SUPPLEMENT TO CURRENT SUMMARY PROSPECTUS AND PROSPECTUS

Federated Short-Intermediate Duration Municipal Trust (FSIDMT) has entered into an Agreement and Plan of Reorganization (the “Agreement”) providing for: (i) the transfer of all or substantially all of the assets of PNC Tax Exempt Limited Maturity Bond Fund (PTXLM), which offers Class A Shares and Class I Shares (the “PTXLM Shares”), in exchange solely for Service Shares and Institutional Shares, respectively, of FSIDMT; (ii) the distribution of Service Shares and Institutional Shares of FSIDMT to the holders of the outstanding PTXLM Shares; and (iii) the liquidation and termination of PTXLM upon the terms and conditions set forth in the Agreement (the “Reorganization”).

The above-described Reorganization was approved by PTXLM shareholders at a special meeting of shareholders held on November 5, 2019, and the Reorganization became effective at 4:00 p.m. Eastern time on November 15, 2019. Accordingly, the “Termination Date” of the voluntary waiver and/or reimbursement of expenses applicable to Service Shares and Institutional Shares described in the footnote to the table in the section entitled “**Risk/Return Summary: Fees and Expenses**” shall be changed to the later of: (a) December 1, 2020; or (b) the date of the next effective Prospectus of FSIDMT.

SUPPLEMENT TO SUMMARY PROSPECTUS DATED AUGUST 31, 2019

On November 14, 2019, the Board of Trustees of Federated Short-Intermediate Duration Municipal Trust (the “Fund”) approved the following changes to the Fund’s Class A Shares and Service Shares: adjustment to the Class A Shares’ sales load and breakpoint discount schedule so that the current 1.00% sales charge is applied only to Class A Share purchases of less than \$100,000; reduction of the Class A Shares distribution (Rule 12b-1) fee from an active 0.25% fee to a dormant 0.05% fee; and elimination of the Service Shares’ distribution (Rule 12b-1) fee. These changes will be effective December 1, 2019.

Accordingly, please delete the fee table and example under “**Risk/Return Summary: Fees and Expenses**” and replace them with the following:

This table describes the fees and expenses that you may pay if you buy and hold Class A Shares (A), Institutional Shares (IS) or Service Shares (SS) of the Fund. You may qualify for certain sales charge discounts if you and your family invest, or agree to invest in the future, at least \$100,000 in certain classes (e.g., A class) of Federated funds. More information about these and other discounts is available from your financial professional, in the “What Do Shares Cost?” section of the Prospectus on page 17 and in “Appendix B” to this Prospectus. If you purchase the Fund’s IS Shares through a broker acting as an agent on behalf of its customers, you may be required to pay a commission to such broker; such commissions, if any, are not reflected in the Example below.

- 1 The Distribution (12b-1) Fee, Total Annual Fund Operating Expenses, Fee Waivers and/or Expense Reimbursements and Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements have been restated to reflect current fees due to a reduction in and elimination of the stated Distribution (12b-1) Fee for the Fund's Class A Shares and Service Shares, respectively.
- 2 The Fund has adopted a Distribution (12b-1) Plan for its Class A Shares pursuant to which the A class of the Fund may incur or charge a Distribution (12b-1) Fee of up to a maximum amount of 0.05%. No such fee is currently incurred or charged by the A class of the Fund. The A class of the Fund will not incur or charge such a Distribution (12b-1) Fee until such time as approved by the Board of Trustees (the "Trustees").
- 3 Under the investment advisory contract, the Adviser is required to reimburse/waive the amount, limited to the amount of the management fee, by which the Fund's aggregate annual operating expenses, including the management fee, but excluding interest, taxes, brokerage commissions, expenses of registering and qualifying the Fund and its shares under federal and state laws, expenses of withholding taxes and extraordinary expenses exceed (after voluntary waivers and reimbursements) 0.45% of the Fund's IS class average daily net assets. Acquired fund fees and expenses are not direct obligations of the Fund and are not contractual reimbursements under the investment advisory contract. In addition, the Adviser and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Effective December 1, 2019, the total annual fund operating expenses (excluding acquired fund fees and expenses, interest expense, extraordinary expenses and proxy-related expenses paid by the Fund, if any) paid by the Fund's A, IS and SS classes (after the voluntary waivers and/or reimbursements) will not exceed 0.71%, 0.47% and 0.71% (the "Fee Limit"), respectively, up to but not including the later of (the "Termination Date"): (a) September 1, 2020; or (b) the date of the Fund's next effective Prospectus. While the Adviser and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Trustees.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example assumes that your investment has a 5% return each year and that operating expenses for the A and SS classes are as shown in the table above and remain the same. The Example also assumes that your investment has a 5% return each year and that operating expenses for the IS class are based on the contractual expense limitation as shown in the table above and remain the same. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years
A	\$182	\$356	\$545	\$1,092
IS	\$ 47	\$148	\$258	\$ 579
SS	\$ 83	\$259	\$450	\$1,002

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example assumes that your investment has a 5% return each year and that operating expenses for the A and SS classes are as shown in the table above and remain the same. The Example also assumes that your investment has a 5% return each year and that operating expenses for the IS class are based on the contractual expense limitation as shown in the table above and remain the same. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years

SS	\$108	\$337	\$585	\$1,294

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 39% of the average value of its portfolio.

RISK/RETURN SUMMARY: INVESTMENTS, RISKS AND PERFORMANCE

What are the Fund's Main Investment Strategies?

The Fund pursues its objective by investing its assets so that normally distributions of annual interest income are exempt from federal regular income tax. Effective September 30, 2019, the Fund can invest without limitation in securities whose interest may be subject to (or may be a specific preference item for purposes of) the AMT. During the period prior to September 30, 2019, the Fund's investment adviser ("Adviser") normally will invest the Fund's assets entirely in securities whose interest is not subject to (nor a specific preference item for purposes of) the federal alternative minimum tax (AMT) for individuals, such that, normally, distributions of annual interest income also are exempt from the AMT. However, in certain circumstances (such as, for example, when there is a lack of supply of non-AMT securities or there are advantageous market

conditions), to pursue the Fund's investment objective, the Adviser may invest the Fund's assets in securities that may be subject to AMT. In such circumstances, interest from the Fund's investments may be subject to (or may be a specific preference item for purposes of) the AMT.

The Fund does not limit itself to securities of a particular maturity range. The Fund's dollar-weighted average portfolio duration will be less than five years. "Duration" measures the sensitivity of a security's price to changes in interest rates. The Adviser may lengthen or shorten duration from time to time based on its interest rate outlook.

The Fund will invest at least a majority of its assets in securities rated investment-grade (or unrated securities of comparable quality), and may purchase securities rated below investment-grade (or unrated securities of comparable quality), which are also known as junk bonds, up to 49% of its assets. Investment-grade securities are securities that receive investment-grade ratings (i.e., generally ratings in the first, second, third or fourth highest rating category) by a nationally recognized statistical rating organization (NRSRO) or unrated securities of comparable quality. For example, securities rated AAA, AA, A or BBB (including modifiers, sub-categories or gradations) by Standard & Poor's, an NRSRO, would be rated in the first, second, third or fourth ratings category, respectively. Securities rated below investment grade (or noninvestment-grade securities) are securities that do not receive investment-grade ratings (i.e., generally ratings below one of the four highest rating categories) by an NRSRO or unrated securities of comparable quality. For example, securities rated B or BB (including modifiers, sub-categories or gradations) by Standard & Poor's, an NRSRO, would be noninvestment-grade securities. The presence of a ratings modifier, sub-category, or gradation (for example, a (+) or (-)) is intended to show relative standing within the major rating categories and does not affect the security credit rating for purposes of the Fund's investment parameters. The Fund does not have a specific minimum quality rating.

The securities in which the Fund may principally invest include tax-exempt securities, which may include, for example, general obligation bonds, special revenue bonds, private activity bonds, inverse floaters, municipal mortgage-backed securities, variable rate demand instruments and municipal notes. Certain of the tax-exempt securities in which the Fund invests may be subject to credit enhancement. The Fund also may principally invest in derivative contracts (such as, for example, futures contracts, option contracts and swap contracts) and hybrid instruments to implement its investment strategies. For example, the Fund may use derivative contracts or hybrid instruments to increase or decrease the portfolio's exposure to the investment(s) underlying the derivative or hybrid instrument in an attempt to benefit from changes in the value of the underlying instrument(s), to gain exposure to the municipal bond sector, to increase or decrease the effective duration of the Fund's portfolio or to hedge against potential losses. There can be no assurance that the Fund's use of derivative contracts or hybrid instruments will work as intended. Derivative investments made by the Fund are included within the Fund's 80% policy (as described below) and are calculated at market value.

The Fund also may invest in certain securities or other investments as described herein (such as, market discount bonds, credit default swaps and other derivative transactions) that will likely cause the Fund to realize a limited amount of ordinary income or short-term capital gains (which are treated as ordinary income for federal income tax purposes).

Under normal circumstances, the Fund will invest its assets so that at least 80% of the income that it distributes will be exempt from federal regular income tax. This policy may not be changed without shareholder approval.

What are the Main (or Principal) Risks of Investing in the Fund?

All mutual funds take investment risks. Therefore, it is possible to lose money by investing in the Fund. The primary factors that may reduce the Fund's returns include:

- **Tax-Exempt Securities Risk.** The amount of public information available about tax-exempt securities is generally less than for corporate equities or bonds. The secondary market for tax-exempt securities also tends to be less well-developed and less liquid than many other securities markets, which may limit the Fund's ability to sell its tax-exempt securities at attractive prices. Special factors, such as legislative changes, and state and local economic and business developments, may adversely affect the yield and/or value of the Fund's investments in tax-exempt securities. Tax-exempt issuers can and have defaulted on obligations, been downgraded or commenced insolvency proceedings. Like other issuers and securities, the likelihood that the credit risk associated with such issuers and such securities will increase is greater during times of economic stress and financial instability.
- **Interest Rate Risk.** Prices of fixed-income securities (including tax-exempt securities) generally fall when interest rates rise. The longer the duration of a fixed-income security, the more susceptible it is to interest rate risk. Recent and potential future changes in monetary policy made by central banks and/or their governments are likely to affect the level of interest rates.
- **Issuer Credit Risk.** It is possible that interest or principal on securities will not be paid when due. Noninvestment-grade securities generally have a higher default risk than investment-grade securities. Such non-payment or default may reduce the value of the Fund's portfolio holdings, its share price and its performance.
- **Counterparty Credit Risk.** A party to a transaction involving the Fund may fail to meet its obligations. This could cause the Fund to lose money or to lose the benefit of the transaction or prevent the Fund from selling or buying other securities to implement its investment strategies.
- **Liquidity Risk.** Certain securities in which the Fund invests may be less readily marketable and may be subject to greater fluctuation in price than other securities. These features may make it more difficult to sell or buy a security at a favorable price or time. Noninvestment-grade securities generally have less liquidity than investment-grade securities. Liquidity risk also refers to the possibility that the Fund may not be able to sell a security or close out a derivative contract when it wants to. Over-the-counter derivative contracts generally carry greater liquidity risk than exchange-traded contracts.

- **Tax Risk.** In order to be tax-exempt, tax-exempt securities must meet certain legal requirements. Failure to meet such requirements may cause the interest received and distributed by the Fund to shareholders to be taxable. The federal income tax treatment of payments in respect of certain derivative contracts is unclear. The Fund also may invest in market discount bonds, enter into credit default swap arrangements and other derivative transactions, and engage in other permissible activities that will likely cause the Fund to realize a limited amount of ordinary income or short-term capital gains (which are treated as ordinary income for federal income tax purposes). Consequently, for each of these reasons, the Fund may receive payments, and make distributions, that are treated as ordinary income for federal income tax purposes. Income from the Fund also may be subject to AMT.
- **Leverage Risk.** Leverage risk is created when an investment, which includes, for example, a derivative contract, exposes the Fund to a level of risk that exceeds the amount invested. Changes in the value of such an investment magnify the Fund's risk of loss and potential for gain. Investments can have these same results if their returns are based on a multiple of a specified index, security or other benchmark.
- **Call Risk.** The Fund's performance may be adversely affected by the possibility that an issuer of a security held by the Fund may redeem the security prior to maturity at a price below or above its current market value.
- **Sector Risk.** A substantial part of the Fund's portfolio may be comprised of securities issued or credit enhanced by companies in similar businesses, or with other similar characteristics. As a result, the Fund will be more susceptible to any economic, business, political or other developments which generally affect these issuers or entities.
- **Prepayment and Extension Risk.** When homeowners prepay their mortgages in response to lower interest rates, the Fund will be required to reinvest the proceeds at the lower interest rates available. Also, when interest rates fall, the price of municipal mortgage-backed securities may not rise to as great an extent as that of other fixed-income securities. When interest rates rise, homeowners are less likely to prepay their mortgages. A decreased rate of prepayments lengthens the expected maturity of a mortgage-backed security, and the price of mortgage-backed securities may decrease more than the price of other fixed income securities when interest rates rise.
- **Credit Enhancement Risk.** The securities in which the Fund invests may be subject to credit enhancement (for example, guarantees, letters of credit or bond insurance). If the credit quality of the credit enhancement provider (for example, a bank or bond insurer) is downgraded, the rating on a security credit enhanced by such credit enhancement provider also may be downgraded. Having multiple securities credit enhanced by the same enhancement provider will increase the adverse effects on the Fund that are likely to result from a downgrading of, or a default by, such an enhancement provider. Adverse developments in the banking or bond insurance industries also may negatively affect the Fund.

- **Risk Associated with Noninvestment-Grade Securities.** Securities rated below investment-grade may be subject to greater interest rate, credit and liquidity risks than investment-grade securities. These securities are considered speculative with respect to the issuer's ability to pay interest and repay principal.
- **Risk Related to the Economy.** The value of the Fund's portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets. Economic, political and financial conditions, or industry or economic trends and developments, may, from time to time, and for varying periods of time, cause the Fund to experience volatility, illiquidity, shareholder redemptions or other potentially adverse effects. Among other investments, lower-grade bonds may be particularly sensitive to changes in the economy.
- **Risk of Investing in Derivative Contracts and Hybrid Instruments.** Derivative contracts and hybrid instruments involve risks different from, or possibly greater than, risks associated with investing directly in securities and other traditional investments. Specific risk issues related to the use of such contracts and instruments include valuation and tax issues, increased potential for losses and/or costs to the Fund, and a potential reduction in gains to the Fund. Each of these issues is described in greater detail in this Prospectus. Derivative contracts and hybrid instruments may also involve other risks described in this Prospectus, such as interest rate, credit, liquidity and leverage risks.
- **Technology Risk.** The Adviser uses various technologies in managing the Fund, consistent with its investment objective(s) and strategy described in this Prospectus. For example, proprietary and third-party data and systems are utilized to support decision making for the Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance.

The Shares offered by this Prospectus are not deposits or obligations of any bank, are not endorsed or guaranteed by any bank and are not insured or guaranteed by the U.S. government, the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

PERFORMANCE: BAR CHART AND TABLE

Risk/Return Bar Chart

The bar chart and performance table below reflect historical performance data for the Fund and are intended to help you analyze the Fund's investment risks in light of its historical returns. The bar chart shows the variability of the Fund's IS class total returns on a calendar year-by-year basis. The Average Annual Total Return Table shows returns for each class *averaged* over the stated periods, and includes comparative performance information. *The Fund's performance will fluctuate, and past performance (before and after taxes) is not necessarily an indication of future results.* Updated performance information for the Fund is available under the "Products" section at FederatedInvestors.com or by calling 1-800-341-7400.

The Fund's IS class total return for the six-month period from January 1, 2019 to June 30, 2019, was 2.16%.

Within the periods shown in the bar chart, the Fund's IS class highest quarterly return was 2.21% (quarter ended September 30, 2009). Its lowest quarterly return was (1.06)% (quarter ended June 30, 2013).

The IS class total returns, rather than the A or SS class total returns, were shown in the bar chart above and table below because in this combined Prospectus the IS class is the oldest class of Fund shares.

Average Annual Total Return Table

In addition to Return Before Taxes, Return After Taxes is shown for the Fund's IS class to illustrate the effect of federal taxes on Fund returns. After-tax returns are shown only for the IS class and after-tax returns for the A or SS classes will differ from those shown for the IS class. *Actual after-tax returns depend on each investor's personal tax situation, and are likely to differ from those shown.* After-tax returns are calculated using a standard set of assumptions. The stated returns assume the highest historical **federal** income and capital gains tax rates. These after-tax returns do not reflect the effect of any applicable **state** and **local** taxes. After-tax returns are not relevant to investors holding shares through tax-deferred programs, such as a 401(k) Plan, an Individual Retirement Account (IRA) or other tax-advantaged investment plan.

- The S&P Municipal Bond Short Intermediate Index consists of bonds in the S&P Municipal Bond Index with a minimum maturity of one year and a maximum maturity of eight years. The S&P Municipal Bond Index is designed to track fixed-rate tax-free bonds and bonds subject to the alternative minimum tax (AMT). The S&P Municipal Bond Index includes bonds of all quality – from “AAA” to non-rated, including defaulted bonds – and from all sectors of the municipal bond market.*
- The S&P Municipal Bond Short Index consists of bonds in the S&P Municipal Bond Index with a minimum maturity of 6 months and a maximum maturity of 4 years. The Fund’s Adviser has elected to change the benchmark from the S&P Municipal Bond Short Intermediate Index to the S&P Municipal Bond Short Index to more closely align with the Fund’s investment strategy.*
- The S&P Municipal Bond 0-7 Years Investment Grade Non-AMT 5% Pre-Refunded Index represents the portion of the S&P Municipal Bond Investment Grade Index composed solely of investment-grade bonds (those with ratings higher than “BBB-”/“Baa3”) with remaining maturities of between zero and seven years that are not subject to the AMT, 5% of which are pre-refunded.*
- The S&P Municipal Bond 1-5 Years Investment Grade 5% Pre-Refunded Index represents the portion of the S&P Municipal Bond Investment Grade Index composed solely of investment-grade bonds (those with ratings higher than “BBB-”/“Baa3”) with remaining maturities of between one and five years, 5% of which are pre-refunded.*
- The S&P 1-5 Year National AMT-Free Municipal Bond Index is a broad, comprehensive, market value-weighted index designed to measure the performance of the investment-grade tax-exempt U.S. municipal bond market with an effective maturity of 1 to 5 years. Bonds issued by U.S. territories, including Puerto Rico, are excluded from this index. This index does not yet have 10 years of published performance information.*
- Lipper figures represent the average of the total returns reported by all the mutual funds designated by Lipper, Inc. as falling into their respective categories indicated.*

TAX INFORMATION

It is anticipated that Fund distributions will be primarily dividends that are exempt from federal regular income tax, although a portion of the Fund's dividends may not be tax-exempt. Dividends may be subject to state and local taxes. Although the Fund does not seek to realize capital gains, the Fund may realize and distribute capital gains from time to time as a result of the Fund's normal investment activities. Any Fund distributions of capital gains are taxable at applicable capital gains rates. The Fund is generally not a suitable investment for retirement accounts.

The Fund pursues its objective by investing its assets so that, normally, distributions of annual interest income are exempt from federal regular income tax (except as described in this Prospectus). Interest from the Fund's investments may be subject to (or may be a specific preference item for purposes of) federal AMT for individuals. Effective September 30, 2019, the Fund can invest without limitation in securities whose interest may be subject to (or may be a specific preference item for purposes of) the AMT.

**PAYMENTS TO BROKER-DEALERS AND OTHER
FINANCIAL INTERMEDIARIES**

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and/or its related companies may pay the intermediary for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
