Federated Hermes SDG Engagement High Yield Credit Fund

A Portfolio of Federated Adviser Series

A mutual fund seeking current income and long-term capital appreciation along side positive societal impact.

As with all mutual funds, the Securities and Exchange Commission (SEC) has not approved or disapproved these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

IMPORTANT NOTICE TO SHAREHOLDERS

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund’s shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund or your financial intermediary electronically by contacting your financial intermediary (such as a broker-dealer or bank); other shareholders may call the Fund at 1-800-341-7400, Option 4.

You may elect to receive all future reports in paper free of charge. You can inform the Fund or your financial intermediary that you wish to continue receiving paper copies of your shareholder reports by contacting your financial intermediary (such as a broker-dealer or bank); other shareholders may call the Fund at 1-800-341-7400, Option 4. Your election to receive reports in paper will apply to all funds held with the Fund complex or your financial intermediary.

Federated Hermes SDG Engagement High Yield Credit Fund (the “Fund”)

RISK/RETURN SUMMARY: INVESTMENT OBJECTIVE
The Fund’s investment objective is to seek current income and long-term capital appreciation alongside positive societal impact. The objective may be changed by the Fund’s Board of Trustees (the “Trustees”) without shareholder approval.

RISK/RETURN SUMMARY: FEES AND EXPENSES
This table describes the fees and expenses that you may pay if you buy and hold Class IS Shares (IS) of the Fund. If you purchase the Fund’s IS Shares through a broker acting as an agent on behalf of its customers, you may be required to pay a commission to such broker; such commissions, if any, are not reflected in the Example below.

Shareholder Fees (fees paid directly from your investment) IS
- Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price) ........................................... None
- Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price or redemption proceeds, as applicable) .... None
- Maximum Sales Charge (Load) Imposed on Reinvested Dividends (and other Distributions) (as a percentage of offering price) .......... None
- Redemption Fee (as a percentage of amount redeemed, if applicable) ........................................................................ None
- Exchange Fee ................................................................................................................................................ None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)
- Management Fee ........................................................................................................................................... 0.60%
- Distribution (12b-1) Fee .................................................................................................................................... None
- Acquired Fund Fees and Expenses 1 .............................................................................................................. 0.01%
- Other Expenses 1 ....................................................................................................................................... 0.48%
- Total Annual Fund Operating Expenses ................................................................................................... 1.09%
- Fee Waiver and/or Expense Reimbursements 3 .............................................................................................. 0.46%
- Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements ........... 0.63%

1 Acquired Fund Fees and Expenses and Other Expenses are based on estimated amounts for the current fiscal year.
2 The Fund may incur or charge certain service fees (shareholder services/account administration fees) on its IS class of up to a maximum of 0.25%. No such fees are expected to be incurred or charged by the IS class of the Fund. The IS class of the Fund will not incur or charge such fees until such time as approved by the Trustees.
3 The Adviser and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Total annual fund operating expenses (excluding Acquired Fund Fees and Expenses, interest expense, extraordinary expenses, and proxy-related expenses, paid by the Fund, if any) paid by the Fund’s IS class (after the voluntary waivers and/or reimbursements) will not exceed 0.62% (the “Fee Limit”), respectively, up to but not including the later of (a) October 1, 2020; or (b) the date of the Fund’s next effective Prospectus. While the Adviser and its affiliates currently do not anticipate terminating or increasing these additional arrangements prior to the Termination Date, these additional arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Trustees.

Example
This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest $10,000 for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the operating expenses (excluding fee waivers and/or expense reimbursements) are as shown in the table above and remain the same. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

PORTFOLIO TURNOVER
The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example above, affect the Fund’s performance. The Fund is a new fund, has not yet completed its first fiscal year of operation and has no portfolio turnover yet to report.
What are the Fund’s Main Investment Strategies?

The Fund pursues its investment objective by investing primarily in a diversified portfolio of high yield fixed-income securities (also known as “junk bonds”), which include debt securities issued by U.S. or foreign businesses (including emerging market debt securities). The Fund’s investment adviser or sub-adviser (as applicable, the “Adviser”) selects securities that it believes have attractive risk-return characteristics. The Adviser’s securities selection process includes an analysis of the issuer’s financial condition, business and product strength, competitive position and management expertise. The Adviser does not limit the Fund’s investments to securities of a particular maturity range or duration.

In managing the assets of the Fund, the Adviser will seek to invest in securities that, in its view, provide the potential for current income and long-term capital appreciation while also contributing to positive societal impact aligned to the United Nations Sustainable Development Goals (the “UN Sustainable Development Goals”) (as outlined in further detail below). It will do so by performing bottom-up fundamental analysis of financial criteria such as balance sheet quality, franchise value (i.e., brand strength and sustainability of the business model) and quality of management. This fundamental, bottom-up analysis of individual credit will be used to generate returns through anticipated price changes. At the same time, the Adviser will analyze securities to seek to identify whether their market price is reflective of the value of the issuer of the securities (as determined by the fundamental analysis outlined above and when taking market news into account). In addition, the Adviser intends to use a wider analysis of general economic conditions for portfolio risk management purposes. The Adviser intends to diversify the Fund’s portfolio across different geographic regions and industries.

In addition to fundamental financial indicator criteria, engagement criteria that may be used to identify such companies will include, for example, assessment of company management competence, integrity, vision, potential and willingness to enact the changes suggested by the Adviser, as well as alignment with at least one of the UN Sustainable Development Goals.

The Adviser will use the UN SDG goals and targets as a framework for identifying, articulating and measuring positive impact opportunities within the companies it chooses to invest. In addition to quantitative financial indicators and metrics, qualitative criteria will include assessment of company management competence, integrity, vision, potential and willingness to enact the changes suggested by the Adviser during company engagements.

The Fund will not be subject to any limitation on the types of companies in which it may invest (either in terms of industry or focus) so long as these companies are viewed by the Adviser to provide the potential for current income and long-term capital appreciation while also contributing to positive societal impact aligned to the UN Sustainable Development Goals. The Fund will however, exclude companies that manufacture tobacco and/or controversial weapons. The Fund may, from time to time, have larger allocations to certain broad market sectors in attempting to achieve its investment objective.

The Fund may invest in derivative contracts and/or hybrid instruments to implement its investment strategies. For example, the Fund may use derivative contracts or hybrid instruments to increase or decrease the portfolio’s exposure to the investments(s) underlying the derivative or hybrid instrument. There can be no assurance that the Fund’s use of derivative contracts or hybrid instruments will work as intended. Derivative investments made by the Fund are included within the Fund’s 80% policy (as described below) and are calculated at market value.

The Fund will invest its assets so that at least 80% of its net assets (plus any borrowings for investment purposes) are invested in fixed-income investments rated below investment-grade. The Fund will notify shareholders at least 60 days in advance of any change in its investment policy that would enable the Fund to invest, under normal circumstances, less than 80% of its net assets (plus any borrowings for investment purposes) in fixed-income investments rated below investment-grade.

The Fund actively trades its portfolio securities in an attempt to achieve its investment objective. Active trading will cause the Fund to have an increased portfolio turnover rate and increase the Fund’s trading costs, which may have an adverse impact on the Fund’s performance. An active trading strategy will likely result in the Fund generating more short-term capital gains or losses. Short-term gains are generally taxed at a higher rate than long-term gains. Any short-term losses are used first to offset short-term gains.

What are the Main Risks of Investing in the Fund?

All mutual funds take investment risks. Therefore, it is possible to lose money by investing in the Fund. The primary factors that may reduce the Fund’s returns include:

**Risk Associated with Noninvestment-Grade Securities.** Securities rated below investment-grade may be subject to greater interest rate, credit and liquidity risks than investment-grade securities. These securities are considered speculative with respect to the issuer’s ability to pay interest and repay principal.

---

Issuer Credit Risk. It is possible that interest or principal on securities will not be paid when due. Noninvestment-grade securities generally have a higher default risk than investment-grade securities. Such non-payment or default may reduce the value of the Fund’s portfolio holdings, its share price and its performance.

Risks of Investing for UN Sustainable Development Goals. The Fund’s strategy is to target companies the Adviser believes will contribute positive societal impact aligned to the UN Sustainable Development Goals. The Fund may underperform funds that do not have such a strategy.

Counterparty Credit Risk. Credit risk includes the possibility that a party to a transaction involving the Fund will fail to meet its obligations. This could cause the Fund to lose money or to lose the benefit of the transaction or prevent the Fund from selling or buying other securities to implement its investment strategy.

Risk Related to the Economy. The value of the Fund’s portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets. Economic, political and financial conditions, or industry or economic trends and developments, may, from time to time, and for varying periods of time, cause the Fund to experience volatility, illiquidity, shareholder redemptions, or other potentially adverse effects. Among other investments, lower-grade bonds and loans may be particularly sensitive to changes in the economy.

Liquidity Risk. The noninvestment-grade securities in which the Fund may invest may not be readily marketable and may be subject to greater fluctuations in price than other securities. Additionally, certain equity securities in which the Fund invests may be less readily marketable and may be subject to greater fluctuation in price than other securities. Also, market growth at rates greater than dealers’ capacity to make markets, as well as regulatory changes or certain other developments, can reduce dealer inventories of securities (such as corporate bonds), which can further constrain liquidity and increase price volatility. Additionally, there is a possibility that the Fund may not be able to sell a security or close out a derivative contract when it wants to. If this happens, the Fund will be required to continue to hold the security or keep the position open, and the Fund could incur losses. High levels of shareholder redemptions in response to market conditions also may increase liquidity risk and may negatively impact Fund performance.

Interest Rate Risk. Prices of fixed-income securities generally fall when interest rates rise. The longer the duration of a fixed-income security, the more susceptible it is to interest-rate risk. Recent and potential future changes in monetary policy made by central banks and/or their governments are likely to affect the level of interest rates.

Leveraged Company Risk. Securities of companies that issue below investment grade debt or “junk bonds” (i.e., leveraged companies) may be more volatile, be more sensitive to adverse issuer, political, market or economic developments and have limited access to additional capital than securities of other, higher quality companies or the market as a whole, which can limit their opportunities and ability to weather challenging business environments. Companies that experience a decrease in credit quality or that have lower-quality debt or highly leveraged capital structures may undergo difficult business circumstances and face a greater risk of liquidation, reorganization or bankruptcy than other companies.

Risk of Foreign Investing. Because the Fund invests in securities issued by foreign companies and national governments, the Fund’s Share price may be more affected by foreign economic and political conditions, taxation policies and accounting and auditing standards than could otherwise be the case.

Currency Risk. Exchange rates for currencies fluctuate daily. The value of the Fund’s foreign investments and the value of the shares may be affected favorably or unfavorably by changes in currency exchange rates relative to the U.S. dollar.

Eurozone Related Risk. A number of countries in the European Union (EU) have experienced, and may continue to experience, severe economic and financial difficulties. Additional EU member countries may also fall subject to such difficulties. These events could negatively affect the value and liquidity of the Fund’s investments in euro-denominated securities and derivatives contracts, securities of issuers located in the EU or with significant exposure to EU issuers or countries.

Leverage Risk. Leverage risk is created when an investment exposes the Fund to a level of risk that exceeds the amount invested.

Sector Risk. The Fund may allocate relatively more assets to certain industry sectors than to others; therefore, the Fund performance may be more susceptible to any developments which affect those sectors emphasized by the Fund.

Risk of Investing in Emerging Market Countries. Securities issued or traded in emerging markets generally entail greater risks than securities issued or traded in developed markets.

Risk of Investing in Derivative Contracts and Hybrid Instruments. Derivative contracts and hybrid instruments involve risks different from, or possibly greater than, risks associated with investing directly in securities and other traditional investments. Specific risk issues related to the use of such contracts and instruments include valuation and tax issues, increased potential for losses and/or costs to the Fund, and a potential reduction in gains to the Fund. Each of these issues is described in greater detail in this prospectus.
Technology Risk. The Adviser uses various technologies in managing the Fund, consistent with its investment objective and strategy described in this Prospectus. For example, proprietary and third party data and systems are utilized to support decision making for the Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance.

The Shares offered by this Prospectus are not deposits or obligations of any bank, are not endorsed or guaranteed by any bank and are not insured or guaranteed by the U.S. government, the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

PERFORMANCE: BAR CHART AND TABLE
A performance bar chart and total return information for the Fund will be provided after the Fund has been in operation for a full calendar year. Updated performance information for the Fund is available under the “Products” section at FederatedInvestors.com or by calling 1-800-341-7400.

FUND MANAGEMENT
The Fund’s Investment Adviser is Federated Investment Management Company. The Fund’s Sub-Adviser is Hermes Investment Management Limited. Federated holds a majority 60% interest in the Sub-Adviser and, upon the exercise in the future of certain put/call rights under a Put/Call Option Deed between Federated and another shareholder of the Sub-Adviser, Federated anticipates holding an 89.5% interest in the Sub-Adviser.

Mitch Reznick, CFA, Head of Research and Sustainable Fixed Income and Co-Portfolio Manager, has been the Fund’s portfolio manager since inception September 2019.

Fraser Lundie, CFA, Head of Credit and Co-Portfolio Manager, has been the Fund’s portfolio manager since inception in September 2019

PURCHASE AND SALE OF FUND SHARES
You may purchase, redeem or exchange Shares of the Fund on any day the New York Stock Exchange is open. Shares may be purchased through a financial intermediary firm that has entered into a Fund selling and/or servicing agreement with the Distributor or an affiliate (“Financial Intermediary”) or directly from the Fund, by wire or by check. Please note that certain purchase restrictions may apply. Redeem or exchange Shares through a financial intermediary or directly from the Fund by telephone at 1-800-341-7400 or by mail.

The minimum initial investment amount for the Fund’s IS class is generally $1,000,000 and there is no minimum subsequent investment amount. Certain types of accounts are eligible for lower minimum investments. The minimum investment amount for Systematic Investment Programs is $50.

TAX INFORMATION
The Fund’s distributions are taxable as ordinary income or capital gains except when your investment is through a 401(k) plan, an Individual Retirement Account or other tax-advantaged investment plan.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES
If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and/or its related companies may pay the intermediary for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

What are the Fund’s Investment Strategies?
The Fund’s investment objective is to seek current income and long-term capital appreciation alongside positive societal impact. While there is no assurance that the Fund will achieve its investment objective, it endeavors to do so by following the principal strategies and policies described in this Prospectus. This objective may be changed by the Fund’s Board of Trustees (the “Trustees”) without shareholder approval.

The Fund pursues its investment objective by investing primarily in the high-yield fixed-income securities market. The Fund’s investment adviser (the “Adviser”) actively manages the Fund’s portfolio seeking to realize the potentially higher returns of high-yield securities (also known as “junk bonds”), compared to returns of high-grade securities by seeking to minimize default risk and other risks through careful security selection and diversification. The Fund invests in domestic high-yield debt securities both domestically and internationally (including emerging markets). A description of the various types of securities in which the Fund invests, and their risks, immediately follows the strategy discussion.

The Adviser selects securities that it believes have attractive risk-return characteristics. The securities in which the Fund invests have high yields primarily because of the market’s greater uncertainty about the issuer’s ability to make all required interest and principal payments, and therefore about the returns that will in fact be realized by the Fund.
The Adviser attempts to select bonds for investment by the Fund which offer high potential returns for the default risks being assumed. The Adviser’s securities selection process consists of a credit-intensive, fundamental analysis of the issuing firm. The Adviser’s analysis focuses on the financial condition of the issuing firm together with the issuer’s business and product strength, competitive position and management expertise. Further, the Adviser considers current economic, financial market and industry factors, which may affect the issuer.

The Adviser attempts to minimize the Fund’s portfolio credit risk through diversification. The Adviser selects securities to maintain broad portfolio diversification both by company and industry. The Adviser does not target an average maturity range or duration for the Fund’s portfolio.

In managing the assets of the Fund, the Adviser will seek to invest in securities that, in its view, provide the potential for current income and long-term capital appreciation while also contributing to positive societal impact aligned to the United Nations Sustainable Development Goals (the “UN Sustainable Development Goals”) (as outlined in further detail below). It will do so by performing bottom-up fundamental analysis of financial criteria such as balance sheet quality, franchise value (i.e., brand strength and sustainability of the business model) and quality of management. This fundamental, bottom-up analysis of individual credit will be used to generate returns through anticipated price changes. For example, the Adviser will analyze securities of an issuer to seek to identify the extent to which the securities are exposed to credit risk. This will be done with a view to assessing whether the market price of the security in question is, in the Adviser’s view, reflective of its value (after taking account of the credit risk). At the same time, the Adviser will analyze securities to seek to identify whether their market price is reflective of the value of the issuer of the securities (as determined by the fundamental analysis outlined above and when taking market news into account). In addition, the Adviser intends to use a wider analysis of general economic conditions for portfolio risk management purposes. The Adviser intends to diversify the Fund’s portfolio across different geographic regions and industries.

In addition to fundamental financial indicator criteria, the Adviser also considers engagement criteria such as assessment of company management competence, integrity, vision, potential and willingness to enact the changes suggested by the Adviser, as well as alignment with at least one of the UN Sustainable Development Goals.

The Adviser will use the UN SDG goals and targets as a framework for identifying, articulating and measuring positive impact opportunities within the companies it chooses to invest. In addition to quantitative financial indicators and metrics, qualitative criteria will include assessment of company management competence, integrity, vision, potential and willingness to enact the changes suggested by the Adviser during company engagements.

The Adviser will utilize bottom-up analysis of companies’ respective supply chains, direct operations, products and services to identify those businesses with the best opportunity for improvement in areas such as education, water, and energy conservation.

It is anticipated that by identifying solutions to meeting specific UN Sustainable Development Goals, companies will be able to incrementally improve long-term financial returns and resilience by generating higher sales and better productivity by delivering, for example, improved health or educational outcomes for their employees and local community. The Adviser’s in-house stewardship team will support the identification of, and engagement with, suitable companies that meet the criteria outlined above and below. The UN Sustainable Development Goals are as follows: no poverty; zero hunger; good health and well-being; quality education; gender equality; clean water and sanitation; affordable and clean energy; decent work and economic growth; industry, innovation and infrastructure; reduced inequalities; sustainable cities and communities; responsible consumption and production; climate action; life below water; life on land; peace, justice and strong institutions; and partnership for the goals.

The Fund will not be subject to any limitation on the types of companies in which it may invest (either in terms of industry or focus) so long as these companies are viewed by the Adviser to provide the potential for long-term capital appreciation while also contributing to positive societal impact aligned to the UN Sustainable Development Goals. The Fund will however, exclude companies that manufacture tobacco and/or controversial weapons. The Fund may, from time to time, have larger allocations to certain broad market sectors in attempting to achieve its investment objective.

In making its investment decisions, the Adviser will seek to consider its corporate governance and/or responsible investment policies (“CGRI Guidelines”) with regards to the holding of either individual securities or various categories or classes of securities. The Adviser will typically sell a security either when its analysis indicates that it has either met the defined engagement objectives aligned to the UN Sustainable Development Goals or the Adviser does not believe that these objectives will be met, or when there is a material change in a company’s investment thesis that would prompt a sale. The CGRI Guidelines are intended to provide guidance on achieving best practice standards of corporate governance and equity stewardship in order to make informed investment decisions.

The Fund may use derivative contracts and/or hybrid instruments to implement elements of its investment strategy. For example, the Fund may use derivative contracts or hybrid instruments to increase or decrease the portfolio’s exposure to the investment(s) underlying the derivative or hybrid instrument in an attempt to benefit from changes in the value of the underlying investment(s). Additionally, by way of example, the Fund may use derivative contracts in an attempt to:
• increase or decrease the effective duration of the Fund portfolio;
• obtain premiums from the sale of derivative contracts;
• realize gains from trading a derivative contract; or
• hedge against potential losses.

There can be no assurance that the Fund’s use of derivative contracts or hybrid instruments will work as intended. Derivative investments made by the Fund are included within the Fund’s 80% policy (as described below) and are calculated at market value.

The Fund will invest its assets so that at least 80% of its net assets (plus any borrowings for investment purposes) are invested in fixed-income investments rated below investment-grade. The Fund will notify shareholders at least 60 days in advance of any change in its investment policy that would enable the Fund to invest, under normal circumstances, less than 80% of its net assets (plus any borrowings for investment purposes) in fixed-income investments rated below investment-grade.

1 Please refer to https://sustainabledevelopment.un.org/?menu=1300 for further information on the United Nations Sustainable Development Goals

Portfolio Turnover

The Fund actively trades its portfolio securities in an attempt to achieve its investment objective. Active trading will cause the Fund to have an increased portfolio turnover rate and increase the Fund’s trading costs, which may have an adverse impact on the Fund’s performance. An active trading strategy will likely result in the Fund generating more short-term capital gains or losses. Short-term gains are generally taxed at a higher rate than long-term gains. Any short-term losses are used first to offset short-term gains.

TEMPORARY INVESTMENTS

The Fund may temporarily depart from its principal investment strategies by investing its assets in shorter-term debt securities and similar obligations or holding cash. It may do this in response to unusual circumstances, such as: adverse market, economic or other conditions (for example, to help avoid potential losses, or during periods when there is a shortage of appropriate securities); to maintain liquidity to meet shareholder redemptions; or to accommodate cash inflows. It is possible that such investments could affect the Fund’s investment returns and/or the ability to achieve the Fund’s investment objectives.

What are the Fund’s Principal Investments?

The following provides general information on the Fund’s principal investments. The Fund’s Statement of Additional Information (SAI) provides information about the Fund’s non-principal investments and may provide additional information about the Fund’s principal investments.

FIXED-INCOME SECURITIES

Fixed-income securities pay interest, dividends or distributions at a specified rate. The rate may be a fixed percentage of the principal or may be adjusted periodically. In addition, the issuer of a fixed-income security must repay the principal amount of the security, normally within a specified time. Fixed-income securities provide more regular income than equity securities. However, the returns on fixed-income securities are limited and normally do not increase with the issuer’s earnings. This limits the potential appreciation of fixed-income securities as compared to equity securities.

A security’s yield measures the annual income earned on a security as a percentage of its price. A security’s yield will increase or decrease depending upon whether it costs less (a “discount”) or more (a “premium”) than the principal amount. If the issuer may redeem the security before its scheduled maturity, the price and yield on a discount or premium security may change based upon the probability of an early redemption. Securities with higher risks generally have higher yields.

The following describes the fixed-income securities in which the Fund principally invests:

Preferred Stocks

Preferred stocks have the right to receive specified dividends or distributions before the issuer makes payments on its common stock. Some preferred stocks also participate in dividends and distributions paid on common stock. Preferred stocks may also permit the issuer to redeem the stock. The Fund may also treat such redeemable preferred stock as a fixed-income security.

Corporate Debt Securities (A Type of Fixed-Income Security)

Corporate debt securities are fixed-income securities issued by businesses. Notes, bonds, debentures and commercial paper are the most prevalent types of corporate debt securities. The credit risks of corporate debt securities vary widely among issuers.
In addition, the credit risk of an issuer’s debt security may vary based on its priority for repayment. For example, higher ranking (“senior”) debt securities have a higher priority than lower ranking (“subordinated”) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of senior securities may receive amounts otherwise payable to the holders of subordinated securities. Some subordinated securities, such as trust-preferred and capital-securities notes, also permit the issuer to defer payments under certain circumstances. For example, insurance companies issue securities known as surplus notes that permit the insurance company to defer any payment that would reduce its capital below regulatory requirements.

Lower-Rated, Fixed-Income Securities

Lower-rated, fixed-income securities are securities rated below investment grade (i.e., BB or lower) by a nationally recognized statistical rating organization (NRSRO). There is no minimal acceptable rating for a security to be purchased or held by the Fund and the Fund may purchase or hold unrated securities and securities whose issuers are in default.

Demand Instruments (A Type of Corporate Debt Security)

Demand instruments are corporate debt securities that require the issuer or a third party, such as a dealer or bank (the “Demand Provider”), to repurchase the security for its face value upon demand. Some demand instruments are “conditional,” so that the occurrence of certain conditions relieves the Demand Provider of its obligation to repurchase the security. Other demand instruments are “unconditional,” so that there are no conditions under which the Demand Provider’s obligation to repurchase the security can terminate. The Fund treats demand instruments as short-term securities, even though their stated maturity may extend beyond one year.

Convertible Securities (A Fixed-Income Security)

Convertible securities are fixed-income securities that the Fund has the option to exchange for equity securities at a specified conversion price. The option allows the Fund to realize additional returns if the market price of the equity securities exceeds the conversion price. For example, the Fund may hold fixed-income securities that are convertible into shares of common stock at a conversion price of $10 per share. If the market value of the shares of common stock reached $12, the Fund could realize an additional $2 per share by converting its fixed-income securities. Convertible securities have lower yields than comparable fixed-income securities. In addition, at the time a convertible security is issued, the conversion price exceeds the market value of the underlying equity securities. Thus, convertible securities may provide lower returns than non-convertible, fixed-income securities or equity securities depending upon changes in the price of the underlying equity securities. However, convertible securities permit the Fund to realize some of the potential appreciation of the underlying equity securities with less risk of losing its initial investment.

To the extent the Fund invests in convertible securities, it typically invests in securities that can be exchanged for instruments that are publically traded or listed on a centralized market or stock exchange. The Fund may receive securities not publically traded or listed on a centralized market or stock exchange in connection with bankruptcies, restructurings, or other unusual circumstances.

The Fund treats convertible securities as fixed-income securities for purposes of its investment policies and limitations, because of their unique characteristics.

Contingent Convertible Capital Instrument (A Type of Fixed-Income Security)

Contingent convertible capital instruments are fixed-income securities or preferred stocks that automatically convert into equity securities of the issuer or undergo a principal write-down by a pre-determined percentage upon the occurrence of certain events (a “Trigger Event”). For example, a Trigger Event may occur if the issuer’s bank regulatory capital ratio falls below a predetermined level. If a Trigger Event occurs, the fund would be likely to lose some or all of its investment in the Contingent convertible capital instrument. Contingent convertible capital instruments may expose the Fund to stock market risk. The Fund treats contingent convertible capital instruments as fixed-income securities for purposes of its investment policies and limitations, because they should perform like other fixed income securities unless a Trigger Event occurs.

FOREIGN SECURITIES

Foreign securities are securities of issuers based outside the United States. To the extent a Fund invests in securities included in its applicable broad-based securities market index, the Fund may consider an issuer to be based outside the United States if the applicable index classifies the issuer as based outside the United States. Accordingly, the Fund may consider an issuer to be based outside the United States if the issuer satisfies at least one, but not necessarily all, of the following:

- it is organized under the laws of, or has its principal office located in, another country;
- the principal trading market for its securities is in another country;
- it (directly or through its consolidated subsidiaries) derived in its most current fiscal year at least 50% of its total assets, capitalization, gross revenue or profit from goods produced, services performed or sales made in another country; or
While the Fund typically invests in U.S. dollar denominated foreign securities, the Fund may also invest in foreign securities that are denominated in foreign currencies. Along with the risks normally associated with domestic securities of the same type, foreign securities are subject to currency risks and risks of foreign investing. Trading in certain foreign markets is also subject to liquidity risks.

Foreign Exchange Contracts

In order to convert U.S. dollars into the currency needed to buy a foreign security, or to convert foreign currency received from the sale of a foreign security into U.S. dollars, or to decrease or eliminate the Fund’s exposure to foreign currencies in which a portfolio security is denominated, the Fund may enter into spot currency trades. In a spot trade, the Fund agrees to exchange one currency for another at the current exchange rate. The Fund may also enter into derivative contracts in which a foreign currency is an underlying asset. The exchange rate for currency derivative contracts may be higher or lower than the spot exchange rate. Use of these derivative contracts may increase or decrease the Fund’s exposure to currency risks.

DERIVATIVE CONTRACTS

Derivative contracts are financial instruments that require payments based upon changes in the values of designated securities, commodities, currencies, indices, or other assets or instruments including other derivative contracts, (each a “Reference Instrument” and collectively, “Reference Instruments”). Each party to a derivative contract may sometimes be referred to as a counterparty. Some derivative contracts require payments relating to an actual, future trade involving the Reference Instrument. These types of derivatives are frequently referred to as “physically settled” derivatives. Other derivative contracts require payments relating to the income or returns from, or changes in the market value of, a Reference Instrument. These types of derivatives are known as “cash-settled” derivatives, since they require cash payments in lieu of delivery of the Reference Instrument.

Many derivative contracts are traded on securities or commodities exchanges. In this case, the exchange sets all the terms of the contract except for the price. Investors make payments due under their contracts through the exchange. Most exchanges require investors to maintain margin accounts through their brokers to cover their potential obligations to the exchange. Parties to the contract make (or collect) daily payments to the margin accounts to reflect losses (or gains) in the value of their contracts. This protects investors against potential defaults by the other party to the contract. Trading contracts on an exchange also allows investors to close out their contracts by entering into offsetting contracts.

The Fund may also trade derivative contracts over-the-counter (OTC) in transactions negotiated directly between the Fund and a financial institution. OTC contracts do not necessarily have standard terms, so they may be less liquid and more difficult to close out than exchange-traded contracts. In addition, OTC contracts with more specialized terms may be more difficult to value than exchange-traded contracts, especially in times of financial stress.

The market for swaps and other OTC derivatives was largely unregulated prior to the enactment of federal legislation known as the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”). Regulations enacted by the Commodity Futures Trading Commission (the CFTC) under the Dodd-Frank Act require the Fund to clear certain swap contracts through a clearing house or central counterparty (a CCP).

To clear a swap through the CCP, the Fund will submit the contract to, and post margin with, a futures commission merchant (FCM) that is a clearing house member. The Fund may enter into the swap with a financial institution other than the FCM and arrange for the contract to be transferred to the FCM for clearing, or enter into the contract with the FCM itself. If the Fund must centrally clear a transaction, the CFTC’s regulations also generally require that the swap be executed on a registered exchange or through a market facility that is known as a swap execution facility or SEF. Central clearing is presently required only for certain swaps; the CFTC is expected to impose a mandatory central clearing requirement for additional derivative instruments over time.

The CCP, SEF and FCM are all subject to regulatory oversight by the CFTC. In addition, most derivative market participants are now regulated as swap dealers or major swap participants and are subject to certain minimum capital and margin requirements and business conduct standards. Similar regulatory requirements are expected to apply to derivative contracts that are subject to the jurisdiction of the SEC, although the SEC has not yet finalized its regulations. In addition, uncleared OTC swaps will be subject to regulatory collateral requirements that could adversely affect the Fund’s ability to enter into swaps in the OTC market. These developments could cause the Fund to terminate new or existing swap agreements or to realize amounts to be received under such instruments at an inopportune time.

Until the mandated rulemaking and regulations are implemented completely, it will not be possible to determine the complete impact of the Dodd-Frank Act and related regulations on the Fund.
Depending on how the Fund uses derivative contracts and the relationships between the market value of a derivative contract and the Reference Instrument, derivative contracts may increase or decrease the Fund’s exposure to the risks of the Reference Instrument, and may also expose the Fund to liquidity and leverage risks. OTC contracts also expose the Fund to credit risks in the event that a counterparty defaults on the contract, although this risk may be mitigated by submitting the contract for clearing through a CCP.

Payment obligations arising in connection with derivative contracts are frequently required to be secured with margin (which is commonly called “collateral”). To the extent necessary to meet such requirements, the Fund may purchase U.S. Treasury and/or government agency securities.

The Fund may invest in a derivative contract if it is permitted to own, invest in, or otherwise have economic exposure to the Reference Instrument. The Fund is not required to own a Reference Instrument in order to buy or sell a derivative contract relating to that Reference Instrument. The Fund may trade in the following specific types and/or combinations of derivative contracts:

**Futures Contracts (A Type of Derivative)**

Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a Reference Instrument at a specified price, date and time. Entering into a contract to buy a Reference Instrument is commonly referred to as buying a contract or holding a long position in the asset. Entering into a contract to sell a Reference Instrument is commonly referred to as selling a contract or holding a short position in the Reference Instrument. Futures contracts are considered to be commodity contracts. The Adviser has claimed an exclusion from the definition of the term “commodity pool operator” under the Commodity Exchange Act with respect to the Fund and, therefore, is not subject to registration or regulation with respect to the Fund. Futures contracts traded OTC are frequently referred to as forward contracts. The Fund can buy or sell financial futures (such as interest rate futures, index futures and security futures), as well as, currency futures and currency forward contracts.

**Option Contracts (A Type of Derivative)**

Option contracts (also called “options”) are rights to buy or sell a Reference Instrument for a specified price (the “exercise price”) during, or at the end of, a specified period. The seller (or “writer”) of the option receives a payment, or premium, from the buyer, which the writer keeps regardless of whether the buyer uses (or exercises) the option. A call option gives the holder (buyer) the right to buy the Reference Instrument from the seller (writer) of the option. A put option gives the holder the right to sell the Reference Instrument to the writer of the option. Options may be bought or sold on a wide variety of Reference Instruments. Options that are written on futures contracts will be subject to margin requirements similar to those applied to futures contracts.

**Swap Contracts (A Type of Derivative)**

A swap contract (also known as a “swap”) is a type of derivative contract in which two parties agree to pay each other (swap) the returns derived from Reference Instruments. Swaps do not always involve the delivery of the Reference Instruments by either party, and the parties might not own the Reference Instruments underlying the swap. The payments are usually made on a net basis so that, on any given day, the Fund would receive (or pay) only the amount by which its payment under the contract is less than (or exceeds) the amount of the other party’s payment. Swap agreements are sophisticated instruments that can take many different forms and are known by a variety of names. Common types of swaps in which the Fund may invest include interest rate swaps, caps and floors, total return swaps, credit default swaps and currency swaps.

**OTHER INVESTMENTS, TRANSACTIONS, TECHNIQUES**

**Hybrid Instruments**

Hybrid instruments combine elements of two different kinds of securities or financial instruments (such as a derivative contract). Frequently, the value of a hybrid instrument is determined by reference to changes in the value of a Reference Instrument (that is a designated security, commodity, currency, index or other asset or instrument including a derivative contract). The Fund may use hybrid instruments only in connection with permissible investment activities. Hybrid instruments can take on many forms including, but not limited to, the following forms. First, a common form of a hybrid instrument combines elements of a derivative contract with those of another security (typically a fixed-income security). In this case, all or a portion of the interest or principal payable on a hybrid security is determined by reference to changes in the price of a Reference Instrument. Second, hybrid instruments may include convertible securities with conversion terms related to a Reference Instrument.
Depending on the type and terms of the hybrid instrument, its risks may reflect a combination of the risks of investing in the Reference Instrument with the risks of investing in other securities, currencies and derivative contracts. Thus, an investment in a hybrid instrument may entail significant risks in addition to those associated with traditional securities or the Reference Instrument. Hybrid instruments are also potentially more volatile than traditional securities or the Reference Instrument. Moreover, depending on the structure of the particular hybrid, it may expose the Fund to leverage risks or carry liquidity risks.

Asset Segregation
In order to secure its obligations in connection with derivative contracts or special transactions, the Fund will either own the underlying assets, enter into offsetting transactions or set aside cash or readily marketable securities in each case, as provided by the SEC or SEC staff guidance. This requirement may cause the Fund to miss favorable trading opportunities, due to a lack of sufficient cash or readily marketable securities. This requirement may also cause the Fund to realize losses on offsetting or terminated derivative contracts or special transactions.

Investing in Securities of Other Investment Companies
The Fund may invest its assets in securities of other investment companies, including the securities of affiliated money market funds, as an efficient means of implementing its investment strategies and/or managing its uninvested cash. The Fund may also invest in high yield and loan instruments primarily by investing in another investment company (which is not available for general investment by the public) that owns those securities and that is advised by an affiliate of the Adviser. The Fund may also invest in such securities directly. These other investment companies are managed independently of the Fund and incur additional fees and/or expenses which would, therefore, be borne indirectly by the Fund in connection with any such investment. However, the Adviser believes that the benefits and efficiencies of this approach should outweigh the potential additional fees and/or expenses.

Investment Ratings for Investment-Grade Securities
The Adviser will determine whether a security is investment grade based upon the credit ratings given by one or more NRSROs. For example, Standard & Poor’s, an NRSRO, assigns ratings to investment-grade securities (AAA, AA, A and BBB including modifiers, sub-categories and gradations) based on their assessment of the likelihood of the issuer’s inability to pay interest or principal (default) when due on each security. Lower credit ratings correspond to higher credit risk. If a security has not received a rating, the Fund must rely entirely upon the Adviser’s credit assessment that the security is comparable to investment grade. The presence of a ratings modifier, sub-category, or gradation (for example, a (+) or (-)) is intended to show relative standing within the major rating categories and does not affect the security credit rating for purposes of the Fund’s investment parameters. If a security is downgraded below the minimum quality grade discussed above, the Adviser will reevaluate the security, but will not be required to sell it.

Investment Ratings for Noninvestment-Grade Securities
Noninvestment-grade securities are rated below BBB- by an NRSRO. These bonds have greater economic, credit and liquidity risks than investment-grade securities.

What are the Specific Risks of Investing in the Fund?
The following provides general information on the risks associated with the Fund’s principal investments. Any additional risks associated with the Fund’s non-principal investments are described in the Fund’s SAI. The Fund’s SAI also may provide additional information about the risks associated with the Fund’s principal investments.

RISK ASSOCIATED WITH NONINVESTMENT-GRADE SECURITIES
Securities rated below investment grade, also known as junk bonds, generally entail greater economic, credit and liquidity risks than investment-grade securities. For example, their prices are more volatile, economic downturns and financial setbacks may affect their prices more negatively, and their trading market may be more limited. These securities are considered speculative with respect to the issuer’s ability to pay interest and repay principal.

ISSUER CREDIT RISK
It is possible that interest or principal on securities will not be paid when due. Noninvestment-grade securities generally have a higher default risk than investment-grade securities. Such non-payment or default may reduce the value of the Fund’s portfolio holdings, its share price and its performance.

Many fixed-income securities receive credit ratings from nationally recognized statistical rating organizations (NRSROs) such as Fitch Rating Service, Moody’s Investor Services, Inc. and Standard & Poor’s that assign ratings to securities by assessing the likelihood of an issuer and/or guarantor default. Higher credit ratings correspond to lower perceived credit risk and lower credit ratings correspond to higher perceived credit risk. Credit ratings may be upgraded or downgraded from
time to time as an NRSRO’s assessment of the financial condition of a party obligated to make payments with respect to such securities and credit risk changes. The impact of any credit rating downgrade can be uncertain. Credit rating downgrades may lead to increased interest rates and volatility in financial markets, which in turn could negatively affect the value of the Fund’s portfolio holdings, its share price and its investment performance. Credit ratings are not a guarantee of quality. Credit ratings may lag behind the current financial conditions of the issuer and/or guarantor and do not provide assurance against default or other loss of money. Credit ratings do not protect against a decline in the value of a security. If a security has not received a rating, the Fund must rely entirely upon the Adviser’s credit assessment.

Fixed-income securities generally compensate for greater credit risk by paying interest at a higher rate. The difference between the yield of a security and the yield of a U.S. Treasury security or other appropriate benchmark with a comparable maturity (the “spread”) measures the additional interest paid for risk. Spreads may increase generally in response to adverse economic or market conditions. A security’s spread may also increase if the security’s rating is lowered, or the security is perceived to have an increased credit risk. An increase in the spread will cause the price of the security to decline if interest rates remain unchanged.

RISKS OF INVESTING FOR UN SUSTAINABLE DEVELOPMENT GOALS

The Fund’s strategy is to target companies the Adviser believes will contribute positive societal impact aligned to the UN Sustainable Development Goals. The Fund may underperform funds that do not have such a strategy. This strategy may result in the Fund’s forgoing opportunities to buy certain securities when it might otherwise be advantageous to do so. The Adviser’s assessment of a company’s alignment to the UN Sustainable Development Goals may change over time, which could cause the Fund to temporarily hold securities that do not align as closely with the UN Sustainable Development Goals as initially determined by the Adviser, or may cause the Fund to sell securities when it might be otherwise disadvantageous for it to do so. In evaluating a company, the Adviser is dependent upon information and data that may be incomplete, inaccurate or unavailable, which could cause the Adviser to incorrectly assess a company’s alignment to the UN Sustainable Development Goals. The Adviser’s assessment of a company’s alignment to the UN Sustainable Development Goals depends upon an analysis of a number of factors and may be evaluated differently by different managers.

COUNTERPARTY CREDIT RISK

Credit risk includes the possibility that a party to a transaction involving the Fund will fail to meet its obligations. This could cause the Fund to lose money or to lose the benefit of the transaction or prevent the Fund from selling or buying other securities to implement its investment strategy.

RISK RELATED TO THE ECONOMY

The value of the Fund’s portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets based on negative developments in the U.S. and global economies. Economic, political and financial conditions, or industry or economic trends and developments, may, from time to time, and for varying periods of time, cause volatility, illiquidity or other potentially adverse effects in the financial markets, including the fixed-income market. The commencement, continuation or ending of government policies and economic stimulus programs, changes in monetary policy, increases or decreases in interest rates, or other factors or events that affect the financial markets, including the fixed-income markets, may contribute to the development of or increase in volatility, illiquidity, shareholder redemptions and other adverse effects, which could negatively impact the Fund’s performance. For example, the value of certain portfolio securities may rise or fall in response to changes in interest rates, which could result from a change in government policies, and has the potential to cause investors to move out of certain portfolio securities, including fixed-income securities, on a large scale. This may increase redemptions from funds that hold large amounts of certain securities and may result in decreased liquidity and increased volatility in the financial markets. Market factors, such as the demand for particular portfolio securities, may cause the price of certain portfolio securities to fall while the prices of other securities rise or remain unchanged. Among other investments, lower-grade bonds and loans may be particularly sensitive to changes in the economy.

LIQUIDITY RISK

Trading opportunities are more limited for fixed-income securities that have not received any credit ratings, have received any credit ratings below investment grade or are not widely held. These features may make it more difficult to sell or buy a security at a favorable price or time. Consequently, the Fund may have to accept a lower price to sell a security, sell other securities to raise cash or give up an investment opportunity, any of which could have a negative effect on the Fund’s performance. Infrequent trading of securities may also lead to an increase in their price volatility.

Liquidity risk also refers to the possibility that the Fund may not be able to sell a security or close out a derivative contract when it wants to. If this happens, the Fund will be required to continue to hold the security or keep the position open, and the Fund could incur losses.
OTC derivative contracts generally carry greater liquidity risk than exchange-traded contracts. This risk may be increased in times of financial stress, if the trading market for OTC derivative contracts becomes restricted.

LEVERAGED COMPANY RISK
Securities issued by leveraged companies, including securities of companies that issue below investment grade debt or “junk bonds” may be more volatile than securities of companies that issue investment grade debt. In addition, securities of leveraged companies tend to be more sensitive to adverse issuer, political, market or economic developments than the market as a whole and the securities of other types of companies. A decrease in the credit quality of a leveraged company is likely to lead to a decrease in the value of the company’s securities. Leveraged companies can have limited access to additional capital, which can limit their ability to capitalize on attractive business opportunities and make it more difficult for them to weather challenging business environments. Companies with lower-quality debt or highly leveraged capital structures may undergo difficult business circumstances. These companies may face a greater risk of liquidation, reorganization or bankruptcy than companies without lower-quality debt or with lower levels of leverage. In the event of liquidation, reorganization or bankruptcy, a company’s creditors generally take precedence over the company’s stockholders, which makes recovery of those stockholders’ investment relatively less likely.

INTEREST RATE RISK
Prices of fixed-income securities rise and fall in response to changes in interest rates. Generally, when interest rates rise, prices of fixed-income securities fall. However, market factors, such as the demand for particular fixed-income securities, may cause the price of certain fixed-income securities to fall while the prices of other securities rise or remain unchanged.

The longer the duration of a fixed-income security, the more susceptible it is to interest rate risk. The duration of a fixed-income security may be equal to or shorter than the stated maturity of a fixed-income security. Recent and potential futures changes in monetary policy made by central banks and/or their governments are likely to affect the level of interest rates. Duration measures the price sensitivity of a fixed-income security given a change in interest rates. For example, if a fixed-income security has an effective duration of three years, a 1% increase in general interest rates would be expected to cause the security’s value to decline about 3% while a 1% decrease in general interest rates would be expected to cause the security’s value to increase about 3%.

RISK OF FOREIGN INVESTING
Foreign securities pose additional risks because foreign economic or political conditions may be less favorable than those of the United States. Securities in foreign markets may also be subject to taxation policies that reduce returns for U.S. investors.

Foreign companies may not provide information (including financial statements) as frequently or to as great an extent as companies in the United States. Foreign companies may also receive less coverage than U.S. companies by market analysts and the financial press. In addition, foreign countries may lack uniform accounting, auditing and financial reporting standards or regulatory requirements comparable to those applicable to U.S. companies. These factors may prevent the Fund and its Adviser from obtaining information concerning foreign companies that is as frequent, extensive and reliable as the information available concerning companies in the United States.

Foreign countries may have restrictions on foreign ownership of securities or may impose exchange controls, capital flow restrictions or repatriation restrictions which could adversely affect the liquidity of the Fund’s investments.

Since many loan instruments involve parties (for example, lenders, borrowers and agent banks) located in multiple jurisdictions outside of the United States, there is a risk that a security interest in any related collateral may be unenforceable and obligations under the related loan agreements may not be binding.

CURRENCY RISK
Exchange rates for currencies fluctuate daily. Accordingly, the Fund may experience increased volatility with respect to the value of its Shares and its returns as a result of its exposure to foreign currencies through direct holding of such currencies or holding of non-U.S. dollar denominated securities. The combination of currency risk and market risks tends to make securities traded in foreign markets more volatile than securities traded exclusively in the United States.

The Adviser attempts to manage currency risk by limiting the amount the Fund invests in securities denominated in a particular currency. However, diversification will not protect the Fund against a general increase in the value of the U.S. dollar relative to other currencies.
EUROZONE RELATED RISK

A number of countries in the European Union (EU) have experienced, and may continue to experience, severe economic and financial difficulties. Additional EU member countries may also fall subject to such difficulties. These events could negatively affect the value and liquidity of the Fund’s investments in euro-denominated securities and derivatives contracts, securities of issuers located in the EU or with significant exposure to EU issuers or countries. If the euro is dissolved entirely, the legal and contractual consequences for holders of euro-denominated obligations and derivative contracts would be determined by laws in effect at such time. Such investments may continue to be held, or purchased, to the extent consistent with the Fund’s investment objective(s) and permitted under applicable law. These potential developments, or market perceptions concerning these and related issues, could adversely affect the value of the Shares.

Certain countries in the EU have had to accept assistance from supra-governmental agencies such as the International Monetary Fund, the European Stability Mechanism (the ESM) or other supra-governmental agencies. The European Central Bank has also been intervening to purchase Eurozone debt in an attempt to stabilize markets and reduce borrowing costs. There can be no assurance that these agencies will continue to intervene or provide further assistance and markets may react adversely to any expected reduction in the financial support provided by these agencies. Responses to the financial problems by European governments, central banks and others including austerity measures and reforms, may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences.

In addition, one or more countries may abandon the euro and/or withdraw from the EU. The impact of these actions, especially if they occur in a disorderly fashion, could be significant and far-reaching. In June 2016, the United Kingdom (U.K.) approved a referendum to leave the EU, commonly referred to as “Brexit,” which sparked depreciation in the value of the British pound, short-term declines in global stock markets and heightened risk of continued worldwide economic volatility. As a result of Brexit, there is considerable uncertainty as to the arrangements that will apply to the U.K.’s relationship with the EU and other countries leading up to, and following, its withdrawal. This long-term uncertainty may affect other countries in the EU and elsewhere. Further, the U.K.’s departure from the EU may cause volatility within the EU, triggering prolonged economic downturns in certain European countries or sparking additional member states to contemplate departure from the EU. In addition, Brexit can create actual or perceived additional economic stresses for the U.K., including potential for decreased trade, capital outflows, devaluation of the British pound, wider corporate bond spreads due to uncertainty and possible declines in business and consumer spending as well as foreign direct investment.

LEVERAGE RISK

Leverage risk is created when an investment, which includes, for example, an investment in a derivative contract, exposes the Fund to a level of risk that exceeds the amount invested. Changes in the value of such an investment magnify the Fund’s risk of loss and potential for gain. Investments can have these same results if their returns are based on a multiple of a specified index, security or other benchmark.

SECTOR RISK

Companies with similar characteristics may be grouped together in broad categories called sectors. Sector risk is the possibility that a certain sector may underperform other sectors or the market as a whole. As the Adviser allocates more of the Fund’s portfolio holdings to a particular sector, the Fund’s performance will be more susceptible to any economic, business or other developments which generally affect that sector.

RISK OF INVESTING IN EMERGING MARKET COUNTRIES

Securities issued or traded in emerging markets generally entail greater risks than securities issued or traded in developed countries. For example, their prices may be significantly more volatile than prices in developed countries. Emerging market economies may also experience more severe down-turns (with corresponding currency devaluations) than developed economies.

Emerging market countries may have relatively unstable governments and may present the risk of nationalization of businesses, expropriation, confiscatory taxation or, in certain instances, reversion to closed market, centrally planned economies.

RISK OF INVESTING IN DERIVATIVE CONTRACTS AND HYBRID INSTRUMENTS

The Fund’s exposure to derivative contracts and hybrid instruments (either directly or through its investment in another investment company) involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. First, changes in the value of the derivative contracts and hybrid instruments in which the Fund invests may not be correlated with changes in the value of the underlying Reference Instruments or, if they are correlated, may move in the opposite direction than originally anticipated. Second, while some strategies involving derivatives may reduce the risk of loss, they may also reduce potential gains or, in some cases, result in losses by offsetting favorable price movements in portfolio holdings. Third, there is a risk that derivative contracts and hybrid instruments may...
be erroneously priced or improperly valued and, as a result, the Fund may need to make increased cash payments to the counterparty. Fourth, exposure to derivative contracts and hybrid instruments may have tax consequences to the Fund and its shareholders. For example, derivative contracts and hybrid instruments may cause the Fund to realize increased ordinary income or short-term capital gains (which are treated as ordinary income for Federal income tax purposes) and, as a result, may increase taxable distributions to shareholders. In addition, under certain circumstances certain derivative contracts and hybrid instruments may cause the Fund to: (a) incur an excise tax on a portion of the income related to those contracts and instruments; and/or (b) reclassify, as a return of capital, some or all of the distributions previously made to shareholders during the fiscal year as dividend income. Fifth, a common provision in OTC derivative contracts permits the counterparty to terminate any such contract between it and the Fund, if the value of the Fund’s total net assets declines below a specified level over a given time period. Factors that may contribute to such a decline (which usually must be substantial) include significant shareholder redemptions and/or a marked decrease in the market value of the Fund’s investments. Any such termination of the Fund’s OTC derivative contracts may adversely affect the Fund (for example, by increasing losses and/or costs, and/or preventing the Fund from fully implementing its investment strategies). Sixth, the Fund may use a derivative contract to benefit from a decline in the value of a Reference Instrument. If the value of the Reference Instrument declines during the term of the contract, the Fund makes a profit on the difference (less any payments the Fund is required to pay under the terms of the contract). Any such strategy involves risk. There is no assurance that the Reference Instrument will decline in value during the term of the contract and make a profit for the Fund. The Reference Instrument may instead appreciate in value creating a loss for the Fund. Seventh, a default or failure by a CCP or an FCM (also sometimes called a “futures broker”), or the failure of a contract to be transferred from an Executing Dealer to the FCM for clearing, may expose the Fund to losses, increase its costs, or prevent the Fund from entering or exiting derivative positions, accessing margin, or fully implementing its investment strategies. The central clearing of a derivative and trading of a contract over a SEF could reduce the liquidity in, or increase costs of entering into or holding, any contracts. Finally, derivative contracts and hybrid instruments may also involve other risks described in this Prospectus, such as interest rate, credit, currency, liquidity and leverage risks.

TECHNOLOGY RISK

The Adviser uses various technologies in managing the Fund, consistent with its investment objective(s) and strategy described in this Prospectus. For example, proprietary and third-party data and systems are utilized to support decision-making for the Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance.

What Do Shares Cost?

CALCULATION OF NET ASSET VALUE

When the Fund receives your transaction request in proper form (as described in this Prospectus under the sections entitled “How to Purchase Shares” and “How to Redeem and Exchange Shares”), it is processed at the next calculated net asset value of a Share (NAV) plus any applicable front-end sales charge ("public offering price"). A Share’s NAV is determined as of the end of regular trading on the New York Stock Exchange (NYSE) (normally 4:00 p.m. Eastern time), each day the NYSE is open. The Fund calculates the NAV of each class by valuing the assets allocated to the Share’s class, subtracting the liabilities allocated to each class and dividing the balance by the number of Shares of the class outstanding. The NAV for each class of Shares may differ due to the level of expenses allocated to each class as well as a result of the variance between the amount of accrued investment income and capital gains or losses allocated to each class and the amount actually distributed to shareholders of each class. The Fund’s current NAV and/or public offering price may be found at FederatedInvestors.com, via online news sources and in certain newspapers.

You can purchase, redeem or exchange Shares any day the NYSE is open.

When the Fund holds securities that trade principally in foreign markets on days the NYSE is closed, the value of the Fund’s assets may change on days you cannot purchase or redeem Shares. This may also occur when the U.S. markets for fixed-income securities are open on a day the NYSE is closed.

In calculating its NAV, the Fund generally values investments as follows:

- Equity securities listed on an exchange or traded through a regulated market system are valued at their last reported sale price or official closing price in their principal exchange or market.
- Fixed-income securities are fair valued using price evaluations provided by a pricing service approved by the Board of Trustees (“Board”).
- Derivative contracts listed on exchanges are valued at their reported settlement or closing price, except that options are valued at the mean of closing bid and asked quotations.
Over-the-counter (OTC) derivative contracts are fair valued using price evaluations provided by a pricing service approved by the Board.

If any price, quotation, price evaluation or other pricing source is not readily available when the NAV is calculated, if the Fund cannot obtain price evaluations from a pricing service or from more than one dealer for an investment within a reasonable period of time as set forth in the Fund’s valuation policies and procedures, or if information furnished by a pricing service, in the opinion of the Valuation Committee, is deemed not representative of the fair value of such security, the Fund uses the fair value of the investment determined in accordance with the procedures generally described below. There can be no assurance that the Fund could obtain the fair value assigned to an investment if it sold the investment at approximately the time at which the Fund determines its NAV per share.

Shares of other mutual funds are valued based upon their reported NAVs. The prospectuses for these mutual funds explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

FAIR VALUATION AND SIGNIFICANT EVENTS PROCEDURES

The Board has ultimate responsibility for determining the fair value of investments for which market quotations are not readily available. The Board has appointed a Valuation Committee comprised of officers of the Fund, the Adviser and certain of the Adviser’s affiliated companies to assist in determining fair value and in overseeing the calculation of the NAV. The Board has also authorized the use of pricing services recommended by the Valuation Committee to provide fair value evaluations of the current value of certain investments for purposes of calculating the NAV. In the event that market quotations and price evaluations are not available for an investment, the Valuation Committee determines the fair value of the investment in accordance with procedures adopted by the Board. The Board periodically reviews and approves the fair valuations made by the Valuation Committee and any changes made to the procedures. The Fund’s SAI discusses the methods used by pricing services and the Valuation Committee to assist the Board in valuing investments.

Using fair value to price investments may result in a value that is different from an investment’s most recent closing price and from the prices used by other mutual funds to calculate their NAVs. The application of the fair value procedures to an investment represent a good faith determination of such investment’s fair value. There can be no assurance that the Fund could obtain the fair value assigned to an investment if it sold the investment at approximately the time at which the Fund determines its NAV per share.

The Board also has adopted procedures requiring an investment to be priced at its fair value whenever the Adviser determines that a significant event affecting the value of the investment has occurred between the time as of which the price of the investment would otherwise be determined and the time as of which the NAV is computed. An event is considered significant if there is both an affirmative expectation that the investment’s value will change in response to the event and a reasonable basis for quantifying the resulting change in value.

Examples of significant events that may occur after the close of the principal market on which a security is traded, or after the time of a price evaluation provided by a pricing service or a dealer, include:

- With respect to securities traded principally in foreign markets, significant trends in U.S. equity markets or in the trading of foreign securities index futures contracts;
- Political or other developments affecting the economy or markets in which an issuer conducts its operations or its securities are traded; and
- Announcements concerning matters such as acquisitions, recapitalizations or litigation developments or a natural disaster affecting the issuer’s operations or regulatory changes or market developments affecting the issuer’s industry.

The Board has adopted procedures whereby the Valuation Committee uses a pricing service to provide factors to update the fair value of equity securities traded principally in foreign markets from the time of the close of their respective foreign stock exchanges to the pricing time of the Fund. For other significant events, the Fund may seek to obtain more current quotations or price evaluations from alternative pricing sources. If a reliable alternative pricing source is not available, the Valuation Committee will determine the fair value of the investment using another method approved by the Board. The Board has ultimate responsibility for any fair valuations made in response to a significant event.

The fair valuation of securities following a significant event can serve to reduce arbitrage opportunities for short-term traders to profit at the expense of long-term investors in the Fund. For example, such arbitrage opportunities may exist when the market on which portfolio securities are traded closes before the Fund calculates its NAV, which is typically the case with Asian and European markets. However, there is no assurance that these significant event procedures will prevent dilution of the NAV by short-term traders. See “Account and Share Information—Frequent Trading Policies” for other procedures the Fund employs to deter such short-term trading.
COMMISSIONS ON CERTAIN SHARES

The Fund does not charge any front-end load, deferred sales charge or other asset-based fee for sales or distribution of IS Shares. However, if you purchase IS Shares through a broker acting solely as an agent on behalf of its customers, you may be required to pay a commission to the broker in an amount determined and separately disclosed to you by the broker.

Because the Fund is not a party to any such commission arrangement between you and your broker, any purchases and redemptions of IS Shares will be made at the applicable net asset value (before imposition of the sales commission). Any such commissions charged by a broker are not reflected in the fees and expenses listed in the “Risk/Return Summary: Fees and Expenses” section of the Fund’s Prospectus and described above nor are they reflected in the “Performance: Bar Chart and Table,” because they are not charged by the Fund.

Shares of the Fund are available in other share classes that have different fees and expenses.

How is the Fund Sold?

The Fund has established the following Share classes: Class A Shares (A), Class C Shares (C), Institutional Shares (IS) and Class R6 Shares (R6), each representing interests in a single portfolio of securities. This prospectus relates to the IS class. All Share classes have different sales charges and/or other expenses which affect their performance. Please note that certain purchase restrictions may apply. Contact your financial intermediary or call 1-800-341-7400 for more information concerning the other classes.

Under the Distributor’s Contract with the Fund, the Distributor, Federated Securities Corp., offers Shares on a continuous, best-efforts basis. The Distributor is a subsidiary of Federated Investors, Inc. (“Federated”).

IS Class

The Fund’s Distributor markets the IS class to Eligible Investors, as described below. In connection with a request to purchase the IS class, you should provide documentation sufficient to verify your status as an Eligible Investor. As a general matter, the IS class is not available for direct investment by natural persons.

The following categories of Eligible Investors are not subject to any minimum initial investment amount for the purchase of the IS class (however, such accounts remain subject to the Fund’s policy on “Accounts with Low Balances” as discussed later in this Prospectus):

- An investor participating in a no-load platform, network or other fee-based program offered by a financial intermediary, for example, a wrap-account or retirement platform, where Federated has entered into an agreement with the intermediary;
- A trustee/director, employee or former employee of the Fund, the Adviser, the Distributor and their affiliates; an immediate family member of these individuals or a trust, pension or profit-sharing plan for these individuals;
- An employer-sponsored retirement plan;
- A trust institution investing on behalf of its trust customers;
- A Federated Fund;
- An investor (including a natural person) who acquired the IS class of a Federated fund pursuant to the terms of an agreement and plan of reorganization which permits the investor to acquire such shares; and
- In connection with an acquisition of an investment management or advisory business, or related investment services, products or assets, by Federated or its investment advisory subsidiaries, an investor (including a natural person) who: (1) becomes a client of an investment advisory subsidiary of Federated; or (2) is a shareholder or interest holder of a pooled investment vehicle or product that becomes advised or subadvised by a Federated investment advisory subsidiary as a result of such an acquisition other than as a result of a fund reorganization transaction pursuant to an agreement and plan of reorganization.

The following categories of Eligible Investors are subject to applicable minimum initial investment amounts for the purchase of the IS class (see “How to Purchase Shares” below):

- An investor, other than a natural person, purchasing the IS class directly from the Fund; and
- In connection with an initial purchase of the IS class through an exchange, an investor (including a natural person) who owned the IS class of another Federated fund as of December 31, 2008.

Intra-Fund Share Conversion Program

A shareholder in the Fund’s Shares may convert their Shares at net asset value to any other share class of the Fund if the shareholder meets the investment minimum and eligibility requirements for the share class into which the conversion is sought, as applicable. The share conversion program is not applicable to the Fund’s Class A Shares and Class C Shares subject to a contingent deferred sales charge, if applicable. For Class C Shares purchased through a financial intermediary after June 30, 2017, such shares may only be converted to another share class of the same Fund if: (i) the shares are no longer subject to a CDSC or the financial intermediary agrees to reimburse the Fund’s distributor the CDSC otherwise payable
upon the sale of such shares; (ii) the shareholder meets the investment minimum and eligibility requirements for the share class into which the conversion is sought, as applicable; and (iii) (a) the conversion is made to facilitate the shareholder’s participation in a self-directed brokerage (non-advice) account or a fee-based advisory program offered by the intermediary; or (b) the conversion is part of a multiple-client transaction through a particular financial intermediary as pre-approved by the Fund’s Administrator. Such conversion of classes should not result in a realization event for tax purposes. Contact your financial intermediary or call 1-800-341-7400 to convert your Shares.

As of the date of this Prospectus, Class A Shares, Class C Shares and Class R6 Shares of the Fund are not being offered.

Payments to Financial Intermediaries

The Fund and its affiliated service providers may pay fees as described below to financial intermediaries (such as broker-dealers, banks, investment advisers or third-party administrators) whose customers are shareholders of the Fund.

SERVICES FEES

The Fund may pay Service Fees of up to 0.25% of average net assets to financial intermediaries or to Federated Shareholder Services Company (FSSC), a subsidiary of Federated, for providing services to shareholders and maintaining shareholder accounts. Intermediaries that receive Service Fees may include a company affiliated with management of Federated. If a financial intermediary receives Service Fees on an account, it is not eligible to also receive Account Administration Fees on that same account.

The Fund has no present intention of paying, accruing or incurring any such Service Fees on the IS class until such time as approved by the Fund’s Board of Trustees.

ACCOUNT ADMINISTRATION FEES

The Fund may pay Account Administration Fees of up to 0.25% of average net assets to banks that are not registered as broker-dealers or investment advisers for providing administrative services to the Fund and its shareholders. If a financial intermediary receives Account Administration Fees on an account, it is not eligible to also receive Service Fees or Recordkeeping Fees on that same account.

The Fund has no present intention of paying, accruing or incurring any such Account Administration Fees on the IS class until such time as approved by the Fund’s Board of Trustees.

RECORDKEEPING FEES

The Fund may pay Recordkeeping Fees on an average-net-assets basis or on a per-account-per-year basis to financial intermediaries for providing recordkeeping services to the Fund and its shareholders. If a financial intermediary receives Recordkeeping Fees on an account, it is not eligible to also receive Account Administration Fees or Networking Fees on that same account.

The Fund may reimburse Networking Fees on a per-account-per-year basis to financial intermediaries for providing administrative services to the Fund and its shareholders on certain non-omnibus accounts. If a financial intermediary receives Networking Fees on an account, it is not eligible to also receive Recordkeeping Fees on that same account.

ADDITIONAL PAYMENTS TO FINANCIAL INTERMEDIARIES

The Distributor may pay out of its own resources amounts to certain financial intermediaries, including broker-dealers, banks, registered investment advisers, independent financial planners and retirement plan administrators, that support the sale of Shares or provide services to Fund shareholders. The amounts of these payments could be significant, and may create an incentive for the financial intermediary or its employees or associated persons to recommend or sell Shares of the Fund to you. Not all financial intermediaries receive such payments, and the amount of compensation may vary by intermediary. In some cases, such payments may be made by or funded from the resources of companies affiliated with the Distributor (including the Adviser). These payments are not reflected in the fees and expenses listed in the fee table section of the Fund’s Prospectus and described above because they are not paid by the Fund.

These payments are negotiated and may be based on such factors as: the number or value of Shares that the financial intermediary sells or may sell; the value of client assets invested; the level and types of services or support furnished by the financial intermediary; or the Fund’s and/or other Federated funds’ relationship with the financial intermediary. These payments may be in addition to payments, as described above, made by the Fund to the financial intermediary. In connection with these payments, the financial intermediary may elevate the prominence or profile of the Fund and/or other Federated funds, within the financial intermediary’s organization by, for example, placement on a list of preferred or recommended funds and/or granting the Distributor preferential or enhanced opportunities to promote the funds in various
ways within the financial intermediary’s organization. In addition, as discussed above in “Commissions on Certain Shares,” if you purchase IS Shares through a broker acting solely as an agent on behalf of its customers, you may be required to pay a commission to the broker in an amount determined and separately disclosed to you by the broker. You can ask your financial intermediary for information about any payments it receives from the Distributor or the Fund and any services provided, as well as about fees and/or commissions it charges.

How to Purchase Shares

You may purchase Shares of the Fund any day the NYSE is open. Shares will be purchased at the NAV next calculated after your investment is received by the Fund, or its agent, in proper form. The Fund reserves the right to reject any request to purchase or exchange Shares. New investors must submit a completed New Account Form. All accounts, including those for which there is no minimum initial investment amount required, are subject to the Fund’s policy on “Accounts with Low Balances” as discussed later in this Prospectus.

Where the Fund offers more than one Share class and you do not specify the class choice on your New Account Form or form of payment (e.g., Federal Reserve wire or check), you automatically will receive the A class.

For important account information, see the section “Security and Privacy Protection.”

Eligible investors may purchase Shares through a financial intermediary, directly from the Fund or through an exchange from another Federated fund in the manner described above under “How is the Fund Sold?”

Where applicable, the required minimum initial investment for IS class is generally $1,000,000. There is no minimum subsequent investment amount.

THROUGH A FINANCIAL INTERMEDIARY

Establish an account with the financial intermediary; and submit your purchase order to the financial intermediary before the end of regular trading on the NYSE (normally 4:00 p.m. Eastern time). The Fund has authorized certain intermediaries to accept Share purchase orders on its behalf. When authorized intermediaries receive an order in proper form, the order is considered as being placed with the Fund and Shares will be bought at the NAV next calculated after such an order is received by the authorized intermediary. If your financial intermediary is not an authorized intermediary, the Fund or its agent must receive the purchase order in proper form from your financial intermediary by the end of regular trading on the NYSE (normally 4:00 p.m. Eastern time) in order for your transaction to be priced at that day’s NAV. In addition, your financial intermediary must forward your payment by the prescribed trade settlement date (typically within one to three business days) to the Fund’s transfer agent, State Street Bank and Trust Company (“Transfer Agent”). You will become the owner of Shares and receive dividends when your payment is received in accordance with these time frames (provided that, if payment is received in the form of a check, the check clears). If your payment is not received in accordance with these time frames, or a check does not clear, your purchase will be canceled and you could be liable for any losses, fees or expenses incurred by the Fund or the Fund’s Transfer Agent.

Financial intermediaries should send payments according to the instructions in the sections “By Wire” or “By Check.” Financial intermediaries may impose higher or lower minimum investment requirements on their customers than those imposed by the Fund. Keep in mind that financial intermediaries may charge you fees for their services in connection with your Share transactions.

Shareholders are encouraged to ask their financial intermediary if they are an authorized agent for the Fund and about any fees that may be charged by the financial intermediary.

DIRECTLY FROM THE FUND

- Establish your account with the Fund by submitting a completed New Account Form; and
- Send your payment to the Fund by Federal Reserve wire or check.

You will become the owner of Shares and your Shares will be priced at the next calculated NAV after the Fund receives your wire or your check. If your check does not clear, your purchase will be canceled and you could be liable for any losses or fees incurred by the Fund or the Fund’s Transfer Agent.
By Wire
To facilitate processing your order, please call the Fund before sending the wire. Send your wire to:

State Street Bank and Trust Company
Boston, MA
Dollar Amount of Wire
ABA Number 011000028
BNF: 23026552
Attention: Federated EDGEWIRE
Wire Order Number, Dealer Number or Group Number
Nominee/Institution Name
Fund Name and Number and Account Number

You cannot purchase Shares by wire on holidays when wire transfers are restricted.

By Check
Make your check payable to The Federated Funds, note your account number on the check, and send it to:
The Federated Funds
P.O. Box 219318
Kansas City, MO 64121-9318

If you send your check by a private courier or overnight delivery service that requires a street address, send it to:
The Federated Funds
430 W 7th Street
Suite 219318
Kansas City, MO 64105-1407

Payment should be made in U.S. dollars and drawn on a U.S. bank. The Fund reserves the right to reject any purchase request. For example, to protect against check fraud the Fund may reject any purchase request involving a check that is not made payable to The Federated Funds (including, but not limited to, requests to purchase Shares using third-party checks) or involving temporary checks or credit card checks.

By Direct Deposit
You may establish Payroll Deduction/Direct Deposit arrangements for investments into the Fund by either calling a Client Service Representative at 1-800-341-7400; or by completing the Payroll Deduction/Direct Deposit Form, which is available on FederatedInvestors.com under “Resources” and then “Literature and Forms,” then “Forms.” You will receive a confirmation when this service is available.

THROUGH AN EXCHANGE
You may purchase Fund Shares through an exchange from another Federated fund. To do this you must:

■ meet any applicable shareholder eligibility requirements;
■ ensure that the account registrations are identical;
■ meet any applicable minimum initial investment requirements; and
■ receive a prospectus for the fund into which you wish to exchange.

An exchange is treated as a redemption and a subsequent purchase, and is a taxable transaction. The Fund reserves the right to reject any request to purchase or exchange Shares. The Fund may modify or terminate the exchange privilege at any time.

You may purchase Shares through an exchange from any Federated fund or share class that does not have a stated sales charge or contingent deferred sales charge, except Shares of Federated Institutional Money Market Management, Federated Institutional Tax-Free Cash Trust, Federated Institutional Prime Obligations Fund, Federated Institutional Prime Value Obligations Fund, Class A Shares of Federated Government Reserves Fund and Class R Shares of any Fund.

By Online Account Services
You may access your accounts online to purchase shares through Federated’s Shareholder Account Access system once you have registered for access. Online transactions may be subject to certain limitations including limitations as to the amount of the transaction. For more information about the services available through Shareholder Account Access, please visit www.FederatedInvestors.com and select “Sign In” and “Access and Manage Investments,” or call (800) 245-4770 to speak with a Client Service Representative.
BY SYSTEMATIC INVESTMENT PROGRAM (SIP)
Once you have opened an account, you may automatically purchase additional Shares on a regular basis by completing the SIP section of the New Account Form or by contacting the Fund or your financial intermediary. The minimum investment amount for SIPs is $50.

BY AUTOMATED CLEARING HOUSE (ACH)
Once you have opened an account, you may purchase additional Shares through a depository institution that is an ACH member. This purchase option can be established by completing the appropriate sections of the New Account Form.

How to Redeem and Exchange Shares
You should redeem or exchange Shares:
■ through a financial intermediary if you purchased Shares through a financial intermediary; or
■ directly from the Fund if you purchased Shares directly from the Fund.

Shares of the Fund may be redeemed for cash, or exchanged for shares of other Federated funds as described herein, on days on which the Fund computes its NAV. Redemption requests may be made by telephone or in writing.

Redemption proceeds normally are wired or mailed within one business day for each method of payment after receiving a timely request in proper form. Depending upon the method of payment, when shareholders receive redemption proceeds can differ. Payment may be delayed for up to seven days under certain circumstances (see “Limitations on Redemption Proceeds”).

For important account information, see the section “Security and Privacy Protection.”

THROUGH A FINANCIAL INTERMEDIARY
Submit your redemption or exchange request to your financial intermediary by the end of regular trading on the NYSE (normally 4:00 p.m. Eastern time). The redemption amount you will receive is based upon the next calculated NAV after the Fund receives the order from your financial intermediary.

DIRECTLY FROM THE FUND

By Telephone
You may redeem or exchange Shares by simply calling the Fund at 1-800-341-7400.

If you call before the end of regular trading on the NYSE (normally 4:00 p.m. Eastern time), you will receive a redemption amount based on that day’s NAV.

By Mail
You may redeem or exchange Shares by sending a written request to the Fund.

You will receive a redemption amount based on the next calculated NAV after the Fund receives your written request in proper form.

Send requests by mail to:
The Federated Funds
P.O. Box 219318
Kansas City, MO 64121-9318

Send requests by private courier or overnight delivery service to:
The Federated Funds
430 W 7th Street
Suite 219318
Kansas City, MO 64105-1407

All requests must include:
■ Fund name and Share class, account number and account registration;
■ amount to be redeemed or exchanged;
■ signatures of all shareholders exactly as registered; and
■ if exchanging, the Fund name and Share class, account number and account registration into which you are exchanging.

Call your financial intermediary or the Fund if you need special instructions.
Signature Guarantees

Signatures must be guaranteed by a financial institution which is a participant in a Medallion signature guarantee program if:

■ your redemption will be sent to an address other than the address of record;
■ your redemption will be sent to an address of record that was changed within the last 30 days;
■ a redemption is payable to someone other than the shareholder(s) of record; or
■ transferring into another fund with a different shareholder registration.

A Medallion signature guarantee is designed to protect your account from fraud. Obtain a Medallion signature guarantee from a bank or trust company, savings association, credit union or broker, dealer or securities exchange member. A notary public cannot provide a signature guarantee.

By Online Account Services

You may access your accounts online to redeem or exchange shares through Federated’s Shareholder Account Access system once you have registered for access. Online transactions may be subject to certain limitations including limitations as to the amount of the transaction. For more information about the services available through Shareholder Account Access, please visit www.FederatedInvestors.com and select “Sign In” and “Access and Manage Investments,” or call (800) 245-4770 to speak with a Client Service Representative.

PAYMENT METHODS FOR REDEMPTIONS

Your redemption proceeds will be mailed by check to your address of record. The following payment options are available if you complete the appropriate section of the New Account Form or an Account Service Options Form. These payment options require a signature guarantee if they were not established when the account was opened:

■ An electronic transfer to your account at a financial institution that is an ACH member; or
■ Wire payment to your account at a domestic commercial bank that is a Federal Reserve System member.

METHODS THE FUND MAY USE TO MEET REDEMPTION REQUESTS

The Fund intends to pay Share redemptions in cash. To ensure that the Fund has cash to meet Share redemptions on any day, the Fund typically expects to hold a cash or cash equivalent reserve or sell portfolio securities.

In unusual or stressed circumstances, the Fund may generate cash in the following ways:

■ Inter-fund Borrowing and Lending. The SEC has granted an exemption that permits the Fund and all other funds advised by subsidiaries of Federated Investors, Inc. (“Federated funds”) to lend and borrow money for certain temporary purposes directly to and from other Federated funds. Inter-fund borrowing and lending is permitted only: (a) to meet shareholder redemption requests; (b) to meet commitments arising from “failed” trades; and (c) for other temporary purposes. All inter-fund loans must be repaid in seven days or less.

■ Committed Line of Credit. The Fund’s Board has approved, at a future time deemed appropriate by Federated, the Fund’s participation with certain other Federated Funds, on a joint basis, in an up to $500,000,000 unsecured, 364-day, committed, revolving line of credit (LOC) agreement. The LOC was made available to finance temporarily the repurchase or redemption of shares of the funds, failed trades, payment of dividends, settlement of trades and for other short-term, temporary or emergency general business purposes. The Fund cannot borrow under the LOC if an inter-fund loan is outstanding. The Fund does not currently participate in the LOC.

■ Redemption in Kind. Although the Fund intends to pay Share redemptions in cash, it reserves the right to pay the redemption price in whole or in part by an “in-kind” distribution of the Fund’s portfolio securities. Because the Fund has elected to be governed by Rule 18f-1 under the 1940 Act, the Fund is obligated to pay Share redemptions to any one shareholder in cash only up to the lesser of $250,000 or 1% of the net assets represented by such Share class during any 90-day period. Redemptions in kind are made consistent with the procedures adopted by the Fund’s Board, which generally include distributions of a pro rata share of the Fund’s portfolio assets. Redemption in kind is not as liquid as a cash redemption. If redemption is made in kind, securities received may be subject to market risk and the shareholder could incur taxable gains and brokerage or other charges in converting the securities to cash.

LIMITATIONS ON REDEMPTION PROCEEDS

Redemption proceeds normally are wired or mailed within one business day after receiving a request in proper form. Payment may be delayed for up to seven days:

■ to allow your purchase to clear (as discussed below);
■ during periods of market volatility;
■ when a shareholder’s trade activity or amount adversely impacts the Fund’s ability to manage its assets; or
■ during any period when the Federal Reserve wire or applicable Federal Reserve banks are closed, other than customary weekend and holiday closings.
If you request a redemption of Shares recently purchased by check (including a cashier’s check or certified check), money order, bank draft or ACH, your redemption proceeds may not be made available for up to seven calendar days to allow the Fund to collect payment on the instrument used to purchase such Shares. If the purchase instrument does not clear, your purchase order will be canceled and you will be responsible for any losses incurred by the Fund as a result of your canceled order.

In addition, the right of redemption may be suspended, or the payment of proceeds may be delayed (including beyond seven days), during any period:

- when the NYSE is closed, other than customary weekend and holiday closings;
- when trading on the NYSE is restricted, as determined by the SEC;
- in which an emergency exists, as determined by the SEC, so that disposal of the Fund’s investments or determination of its NAV is not reasonably practicable; or
- as the SEC may by order permit for the protection of Fund shareholders.

You will not accrue interest or dividends on uncashed redemption checks from the Fund when checks are undeliverable and returned to the Fund.

**EXCHANGE PRIVILEGE**

You may exchange Shares of the Fund. To do this, you must:

- meet any applicable shareholder eligibility requirements;
- ensure that the account registrations are identical;
- meet any applicable minimum initial investment requirements; and
- receive a prospectus for the fund into which you wish to exchange.

An exchange is treated as a redemption and a subsequent purchase, and is a taxable transaction. The Fund reserves the right to reject any request to purchase or exchange Shares. The Fund may modify or terminate the exchange privilege at any time.

In addition, the Fund may terminate your exchange privilege if your exchange activity is found to be excessive under the Fund’s frequent trading policies. See “Account and Share Information – Frequent Trading Policies.”

You may exchange Shares of the Fund for shares of any Federated fund or share class that does not have a stated sales charge or contingent deferred sales charge, except Shares of Federated Institutional Money Market Management, Federated Institutional Tax-Free Cash Trust, Federated Institutional Prime Obligations Fund, Federated Institutional Prime Value Obligations Fund, Class A Shares of Federated Government Reserves Fund and Class R Shares of any Fund.

**SYSTEMATIC WITHDRAWAL/EXCHANGE PROGRAM**

You may automatically redeem or exchange Shares. The minimum amount for all new or revised systematic redemptions or exchanges of Shares is $50 per transaction per fund. Complete the appropriate section of the New Account Form or an Account Service Options Form or contact your financial intermediary or the Fund. Your account value must meet the minimum initial investment amount at the time the program is established. This program may reduce, and eventually deplete, your account. Payments should not be considered yield or income.

**ADDITIONAL CONDITIONS**

**Telephone Transactions**

The Fund will record your telephone instructions. If the Fund does not follow reasonable procedures, it may be liable for losses due to unauthorized or fraudulent telephone instructions.

**Share Certificates**

The Fund does not issue share certificates.

**Security and Privacy Protection**

**ONLINE ACCOUNT AND TELEPHONE ACCESS SECURITY**

Federated Investors, Inc. will not be responsible for losses that result from unauthorized transactions, unless Federated does not follow procedures designed to verify your identity. When initiating a transaction by telephone or online, shareholders should be aware that any person with access to your account and other personal information including PINs (Personal Identification Numbers) may be able to submit instructions by telephone or online. Shareholders are responsible for protecting their identity by using strong usernames and complex passwords which utilize combinations of mixed case letters, numbers and symbols, and change passwords and PINs frequently.
Using Federated’s Account Access website means you are consenting to sending and receiving personal financial information over the Internet, so you should be sure you are comfortable with the risks. You will be required to accept the terms of an online agreement and to establish and utilize a password in order to access online account services. The Transfer Agent has adopted security procedures to confirm that internet instructions are genuine. The Transfer Agent will also send you written confirmation of share transactions. The Transfer Agent, the Fund and any of its affiliates will not be liable for losses or expenses that occur from fraudulent Internet instructions reasonably believed to be genuine.

The Transfer Agent or the Fund will employ reasonable procedures to confirm that telephone transaction requests are genuine, which may include recording calls, asking the caller to provide certain personal identification information, sending you written confirmation, or requiring other confirmation security procedures. The Transfer Agent, the Fund and any of its affiliates will not be liable for relying on instructions submitted by telephone that the Fund reasonably believes to be genuine.

ANTI-MONEY LAUNDERING COMPLIANCE

To help the government fight the funding of terrorism and money laundering activities, federal law requires financial institutions to obtain, verify, and record information that identifies each new customer who opens a Fund account and to determine whether such person’s name appears on governmental lists of known or suspected terrorists or terrorist organizations. Pursuant to the requirements under the USA PATRIOT Act, the information obtained will be used for compliance with the USA PATRIOT Act or other applicable laws, regulations and rules in connection with money laundering, terrorism or other illicit activities.

Information required includes your name, residential or business address, date of birth (for an individual), and other information that identifies you, including your social security number, tax identification number or other identifying number. The Fund cannot waive these requirements. The Fund is required by law to reject your Account Application if the required information is not provided. If, after reasonable effort, the Fund is unable to verify your identity or that of any other person(s) authorized to act on your behalf, or believes it has identified potentially suspicious, fraudulent or criminal activity, the Fund reserves the right to close your account and redeem your shares at the next calculated NAV without your permission. Any applicable contingent deferred sales charge (CDSC) will be assessed upon redemption of your shares.

The Fund has a strict policy designed to protect the privacy of your personal information. A copy of Federated Investors’ privacy policy notice was given to you at the time you opened your account. The Fund sends a copy of the privacy notice to you annually. You may also obtain the privacy notice by calling the Fund, or through Federated Investors’ website.

Account and Share Information

CONFIRMATIONS AND ACCOUNT STATEMENTS

You will receive confirmation of purchases, redemptions and exchanges (except for systematic transactions). In addition, you will receive periodic statements reporting all account activity, including systematic transactions, dividends and capital gains paid.

DIVIDENDS AND CAPITAL GAINS

The Fund declares and pays any dividends monthly to shareholders. Dividends are paid to all shareholders invested in the Fund on the record date. The record date is the date on which a shareholder must officially own Shares in order to earn a dividend.

In addition, the Fund pays any capital gains at least annually and may make such special distributions of dividends and capital gains as may be necessary to meet applicable regulatory requirements. Your dividends and capital gains distributions will be automatically reinvested in additional Shares without a sales charge, unless you elect cash payments. Dividends may also be reinvested without sales charges in shares of any class of any other Federated fund of which you are already a shareholder.

If you purchase Shares just before the record date for a dividend or capital gain distribution, you will pay the full price for the Shares and then receive a portion of the price back in the form of a taxable distribution, whether or not you reinvest the distribution in Shares. Therefore, you should consider the tax implications of purchasing Shares shortly before the record date for a dividend or capital gain. Contact your financial intermediary or the Fund for information concerning when dividends and capital gains will be paid.

Under the federal securities laws, the Fund is required to provide a notice to shareholders regarding the source of distributions made by the Fund if such distributions are from sources other than ordinary investment income. In addition, important information regarding the Fund’s distributions, if applicable, is available via the link to the Fund and share class name at www.FederatedInvestors.com/FundInformation.
SMALL DISTRIBUTIONS AND UNCAshed CHECKS

Generally, dividend and/or capital gain distributions payable by check in an amount of less than $25 will be automatically reinvested in additional shares. This policy does not apply if you have elected to receive cash distributions that are directly deposited into your bank account via wire or ACH.

Additionally, if one or more dividend or capital gain distribution checks are returned as “undeliverable,” or remain uncashed for 180 days, all subsequent dividend and capital gain distributions will be reinvested in additional shares. No interest will accrue on amounts represented by uncashed distribution checks. For questions on whether reinvestment applies to your distributions, please contact a Client Service Representative at 1-800-341-7400.

Certain states, including the state of Texas, have laws that allow shareholders to designate a representative to receive abandoned or unclaimed property (“escheatment”) notifications by completing and submitting a designation form that generally can be found on the official state website. If a shareholder resides in an applicable state, and elects to designate a representative to receive escheatment notifications, escheatment notices generally will be delivered as required by such state laws, including, as applicable, to both the shareholder and the designated representative. A completed designation form may be mailed to the Fund (if Shares are held directly with the Fund) or to the shareholder’s financial intermediary (if Shares are not held directly with the Fund). Shareholders should refer to relevant state law for the shareholder’s specific rights and responsibilities under his or her state’s escheatment law(s), which can generally be found on a state’s official website.

ACCOUNTS WITH LOW BALANCES

Federated reserves the right to close accounts if redemptions or exchanges cause the account balance to fall below:

- $25,000 for the IS class.

Before an account is closed, you will be notified and allowed at least 30 days to purchase additional Shares to meet the minimum.

TAX INFORMATION

The Fund sends an IRS Form 1099 and an annual statement of your account activity to assist you in completing your federal, state and local tax returns. Fund distributions of dividends and capital gains are taxable to you whether paid in cash or reinvested in the Fund. Dividends are taxable at different rates depending on the source of dividend income. Distributions of net short-term capital gains are taxable to you as ordinary income. Distributions of net long-term capital gains are taxable to you as long-term capital gains regardless of how long you have owned your Shares.

Fund distributions are expected to be both dividends and capital gains. Redemptions and exchanges are taxable sales. Please consult your tax adviser regarding your federal, state and local tax liability.

FREQUENT TRADING POLICIES

Frequent or short-term trading into and out of the Fund can have adverse consequences for the Fund and shareholders who use the Fund as a long-term investment vehicle. Such trading in significant amounts can disrupt the Fund’s investment strategies (e.g., by requiring it to sell investments at inopportune times or maintain excessive short-term or cash positions to support redemptions), increase brokerage and administrative costs and affect the timing and amount of taxable gains distributed by the Fund. Investors engaged in such trading may also seek to profit by anticipating changes in the Fund’s NAV in advance of the time as of which NAV is calculated or through an overall strategy to buy and sell Shares in response to incremental changes in the Fund’s NAV.

The Fund’s Board has approved policies and procedures intended to discourage excessive frequent or short-term trading of the Fund’s Shares. The Fund’s fair valuation procedures are intended in part to discourage short-term trading strategies by reducing the potential for these strategies to succeed. See “What Do Shares Cost?” The Fund also monitors trading in Fund Shares in an effort to identify disruptive trading activity. The Fund monitors trades into and out of the Fund within a period of 30 days or less. The Fund may also monitor trades into and out of the Fund for potentially disruptive trading activity over periods longer than 30 days. The size of Share transactions subject to monitoring varies. Where it is determined that a shareholder has exceeded the detection amounts twice within a period of 12 months, the Fund will temporarily prohibit the shareholder from making further purchases or exchanges of Fund Shares. If the shareholder continues to exceed the detection amounts for specified periods the Fund will impose lengthier trading restrictions on the shareholder, up to and including permanently prohibiting the shareholder from making any further purchases or exchanges of Fund Shares. Whether or not the specific monitoring limits are exceeded, the Fund’s management or the Adviser may determine from the amount, frequency or pattern of purchases and redemptions or exchanges that a shareholder is engaged in excessive trading that is or could be detrimental to the Fund and other shareholders and may prohibit the shareholder from making further purchases or exchanges of Fund Shares. No matter how the Fund defines its limits on frequent trading of Fund Shares, other purchases and sales of Fund Shares may have adverse effects on the management of the Fund’s portfolio and its performance.
The Adviser manages the Fund's assets, including buying and selling portfolio securities. Federated Advisory Services Company (FASC), an affiliate of the Adviser, provides research, quantitative analysis, equity trading and transaction settlement and certain support services to the Adviser. The fee for these services is paid by the Adviser and not by the Fund. The address of the Adviser and FASC is Federated Investors Tower, 1001 Liberty Avenue, Pittsburgh, PA 15222-3779.

The Adviser has delegated daily management of some or all of the Fund assets to the Sub-Adviser, Hermes Investment Management Limited, who is paid by the Adviser and not by the Fund, based on the portion of securities the Sub-Adviser manages. The Sub-Adviser's address is Sixth Floor, 150 Cheapside, London EC2V 6ET, England.

PORTFOLIO HOLDINGS INFORMATION

Information concerning the Fund’s portfolio holdings is available via the link to the Fund and share class name at www.FederatedInvestors.com/FundInformation. A complete listing of the Fund’s portfolio holdings as of the end of each calendar quarter is posted on the website 30 days (or the next business day) after the end of the quarter and remains posted for six months thereafter. Summary portfolio composition information as of the close of each month is posted on the website 15 days (or the next business day) after month-end and remains posted until replaced by the information for the succeeding month. The summary portfolio composition information may include identification of the Fund's top 10 holdings, and percentage breakdown of the portfolio by geographical region and/or sector.

You may also access portfolio information as of the end of the Fund's fiscal quarters via the link to the Fund and share class name at www.FederatedInvestors.com. The Fund’s Annual and Semi-Annual Shareholder Reports contain complete listings of the Fund’s portfolio holdings as of the end of the Fund’s second and fourth fiscal quarters. Fiscal quarter information is made available on the website within 70 days after the end of the fiscal quarter. This information is also available in reports filed with the SEC at the SEC’s website at www.sec.gov.

Each fiscal quarter, the Fund will file with the SEC a complete schedule of its monthly portfolio holdings on “Form N-PORT.” The Fund's holdings as of the end of the third month of every fiscal quarter, as reported on Form N-PORT, will be publicly available on the SEC’s website at www.sec.gov within 60 days of the end of the fiscal quarter upon filing. You may also access this information via the link to the Fund and share class name at www.FederatedInvestors.com.

In addition, from time to time (for example, during periods of unusual market conditions), additional information regarding the Fund’s portfolio holdings and/or composition may be posted to Federated’s website. If and when such information is posted, its availability will be noted on, and the information will be accessible from, the home page of the website.

Who Manages the Fund?

The Board governs the Fund. The Board selects and oversees the Adviser, Federated Investment Management Company. The Adviser manages the Fund’s assets, including buying and selling portfolio securities. Federated Advisory Services Company (FASC), an affiliate of the Adviser, provides research, quantitative analysis, equity trading and transaction settlement and certain support services to the Adviser. The fee for these services is paid by the Adviser and not by the Fund.

The address of the Adviser and FASC is Federated Investors Tower, 1001 Liberty Avenue, Pittsburgh, PA 15222-3779.

The Adviser has delegated daily management of some or all of the Fund assets to the Sub-Adviser, Hermes Investment Management Limited, who is paid by the Adviser and not by the Fund, based on the portion of securities the Sub-Adviser manages. The Sub-Adviser’s address is Sixth Floor, 150 Cheapside, London EC2V 6ET, England.
The Fund has applied for and intends to rely upon an order from the Securities and Exchange Commission (SEC) that will permit the Adviser, subject to approval by the Board of Trustees, to appoint a subadviser or change the terms of a subadvisory agreement without obtaining shareholder approval. Once received, the Fund would be permitted to rely upon the SEC order to change subadvisers, or the fees paid to a subadviser, without the expense and delays associated with obtaining shareholder approval of the change. This order does not, however, permit the Adviser to increase the aggregate advisory fee rate of the Fund without the approval of the shareholders.

The Adviser and other subsidiaries of Federated advise approximately 102 equity, fixed-income and money market mutual funds as well as a variety of other pooled investment vehicles, private investment companies and customized separately managed accounts (including non-U.S./offshore funds) which totaled approximately $459.9 billion in assets as of December 31, 2018. Federated was established in 1955 and is one of the largest investment managers in the United States with nearly 1,900 employees. Federated provides investment products to approximately 9,500 investment professionals and institutions.

The Adviser advises approximately 76 fixed-income and money market mutual funds (including sub-advised funds) and private investment companies, which totaled approximately $264.8 billion in assets as of December 31, 2018.

The Sub-Adviser manages $42.6 billion (£33.4 billion) across a broad range of specialist, high-conviction investment strategies spanning listed equities, credit, real-estate, infrastructure, private debt and private equity, serving more than 630 clients through wholesale and institutional markets. All asset information is reported as of December 31, 2018 and converted using December 31, 2018 exchange rates.

PORTFOLIO MANAGEMENT INFORMATION

Mitch Reznick

Mitch Reznick, CFA, Head of Research and Sustainable Fixed Income and Co-Portfolio Manager, has been the Fund’s portfolio manager since inception in September 2019.

He joined Hermes in 2010 as Head of Research on the Hermes Credit team. He earned a Master’s degree in International Affairs at Columbia University in New York City and a Bachelor’s degree in History at Pitzer College.

Investment Experience: 22 Years.

Fraser Lundie

Fraser Lundie, CFA, Head of Credit and Co-Portfolio Manager, has been the Fund’s portfolio manager since inception in September 2019.

He joined Hermes in 2010 as Head of Credit and lead manager on the Hermes range of credit strategies. Fraser earned a MA (Hons) in Economics from the University of Aberdeen and a MSc in Investment Analysis from the University of Stirling.

Investment Experience: 15 years.

The Fund’s SAI provides additional information about the Portfolio Managers’ compensation, management of other accounts and ownership of securities in the Fund.

ADVISORY FEES

The Fund’s investment advisory contract provides for payment to the Adviser of an annual investment advisory fee of 0.60% of the Fund’s average daily net assets. The Adviser may voluntarily waive a portion of its fee or reimburse the Fund for certain operating expenses. The Adviser and its affiliates have also agreed to certain “Fee Limits” as described in the footnote to the “Risk/Return Summary: Fees and Expenses” table found in the “Fund Summary” section of the Prospectus.

The Fund’s shareholder reports will contain information regarding the basis for the Board’s approval of the Fund’s Advisory and Sub-Advisory Agreements. The Fund’s semi-annual reports for the six-month periods ended each February 28 and the annual reports for the fiscal years ending each August 31 discuss the Board’s annual evaluation and approval of those agreements, which typically occurs annually in May.

Financial Information

FINANCIAL HIGHLIGHTS

The Fund’s fiscal year end is August 31. As the Fund’s first fiscal year will end August 31, 2020, the Fund’s audited financial information is not yet available as of the date of this Prospectus.
Appendix A: Hypothetical Investment and Expense Information

The following chart provides additional hypothetical information about the effect of the Fund’s expenses, including investment advisory fees and other Fund costs, on the Fund’s assumed returns over a 10-year period. The chart shows the estimated expenses that would be incurred in respect of a hypothetical investment of $10,000, assuming a 5% return each year, and no redemption of Shares. The chart also assumes that the Fund’s annual expense ratio stays the same throughout the 10-year period and that all dividends and distributions are reinvested. The annual expense ratio used in the chart is the same as stated in the “Fees and Expenses” table of this Prospectus (and thus may not reflect any fee waiver or expense reimbursement currently in effect). The maximum amount of any sales charge that might be imposed on the purchase of Shares (and deducted from the hypothetical initial investment of $10,000; the “Front-End Sales Charge”) is reflected in the “Hypothetical Expenses” column. The hypothetical investment information does not reflect the effect of charges (if any) normally applicable to redemptions of Shares (e.g., deferred sales charges, redemption fees). Mutual fund returns, as well as fees and expenses, may fluctuate over time, and your actual investment returns and total expenses may be higher or lower than those shown below.

FEDERATED HERMES SDG ENGAGEMENT HIGH YIELD CREDIT FUND - IS CLASS
