reference Instrument for a U.S. Treasury futures contract is a U.S. Treasury security. The Reference Instrument for a Eurodollar futures contract is the London Interbank Offered Rate (commonly referred to as "LIBOR"); Eurodollar futures contracts enable the purchaser to obtain a fixed rate for the lending of funds over a stated period of time and the seller to obtain a fixed rate for a borrowing of funds over that same period.

#### **Index Futures**

An index futures contract is an exchange-traded contract to make or receive a payment based upon changes in the value of an index. An index is a statistical composite that measures changes in the value of designated Reference Instruments within the index.

#### **Security Futures**

A security futures contract is an exchange-traded contract to purchase or sell in the future a specific quantity of a security (other than a Treasury security) or a narrow-based securities index at a certain price. Presently, the only available security futures contracts use shares of a single equity security as the Reference Instrument. However, it is possible that in the future security futures contracts will be developed that use a single fixed-income security as the Reference Instrument.

### **Currency Futures and Currency Forward Contracts (Types of Futures Contracts)**

A currency futures contract is an exchange-traded contract to buy or sell a particular currency at a specific price at some time in the future (commonly three months or more). A currency forward contract is not an exchange-traded contract and represents an obligation to purchase or sell a specific currency at a future date, at a price set at the time of the contract and for a period agreed upon by the parties which may be either a window of time or a fixed number of days from the date of the contract. Currency futures and forward contracts are highly volatile, with a relatively small price movement potentially resulting in substantial gains or losses to the Fund. Additionally, the Fund may lose money on currency futures and forward contracts if changes in currency rates do not occur as anticipated or if the Fund's counterparty to the contract were to default.

### **Option Contracts (A Type of Derivative)**

Option contracts (also called "options") are rights to buy or sell a Reference Instrument for a specified price (the exercise price) during, or at the end of, a specified period. The seller (or writer) of the option receives a payment, or premium, from the buyer, which the writer keeps regardless of whether the buyer uses (or exercises) the option. Options may be bought or sold on a wide variety of Reference Instruments. Options that are written on futures contracts will be subject to margin requirements similar to those applied to futures contracts.

The Fund may buy and/or sell the following types of options:

#### **Call Options**

A call option gives the holder (buyer) the right to buy the Reference Instrument from the seller (writer) of the option. The Fund may use call options in the following ways:

- Buy call options on a Reference Instrument in anticipation of an increase in the value of the Reference Instrument; and
- Write call options on a Reference Instrument to generate income from premiums, and in anticipation of a decrease or only limited increase in the value of the Reference Instrument. If the Fund writes a call option on a Reference Instrument that it owns and that call option is exercised, the Fund foregoes any possible profit from an increase in the market price of the Reference Instrument over the exercise price plus the premium received.

#### **Put Options**

A put option gives the holder the right to sell the Reference Instrument to the writer of the option. The Fund may use put options in the following ways:

- Buy put options on a Reference Instrument in anticipation of a decrease in the value of the Reference Instrument; and
- Write put options on a Reference Instrument to generate income from premiums, and in anticipation of an increase or only limited decrease in the value of the Reference Instrument. In writing puts, there is a risk that the Fund may be required to take delivery of the Reference Instrument when its current market price is lower than the exercise price.

The Fund may also buy or write options, as needed, to close out existing option positions.

Finally, the Fund may enter into combinations of options contracts in an attempt to benefit from changes in the prices of those options contracts (without regard to changes in the value of the Reference Instrument).

### **Swap Contracts (A Type of Derivative)**

A swap contract (also known as a "swap") is a type of derivative contract in which two parties agree to pay each other (swap) the returns derived from Reference Instruments. Most swaps do not involve the delivery of the underlying assets by either party, and the parties might not own the Reference Instruments. The payments are usually made on a net basis so that, on any given day, the Fund would receive (or pay) only the amount by which its payment under the contract is less than (or exceeds) the amount of the other party's payment. Swap agreements are sophisticated instruments that can take many different forms and are known by a variety of names.

Common swap agreements that the Fund may use include:

#### **Interest Rate Swaps**

Interest rate swaps are contracts in which one party agrees to make regular payments equal to a fixed or floating interest rate times a stated principal amount (commonly referred to as a "notional principal amount") in return for payments equal to a different fixed or floating rate times the same principal amount, for a specific period. For example, a \$10 million London Interbank Offered Rate (commonly referred to as "LIBOR") swap would require one party to pay the equivalent of the London Interbank Offered Rate of interest (which fluctuates) on \$10 million principal amount in exchange for the right to receive the equivalent of a stated fixed rate of interest on \$10 million principal amount.

### **Caps and Floors (A Type of Swap Contract)**

Caps and Floors are contracts in which one party agrees to make payments only if an interest rate or index goes above (Cap) or below (Floor) a certain level in return for a fee from the other party.

### **Total Return Swaps**

A total return swap is an agreement between two parties whereby one party agrees to make payments of the total return from a Reference Instrument (or a basket of such instruments) during the specified period, in return for payments equal to a fixed or floating rate of interest or the total return from another Reference Instrument. Alternately, a total return swap can be structured so that one party will make payments to the other party if the value of a Reference Instrument increases, but receive payments from the other party if the value of that instrument decreases.

### **Credit Default Swaps**

A credit default swap (CDS) is an agreement between two parties whereby one party (the “Protection Buyer”) agrees to make payments over the term of the CDS to the other party (the “Protection Seller”), provided that no designated event of default, restructuring or other credit related event (each a “Credit Event”) occurs with respect to the Reference Instrument that is usually a particular bond, loan or the unsecured credit of an issuer, in general (the “Reference Obligation”). Many CDS are physically settled, which means that if a Credit Event occurs, the Protection Seller must pay the Protection Buyer the full notional value, or “par value,” of the Reference Obligation in exchange for delivery by the Protection Buyer of the Reference Obligation or another similar obligation issued by the issuer of the Reference Obligation (the “Deliverable Obligation”). The Counterparties agree to the characteristics of the Deliverable Obligation at the time that they enter into the CDS. Alternately, a CDS can be “cash settled,” which means that upon the occurrence of a Credit Event, the Protection Buyer will receive a payment from the Protection Seller equal to the difference between the par amount of the Reference Obligation and its market value at the time of the Credit Event. The Fund may be either the Protection Buyer or the Protection Seller in a CDS. If the Fund is a Protection Buyer and no Credit Event occurs, the Fund will lose its entire investment in the CDS (i.e., an amount equal to the payments made to the Protection Seller over the term of the CDS). However, if a Credit Event occurs, the Fund (as Protection Buyer) will deliver the Deliverable Obligation and receive a payment equal to the full notional value of the Reference Obligation, even though the Reference Obligation may have little or no value. If the Fund is the Protection Seller and no Credit Event occurs, the Fund will receive a fixed rate of income throughout the term of the CDS. However, if a Credit Event occurs, the Fund (as Protection Seller) will pay the Protection Buyer the full notional value of the Reference Obligation and receive the Deliverable Obligation from the Protection Buyer. A CDS may involve greater risks than if the Fund invested directly in the Reference Obligation. For example, a CDS may increase credit risk since the Fund has exposure to both the issuer of the Reference Obligation and the Counterparty to the CDS.

### **Currency Swaps**

Currency swaps are contracts which provide for interest payments in different currencies. The parties might agree to exchange the notional principal amounts of the currencies as well (commonly called a “foreign exchange swap”).

### **Loan Instruments (A Fixed Income Security)**

The Fund may invest in loans and loan-related instruments, which are generally interests in amounts owed by a corporate, governmental, or other borrower to lenders or groups of lenders known as lending syndicates (loans and loan participations).

Trade finance refers generally to loans made to producers, sellers, importers and/or exporters in relation to commodities, goods or services. Such loans typically have short-to-medium term maturities and will generally be self-liquidating (i.e., as the goods or commodities are sold, proceeds from payments for such goods or commodities are used to pay the principal on the loan prior to being distributed to the borrower). These trade finance structures are subject to significant individual variation but typical structures may include but not be limited to the following:

**Buyer’s Credit.** An extension of credit typically made by a bank to a buyer of goods (i.e., importer) to finance the purchase of goods under a commercial contract of sale.

**Contract Frustration and Trade Credit Indemnity.** An insurance policy issued by an insurer in favor of an insured (typically a supplier or a bank) that provides conditional coverage to the insured against loss incurred as a result of non-payment/non-delivery by an obligor involved in a trade transaction.

**Cross Border Leases.** Cross border leases, often structured with insignificant residual value.

**Export Credit Agency Financing.** A loan where an export credit agency acts as lender, co-lender or guarantor.

**Import Finance.** An extension of credit made to an importer that finances his imports.

**Inventory Finance.** An extension of credit made to a borrowing entity (be it an importer or exporter) secured against the physical inventory held and owned by that borrower. The inventory may be held in a warehouse.

**Letter of Credit (L/C).** A written undertaking, or obligation, of a bank made at the request of its customer (usually an importer) to honor or pay an exporter against presentation of trade documents that comply with terms specified in the letter of credit.

**Multilateral Agency Financing.** A loan where a multilateral agency acts as either a lender or a co-lender. Such a loan may benefit from preferred creditor status in the event of shortages of foreign exchange that may be experienced by sovereign governments.

**Pre-export Finance.** An extension of credit to an exporter before export of the goods has taken place. This can be secured against the subject goods or sales proceeds, or unsecured.

**Prepayment Agreement.** An extension of credit to an exporter where the source of pay-back is through the future export of goods. The difference between Pre-export finance and a Prepayment agreement is that the latter arrangement may involve the buyer of the goods as a contractual party and is in effect a payment for goods in advance of delivery.

**Promissory Notes, Bills of Exchange and Other Forms of Negotiable Instrument.** A written promise to pay issued by (or drawn on) an obligor in favor of a beneficiary.

**Receivables.** Receivables or flows of receivables created in consideration for the transfer of goods and services.

**Supplier Credit.** An extension of credit made by a supplier (or exporter) to an importer to finance a purchase of goods. Banks or other lenders may purchase or participate in the credit instrument if the instrument permits transfer.

**Trade Finance Related Loans and Other Loan Assignments and Participations.** The Fund expects primarily to purchase trade finance loans and other loans by assignment, transfer or novation from a participant in the original syndicate of lenders or from subsequent holders of such interests. The Fund may also purchase participations on a primary basis from a mandated lead arranger during the formation of the original syndicate making such loans. See the headings “Loan Assignments” and “Loan Participations” below for a complete description of such loan assignments and loan participations.

Investments in certain loans have additional risks that result from the use of agents and other interposed financial institutions. Such loans are structured and administered by a financial institution (e.g., a commercial bank) that acts as the agent of the lending syndicate. The agent bank, which may or may not also be a lender, typically administers and enforces the loan on behalf of the lenders in the lending syndicate. In addition, an institution, typically but not always the agent bank, holds the collateral, if any, on behalf of the lenders. A financial institution’s employment as an agent bank might be terminated for a number of reasons, for example, in the event that it fails to observe a requisite standard of care or becomes insolvent. A successor agent bank would generally be appointed to replace the terminated agent bank, and assets held by the agent bank under the loan agreement likely would remain available to holders of such indebtedness. However, if assets held by the agent bank for the benefit of the Fund were determined to be subject to the claims of the agent bank’s general creditors, the Fund might incur certain costs and delays in realizing payment on a loan or loan participation and could suffer a loss of principal and/or interest. In situations involving other interposed financial institutions (e.g., an insurance company or government agency) similar risks may arise.

Loan instruments may be secured or unsecured. If secured, then the lenders have been granted rights to specific property, which is commonly referred to as collateral. The purpose of securing loans is to allow the lenders to exercise rights over the collateral if a loan is not repaid as required by the terms of the loan agreement. Collateral may include security interests in receivables, goods, commodities or real property. With regard to trade finance loan transactions the collateral itself may be the source of proceeds to repay the loan (i.e., the borrower’s ability to repay the loan will be dependent on the borrower’s ability to sell, and the purchaser’s ability to buy, the goods or commodities that are collateral for the loan). Interests in loan instruments may also be tranching or tiered with respect to collateral rights. Unsecured loans expose the lenders to increased credit risk.

The loan instruments in which the Fund may invest may involve borrowers, agent banks, co-lenders and collateral located both in the United States and outside of the United States (in both developed and emerging markets).

The Fund treats loan instruments as a type of fixed-income security. Investments in loan instruments may expose the Fund to interest rate risk, risks of investing in foreign securities, credit risk, liquidity risk, risks of noninvestment-grade securities, risks of emerging markets and leverage risk. (For purposes of the descriptions in this SAI of these various risks, references to “issuer,” include borrowers under loan instruments.) Many loan instruments incorporate risk mitigation, credit enhancement (e.g., standby letters of credit) and insurance products into their structures, in order to manage these risks. There is no guarantee that these risk management techniques will work as intended and may expose the Fund to credit enhancement risk.

Loans and loan-related instruments are generally considered to be illiquid due to the length of time required to transfer an interest in a loan or a related instrument. Additionally, in the case of some loans, such as those related to trade finance, there is a limited secondary market. The liquidity of a particular loan will be determined by the Adviser under guidelines adopted by the Fund’s board.

### **Loan Assignments (A Type of Loan Instrument)**

The Fund may purchase a loan assignment from the agent bank or other member of the lending syndicate. Investments in loans through an assignment may involve additional risks to the Fund. For example, if a loan is foreclosed, a Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. In addition, it is conceivable that under emerging legal theories of lender liability, a Fund could be held liable as co-lender. It is unclear whether loans and other forms of direct indebtedness offer securities law protections against fraud and misrepresentation. In the absence of definitive regulatory guidance, the Fund relies on the Adviser's research in an attempt to avoid situations where fraud or misrepresentation could adversely affect the Funds.

### **Loan Participations (A Type of Loan Instrument)**

The Fund may purchase a funded participation interest in a loan, by which the Fund has the right to receive payments of principal, interest and fees from an intermediary (typically a bank, financial institution or lending syndicate) that has a direct contractual relationship with a borrower. In loan participations, the Fund does not have a direct contractual relationship with the borrower.

The Fund may also purchase a type of a participation interest, known as risk participation interest. In this case, the Fund will receive a fee in exchange for the promise to make a payment to a lender if a borrower fails to make a payment of principal, interest, or fees, as required by the loan agreement.

When purchasing loan participations, the Fund will be exposed to credit risk of the borrower and, in some cases, the intermediary offering the participation. A participation agreement also may limit the rights of the Fund to vote on changes that may be made to the underlying loan agreement, such as waiving a breach of a covenant. The participation interests in which a fund intends to invest may not be rated by any nationally recognized rating service or, if rated, may be below investment grade and expose the Fund to the risks of noninvestment-grade securities.

## **OTHER INVESTMENTS, TRANSACTIONS, TECHNIQUES**

### **Repurchase Agreements**

Repurchase agreements are transactions in which the Fund buys a security from a dealer or bank and agrees to sell the security back at a mutually agreed upon time and price. The repurchase price exceeds the sale price, reflecting the Fund's return on the transaction. This return is unrelated to the interest rate on the underlying security. The Fund will enter into repurchase agreements only with banks and other recognized financial institutions, such as securities dealers, deemed creditworthy by the Adviser.

The Fund's custodian or subcustodian will take possession of the securities subject to repurchase agreements. The Adviser or subcustodian will monitor the value of the underlying security each day to ensure that the value of the security always equals or exceeds the repurchase price.

Repurchase agreements are subject to credit risks.

### **Hybrid Instruments**

Hybrid instruments combine elements of two different kinds of securities or financial instruments (such as a derivative contract). Frequently, the value of a hybrid instrument is determined by reference to changes in the value of a Reference Instrument (that is a designated security, commodity, currency, index or other asset or instrument including a derivative contract). Hybrid instruments can take on many forms including, but not limited to, the following forms. First, a common form of a hybrid instrument combines elements of a derivative contract with those of another security (typically a fixed-income security). In this case all or a portion of the interest or principal payable on a hybrid security is determined by reference to changes in the price of a Reference Instrument. Second, a hybrid instrument may also combine elements of a fixed-income security and an equity security. Third, hybrid instruments may include convertible securities with conversion terms related to a Reference Instrument.

Depending on the type and terms of the hybrid instrument, its risks may reflect a combination of the risks of investing in the Reference Instrument with the risks of investing in other securities, currencies and derivative contracts. Thus, an investment in a hybrid instrument may entail significant risks in addition to those associated with traditional securities or the Reference Instrument. Hybrid instruments are also potentially more volatile than traditional securities or the Reference Instrument. Moreover, depending on the structure of the particular hybrid, it may expose the Fund to leverage risks or carry liquidity risks.

### **Credit Linked Note (A Type of Hybrid Instrument)**

A credit linked note (CLN) is a type of hybrid instrument in which a special purpose entity issues a structured note (the "Note Issuer") with respect to which the Reference Instrument is a single bond, a portfolio of bonds, or the unsecured credit of an issuer, in general (each a "Reference Credit"). The purchaser of the CLN (the "Note Purchaser") invests a par amount and receives a payment during the term of the CLN that equals a fixed or floating rate of interest equivalent to a high rated funded asset (such as a bank certificate of deposit) plus an additional premium that relates to taking on the credit risk of the Reference Credit. Upon

maturity of the CLN, the Note Purchaser will receive a payment equal to: (i) the original par amount paid to the Note Issuer, if there is no occurrence of a designated event of default, restructuring or other credit event (each, a “Credit Event”) with respect to the issuer of the Reference Credit; or (ii) the market value of the Reference Credit, if a Credit Event has occurred. Depending upon the terms of the CLN, it is also possible that the Note Purchaser may be required to take physical delivery of the Reference Credit in the event of a Credit Event. Most credit linked notes use a corporate bond (or a portfolio of corporate bonds) as the Reference Credit. However, almost any type of fixed-income security (including foreign government securities), index or derivative contract (such as a credit default swap) can be used as the Reference Credit.

### **Equity Linked Note (A Type of Hybrid Instrument)**

An equity linked note (ELN) is a type of hybrid instrument that provides the noteholder with exposure to a single equity security, a basket of equity securities, or an equity index (the “Reference Equity Instrument”). Typically, an ELN pays interest at agreed rates over a specified time period and, at maturity, either converts into shares of a Reference Equity Instrument or returns a payment to the noteholder based on the change in value of a Reference Equity Instrument.

### **Asset Segregation**

In accordance with the Securities and Exchange Commission (SEC) and SEC staff positions regarding the interpretation of the Investment Company Act of 1940 (“1940 Act”), with respect to derivatives that create a future payment obligation of the Fund, the Fund must “set aside” (referred to sometimes as “asset segregation”) liquid assets, or engage in other SEC- or staff-approved measures, while the derivative contracts are open. For example, with respect to forwards and futures contracts that are not contractually required to “cash-settle,” the Fund must cover its open positions by setting aside cash or readily marketable securities equal to the contracts’ full, notional value. With respect to forwards and futures that are contractually required to “cash-settle,” however, the Fund is permitted to set aside cash or readily marketable securities in an amount equal to the Fund’s daily marked-to-market (net) obligations, if any (i.e., the Fund’s daily net liability, if any), rather than the notional value.

The Fund will employ another approach to segregating assets to cover options that it sells. If the Fund sells a call option, the Fund will set aside either the Reference Instrument subject to the option, cash or readily marketable securities with a value that equals or exceeds the current market value of the Reference Instrument. In no event will the value of the cash, or readily marketable securities set aside by the Fund, be less than the exercise price of the call option. If the Fund sells a put option, the Fund will set aside cash or readily marketable securities with a value that equals or exceeds the exercise price of the put option.

The Fund’s asset segregation approach for swap agreements varies among different types of swaps. For example, if the Fund enters into a credit default swap as the Protection Buyer, then it will set aside cash or readily marketable securities necessary to meet any accrued payment obligations under the swap. By comparison, if the Fund enters into a credit default swap as the Protection Seller, then the Fund will set aside cash or readily marketable securities equal to the full notional amount of the swap that must be paid upon the occurrence of a Credit Event. For some other types of swaps, such as interest rate swaps, the Fund will calculate the obligations of the counterparties to the swap on a net basis. Consequently, the Fund’s current obligation (or rights) under this type of swap will equal only the net amount to be paid or received based on the relative values of the positions held by each counterparty to the swap (the “net amount”). The net amount currently owed by or to the Fund will be accrued daily and the Fund will set aside cash or readily marketable securities equal to any accrued but unpaid net amount owed by the Fund under the swap.

The Fund may reduce the liquid assets segregated to cover obligations under a derivative contract by entering into an offsetting derivative contract. For example, if the Fund sells a put option for the same Reference Instrument as a call option the Fund has sold, and the exercise price of the call option is the same as or higher than the exercise price of the put option, then the Fund may net its obligations under the options and set aside cash or readily marketable securities (including any margin deposited for the options) with a value equal to the greater of: (a) the current market value of the Reference Instrument deliverable under the call option; or (b) the exercise price of the put option.

By setting aside cash or readily marketable securities equal to only its net obligations under swaps, short sales and certain cash-settled derivative contracts, the Fund will have the ability to employ leverage to a greater extent than if the Fund were required to segregate cash or readily marketable securities equal to the full notional value of such contracts. The use of leverage involves certain risks. See “Risk Factors.” Unless the Fund has other cash or readily marketable securities to set aside, it cannot trade assets set aside in connection with derivative contracts or special transactions without entering into an offsetting derivative contract or terminating a special transaction. This may cause the Fund to miss favorable trading opportunities or to realize losses on derivative contracts or special transactions. The Fund reserves the right to modify its asset segregation policies in the future to comply with any changes in the positions articulated from time to time by the SEC and its staff.

Generally, special transactions do not cash-settle on a net basis. Consequently, with respect to special transactions, the Fund will set aside cash or readily marketable securities with a value that equals or exceeds the Fund’s obligations.

## **Securities Lending**

The Fund may lend portfolio securities to borrowers that the Adviser deems creditworthy. In return, the Fund receives cash or liquid securities from the borrower as collateral. The borrower must furnish additional collateral if the market value of the loaned securities increases. Also, the borrower must pay the Fund the equivalent of any dividends or interest received on the loaned securities.

The Fund will reinvest cash collateral in securities that qualify as an acceptable investment for the Fund. However, the Fund must pay interest to the borrower for the use of cash collateral. An acceptable investment into which the Fund may reinvest cash collateral includes, among other acceptable investments, securities of affiliated money market funds (including affiliated institutional prime money market funds with a “floating” net asset value that can impose redemption fees and liquidity gates, impose certain operational impediments to investing cash collateral, and, if net asset value decreases, result in the Fund having to cover the decrease in the value of the cash collateral).

Loans are subject to termination at the option of the Fund or the borrower. The Fund will not have the right to vote on securities while they are on loan. However, the Fund will attempt to terminate a loan in an effort to reacquire the securities in time to vote on matters that are deemed to be material by the Adviser. There can be no assurance that the Fund will have sufficient notice of such matters to be able to terminate the loan in time to vote thereon. The Fund may pay administrative and custodial fees in connection with a loan and may pay a negotiated portion of the interest earned on the cash collateral to a securities lending agent or broker.

Securities lending activities are subject to interest rate risks and credit risks.

## **Hedging**

Hedging transactions are intended to reduce specific risks. For example, to protect the Fund against circumstances that would normally cause the Fund’s portfolio securities to decline in value, the Fund may buy or sell a derivative contract that would normally increase in value under the same circumstances. The Fund may also attempt to hedge by using combinations of different derivative contracts, or derivative contracts and securities. The Fund’s ability to hedge may be limited by the costs of the derivative contracts. The Fund may attempt to lower the cost of hedging by entering into transactions that provide only limited protection, including transactions that: (1) hedge only a portion of its portfolio; (2) use derivative contracts that cover a narrow range of circumstances; or (3) involve the sale of derivative contracts with different terms. Consequently, hedging transactions will not eliminate risk even if they work as intended. In addition, hedging strategies are not always successful, and could result in increased expenses and losses to the Fund.

## **INTER-FUND BORROWING AND THIRD-PARTY LENDING ARRANGEMENTS**

### **Inter-Fund Borrowing**

The Securities and Exchange Commission (SEC) has granted an exemption that permits the Fund and all other funds advised by subsidiaries of Federated Investors, Inc. (“Federated funds”) to lend and borrow money for certain temporary purposes directly to and from other Federated funds. Participation in this inter-fund lending program is voluntary for both borrowing and lending Federated funds, and an inter-fund loan is only made if it benefits each participating Federated fund. Federated Investors, Inc. (“Federated”) administers the program according to procedures approved by the Fund’s Board, and the Board monitors the operation of the program. Any inter-fund loan must comply with certain conditions set out in the exemption, which are designed to assure fairness and protect all participating Federated funds.

For example, inter-fund lending is permitted only: (a) to meet shareholder redemption requests; (b) to meet commitments arising from “failed” trades; and (c) for other temporary purposes. All inter-fund loans must be repaid in seven days or less. The Fund’s participation in this program must be consistent with its investment policies and limitations, and must meet certain percentage tests. Inter-fund loans may be made only when the rate of interest to be charged is more attractive to the lending Federated fund than market-competitive rates on overnight repurchase agreements (“Repo Rate”) and more attractive to the borrowing Federated fund than the rate of interest that would be charged by an unaffiliated bank for short-term borrowings (“Bank Loan Rate”), as determined by the Board. The interest rate imposed on inter-fund loans is the average of the Repo Rate and the Bank Loan Rate.

### **Third-Party Line of Credit**

The Fund participates with certain other Federated Funds, on a several basis, in an up to \$500,000,000 unsecured, 364-day, committed, revolving line of credit (LOC) agreement. The LOC was made available to finance temporarily the repurchase or redemption of shares of the Fund, failed trades, payment of dividends, settlement of trades and for other short-term, temporary or emergency general business purposes. The Fund cannot borrow under the LOC if an inter-fund loan is outstanding. The Fund’s ability to borrow under the LOC also is subject to the limitations of the 1940 Act and various conditions precedent that must be satisfied before the Fund can borrow. Loans under the LOC are charged interest at a fluctuating rate per annum equal to the

highest, on any day, of: (a) (i) the federal funds effective rate; (ii) the one month London Interbank Offered Rate (LIBOR); and (iii) 0.0%; plus (b) a margin. The LOC also requires the Fund to pay, quarterly in arrears and at maturity, its pro rata share of a commitment fee based on the amount of the lenders' commitment that has not been utilized. As of the date of this Statement of Additional Information, there were no outstanding loans. During the most recently ended fiscal year, the Fund did not utilize the LOC.

### **Illiquid Securities**

Illiquid securities are securities for which there is no readily available market or securities with legal or contractual restrictions. These may include private placements, repurchase agreements that the Fund cannot dispose of within seven days and securities eligible for resale under Rule 144A of the Securities Act of 1933.

### **PORTFOLIO TURNOVER**

The Fund will generally purchase and sell securities and effect transactions in futures contracts without regard to the length of time the security has been held or the futures contract open and, accordingly, it can be expected that the rate of portfolio turnover may be substantial. The Fund may sell a given security or close a futures contract, no matter for how long or short a period it has been held in the portfolio, and no matter whether the sale is at a gain or loss, if the Adviser believes that it is not fulfilling its purpose. Since investment decisions are based on the anticipated contribution of the security in question to the Fund's investment objective, the rate of portfolio turnover is irrelevant when the Adviser believes a change is in order to achieve those objectives, and the Fund's annual portfolio turnover rate may vary from year to year. Pursuant to Securities and Exchange Commission requirements, the portfolio turnover rate of the Fund is calculated without regard to securities, including options and futures contracts, having a maturity of less than one year. The Fund may hold a significant portion of its assets in assets which are excluded for purposes of calculating portfolio turnover.

High portfolio turnover in any year will result in the payment by the Fund of above-average transaction costs and could result in the payment by shareholders of above-average amounts of taxes on realized investment gains.

## **Investment Risks**

There are many risk factors which may affect an investment in the Fund. The Fund's principal risks are described in its Prospectus. The following information is either additional information in respect of a principal risk factor referenced in the Prospectus or information in respect of a non-principal risk factor applicable to the Fund (in which case there is no related disclosure in the Prospectus).

### **Credit Risk**

It is possible that interest or principal on securities will not be paid when due. Such non-payment or default may reduce the value of the Fund's portfolio holdings, its share price and its performance.

Many fixed-income securities receive credit ratings from services such as Fitch Rating Service, Moody's Investor Services, Inc. and Standard & Poor's that assign ratings to securities by assessing the likelihood of an issuer and/or guarantor default. Higher credit ratings correspond to lower perceived credit risk and lower credit ratings correspond to higher perceived credit risk. Credit ratings may be upgraded or downgraded from time to time as an NRSRO's assessment of the financial condition of a party obligated to make payments with respect to such securities and credit risk changes. The impact of any downgrade in a credit rating can be uncertain. Credit rating downgrades may lead to increased interest rates and volatility in financial markets, which in turn could negatively affect the value of the Fund's portfolio holdings, its share price and its investment performance. Credit ratings are not a guarantee of quality. Credit ratings may lag behind the current financial conditions of the issuer and/or guarantor and do not provide assurance against default or other loss of money. Credit ratings do not protect against a decline in the value of a security. If a security has not received a rating, the Fund must rely entirely upon the Adviser's credit assessment.

Fixed-income securities generally compensate for greater credit risk by paying interest at a higher rate. The difference between the yield of a security and the yield of a U.S. Treasury security or other appropriate benchmark with a comparable maturity (the spread) measures the additional interest paid for risk. Spreads may increase generally in response to adverse economic or market conditions. A security's spread may also increase if the security's rating is lowered, or the security is perceived to have an increased credit risk. An increase in the spread will cause the price of the security to decline.

Credit risk includes the possibility that a party to a transaction involving the Fund will fail to meet its obligations. This could cause the Fund to lose the benefit of the transaction or prevent the Fund from selling or buying securities to implement its investment strategy.

## **Risk of Investing in Derivative Contracts and Hybrid Instruments**

The Fund's exposure to derivative contracts and hybrid instruments (either directly or through its investment in another investment company) involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. First, changes in the value of the derivative contracts and hybrid instruments in which the Fund invests may not be correlated with changes in the value of the underlying Reference Instruments or, if they are correlated, may move in the opposite direction than originally anticipated. Second, while some strategies involving derivatives may reduce the risk of loss, they may also reduce potential gains or, in some cases, result in losses by offsetting favorable price movements in portfolio holdings. Third, there is a risk that derivative contracts and hybrid instruments may be erroneously priced or improperly valued and, as a result, the Fund may need to make increased cash payments to the counterparty. Fourth, exposure to derivative contracts and hybrid instruments may have tax consequences to the Fund and its shareholders. For example, derivative contracts and hybrid instruments may cause the Fund to realize increased ordinary income or short-term capital gains (which are treated as ordinary income for Federal income tax purposes) and, as a result, may increase taxable distributions to shareholders. In addition, under certain circumstances certain derivative contracts and hybrid instruments may cause the Fund to: (a) incur an excise tax on a portion of the income related to those contracts and instruments; and/or (b) reclassify, as a return of capital, some or all of the distributions previously made to shareholders during the fiscal year as dividend income. Fifth, a common provision in OTC derivative contracts permits the counterparty to terminate any such contract between it and the Fund, if the value of the Fund's total net assets declines below a specified level over a given time period. Factors that may contribute to such a decline (which usually must be substantial) include significant shareholder redemptions and/or a marked decrease in the market value of the Fund's investments. Any such termination of the Fund's OTC derivative contracts may adversely affect the Fund (for example, by increasing losses and/or costs, and/or preventing the Fund from fully implementing its investment strategies). Sixth, the Fund may use a derivative contract to benefit from a decline in the value of a Reference Instrument. If the value of the Reference Instrument declines during the term of the contract, the Fund makes a profit on the difference (less any payments the Fund is required to pay under the terms of the contract). Any such strategy involves risk. There is no assurance that the Reference Instrument will decline in value during the term of the contract and make a profit for the Fund. The Reference Instrument may instead appreciate in value creating a loss for the Fund. Seventh, a default or failure by a CCP or an FCM (also sometimes called a "futures broker"), or the failure of a contract to be transferred from an Executing Dealer to the FCM for clearing, may expose the Fund to losses, increase its costs, or prevent the Fund from entering or exiting derivative positions, accessing margin or fully implementing its investment strategies. The central clearing of a derivative and trading of a contract over a SEF could reduce the liquidity in, or increase costs of entering into or holding, any contracts. Finally, derivative contracts and hybrid instruments may also involve other risks described herein or in the Fund's prospectus, such as interest rate, credit, currency, liquidity and leverage risks.

## **Liquidity Risk**

Trading opportunities are more limited for fixed-income securities that have not received any credit ratings, have received any credit ratings below investment-grade or are not widely held. These features may make it more difficult to sell or buy a security at a favorable price or time. Consequently, the Fund may have to accept a lower price to sell a security, sell other securities to raise cash or give up an investment opportunity, any of which could have a negative effect on the Fund's performance. Infrequent trading of securities may also lead to an increase in their price volatility.

## **Interest Rate Risk**

Prices of fixed-income securities rise and fall in response to changes in interest rates. Generally, when interest rates rise, prices of fixed-income securities fall. However, market factors, such as the demand for particular fixed-income securities, may cause the price of certain fixed-income securities to fall while the prices of other securities rise or remain unchanged.

The longer the duration of a fixed-income security, the more susceptible it is to interest rate risk. The duration of a fixed-income security may be equal to or shorter than the stated maturity of a fixed-income security. Recent and potential future changes in monetary policy made by central banks and/or their governments are likely to affect the level of interest rates. Duration measures the price sensitivity of a fixed-income security given a change in interest rates. For example, if a fixed-income security has an effective duration of three years, a 1% increase in general interest rates would be expected to cause the security's value to decline about 3% while a 1% decrease in general interest rates would be expected to cause the security's value to increase about 3%.

## **Gold and Other Precious Metals Investing Risk**

The prices of gold and other precious metals, and the prices of securities whose performance is linked to the price of gold and other precious metals, have been subject to substantial price fluctuations over short periods of time. They may be adversely affected by unpredictable international monetary and political developments such as currency devaluations or revolutions, economic and social conditions within a country, trade imbalances or trade, or currency restrictions between countries.

### **Risk of Investing In Loans**

In addition to the risks generally associated with debt instruments, such as credit, market, interest rate, liquidity and derivatives risks, bank loans are also subject to the risk that the value of the collateral securing a loan may decline, be insufficient to meet the obligations of the borrower or be difficult to liquidate. The Fund's access to the collateral may be limited by bankruptcy, other insolvency laws or by the type of loan the Fund has purchased. For example, if the Fund purchases a participation instead of an assignment, it would not have direct access to collateral of the borrower. As a result, a floating rate loan may not be fully collateralized and can decline significantly in value. Additionally, collateral on loan instruments may consist of assets that may not be readily liquidated, and there is no assurance that the liquidation of such assets will satisfy a borrower's obligations under the instrument. Loans generally are subject to legal or contractual restrictions on resale.

Loans and other forms of indebtedness may be structured such that they are not securities under securities laws. As such, it is unclear whether loans and other forms of direct indebtedness offer securities law protections, such as those against fraud and misrepresentation. In the absence of definitive regulatory guidance, while there can be no assurance that fraud or misrepresentation will not occur with respect to the loans and other investments in which the Fund invests, the Fund relies on the Adviser's research in an attempt to seek to avoid situations where fraud or misrepresentation could adversely affect the Fund.

### **Loan Liquidity Risk**

Loans generally are subject to legal or contractual restrictions on resale. The liquidity of loans, including the volume and frequency of secondary market trading in such loans, varies significantly over time and among individual loans. For example, if the credit quality of a loan unexpectedly declines significantly, secondary market trading in that loan can also decline for a period of time. During periods of infrequent trading, valuing a loan can be more difficult, and buying and selling a loan at an acceptable price can be more difficult and delayed. Difficulty in selling a loan can result in a loss.

Loan instruments may not be readily marketable and may be subject to restrictions on resale. In some cases, negotiations involved in disposing of loans may require weeks to complete. Thus, transactions in loan instruments may take longer than seven days to settle. This could pose a liquidity risk to the Fund and, if the Fund's exposure to such investments is substantial, could impair the Fund's ability to meet shareholder redemptions in a timely manner.

A majority of the Fund's assets are likely to be invested in assets that are considerably less liquid than debt instruments traded on national exchanges. Market quotations for such assets may be volatile and/or subject to large spreads between bid and ask prices.

### **Loan Prepayment Risk**

During periods of declining interest rates or for other purposes, borrowers may exercise their option to prepay principal earlier than scheduled which may force the Fund to reinvest in lower-yielding debt securities.

### **Agent Insolvency Risk**

In a syndicated loan, the agent bank is the bank that undertakes the bulk of the administrative duties involved in the day-to-day administration of the loan. In the event of the insolvency of an agent bank, a loan could be subject to settlement risk as well as the risk of interruptions in the administrative duties performed in the day-to-day administration of the loan (such as processing LIBOR calculations, processing draws, etc.).

### **Risk Associated with the Investment Activities of Other Accounts**

Investment decisions for the Fund are made independently from those of other accounts managed by the Adviser and accounts managed by affiliates of the Adviser. Therefore, it is possible that investment-related actions taken by such other accounts could adversely impact the Fund with respect to, for example, the value of Fund portfolio holdings, and/or prices paid to or received by the Fund on its portfolio transactions, and/or the Fund's ability to obtain or dispose of portfolio securities. Related considerations are discussed elsewhere in this SAI under "Brokerage Transactions and Investment Allocation."

### **Cybersecurity Risk**

Like other funds and business enterprises, Federated's business relies on the security and reliability of information and communications technology, systems and networks. Federated uses digital technology, including, for example, networked systems, email and the Internet, to conduct business operations and engage clients, customers, employees, products, accounts, shareholders, and relevant service providers, among others. Federated, as well as its funds and certain service providers, also generate, compile and process information for purposes of preparing and making filings or reports to governmental agencies, and a cybersecurity attack or incident that impacts that information, or the generation and filing processes, may prevent required regulatory filings and reports from being made. The use of the Internet and other electronic media and technology exposes the Fund, the Fund's shareholders, and the Fund's service providers, and their respective operations, to potential risks from cybersecurity attacks or incidents (collectively, "cyber-events").

Cyber-events can result from intentional (or deliberate) attacks or unintentional events by insiders or third parties, including cybercriminals, competitors, nation-states and “hacktivists,” among others. Cyber-events may include, for example, phishing, use of stolen access credentials, unauthorized access to systems, networks or devices (such as, for example, through “hacking” activity), structured query language attacks, infection from or spread of malware, ransomware, computer viruses or other malicious software code, corruption of data, and attacks (including, but not limited to, denial of service attacks on websites) which shut down, disable, slow, impair or otherwise disrupt operations, business processes, technology, connectivity or website or internet access, functionality or performance. Like other funds and business enterprises, the Fund and its service providers have experienced, and will continue to experience, cyber-events on a daily basis. In addition to intentional cyber-events, unintentional cyber-events can occur, such as, for example, the inadvertent release of confidential information. To date, cyber-events have not had a material adverse effect on the Fund’s business operations or performance.

Cyber-events can affect, potentially in a material way, Federated’s relationships with its customers, employees, products, accounts, shareholders and relevant service providers. Any cyber-event could adversely impact the Fund and its shareholders and cause the Fund to incur financial loss and expense, as well as face exposure to regulatory penalties, reputational damage and additional compliance costs associated with corrective measures. A cyber-event may cause the Fund, or its service providers, to lose proprietary information, suffer data corruption, lose operational capacity (such as, for example, the loss of the ability to process transactions, calculate the Fund’s NAV, or allow shareholders to transact business or other disruptions to operations), and/or fail to comply with applicable privacy and other laws. Among other potentially harmful effects, cyber-events also may result in theft, unauthorized monitoring and failures in the physical infrastructure or operating systems that support the Fund and its service providers. In addition, cyber-events affecting issuers in which the Fund invests could cause the Fund’s investments to lose value.

The Fund’s Adviser and its relevant affiliates have established risk management systems reasonably designed to seek to reduce the risks associated with cyber-events. The Fund’s Adviser employs various measures aimed at mitigating cybersecurity risk, including, among others, use of firewalls, system segmentation, system monitoring, virus scanning, periodic penetration testing, employee phishing training and an employee cybersecurity awareness campaign. Among other vendor management efforts, Federated also conducts due diligence on key service providers (or vendors) relating to cybersecurity. Federated has established a committee to oversee Federated’s information security and data governance efforts, and updates on cyber-events and risks are reviewed with relevant committees, as well as Federated’s and the Fund’s Boards of Directors or Trustees (or a committee thereof), on a periodic (generally quarterly) basis (and more frequently when circumstances warrant) as part of risk management oversight responsibilities. However, there is no guarantee that the efforts of Federated, the Fund’s Adviser or its affiliates, or other service providers, will succeed, either entirely or partially as there are limits on Federated’s and the Fund’s ability to prevent, detect or mitigate cyber-events. Among other reasons, the cybersecurity landscape is constantly evolving, the nature of malicious cyber-events is becoming increasingly sophisticated and the Fund’s Adviser, and its relevant affiliates, cannot control the cyber systems and cybersecurity systems of issuers or third-party service providers.

## Investment Objective and Investment Limitations

The Fund’s investment objective is to seek capital appreciation. This investment objective may not be changed by the Fund’s Trustees without shareholder approval.

### **Diversification**

With respect to securities comprising 75% of the value of its total assets, the Fund will not purchase securities of any one issuer (other than cash; cash items; securities issued or guaranteed by the government of the United States or its agencies or instrumentalities and repurchase agreements collateralized by such U.S. government securities; and securities of other investment companies) if, as a result, more than 5% of the value of its total assets would be invested in the securities of that issuer, or the Fund would own more than 10% of the outstanding voting securities of that issuer.

### **Borrowing Money and Issuing Senior Securities**

The Fund may borrow money, directly or indirectly, and issue senior securities to the maximum extent permitted under the Investment Company Act of 1940 (“1940 Act”), any rule or order thereunder, or any SEC staff interpretation thereof.

### **Underwriting**

The Fund may not underwrite the securities of other issuers, except that the Fund may engage in transactions involving the acquisition, disposition or resale of its portfolio securities, under circumstances where it may be considered to be an underwriter under the Securities Act of 1933.

## **Lending**

The Fund may not make loans, provided that this restriction does not prevent the Fund from purchasing debt obligations, entering into repurchase agreements, lending its assets to broker/dealers or institutional investors and investing in loans, including assignments and participation interests.

## **Concentration**

The Fund will not make investments that will result in the concentration of its investments in the securities of issuers primarily engaged in the same industry. For purposes of this restriction, the term concentration has the meaning set forth in the 1940 Act, any rule or order thereunder, or any SEC staff interpretation thereof. Government securities and municipal securities will not be deemed to constitute an industry.

## **Investing in Real Estate**

The Fund may not purchase or sell real estate, provided that this restriction does not prevent the Fund from investing in issuers which invest, deal or otherwise engage in transactions in real estate or interests therein, or investing in securities that are secured by real estate or interests therein. The Fund may exercise its rights under agreements relating to such securities, including the right to enforce security interests and to hold real estate acquired by reason of such enforcement until that real estate can be liquidated in an orderly manner.

## **Investing in Commodities**

The Fund may invest in commodities to the maximum extent permitted under the 1940 Act.

**The above limitations cannot be changed unless authorized by the Board and by the “vote of a majority of the Fund’s outstanding voting securities” as defined by the 1940 Act. The following limitations, however, may be changed by the Board without shareholder approval. Shareholders will be notified before any material change in these limitations becomes effective.**

## **Applying Concentration**

In applying the Fund’s concentration restriction: (a) utility companies will be divided according to their services (for example, gas, gas transmission, electric and telephone will each be considered a separate industry); (b) financial service companies will be classified according to the end users of their services (for example, automobile finance, bank finance and diversified finance will each be considered a separate industry); and (c) asset-backed securities will be classified according to the underlying assets securing such securities. Additionally, in applying the Fund’s concentration limitation, the investment of more than 25% of the value of the Fund’s total assets in any one industry will constitute “concentration.”

## **Illiquid Securities**

The Fund will not purchase securities for which there is no readily available market, or enter into repurchase agreements or purchase time deposits that the Fund cannot dispose of within seven days, if immediately after and as a result, the value of such securities would exceed, in the aggregate, 15% of the Fund’s net assets.

## **Investing in Other Investment Companies**

The Fund may invest its assets in securities of other investment companies as an efficient means of carrying out its investment policies. It should be noted that investment companies incur certain expenses, such as management fees, and, therefore, any investment by the Fund in shares of other investment companies may be subject to such additional expenses. At the present time, the Fund expects that its investments in other investment companies may include shares of money market funds, including funds affiliated with the Fund’s investment adviser.

The Fund may invest in the securities of affiliated money market funds as an efficient means of managing the Fund’s uninvested cash.

## **Purchases on Margin**

The Fund will not purchase securities on margin, provided that the Fund may obtain short-term credits necessary for the clearance of purchases and sales of securities, and further provided that the Fund may make margin deposits in connection with its use of financial options and futures, forward and spot currency contracts, swap transactions and other financial contracts or derivative instruments.

## **Pledging Assets**

The Fund will not mortgage, pledge or hypothecate any of its assets, provided that this shall not apply to the transfer of securities in connection with any permissible borrowing or to collateral arrangements in connection with permissible activities.

## **Additional Information**

For purposes of the above limitations, the Fund considers certificates of deposit and demand and time deposits issued by a U.S. branch of a domestic bank or savings association having capital, surplus and undivided profits in excess of \$100,000,000 at the time of investment to be “cash items.”

Except with respect to borrowing money, if a percentage limitation is adhered to at the time of investment, a later increase or decrease in percentage resulting from any change in value or net assets will not result in a violation of such limitation. Under the 1940 Act the Fund may borrow up to one-third of its assets from banks, borrow money or issue senior securities in certain circumstances to the extent certain conditions are met. The restrictions on borrowing under the 1940 Act are designed to protect shareholders and their investment by limiting the Fund’s ability to leverage its assets.

As a matter of non-fundamental policy, for purposes of the illiquid securities policy, illiquid securities are securities that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment.

## **What Do Shares Cost?**

### **DETERMINING MARKET VALUE OF SECURITIES**

A Share’s net asset value (NAV) is determined as of the end of regular trading on the New York Stock Exchange (NYSE) (normally 4:00 p.m. Eastern time) each day the NYSE is open. The Fund calculates the NAV of each class by valuing the assets allocated to the Share’s class, subtracting the liabilities allocated to each class and dividing the balance by the number of Shares of the class outstanding. The NAV for each class of Shares may differ due to the level of expenses allocated to each class as well as a result of the variance between the amount of accrued investment income and capital gains or losses allocated to each class and the amount actually distributed to shareholders of each class. The NAV is calculated to the nearest whole cent per Share.

In calculating its NAV, the Fund generally values investments as follows:

- Equity securities listed on a U.S. securities exchange or traded through the U.S. national market system are valued at their last reported sale price or official closing price in their principal exchange or market. If a price is not readily available, such equity securities are valued based upon the mean of closing bid and asked quotations from one or more dealers.
- Other equity securities traded primarily in the United States are valued based upon the mean of closing bid and asked quotations from one or more dealers.
- Equity securities traded primarily through securities exchanges and regulated market systems outside the United States are valued at their last reported sale price or official closing price in their principal exchange or market. These prices may be adjusted for significant events occurring after the closing of such exchanges or market systems as described below. If a price is not readily available, such equity securities are valued based upon the mean of closing bid and asked quotations from one or more dealers.
- Fixed-income securities are fair valued using price evaluations provided by a pricing service approved by the Board. The methods used by pricing services to determine such price evaluations are described below. If a price evaluation from a pricing service is not readily available, such fixed-income securities are fair valued based upon price evaluations from one or more dealers.
- Futures contracts listed on exchanges are valued at their reported settlement price. Option contracts listed on exchanges are valued based upon the mean of closing bid and asked quotations reported by the exchange or from one or more futures commission merchants.
- OTC derivative contracts are fair valued using price evaluations provided by a pricing service approved by the Board. The methods used by pricing services to determine such price evaluations are described below. If a price evaluation from a pricing service is not readily available, such derivative contracts may be fair valued based upon price evaluations from one or more dealers or using a recognized pricing model for the contract.
- Shares of other mutual funds or non-exchange-traded investment companies are valued based upon their reported NAVs. The prospectuses for these mutual funds explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

If any price, quotation, price evaluation or other pricing source is not readily available when the NAV is calculated, if the Fund cannot obtain price evaluations from a pricing service or from more than one dealer for an investment within a reasonable period of time as set forth in the Fund's valuation policies and procedures, or if information furnished by a pricing service, in the opinion of the Valuation Committee, is deemed not representative of the fair value of such security, the Fund will use the fair value of the investment determined in accordance with the procedures described below. There can be no assurance that the Fund could purchase or sell an investment at the price used to calculate the Fund's NAV. The Fund will not use a pricing service or dealer who is an affiliated person of the Adviser to value investments.

Noninvestment assets and liabilities are valued in accordance with U.S. Generally Accepted Accounting Principles (GAAP). The NAV calculation includes expenses, dividend income, interest income, other income and realized and unrealized investment gains and losses through the date of the calculation. Changes in holdings of investments and in the number of outstanding Shares are included in the calculation not later than the first business day following such change. Any assets or liabilities denominated in foreign currencies are converted into U.S. dollars using an exchange rate obtained from one or more currency dealers.

The Fund follows procedures that are common in the mutual fund industry regarding errors made in the calculation of its NAV. This means that, generally, the Fund will not correct errors of less than one cent per Share or errors that did not result in net dilution to the Fund.

### **Fair Valuation and Significant Events Procedures**

The Board has ultimate responsibility for determining the fair value of investments for which market quotations are not readily available. The Board has appointed a Valuation Committee comprised of officers of the Fund, the Adviser and certain of the Adviser's affiliated companies to assist in determining fair value and in overseeing the calculation of the NAV. The Board has also authorized the use of pricing services recommended by the Valuation Committee to provide price evaluations of the current fair value of certain investments for purposes of calculating the NAV.

**Pricing Service Valuations.** Based on the recommendations of the Valuation Committee, the Board has authorized the Fund, subject to Board oversight, to use pricing services that provide daily fair value evaluations of the current value of certain investments, primarily fixed-income securities and OTC derivatives contracts. Different pricing services may provide different price evaluations for the same security because of differences in their methods of evaluating market values. Factors considered by pricing services in evaluating an investment include the yields or prices of investments of comparable quality, coupon, maturity, call rights and other potential prepayments, terms and type, reported transactions, indications as to values from dealers and general market conditions. A pricing service may find it more difficult to apply these and other factors to relatively illiquid or volatile investments, which may result in less frequent or more significant changes in the price evaluations of these investments. If a pricing service determines that it does not have sufficient information to use its standard methodology, it may evaluate an investment based on the present value of what investors can reasonably expect to receive from the issuer's operations or liquidation.

Special valuation considerations may apply with respect to the Fund's "odd-lot" positions, if any, as the Fund may receive lower prices when it sells such positions than it would receive for sales of institutional round lot positions. Typically, these securities are valued assuming orderly transactions of institutional round lot sizes, but the Fund may hold or, from time to time, transact in such securities in smaller, odd lot sizes.

The Valuation Committee engages in oversight activities with respect to the Fund's pricing services, which includes, among other things, monitoring significant or unusual price fluctuations above predetermined tolerance levels from the prior day, back-testing of pricing services' prices against actual sale transactions, conducting periodic due diligence meetings and reviews, and periodically reviewing the inputs, assumptions and methodologies used by these pricing services. If information furnished by a pricing service is not readily available or, in the opinion of the Valuation Committee, is deemed not representative of the fair value of such security, the security will be fair valued by the Valuation Committee in accordance with procedures established by the Trustees as discussed below in "Fair Valuation Procedures."

Some pricing services provide a single price evaluation reflecting the bid-side of the market for an investment (a "bid" evaluation). Other pricing services offer both bid evaluations and price evaluations indicative of a price between the prices bid and asked for the investment (a "mid" evaluation). The Fund normally uses bid evaluations for any U.S. Treasury and Agency securities, mortgage-backed securities and municipal securities. The Fund normally uses mid evaluations for any other types of fixed-income securities and any OTC derivative contracts.

**Fair Valuation Procedures.** The Board has established procedures for determining the fair value of investments for which price evaluations from pricing services or dealers and market quotations are not readily available. The procedures define an investment's "fair value" as the price that the Fund might reasonably expect to receive upon its current sale. The procedures assume that any sale would be made to a willing buyer in the ordinary course of trading. The procedures require consideration of factors that vary based on the type of investment and the information available. Factors that may be considered in determining an investment's fair value include: (1) the last reported price at which the investment was traded; (2) information provided by dealers or investment analysts

regarding the investment or the issuer; (3) changes in financial conditions and business prospects disclosed in the issuer's financial statements and other reports; (4) publicly announced transactions (such as tender offers and mergers) involving the issuer; (5) comparisons to other investments or to financial indices that are correlated to the investment; (6) with respect to fixed-income investments, changes in market yields and spreads; (7) with respect to investments that have been suspended from trading, the circumstances leading to the suspension; and (8) other factors that might affect the investment's value.

The Valuation Committee is responsible for the day-to-day implementation of these procedures subject to Board oversight. The Valuation Committee may also authorize the use of a financial valuation model to determine the fair value of a specific type of investment. The Board periodically reviews and approves the fair valuations made by the Valuation Committee and any changes made to the procedures.

Using fair value to price investments may result in a value that is different from an investment's most recent closing price and from the prices used by other mutual funds to calculate their NAVs. The application of the fair value procedures to an investment represent a good faith determination of an investment's fair value. There can be no assurance that the Fund could obtain the fair value assigned to an investment if it sold the investment at approximately the time at which the Fund determines its NAV per share.

**Significant Events.** The Board has adopted procedures requiring an investment to be priced at its fair value whenever the Adviser determines that a significant event affecting the value of the investment has occurred between the time as of which the price of the investment would otherwise be determined and the time as of which the NAV is computed. An event is considered significant if there is both an affirmative expectation that the investment's value will change in response to the event and a reasonable basis for quantifying the resulting change in value. Examples of significant events that may occur after the close of the principal market on which a security is traded, or the time of a price evaluation provided by a pricing service or a dealer, include:

- With respect to securities traded principally in foreign markets, significant trends in U.S. equity markets or in the trading of foreign securities index futures contracts;
- Political or other developments affecting the economy or markets in which an issuer conducts its operations or its securities are traded; and
- Announcements concerning matters such as acquisitions, recapitalizations or litigation developments, or a natural disaster affecting the issuer's operations or regulatory changes or market developments affecting the issuer's industry.

The Board has adopted procedures whereby the Valuation Committee uses a pricing service to provide factors to update the fair value of equity securities traded principally in foreign markets from the time of the close of their respective foreign stock exchanges to the pricing time of the Fund. The pricing service uses models that correlate changes between the closing and opening price of equity securities traded primarily in non-U.S. markets to changes in prices in U.S.-traded securities and derivative contracts. The pricing service seeks to employ the model that provides the most significant correlation based on a periodic review of the results. The model uses the correlation to adjust the reported closing price of a foreign equity security based on information available up to the close of the NYSE.

For other significant events, the Fund may seek to obtain more current quotations or price evaluations from alternative pricing sources. If a reliable alternative pricing source is not available, the fair value of the investment is determined using the methods discussed above in "Fair Valuation Procedures." The Board has ultimate responsibility for any fair valuations made in response to a significant event.

## How is the Fund Sold?

Under the Distributor's Contract with the Fund, the Distributor ("Federated Securities Corp.") offers Shares on a continuous, best-efforts basis.

### **RULE 12B-1 PLAN (CLASS A SHARES AND CLASS C SHARES)**

As a compensation-type plan, the Rule 12b-1 Plan is designed to pay the Distributor for activities principally intended to result in the sale of Shares such as advertising and marketing of Shares (including printing and distributing prospectuses and sales literature to prospective shareholders and financial intermediaries) and providing incentives to financial intermediaries to sell Shares. The Plan is also designed to cover the cost of administrative services performed in conjunction with the sale of Shares, including, but not limited to, shareholder services, recordkeeping services and educational services, as well as the costs of implementing and operating the Plan. The Rule 12b-1 Plan allows the Distributor to contract with financial intermediaries to perform activities covered by the Plan. The Rule 12b-1 Plan is expected to benefit the Fund in a number of ways. For example, it is anticipated that the Plan will help the Fund attract and retain assets, thus providing cash for orderly portfolio management and Share redemptions and possibly helping to stabilize or reduce other operating expenses.

In addition, the Plan is integral to the multiple class structure of the Fund, which promotes the sale of Shares by providing a range of options to investors. The Fund's service providers that receive asset-based fees also benefit from stable or increasing Fund assets.

The Fund may compensate the Distributor more or less than its actual marketing expenses. In no event will the Fund pay for any expenses of the Distributor that exceed the maximum Rule 12b-1 Plan fee.

For some classes of shares, the maximum Rule 12b-1 Plan fee that can be paid in any one year may not be sufficient to cover the marketing-related expenses the Distributor has incurred. Therefore, it may take the Distributor a number of years to recoup these expenses.

In addition, in connection with the sale of Class C Shares, Federated and its subsidiaries make advance commission payments to financial intermediaries and in return may receive Rule 12b-1 fees and contingent deferred sales loads from the Class C Shares. Federated and its subsidiaries may benefit or sustain losses from such arrangements.

Regarding the Fund's Class A Shares, the Class A Shares of the Fund currently does not accrue, pay or incur any Rule 12b-1 Plan fee, although the Board of Trustees has adopted a Plan that permits the Class A Shares of the Fund to accrue, pay and incur a Rule 12b-1 Plan fee of up to a maximum amount of 0.05%, or some lesser amount as the Board of Trustees shall approve from time to time. The Class A Shares of the Fund will not incur or charge such Rule 12b-1 Plan fees until such time as approved by the Fund's Board of Trustees.

#### **ADDITIONAL PAYMENTS TO FINANCIAL INTERMEDIARIES**

The Distributor may pay out of its own resources amounts to certain financial intermediaries, including broker-dealers, banks, registered investment advisers, independent financial planners and retirement plan administrators. In some cases, such payments may be made by, or funded from the resources of, companies affiliated with the Distributor (including the Adviser). While Financial Industry Regulatory Authority, Inc. (FINRA) regulations limit the sales charges that you may bear, there are no limits with regard to the amounts that the Distributor may pay out of its own resources. In addition to the payments which are generally described herein and in the Prospectus, the financial intermediary also may receive payments under the Rule 12b-1 Plan and/or Service Fees. In connection with these payments, the financial intermediary may elevate the prominence or profile of the Fund and/or other Federated funds within the financial intermediary's organization by, for example, placement on a list of preferred or recommended funds and/or granting the Distributor preferential or enhanced opportunities to promote the funds in various ways within the financial intermediary's organization. The same financial intermediaries may receive payments under more than one or all categories. These payments assist in the Distributor's efforts to support the sale of Shares. These payments are negotiated and may be based on such factors as: the number or value of Shares that the financial intermediary sells or may sell; the value of client assets invested; the level and types of services or support furnished by the financial intermediary; or the Fund's and/or other Federated funds' relationship with the financial intermediary. Not all financial intermediaries receive such payments and the amount of compensation may vary by intermediary. You should ask your financial intermediary for information about any payments it receives from the Distributor or the Federated funds and any services it provides, as well as the fees and/or commissions it charges.

The categories of additional payments are described below.

#### **Supplemental Payments**

The Distributor may make supplemental payments to certain financial intermediaries that are holders or dealers of record for accounts in one or more of the Federated funds. These payments may be based on such factors as: the number or value of Shares the financial intermediary sells or may sell; the value of client assets invested; or the type and nature of services or support furnished by the financial intermediary.

#### **Processing Support Payments**

The Distributor may make payments to certain financial intermediaries that sell Federated fund shares to help offset their costs associated with client account maintenance support, statement processing and transaction processing. The types of payments that the Distributor may make under this category include: payment of ticket charges on a per-transaction basis; payment of networking fees; and payment for ancillary services such as setting up funds on the financial intermediary's mutual fund trading system.

#### **Retirement Plan Program Servicing Payments**

The Distributor may make payments to certain financial intermediaries who sell Federated fund shares through retirement plan programs. A financial intermediary may perform retirement plan program services itself or may arrange with a third party to perform retirement plan program services. In addition to participant recordkeeping, reporting or transaction processing, retirement plan program services may include: services rendered to a plan in connection with fund/investment selection and monitoring; employee enrollment and education; plan balance rollover or separation; or other similar services.

## Marketing Support Payments

From time to time, the Distributor, at its expense, may provide additional compensation to financial intermediaries that sell or arrange for the sale of Shares. Such compensation, provided by the Distributor, may include financial assistance to financial intermediaries that enable the Distributor to participate in or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client entertainment, client and investor events and other financial intermediary-sponsored events. Such compensation may also be used for the provision of sales-related data to the Adviser and/or its affiliates.

The Distributor also may hold or sponsor, at its expense, sales events, conferences and programs for employees or associated persons of financial intermediaries and may pay the travel and lodging expenses of attendees. The Distributor also may provide, at its expense, meals and entertainment in conjunction with meetings with financial intermediaries. Other compensation may be offered to the extent not prohibited by applicable federal or state law or regulations, or the rules of any self-regulatory agency, such as FINRA. These payments may vary depending on the nature of the event or the relationship.

For the year ended December 31, 2018, the following is a list of FINRA member firms that received additional payments from the Distributor or an affiliate. Additional payments may also be made to certain other financial intermediaries that are not FINRA member firms that sell Federated fund shares or provide services to the Federated funds and shareholders. These firms are not included in this list. Any additions, modifications or deletions to the member firms identified in this list that have occurred since December 31, 2018, are not reflected. You should ask your financial intermediary for information about any additional payments it receives from the Distributor.

## UNDERWRITING COMMISSIONS

The following chart reflects the total front-end sales charges and/or contingent deferred sales charges paid in connection with the sale of Class A Shares and Class C Shares and the amount retained by the Distributor for the last three fiscal years ended September 30:

	2019		2018		2017	
	Total Sales Charges	Amount Retained	Total Sales Charges	Amount Retained	Total Sales Charges	Amount Retained
Class A Shares	\$102,388	\$11,057	\$175,839	\$19,034	\$131,593	\$13,166
Class C Shares	\$ 2,816	\$ 2,816	\$ 2,611	\$ 2,611	\$ 7,955	\$ 7,955

## Purchases In-Kind

You may contact the Distributor to request a purchase of Shares using securities you own. The Fund reserves the right to determine whether to accept your securities and the minimum market value to accept. The Fund will value your securities in the same manner as it values its assets. An in-kind purchase may be treated as a sale of your securities for federal tax purposes; please consult your tax adviser regarding potential tax liability.

## Redemption In-Kind

Although the Fund generally intends to pay Share redemptions in cash, it reserves the right, on its own initiative or in response to a shareholder request, to pay the redemption price in whole or in part by a distribution of the Fund's portfolio securities.

Because the Fund has elected to be governed by Rule 18f-1 under the 1940 Act, the Fund is obligated to pay Share redemptions to any one shareholder in cash only up to the lesser of \$250,000 or 1% of the net assets represented by such Share class during any 90-day period.

Any Share redemption payment greater than this amount will also be in cash unless the Fund elects to pay all or a portion of the remainder of the redemption in portfolio securities, valued in the same way as the Fund determines its NAV.

Redemption in-kind is not as liquid as a cash redemption. Shareholders receiving the portfolio securities could have difficulty selling them, may incur related transaction costs and would be subject to risks of fluctuations in the securities' values prior to sale.

## Massachusetts Partnership Law

Under certain circumstances, shareholders may be held personally liable as partners under Massachusetts law for obligations of the Trust. To protect its shareholders, the Trust has filed legal documents with Massachusetts that expressly disclaim the liability of its shareholders for acts or obligations of the Trust.

In the unlikely event a shareholder is held personally liable for the Trust's obligations, the Trust is required by the Declaration of Trust to use its property to protect or compensate the shareholder. On request, the Trust will defend any claim made and pay any judgment against a shareholder for any act or obligation of the Trust. Therefore, financial loss resulting from liability as a shareholder will occur only if the Trust itself cannot meet its obligations to indemnify shareholders and pay judgments against them.

## Account and Share Information

### VOTING RIGHTS

Each Share of the Fund gives the shareholder one vote in Trustee elections and other matters submitted to shareholders for vote.

All Shares of the Trust have equal voting rights, except that in matters affecting only a particular Fund or class, only shares of that Fund or class are entitled to vote.

Trustees may be removed by the Board or by shareholders at a special meeting. A special meeting of shareholders will be called by the Board upon the written request of shareholders who own at least 10% of the Trust's outstanding Shares of all series entitled to vote.

As of November 6, 2019, the following shareholders owned of record, beneficially or both, 5% or more of outstanding Class A Shares: Pershing LLC, Jersey City, NJ, owned approximately 218,721 Shares (5.25%); TD Ameritrade Inc., Omaha, NE, owned approximately 308,933 Shares (7.42%); Wells Fargo Clearing Services, LLC, St. Louis, MO, owned approximately 326,974 (7.85%); Charles Schwab & Co., Inc., San Francisco, CA, owned approximately 658,585 Shares (15.82%); and National Financial Services LLC, New York, NY, owned approximately 665,497 Shares (15.99%).

As of November 6, 2019, the following shareholders owned of record, beneficially or both, 5% or more of outstanding Class C Shares: Morgan Stanley Smith Barney LLC., New York, NY, owned approximately 53,741 Shares (5.74%); American Enterprise, Minneapolis, MN, owned approximately 77,287 Shares (8.26%); National Financial Services LLC, New York, NY, owned approximately 81,059 Shares (8.66%); Raymond James, St. Petersburg, FL, owned approximately 81,308 Shares (8.69%); Wells Fargo Clearing Services, LLC, St. Louis, MO, owned approximately 91,579 Shares (9.78%); Charles Schwab & Co., Inc., San Francisco, CA, owned approximately 110,800 (11.84%); and Stifel Nicolaus & Co. Inc., St. Louis, MO, owned approximately 242,374 Shares (25.90%).

As of November 6, 2019, the following shareholders owned of record, beneficially or both, 5% or more of outstanding Institutional Shares: Raymond James, St. Petersburg, FL, owned approximately 304,544 Shares (5.08%); UBA WM USA, Weehawken, NJ, owned approximately 343,713 Shares (5.73%); Enterprise Trust & Investment Co., Los Gatos, CA, owned approximately 346,754 Shares (5.78%); National Financial Services LLC, Jersey City, NJ, owned approximately 399,775 (6.67%); Wells Fargo Clearing Services, LLC, St. Louis, MO, owned approximately 1,308,465 Shares (17.33%); and American Enterprise, Minneapolis, MN, owned approximately 2,160,850 Shares (36.06%);

Shareholders owning 25% or more of outstanding Shares may be in control and be able to affect the outcome of certain matters presented for a vote of shareholders.

American Enterprise Investment Services Inc. is organized in state of Minnesota.

Stifel Nicolaus & Co. is a wholly-owned subsidiary of Stifel Financial Corp. which is organized in the state of Delaware.

## Tax Information

### FEDERAL INCOME TAX

The Fund intends to meet requirements of Subchapter M of the Internal Revenue Code (the “Code”) applicable to regulated investment companies. If these requirements are not met, it will not receive special tax treatment and will be subject to federal corporate income tax.

The Fund will be treated as a single, separate entity for federal income tax purposes so that income earned and capital gains and losses realized by the Trust’s other portfolios will be separate from those realized by the Fund.

The Fund is entitled to a loss carryforward, which may reduce the taxable income or gain that the Fund would realize, and to which the shareholder would be subject, in the future.

### TAX BASIS INFORMATION

The Fund’s Transfer Agent is required to provide you with the cost basis information on the sale of any of your Shares in the Fund, subject to certain exceptions.

### FOREIGN INVESTMENTS

If the Fund purchases foreign securities, its investment income may be subject to foreign withholding or other taxes that could reduce the return on these securities. Tax treaties between the United States and foreign countries, however, may reduce or eliminate the amount of foreign taxes to which the Fund would be subject. The effective rate of foreign tax cannot be predicted since the amount of Fund assets to be invested within various countries is uncertain. However, the Fund intends to operate so as to qualify for treaty-reduced tax rates when applicable.

Distributions from the Fund may be based on estimates of book income for the year. Book income generally consists solely of the income generated by the securities in the portfolio, whereas tax-basis income includes, in addition, gains or losses attributable to currency fluctuation. Due to differences in the book and tax treatment of fixed-income securities denominated in foreign currencies, it is difficult to project currency effects on an interim basis. Therefore, to the extent that currency fluctuations cannot be anticipated, a portion of distributions to shareholders could later be designated as a return of capital, rather than income, for income tax purposes, which may be of particular concern to certain trusts.

Certain foreign corporations may qualify as Passive Foreign Investment Companies (PFIC). There are special rules prescribing the tax treatment of such an investment by the Fund, which could subject the Fund to federal income tax.

If more than 50% of the value of the Fund’s assets at the end of the tax year is represented by stock or securities of foreign corporations, the Fund will qualify for certain Code provisions that allow its shareholders to claim a foreign tax credit or deduction on their U.S. income tax returns. The Code may limit a shareholder’s ability to claim a foreign tax credit. Shareholders who elect to deduct their portion of the Fund’s foreign taxes rather than take the foreign tax credit must itemize deductions on their income tax returns.

## Who Manages and Provides Services to the Fund?

### BOARD OF TRUSTEES

The Board of Trustees is responsible for managing the Trust’s business affairs and for exercising all the Trust’s powers except those reserved for the shareholders. The following tables give information about each Trustee and the senior officers of the Fund. Where required, the tables separately list Trustees who are “interested persons” of the Fund (i.e., “Interested” Trustees) and those who are not (i.e., “Independent” Trustees). Unless otherwise noted, the address of each person listed is Federated Investors Tower, 1001 Liberty Avenue, Pittsburgh, PA 15222-3779. The address of all Independent Trustees listed is 4000 Ericsson Drive, Warrendale, PA 15086-7561; Attention: Mutual Fund Board. As of December 31, 2018, the Trust comprised 10 portfolios, and the Federated Fund Complex consisted of 40 investment companies (comprising 102 portfolios). Unless otherwise noted, each Officer is elected annually. Unless otherwise noted, each Trustee oversees all portfolios in the Federated Fund Complex and serves for an indefinite term.

As of November 6, 2019, the Fund’s Board and Officers as a group owned less than 1% of each class of the Fund’s outstanding Shares.

### QUALIFICATIONS OF INDEPENDENT TRUSTEES

Individual Trustee qualifications are noted in the “Independent Trustees Background and Compensation” chart. In addition, the following characteristics are among those that were considered for each existing Trustee and will be considered for any Nominee Trustee.

- Outstanding skills in disciplines deemed by the Independent Trustees to be particularly relevant to the role of Independent Trustee and to the Federated funds, including legal, accounting, business management, the financial industry generally and the investment industry particularly.
- Desire and availability to serve for a substantial period of time, taking into account the Board's current mandatory retirement age of 75 years.
- No conflicts which would interfere with qualifying as independent.
- Appropriate interpersonal skills to work effectively with other Independent Trustees.
- Understanding and appreciation of the important role occupied by Independent Trustees in the regulatory structure governing regulated investment companies.
- Diversity of background.

\* Officers do not receive any compensation from the Fund.

In addition, the Fund has appointed an Anti-Money Laundering Compliance Officer.

## DIRECTOR/TRUSTEE EMERITUS PROGRAM

The Board has created a position of Director/Trustee Emeritus, whereby an incumbent Director/Trustee who has attained the age of 75 and completed a minimum of five years of service as a director/trustee, may, in the sole discretion of the Committee of Independent Directors/Trustees (“Committee”), be recommended to the full Board of Directors/Trustees of the Fund to serve as Director/Trustee Emeritus.

A Director/Trustee Emeritus that has been approved as such receives an annual fee in an amount equal to a percent of the annual base compensation paid to a Director/Trustee. Effective August 16, 2013, in the case of a Director/Trustee Emeritus who had previously served at least five years but less than 10 years as a Director/Trustee, the percent will be 10%. In the case of a Director/Trustee Emeritus who had previously served at least 10 years as a Director/Trustee, the percent will be 20%. Directors/Trustees Emeritus appointed prior to August 16, 2013 are paid 20% of the annual base compensation. In addition, the Director/Trustee Emeritus will be reimbursed for any expenses incurred in connection with their service, including expenses of travel and lodging incurred in attendance at Board meetings. Director/Trustee Emeritus will continue to receive relevant materials concerning the Funds, will be expected to attend at least one regularly scheduled quarterly meeting of the Board of Directors/Trustees each year and will be available to consult with the Committees or its representatives at reasonable times as requested by the Chairman; however, a Director/Trustee Emeritus does not have any voting rights at Board meetings and is not subject to election by shareholders of the Funds.

The Director/Trustee Emeritus will be permitted to serve in such capacity at the pleasure of the Committee, but the annual fee will cease to be paid at the end of the calendar year during which he or she has attained the age of 80 years, thereafter the position will be honorary.

The following table shows the fees paid to each Director/Trustee Emeritus for the Fund's most recently ended fiscal year and the portion of that fee paid by the Fund or Trust.<sup>1</sup>

#### EMERITUS TRUSTEES AND COMPENSATION

Director/Trustee Emeritus	Compensation From Fund (past fiscal year)	Total Compensation Paid to Director/Trustee Emeritus <sup>1</sup>
Nicholas Constantakis	\$32.84	\$50,000.00
Peter E. Madden	\$32.84	\$50,000.00

<sup>1</sup> The fees paid to each Director/Trustee are allocated among the funds that were in existence at the time the Director/Trustee elected Emeritus status based on each fund's net assets at that time.

#### BOARD LEADERSHIP STRUCTURE

As required under the terms of certain regulatory settlements, the Chairman of the Board is not an interested person of the Fund and neither the Chairman, nor any firm with which the Chairman is affiliated, has a prior relationship with Federated or its affiliates or (other than his position as a Trustee) with the Fund.

#### COMMITTEES OF THE BOARD

Board Committee	Committee Members	Committee Functions	Meetings Held During Last Fiscal Year
<b>Executive</b>	J. Christopher Donahue John T. Collins John S. Walsh	In between meetings of the full Board, the Executive Committee generally may exercise all the powers of the full Board in the management and direction of the business and conduct of the affairs of the Trust in such manner as the Executive Committee shall deem to be in the best interests of the Trust. However, the Executive Committee cannot elect or remove Board members, increase or decrease the number of Trustees, elect or remove any Officer, declare dividends, issue shares or recommend to shareholders any action requiring shareholder approval.	One
<b>Audit</b>	John T. Collins G. Thomas Hough Maureen Lally-Green Thomas M. O'Neill	The purposes of the Audit Committee are to oversee the accounting and financial reporting process of the Fund, the Fund's internal control over financial reporting and the quality, integrity and independent audit of the Fund's financial statements. The Committee also oversees or assists the Board with the oversight of compliance with legal requirements relating to those matters, approves the engagement and reviews the qualifications, independence and performance of the Fund's independent registered public accounting firm, acts as a liaison between the independent registered public accounting firm and the Board and reviews the Fund's internal audit function.	Seven
<b>Nominating</b>	John T. Collins G. Thomas Hough Maureen Lally-Green Charles F. Mansfield, Jr. Thomas M. O'Neill P. Jerome Richey John S. Walsh	The Nominating Committee, whose members consist of all Independent Trustees, selects and nominates persons for election to the Fund's Board when vacancies occur. The Committee will consider candidates recommended by shareholders, Independent Trustees, officers or employees of any of the Fund's agents or service providers and counsel to the Fund. Any shareholder who desires to have an individual considered for nomination by the Committee must submit a recommendation in writing to the Secretary of the Fund, at the Fund's address appearing on the back cover of this SAI. The recommendation should include the name and address of both the shareholder and the candidate and detailed information concerning the candidate's qualifications and experience. In identifying and evaluating candidates for consideration, the Committee shall consider such factors as it deems appropriate. Those factors will ordinarily include: integrity, intelligence, collegiality, judgment, diversity, skill, business and other experience, qualification as an "Independent Trustee," the existence of material relationships which may create the appearance of a lack of independence, financial or accounting knowledge and experience and dedication and willingness to devote the time and attention necessary to fulfill Board responsibilities. ## BOARD'S ROLE IN RISK OVERSIGHT

The Board's role in overseeing the Fund's general risks includes receiving performance reports for the Fund and risk management reports from Federated's Chief Risk Officer at each regular Board meeting. The Chief Risk Officer is responsible for enterprise risk management at Federated, which includes risk management committees for investment management and for investor services. The Board also receives regular reports from the Fund's Chief Compliance Officer regarding significant compliance risks.

On behalf of the Board, the Audit Committee plays a key role overseeing the Fund's financial reporting and valuation risks. The Audit Committee meets regularly with the Fund's Principal Financial Officer and outside auditors, as well as with Federated's Chief Audit Executive to discuss financial reporting and audit issues, including risks relating to financial controls.

## BOARD OWNERSHIP OF SHARES IN THE FUND AND IN THE FEDERATED FAMILY OF INVESTMENT COMPANIES AS OF DECEMBER 31, 2018

Interested Board Member Name	Dollar Range of Shares Owned in Federated Prudent Bear Fund	Aggregate Dollar Range of Shares Owned in Federated Family of Investment Companies
J. Christopher Donahue	None	Over \$100,000

Thomas M. O'Neill	None	Over \$100,000
P. Jerome Richey	None	Over \$100,000
John S. Walsh	None	Over \$100,000

## INVESTMENT ADVISER

The Adviser conducts investment research and makes investment decisions for the Fund.

The Adviser is a wholly owned subsidiary of Federated.

The Adviser shall not be liable to the Trust or any Fund shareholder for any losses that may be sustained in the purchase, holding or sale of any security or for anything done or omitted by it, except acts or omissions involving willful misfeasance, bad faith, gross negligence or reckless disregard of the duties imposed upon it by its contract with the Trust.

In December 2017, Federated Investors, Inc. became a signatory to the Principles for Responsible Investment (PRI). The PRI is an investor initiative in partnership with the United Nations Environment Programme Finance Initiative and the United Nations Global Compact. Commitments made as a signatory to the PRI are not legally binding, but are voluntary and aspirational. They include efforts, where consistent with our fiduciary responsibilities, to incorporate environmental, social and corporate governance (ESG) issues into investment analysis and investment decision making, to be active owners and incorporate ESG issues into our ownership policies and practices, to seek appropriate disclosure on ESG issues by the entities in which we invest, to promote acceptance and implementation of the PRI within the investment industry, to enhance our effectiveness in implementing the PRI, and to report on our activities and progress towards implementing the PRI. Being a signatory to the PRI does not obligate Federated to take, or not take, any particular action as it relates to investment decisions or other activities.

In July 2018, Federated acquired a 60% interest in Hermes Fund Managers Limited (Hermes), which operates as Hermes Investment Management, a pioneer of integrated ESG investing. Hermes' experience with ESG issues contributes to Federated's understanding of material risks and opportunities these issues may present.

## Portfolio Manager Information

As a general matter, certain conflicts of interest may arise in connection with a portfolio manager's management of a fund's investments, on the one hand, and the investments of other funds/pooled investment vehicles or accounts (collectively, including the Fund, as applicable, "accounts") for which the portfolio manager is responsible, on the other. For example, it is possible that the various accounts managed could have different investment strategies that, at times, might conflict with one another to the possible detriment of the Fund. Alternatively, to the extent that the same investment opportunities might be desirable for more than one

account, possible conflicts could arise in determining how to allocate them. Other potential conflicts can include, for example, conflicts created by specific portfolio manager compensation arrangements (including, for example, the allocation or weighting given to the performance of the Fund or other accounts or activities for which the portfolio manager is responsible in calculating the portfolio manager's compensation), and conflicts relating to selection of brokers or dealers to execute Fund portfolio trades and/or specific uses of commissions from Fund portfolio trades (for example, research or "soft dollars"). The Adviser has adopted policies and procedures and has structured the portfolio managers' compensation in a manner reasonably designed to safeguard the Fund from being negatively affected as a result of any such potential conflicts.

The following information about the Fund's Portfolio Managers is provided as of the end of the Fund's most recently completed fiscal year unless otherwise indicated.

### **Dana Meissner, Portfolio Manager**

<b>Types of Accounts Managed by Dana Meissner</b>	<b>Total Number of Additional Accounts Managed/Total Assets*</b>
Registered Investment Companies	0/\$0
Other Pooled Investment Vehicles	0/\$0
Other Accounts	0/\$0

\* None of the Accounts has an advisory fee that is based on the performance of the account.

Dollar value range of shares owned in the Fund: \$100,001-\$500,000.

Dana Meissner is paid a fixed base salary and a variable annual incentive. Base salary is determined within a market competitive, position-specific salary range, based on the portfolio manager's experience and performance. The annual incentive amount is determined based primarily on Investment Product Performance (IPP) and may also include a discretionary component based on a variety of factors deemed relevant, such as financial measures and performance and may be paid entirely in cash, or in a combination of cash and restricted stock of Federated Investors, Inc. ("Federated"). The total combined annual incentive opportunity is intended to be competitive in the market for this portfolio manager role.

IPP is measured in part on a rolling one year excess return basis versus the Fund's benchmark (i.e., Inverse S&P 500 Index), and on the net long/short alpha contribution of the portfolio versus the benchmark as well as versus the Fund's designated peer group of comparable accounts. Performance periods are adjusted if a portfolio manager has been managing an account for less than five years; accounts with less than one year of performance history under a portfolio manager may be excluded.

Mr. Meissner has oversight responsibility for other accounts in addition to the Fund. Such other accounts may have different benchmarks and performance measures. The allocation or weighting given to the performance of the Fund or other accounts for which Mr. Meissner is responsible when his compensation is calculated may be equal or can vary.

For purposes of calculating the annual incentive amount, each account managed by the portfolio manager currently is categorized into one of two IPP groups (which may be adjusted periodically). Within each performance measurement period and IPP group, IPP currently is calculated on the basis of an assigned weighting to each account managed by the portfolio manager and included in the IPP groups. At the account level, the weighting assigned to the Fund is greater than or equal to the weighting assigned to other accounts used to determine IPP (but can be adjusted periodically). A portion of the bonus tied to the IPP score may be adjusted based on management's assessment of overall contributions to account performance and any other factors as deemed relevant.

Any individual allocations from the discretionary pool may be determined, by executive management on a discretionary basis using various factors, such as, for example, on a product, strategy or asset class basis, and considering overall contributions and any other factors deemed relevant (and may be adjusted periodically).

### **Patrick Ryan Bend, Portfolio Manager**

<b>Types of Accounts Managed by Patrick Ryan Bend</b>	<b>Total Number of Additional Accounts Managed/Total Assets*</b>
Registered Investment Companies	0/\$0
Other Pooled Investment Vehicles	0/\$0
Other Accounts	0/\$0

\* None of the Accounts has an advisory fee that is based on the performance of the account.

Dollar value range of shares owned in the Fund: \$100,001-\$500,000.

Patrick Ryan Bend is paid a fixed base salary and a variable annual incentive. Base salary is determined within a market competitive, position-specific salary range, based on the portfolio manager's experience and performance. The annual incentive amount is determined based primarily on Investment Product Performance (IPP) and may also include a discretionary component based on a variety of factors deemed relevant, such as financial measures and performance, and may be paid entirely in cash, or in a combination of cash and restricted stock of Federated Investors, Inc. ("Federated"). The total combined annual incentive opportunity is intended to be competitive in the market for this portfolio manager role.

IPP is measured in part on a rolling one year excess return basis versus the Fund's benchmark (i.e., Inverse S&P 500 Index), and on the net long/short alpha contribution of the portfolio versus the benchmark as well as versus the Fund's designated peer group of comparable accounts. Performance periods are adjusted if a portfolio manager has been managing an account for less than five years; accounts with less than one year of performance history under a portfolio manager may be excluded.

For purposes of calculating the annual incentive amount, each account managed by the portfolio manager currently is categorized into one IPP group (which may be adjusted periodically). Within each performance measurement period and IPP group, IPP currently is calculated on the basis of an assigned weighting to each account managed by the portfolio manager and included in the IPP group. At the account level, the Fund is the only account included to determine IPP (but can be adjusted periodically). A portion of the bonus tied to the IPP score may be adjusted based on management's assessment of overall contributions to account performance and any other factors as deemed relevant.

Any individual allocations from the discretionary pool may be determined, by executive management on a discretionary basis using various factors, such as, for example, on a product, strategy or asset class basis, and considering overall contributions and any other factors deemed relevant (and may be adjusted periodically).

### **Chad Hudson, Portfolio Manager**

<b>Types of Accounts Managed by Chad Hudson</b>	<b>Total Number of Additional Accounts Managed/Total Assets*</b>
Registered Investment Companies	0/\$0
Other Pooled Investment Vehicles	0/\$0
Other Accounts	0/\$0

\* None of the Accounts has an advisory fee that is based on the performance of the account.

Dollar value range of shares owned in the Fund: \$50,001-\$100,000.

Chad Hudson is paid a fixed base salary and a variable annual incentive. Base salary is determined within a market competitive, position-specific salary range, based on the portfolio manager's experience and performance. The annual incentive amount is determined based primarily on Investment Product Performance (IPP) and may also include a discretionary component based on a variety of factors deemed relevant, such as financial measures and performance, and may be paid entirely in cash, or in a combination of cash and restricted stock of Federated Investors, Inc. ("Federated"). The total combined annual incentive opportunity is intended to be competitive in the market for this portfolio manager role.

IPP is measured in part on a rolling one year excess return basis versus the Fund's benchmark (i.e., Inverse S&P 500 Index), and on the net long/short alpha contribution of the portfolio versus the benchmark as well as versus the Fund's designated peer group of comparable accounts. Performance periods are adjusted if a portfolio manager has been managing an account for less than five years; accounts with less than one year of performance history under a portfolio manager may be excluded.

Mr. Hudson also provides trading support for other accounts in addition to the Fund. Such other accounts may have different benchmarks and performance measures. The allocation or weighting given to the performance of the Fund or other accounts for which Mr. Hudson is responsible when his compensation is calculated may be equal or can vary.

For purposes of calculating the annual incentive amount, each account managed by the portfolio manager currently is categorized into one IPP group (which may be adjusted periodically). Within each performance measurement period and IPP group, IPP currently is calculated on the basis of an assigned weighting to each account managed by the portfolio manager and included in the IPP group. At the account level, the Fund is the only account included to determine IPP (but can be adjusted periodically). A portion of the bonus tied to the IPP score may be adjusted based on management's assessment of overall contributions to account performance and any other factors as deemed relevant.

Any individual allocations from the discretionary pool may be determined, by executive management on a discretionary basis using various factors, such as, for example, on a product, strategy or asset class basis, and considering overall contributions and any other factors deemed relevant (and may be adjusted periodically).

## **Services Agreement**

Federated Advisory Services Company, an affiliate of the Adviser, provides research, quantitative analysis, equity trading and transaction settlement and certain support services to the Adviser. The fee for these services is paid by the Adviser and not by the Fund.

## **Other Related Services**

Affiliates of the Adviser may, from time to time, provide certain electronic equipment and software to institutional customers in order to facilitate the purchase of Fund Shares offered by the Distributor.

## **CODE OF ETHICS RESTRICTIONS ON PERSONAL TRADING**

As required by Rule 17j-1 of the Investment Company Act of 1940 and Rule 204A-1 under the Investment Advisers Act (as applicable), the Fund, its Adviser and its Distributor have adopted codes of ethics. These codes govern securities trading activities of investment personnel, Fund Trustees and certain other employees. Although they do permit these people to trade in securities, including those that the Fund could buy, as well as Shares of the Fund, they also contain significant safeguards designed to protect the Fund and its shareholders from abuses in this area, such as requirements to obtain prior approval for, and to report, particular transactions.

## **VOTING PROXIES ON FUND PORTFOLIO SECURITIES**

The Board has delegated to the Adviser authority to vote proxies on the securities held in the Fund's portfolio. The Board has also approved the Adviser's policies and procedures for voting the proxies, which are described below.

### **Proxy Voting Policies**

The Adviser's general policy is to cast proxy votes in favor of management proposals and shareholder proposals that the Adviser anticipates will enhance the long-term value of the securities being voted. Generally, this will mean voting for proposals that the Adviser believes will improve the management of a company, increase the rights or preferences of the voted securities, or increase the chance that a premium offer would be made for the company or for the voted securities. This approach to voting proxy proposals will be referred to hereafter as the "General Policy."

The following examples illustrate how the General Policy may apply to management proposals and shareholder proposals submitted for approval or ratification by holders of the company's voting securities. However, whether the Adviser supports or opposes a proposal will always depend on the specific circumstances described in the proxy statement and other available information.

On matters related to the board of directors, generally the Adviser will vote to elect nominees to the board in uncontested elections except in certain circumstances, such as where the director: (1) had not attended at least 75% of the board meetings during the previous year; (2) serves as the company's chief financial officer; (3) has committed himself or herself to service on a large number of boards, such that we deem it unlikely that the director would be able to commit sufficient focus and time to a particular company; (4) is the chair of the nominating or governance committee when the roles of chairman of the board and CEO are combined and there is no lead independent director; (5) served on the compensation committee during a period in which compensation appears excessive relative to performance and peers; or (6) served on a board that did not implement a shareholder proposal that Federated supported and received more than 50% shareholder support the previous year. In addition, the Adviser will generally vote in favor of: (7) a full slate of directors, where the directors are elected as a group and not individually, unless more than half of the nominees are not independent; (8) shareholder proposals to declassify the board of directors; (9) shareholder proposals to require a majority voting standard in the election of directors; (10) shareholder proposals to separate the roles of chairman of the board and CEO; and (11) a proposal to require a company's audit committee to be comprised entirely of independent directors.

On other matters of corporate governance, generally the Adviser will vote in favor of: (1) proposals to grant shareholders the right to call a special meeting if owners of at least 25% of the outstanding stock agree; (2) a proposal to require independent tabulation of proxies and/or confidential voting of shareholders; (3) a proposal to ratify the board's selection of auditors, unless: (a) compensation for non-audit services exceeded 50% of the total compensation received from the company; or (b) the previous auditor was dismissed because of a disagreement with the company; (4) a proposal to repeal a shareholder rights plan (also known as a "poison pill") and against the adoption of such a plan, unless the plan is designed to facilitate, rather than prevent, unsolicited offers for the company; (5) shareholder proposals to eliminate supermajority requirements in company bylaws; and (6) shareholder proposals calling for "Proxy Access," that is, a bylaw change allowing shareholders owning at least 3% of the outstanding common stock for at least three years to nominate candidates for election to the board of directors. The Adviser will generally withhold support from shareholder proposals to grant shareholders the right to act by written consent, especially if they already have the right to call a special meeting.

On environmental and social matters, generally the Adviser will vote in favor of shareholder proposals calling for: (1) enhanced disclosure of the company's approach to mitigating climate change and other environmental risks; (2) managing risks related to manufacturing or selling certain products, such as guns and opioids; (3) monitoring gender pay equity; and (4) achieving and maintaining diversity on the board of directors. Generally, the Adviser will not support shareholder proposals calling for limitations on political activity by the company, including political contributions, lobbying and memberships in trade associations.

On matters of capital structure, generally the Adviser will vote against a proposal to authorize or issue shares that are senior in priority or voting rights to the voted securities, and in favor of a proposal to: (1) reduce the amount of shares authorized for issuance (subject to adequate provisions for outstanding convertible securities, options, warrants, rights and other existing obligations to issue shares); (2) grant authorities to issue shares with and without pre-emptive rights unless the size of the authorities would threaten to unreasonably dilute existing shareholders; and (3) authorize a stock repurchase program.

On matters relating to management compensation, generally the Adviser will vote in favor of stock incentive plans (including plans for directors) that align the recipients of stock incentives with the interests of shareholders, without creating undue dilution, and against: (1) the advisory vote on executive compensation plans ("Say On Pay") when the plan has failed to align executive compensation with corporate performance; (2) the advisory vote on the frequency of the Say On Pay vote when the frequency is other than annual; (3) proposals that would permit the amendment or replacement of outstanding stock incentives having more favorable terms (e.g., lower purchase prices or easier vesting requirements); and (4) executive compensation plans that do not disclose the maximum amounts of compensation that may be awarded or the criteria for determining awards.

On matters relating to corporate transactions, the Adviser will generally vote in favor of mergers, acquisitions and sales of assets if the Adviser's analysis of the proposed business strategy and the transaction price would have a positive impact on the total return for shareholders.

In addition, the Adviser will not vote any proxy if it determines that the consequences or costs of voting outweigh the potential benefit of voting. For example, if a foreign market requires shareholders voting proxies to retain the voted shares until the meeting date (thereby rendering the shares "illiquid" for some period of time), the Adviser will not vote proxies for such shares. In addition, the Adviser is not obligated to incur any expense to send a representative to a shareholder meeting or to translate proxy materials into English.

To the extent that the Adviser is permitted to loan securities, the Adviser will not have the right to vote on securities while they are on loan. However, the Adviser will take all reasonable steps to recall shares prior to the record date when the meeting raises issues that the Adviser believes materially affect shareholder value, including, but not limited to, excessive compensation, mergers and acquisitions, contested elections and weak oversight by the audit committee. However, there can be no assurance that the Adviser will have sufficient notice of such matters to be able to terminate the loan in time to vote thereon.

If proxies are not delivered in a timely or otherwise appropriate basis, the Adviser may not be able to vote a particular proxy.

For an Adviser that employs a quantitative investment strategy for certain funds or accounts that does not make use of qualitative research ("Non-Qualitative Accounts"), the Adviser may not have the kind of research to make decisions about how to vote proxies for them. Therefore, the Adviser will vote the proxies of these Non-Qualitative Accounts as follows: (a) in accordance with the Standard Voting Instructions (defined below) adopted by the Adviser with respect to issues subject to the proxies; (b) if the Adviser is directing votes for the same proxy on behalf of a regular qualitative account and a Non-Qualitative Account, the Non-Qualitative Account would vote in the same manner as the regular qualitative account; (c) if neither of the first two conditions apply, as the proxy voting service is recommending; and (d) if none of the previous conditions apply, as recommended by the Proxy Voting Committee ("Proxy Committee").

### **Proxy Voting Procedures**

The Adviser has established a Proxy Voting Committee ("Proxy Committee"), to exercise all voting discretion granted to the Adviser by the Board in accordance with the proxy voting policies. To assist it in carrying out the day-to-day operations related to proxy voting, the Proxy Committee has created the Proxy Voting Management Group (PVMG). The day-to-day operations related to proxy voting are carried out by the Proxy Voting Operations Team (PVOT) and overseen by the PVMG. Besides voting the proxies, this work includes engaging with investee companies on corporate governance matters, managing the proxy voting service, soliciting voting recommendations from the Adviser's investment professionals, bringing voting recommendations to the Proxy Committee for approval, filing with regulatory agencies any required proxy voting reports, providing proxy voting reports to clients and investment companies as they are requested from time to time, and keeping the Proxy Committee informed of any issues related to corporate governance and proxy voting.

The Adviser has compiled a list of specific voting instructions based on the General Policy (the "Standard Voting Instructions"). The Standard Voting Instructions and any modifications to them are approved by the Committee. The Standard Voting Instructions sometimes call for an investment professional to review the ballot question and provide a voting recommendation to the Committee (a "case-by-case vote"). In some situations, such as when the Fund owning the shares to be voted is managed

according to a quantitative or index strategy, the investment professionals may not have the kind of research necessary to develop a voting recommendation. In those cases, the final vote would be determined as follows. If the investment professionals managing another fund or account are able to develop a voting recommendation for the ballot question, that final voting decision would also apply to the quantitative or index fund's proxy. Otherwise, the final voting decision would follow the voting recommendation of the proxy voting service (see below). The foregoing notwithstanding, the Committee always has the authority to determine a final voting decision.

The Adviser has hired a proxy voting service to obtain, vote and record proxies in accordance with the directions of the Proxy Committee. The Proxy Committee has supplied the proxy voting services with the Standard Voting Instructions. The Proxy Committee retains the right to modify the Standard Voting Instructions at any time or to vote contrary to them at any time in order to cast proxy votes in a manner that the Proxy Committee believes is in accordance with the General Policy. The proxy voting service may vote any proxy as directed in the Standard Voting Instructions without further direction from the Proxy Committee. However, if the Standard Voting Instructions require case-by-case handling for a proposal, the PVOT will work with the investment professionals and the proxy voting service to develop a voting recommendation for the Proxy Committee and to communicate the Proxy Committee's final voting decision to the proxy voting service. Further, if the Standard Voting Instructions require the PVOT to analyze a ballot question and make the final voting decision, the PVOT will report such votes to the Proxy Committee on a quarterly basis for review.

### **Conflicts of Interest**

The Adviser has adopted procedures to address situations where a matter on which a proxy is sought may present a potential conflict between the interests of the Fund (and its shareholders) and those of the Adviser or Distributor. This may occur where a significant business relationship exists between the Adviser (or its affiliates) and a company involved with a proxy vote.

A company that is a proponent, opponent, or the subject of a proxy vote, and which to the knowledge of the Proxy Committee has this type of significant business relationship, is referred to below as an "Interested Company."

The Adviser has implemented the following procedures in order to avoid concerns that the conflicting interests of the Adviser or its affiliates have influenced proxy votes. Any employee of the Adviser or its affiliates who is contacted by an Interested Company regarding proxies to be voted by the Adviser must refer the Interested Company to a member of the Proxy Committee, and must inform the Interested Company that the Proxy Committee has exclusive authority to determine how the proxy will be voted. Any Proxy Committee member contacted by an Interested Company must report it to the full Proxy Committee and provide a written summary of the communication. Under no circumstances will the Proxy Committee or any member of the Proxy Committee make a commitment to an Interested Company regarding the voting of proxies or disclose to an Interested Company how the Proxy Committee has directed such proxies to be voted. If the Standard Voting Instructions already provide specific direction on the proposal in question, the Proxy Committee shall not alter or amend such directions. If the Standard Voting Instructions require the Proxy Committee to provide further direction, the Proxy Committee shall do so in accordance with the proxy voting policies, without regard for the interests of the Adviser with respect to the Interested Company. If the Proxy Committee provides any direction as to the voting of proxies relating to a proposal affecting an Interested Company, it must disclose annually to the Fund's Board information regarding: the significant business relationship; any material communication with the Interested Company; the matter(s) voted on; and how, and why, the Adviser voted as it did. In certain circumstances it may be appropriate for the Adviser to vote in the same proportion as all other shareholders, so as to not affect the outcome beyond helping to establish a quorum at the shareholders' meeting. This is referred to as "proportional voting." If the Fund owns shares of another Federated mutual fund, generally the Adviser will proportionally vote the client's proxies for that fund or seek direction from the Board or the client on how the proposal should be voted. If the Fund owns shares of an unaffiliated mutual fund, the Adviser may proportionally vote the Fund's proxies for that fund depending on the size of the position. If the Fund owns shares of an unaffiliated exchange-traded fund, the Adviser will proportionally vote the Fund's proxies for that fund.

### **Downstream Affiliates**

If the Proxy Committee gives further direction, or seeks to vote contrary to the Standard Voting Instructions, for a proxy relating to a portfolio company in which the Fund owns more than 10% of the portfolio company's outstanding voting securities at the time of the vote (Downstream Affiliate), the Proxy Committee must first receive guidance from counsel to the Proxy Committee as to whether any relationship between the Adviser and the portfolio company, other than such ownership of the portfolio company's securities, gives rise to an actual conflict of interest. If counsel determines that an actual conflict exists, the Proxy Committee must address any such conflict with the executive committee of the board of directors or trustees of any investment company client prior to taking any action on the proxy at issue.

### **Proxy Advisers' Conflicts of Interest**

Proxy advisory firms may have significant business relationships with the subjects of their research and voting recommendations. For example, a proxy voting service client may be a public company with an upcoming shareholders' meeting and the proxy voting service has published a research report with voting recommendations. In another example, a proxy voting service board member also sits on the board of a public company for which the proxy voting service will write a research report. These and similar situations give rise to an actual or apparent conflict of interest.

In order to avoid concerns that the conflicting interests of the engaged proxy voting service have influenced proxy voting recommendations, the Adviser will take the following steps:

- A due diligence team made up of employees of the Adviser and/or its affiliates will meet with the proxy voting service on an annual basis and determine through a review of their policies and procedures and through inquiry that the proxy voting service has established a system of internal controls that provide reasonable assurance that their voting recommendations are not influenced by the business relationships they have with the subjects of their research.
- Whenever the standard voting guidelines call for voting a proposal in accordance with the proxy voting service recommendation and the proxy voting service has disclosed that they have a conflict of interest with respect to that issuer, the PVOT will take the following steps: (a) the PVOT will obtain a copy of the research report and recommendations published by another proxy voting service for that issuer; (b) the Head of the PVOT, or his designee, will review both the engaged proxy voting service research report and the research report of the other proxy voting service and determine what vote will be cast. The PVOT will report all proxies voted in this manner to the Proxy Committee on a quarterly basis. Alternatively, the PVOT may seek direction from the Committee on how the proposal shall be voted.

### **Proxy Voting Report**

A report on "Form N-PX" of how the Fund voted any proxies during the most recent 12-month period ended June 30 is available via the Proxy Voting Record (Form N-PX) link associated with the Fund and share class name at [www.FederatedInvestors.com/FundInformation](http://www.FederatedInvestors.com/FundInformation). Form N-PX filings are also available at the SEC's website at [www.sec.gov](http://www.sec.gov).

### **PORTFOLIO HOLDINGS INFORMATION**

Information concerning the Fund's portfolio holdings is available via the link to the Fund and share class name at [www.FederatedInvestors.com/FundInformation](http://www.FederatedInvestors.com/FundInformation). A complete listing of the Fund's portfolio holdings as of the end of each calendar quarter is posted on the website 30 days (or the next business day) after the end of the quarter and remains posted for six months thereafter. Summary portfolio composition information as of the close of each month is posted on the website 15 days (or the next business day) after month-end and remains posted until replaced by the information for the succeeding month. The summary portfolio composition information may include: identification of a percentage breakdown of the portfolio by sector.

You may also access portfolio information as of the end of the Fund's fiscal quarters via the link to the Fund and share class name at [www.FederatedInvestors.com](http://www.FederatedInvestors.com). The Fund's Annual Shareholder Report and Semi-Annual Shareholder Report contain complete listings of the Fund's portfolio holdings as of the end of the Fund's second and fourth fiscal quarters. Fiscal quarter information is made available on the website within 70 days after the end of the fiscal quarter. This information is also available in reports filed with the SEC at the SEC's website at [www.sec.gov](http://www.sec.gov).

Each fiscal quarter, the Fund will file with the SEC a complete schedule of its monthly portfolio holdings on "Form N-PORT." The Fund's holdings as of the end of the third month of every fiscal quarter, as reported on Form N-PORT, will be publicly available on the SEC's website at [www.sec.gov](http://www.sec.gov) within 60 days of the end of the fiscal quarter upon filing. You may also access this information via the link to the Fund and share class name at [www.FederatedInvestors.com](http://www.FederatedInvestors.com).

The disclosure policy of the Fund and the Adviser prohibits the disclosure of portfolio holdings information to any investor or intermediary before the same information is made available to other investors. Employees of the Adviser or its affiliates who have access to nonpublic information concerning the Fund's portfolio holdings are prohibited from trading securities on the basis of this information. Such persons must report all personal securities trades and obtain pre-clearance for all personal securities trades other than mutual fund shares.

Firms that provide administrative, custody, financial, accounting, legal or other services to the Fund may receive nonpublic information about Fund portfolio holdings for purposes relating to their services. The Fund may also provide portfolio holdings information to publications that rate, rank or otherwise categorize investment companies. Traders or portfolio managers may provide "interest" lists to facilitate portfolio trading if the list reflects only that subset of the portfolio for which the trader or portfolio manager is seeking market interest. A list of service providers, publications and other third parties who may receive nonpublic portfolio holdings information appears in the Appendix to this SAI.

The furnishing of nonpublic portfolio holdings information to any third party (other than authorized governmental or regulatory personnel) requires the prior approval of the President of the Adviser and of the Chief Compliance Officer of the Fund. The President of the Adviser and the Chief Compliance Officer will approve the furnishing of nonpublic portfolio holdings information to a third party only if they consider the furnishing of such information to be in the best interests of the Fund and its shareholders. In that regard, and to address possible conflicts between the interests of Fund shareholders and those of the Adviser and its affiliates, the following procedures apply. No consideration may be received by the Fund, the Adviser, any affiliate of the Adviser or any of their employees in connection with the disclosure of portfolio holdings information. Before information is furnished, the third party must sign a written agreement that it will safeguard the confidentiality of the information, will use it only for the purposes for which it is furnished and will not use it in connection with the trading of any security. Persons approved to receive nonpublic portfolio holdings information will receive it as often as necessary for the purpose for which it is provided. Such information may be furnished as frequently as daily and often with no time lag between the date of the information and the date it is furnished. The Board receives and reviews annually a list of the persons who receive nonpublic portfolio holdings information and the purposes for which it is furnished.

## **BROKERAGE TRANSACTIONS AND INVESTMENT ALLOCATION**

Equity securities may be traded in the over-the-counter market through broker/dealers acting as principal or agent, or in transactions directly with other investors. Transactions may also be executed on a securities exchange or through an electronic communications network. The Adviser seeks to obtain best execution of trades in equity securities by balancing the costs inherent in trading, including opportunity costs, market impact costs and commissions. As a general matter, the Adviser seeks to add value to its investment management by using market information to capitalize on market opportunities, actively seek liquidity and discover price. The Adviser continually monitors its trading results in an effort to improve execution. Fixed-income securities are generally traded in an over-the-counter market on a net basis (i.e., without commission) through dealers acting as principal or in transactions directly with the issuer. Dealers derive an undisclosed amount of compensation by offering securities at a higher price than they bid for them. Some fixed-income securities may have only one primary market maker. The Adviser seeks to use dealers it believes to be actively and effectively trading the security being purchased or sold, but may not always obtain the lowest purchase price or highest sale price with respect to a fixed-income security. The Adviser's receipt of research services (as described below) may also be a factor in the Adviser's selection of brokers and dealers. The Adviser may also direct certain portfolio trades to a broker that, in turn, pays a portion of the Fund's operating expenses. The Adviser makes decisions on portfolio transactions and selects brokers and dealers subject to review by the Fund's Board.

Investment decisions for the Fund are made independently from those of other accounts managed by the Adviser and accounts managed by affiliates of the Adviser. Except as noted below, when the Fund and one or more of those accounts invests in, or disposes of, the same security, available investments or opportunities for sales will be allocated among the Fund and the account(s) in a manner believed by the Adviser to be equitable. While the coordination and ability to participate in volume transactions may benefit the Fund, it is possible that this procedure could adversely impact the price paid or received and/or the position obtained or disposed of by the Fund. Investments for Federated Kaufmann Fund and other accounts managed by that fund's portfolio managers in initial public offerings (IPO) are made independently from any other accounts, and much of their non-IPO trading may also be conducted independently from other accounts. Trading and allocation of investments, including IPOs, for accounts managed by Federated MDTA LLC are also made independently from the Fund. Investment decisions and trading for certain separately managed or wrap-fee accounts, and other accounts, of the Adviser and/or certain investment adviser affiliates of the Adviser also are generally made and conducted independently from the Fund. It is possible that such independent trading activity could adversely impact the prices paid or received and/or positions obtained or disposed of by the Fund.

On September 30, 2019, the Fund owned securities of the following regular broker/dealers:

<b>Broker Dealer</b>	<b>Amount of Securities Owned</b>
Citigroup	\$690,800

## **Brokerage and Research Services**

Brokerage services include execution of trades and products and services that relate to the execution of trades, including communications services related to trade execution, clearing and settlement, trading software used to route orders to market centers, software that provides algorithmic trading strategies and software used to transmit orders to direct market access (DMA) systems. Research services may include: advice as to the advisability of investing in securities; security analysis and reports; economic studies; industry studies; receipt of quotations for portfolio evaluations; and similar services. Research services assist the Adviser and its affiliates in terms of their overall investment responsibilities to funds and investment accounts for which they have investment discretion. However, particular brokerage and research services received by the Adviser and its affiliates may not be used

to service every fund or account, and may not benefit the particular funds and accounts that generated the brokerage commissions. In addition, brokerage and research services paid for with commissions generated by the Fund may be used in managing other funds and accounts. To the extent that receipt of these services may replace services for which the Adviser or its affiliates might otherwise have paid, it would tend to reduce their expenses. The Adviser and its affiliates exercise reasonable business judgment in selecting brokers to execute securities transactions where receipt of research services is a factor. They determine in good faith that commissions charged by such persons are reasonable in relationship to the value of the brokerage and research services provided.

For the fiscal year ended September 30, 2019, the Fund's Adviser directed brokerage transactions to certain brokers in connection with the Adviser's receipt of research services. The total amount of these transactions was \$ 1,038,869,981 for which the Fund paid \$ 650,285 in brokerage commissions.

#### **ADMINISTRATOR**

Federated Administrative Services (FAS), a subsidiary of Federated, provides administrative personnel and services, including certain legal, compliance, recordkeeping and financial reporting services ("Administrative Services"), necessary for the operation of the Fund. FAS provides Administrative Services for a fee based upon the rates set forth below paid on the average daily net assets of the Fund. For purposes of determining the appropriate rate breakpoint, "Investment Complex" is defined as all of the Federated Funds subject to a fee under the Administrative Services Agreement with FAS. FAS is also entitled to reimbursement for certain out-of-pocket expenses incurred in providing Administrative Services to the Fund.

<b>Administrative Services Fee Rate</b>	<b>Average Daily Net Assets of the Investment Complex</b>
0.100 of 1%	on assets up to \$50 billion
0.075 of 1%	on assets over \$50 billion

#### **CUSTODIAN**

State Street Bank and Trust Company, Boston, Massachusetts, is custodian for the securities and cash of the Fund. Foreign instruments purchased by the Fund are held by foreign banks participating in a network coordinated by State Street Bank and Trust Company.

#### **TRANSFER AGENT AND DIVIDEND DISBURSING AGENT**

State Street Bank and Trust Company, the Fund's registered transfer agent, maintains all necessary shareholder records.

#### **INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

The independent registered public accounting firm for the Fund, KPMG LLP, conducts its audits in accordance with the standards of the Public Company Accounting Oversight Board (United States), which require it to plan and perform its audits to provide reasonable assurance about whether the Fund's financial statements and financial highlights are free of material misstatement.

#### **FEES PAID BY THE FUND FOR SERVICES**

<b>For the Year Ended September 30</b>	<b>2019</b>	<b>2018</b>	<b>2017</b>
Advisory Fee Earned	\$2,164,554	\$2,162,041	\$3,358,829
Advisory Fee Waived	\$ 123,919	\$ 166,132	\$ 156,640
Advisory Fee Reimbursed	\$ 36,225	\$ 6,598	\$ 11,149
Brokerage Commissions	\$ 723,157	\$1,072,934	\$1,219,836
Net Administrative Fee	\$ 139,763	\$ 138,659	\$ 211,256
<b>12b-1 Fee:</b>			
Class A Shares	\$ —	\$ —	\$ —
Class C Shares	\$ 92,619	\$ 118,206	\$ 171,718
<b>Shareholder Services Fee:</b>			
Class A Shares	\$ 141,605	\$ 174,548	\$ 280,638
Class C Shares	\$ 30,493	\$ 38,550	\$ 55,966

Fees are allocated among classes based on their pro rata share of Fund assets, except for marketing ("Rule 12b-1") fees and shareholder services fees, which are borne only by the applicable class of Shares.

## SECURITIES LENDING ACTIVITIES

The services provided to the Fund by Citibank, N.A. as securities lending agent may include the following: selecting securities previously identified by the Fund as available for loan to be loaned; locating borrowers identified in the securities lending agency agreement; negotiating loan terms; monitoring daily the value of the loaned securities and collateral; requiring additional collateral as necessary; marking to market non-cash collateral; instructing the Fund's custodian with respect to the transfer of loaned securities; indemnifying the Fund in the event of a borrower default; and arranging for return of loaned securities to the Fund at loan termination.

The Fund did not participate in any securities lending activities during the Fund's most recently completed fiscal year.

<b>Gross income from securities lending activities</b>	\$00.00
<i>Fees and/or compensation for securities lending activities and related services</i>	
Fees paid to securities lending agent from a revenue split	\$00.00
Fees paid for any cash collateral management service (including fees deducted from a pooled cash collateral reinvestment vehicle) that are not included in the revenue split	—
Administrative fees not included in revenue split	—
Indemnification fee not included in revenue split	—
Rebate (paid to borrower)	\$00.00
Other fees not included in revenue split (specify)	—
<b>Aggregate fees/compensation for securities lending activities</b>	\$00.00
<b>Net income from securities lending activities</b>	\$00.00

## Financial Information

The Financial Statements for the Fund for the fiscal year ended September 30, 2019, are incorporated herein by reference to the Annual Report to Shareholders of Federated Prudent Bear Fund dated September 30, 2019.

## Investment Ratings

### STANDARD & POOR'S RATING SERVICES (S&P) LONG-TERM ISSUE RATINGS

Issue credit ratings are based, in varying degrees, on S&P's analysis of the following considerations: the likelihood of payment-capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation; the nature of and provisions of the obligation; and the protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

**AAA**—An obligation rated “AAA” has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

**AA**—An obligation rated “AA” differs from the highest rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

**A**—An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

**BBB**—An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Obligations rated “BB,” “B,” “CCC,” “CC” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

**BB**—An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

**B**—An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB,” but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

**CCC**—An obligation rated “CCC” is currently vulnerable to nonpayment, and is dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

**CC**—An obligation rated “CC” is currently highly vulnerable to nonpayment.

**C**—A “C” rating is assigned to obligations that are currently highly vulnerable to nonpayment, obligations that have payment arrearages allowed by the terms of the documents, or obligations of an issuer that is the subject of a bankruptcy petition or similar action which have not experienced a payment default. Among others, the “C” rating may be assigned to subordinated debt, preferred stock or other obligations on which cash payments have been suspended in accordance with the instrument’s terms or when preferred stock is the subject of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

**D**—An obligation rated “D” is in payment default. The “D” rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within five business days, irrespective of any grace period. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action if payments on an obligation are jeopardized. An obligation’s rating is lowered to “D” upon completion of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

The ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

### **S&P RATING OUTLOOK**

An S&P rating outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions.

**Positive**—Positive means that a rating may be raised.

**Negative**—Negative means that a rating may be lowered.

**Stable**—Stable means that a rating is not likely to change.

**Developing**—Developing means a rating may be raised or lowered.

**N.M.**—N.M. means not meaningful.

### **S&P SHORT-TERM ISSUE RATINGS**

Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the United States, for example, that means obligations with an original maturity of no more than 365 days – including commercial paper.

**A-1**—A short-term obligation rated “A-1” is rated in the highest category by S&P. The obligor’s capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

**A-2**—A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitment on the obligation is satisfactory.

**A-3**—A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

**B**—A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor’s inadequate capacity to meet its financial commitments.

**C**—A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitment on the obligation.

**D**—A short-term obligation rated “D” is in payment default. The “D” rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

### **MOODY’S INVESTOR SERVICES, INC. (MOODY’S) LONG-TERM RATINGS**

Moody’s long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default.

**Aaa**—Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

**Aa**—Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

**A**—Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.

**Baa**—Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

**Ba**—Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

**B**—Obligations rated B are considered speculative and are subject to high credit risk.

**Caa**—Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

**Ca**—Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

**C**—Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from Aaa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

### **MOODY'S SHORT-TERM RATINGS**

Moody's short-term ratings are assigned to obligations with an original maturity of 13 months or less and reflect the likelihood of a default on contractually promised payments.

**P-1**—Issuers (or supporting institutions) rated P-1 have a superior ability to repay short-term debt obligations.

**P-2**—Issuers (or supporting institutions) rated P-2 have a strong ability to repay short-term debt obligations.

**P-3**—Issuers (or supporting institutions) rated P-3 have an acceptable ability to repay short-term obligations.

**NP**—Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

### **FITCH, INC. (FITCH) LONG-TERM DEBT RATINGS**

Fitch long-term ratings report Fitch's opinion on an entity's relative vulnerability to default on financial obligations. The "threshold" default risk addressed by the rating is generally that of the financial obligations whose non-payment would best reflect the uncured failure of that entity. As such, Fitch long-term ratings also address relative vulnerability to bankruptcy, administrative receivership or similar concepts, although the agency recognizes that issuers may also make pre-emptive and therefore voluntary use of such mechanisms.

**AAA: Highest Credit Quality**—"AAA" ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

**AA: Very High Credit Quality**—"AA" ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

**A: High Credit Quality**—"A" ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

**BBB: Good Credit Quality**—"BBB" ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

**BB: Speculative**—"BB" ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial flexibility exists which supports the servicing of financial commitments.

**B: Highly Speculative**—"B" ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

**CCC: Substantial Credit Risk**—Default is a real possibility.

**CC: Very High Levels of Credit Risk**—Default of some kind appears probable.

**C: Exceptionally High Levels of Credit Risk**—Default is imminent or inevitable, or the issuer is in standstill. Conditions that are indicative of a "C" category rating for an issuer include: (a) the issuer has entered into a grace or cure period following non-payment of a material financial obligation; (b) the issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation; or (c) Fitch otherwise believes a condition of "RD" or "D" to be imminent or inevitable, including through the formal announcement of a distressed debt exchange.

**RD: Restricted Default**—“RD” ratings indicate an issuer that in Fitch’s opinion has experienced an uncured payment default on a bond, loan or other material financial obligation but which has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, and which has not otherwise ceased operating. This would include: (a) the selective payment default on a specific class or currency of debt; (b) the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation; (c) the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; or (d) execution of a distressed debt exchange on one or more material financial obligations.

**D: Default**—“D” ratings indicate an issuer that in Fitch’s opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, or which has otherwise ceased business.

Default ratings are not assigned prospectively to entities or their obligations; within this context, non-payment on an instrument that contains a deferral feature or grace period will generally not be considered a default until after the expiration of the deferral or grace period, unless a default is otherwise driven by bankruptcy or other similar circumstance, or by a distressed debt exchange.

“Imminent” default typically refers to the occasion where a payment default has been intimated by the issuer, and is all but inevitable. This may, for example, be where an issuer has missed a scheduled payment, but (as is typical) has a grace period during which it may cure the payment default. Another alternative would be where an issuer has formally announced a distressed debt exchange, but the date of the exchange still lies several days or weeks in the immediate future.

In all cases, the assignment of a default rating reflects the agency’s opinion as to the most appropriate rating category consistent with the rest of its universe of ratings, and may differ from the definition of default under the terms of an issuer’s financial obligations or local commercial practice.

#### **FITCH SHORT-TERM DEBT RATINGS**

A Fitch short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity or security stream and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as “short-term” based on market convention. Typically, this means up to 13 months for corporate, sovereign and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

**F1: Highest Short-Term Credit Quality**—Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

**F2: Good Short-Term Credit Quality**—Good intrinsic capacity for timely payment of financial commitments.

**F3: Fair Short-Term Credit Quality**—The intrinsic capacity for timely payment of financial commitments is adequate.

**B: Speculative Short-Term Credit Quality**—Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near-term adverse changes in financial and economic conditions.

**C: High Short-Term Default Risk**—Default is a real possibility.

**RD: Restricted Default**—Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Applicable to entity ratings only.

**D: Default**—Indicates a broad-based default event for an entity, or the default of a short-term obligation.

#### **A.M. BEST COMPANY, INC. (A.M. BEST) LONG-TERM DEBT AND PREFERRED STOCK RATINGS**

A Best’s long-term debt rating is Best’s independent opinion of an issuer/entity’s ability to meet its ongoing financial obligations to security holders when due.

**aaa: Exceptional**—Assigned to issues where the issuer has an exceptional ability to meet the terms of the obligation.

**aa: Very Strong**—Assigned to issues where the issuer has a very strong ability to meet the terms of the obligation.

**a: Strong**—Assigned to issues where the issuer has a strong ability to meet the terms of the obligation.

**bbb: Adequate**—Assigned to issues where the issuer has an adequate ability to meet the terms of the obligation; however, the issue is more susceptible to changes in economic or other conditions.

**bb: Speculative**—Assigned to issues where the issuer has speculative credit characteristics, generally due to a modest margin or principal and interest payment protection and vulnerability to economic changes.

**b: Very Speculative**—Assigned to issues where the issuer has very speculative credit characteristics, generally due to a modest margin of principal and interest payment protection and extreme vulnerability to economic changes.

**ccc, cc, c: Extremely Speculative**—Assigned to issues where the issuer has extremely speculative credit characteristics, generally due to a minimal margin of principal and interest payment protection and/or limited ability to withstand adverse changes in economic or other conditions.

**d: In Default**—Assigned to issues in default on payment of principal, interest or other terms and conditions, or when a bankruptcy petition or similar action has been filed.

Ratings from “aa” to “ccc” may be enhanced with a “+” (plus) or “-” (minus) to indicate whether credit quality is near the top or bottom of a category.

#### **A.M. BEST SHORT-TERM DEBT RATINGS**

A Best’s short-term debt rating is Best’s opinion of an issuer/entity’s ability to meet its financial obligations having original maturities of generally less than one year, such as commercial paper.

**AMB-1+ Strongest**—Assigned to issues where the issuer has the strongest ability to repay short-term debt obligations.

**AMB-1 Outstanding**—Assigned to issues where the issuer has an outstanding ability to repay short-term debt obligations.

**AMB-2 Satisfactory**—Assigned to issues where the issuer has a satisfactory ability to repay short-term debt obligations.

**AMB-3 Adequate**—Assigned to issues where the issuer has an adequate ability to repay short-term debt obligations; however, adverse economic conditions likely will reduce the issuer’s capacity to meet its financial commitments.

**AMB-4 Speculative**—Assigned to issues where the issuer has speculative credit characteristics and is vulnerable to adverse economic or other external changes, which could have a marked impact on the company’s ability to meet its financial commitments.

**d: In Default**—Assigned to issues in default on payment of principal, interest or other terms and conditions, or when a bankruptcy petition or similar action has been filed.

#### **A.M. BEST RATING MODIFIERS**

Both long- and short-term credit ratings can be assigned a modifier.

**u**—Indicates the rating may change in the near term, typically within six months. Generally is event-driven, with positive, negative or developing implications.

**pd**—Indicates ratings assigned to a company that chose not to participate in A.M. Best’s interactive rating process. (Discontinued in 2010).

**i**—Indicates rating assigned is indicative.

#### **A.M. BEST RATING OUTLOOK**

A.M. Best Credit Ratings are assigned a Rating Outlook that indicates the potential direction of a credit rating over an intermediate term, generally defined as the next 12 to 36 months.

**Positive**—Indicates possible ratings upgrade due to favorable financial/market trends relative to the current trading level.

**Negative**—Indicates possible ratings downgrade due to unfavorable financial/market trends relative to the current trading level.

**Stable**—Indicates low likelihood of rating change due to stable financial/market trends.

#### **NOT RATED**

Certain nationally recognized statistical rating organizations (NRSROs) may designate certain issues as NR, meaning that the issue or obligation is not rated.
